Admiral Sperry and Officers Officially Received by Prime Min-Ister Sir J. G. Ward.

10

NEW ZEALAND

### ENTHUSIASM WAS UNBOUNDED

#### Beautiful Illuminated Address Presented to American Commander-in-Chief.

Auckland, N. Z., Monday, Aug. 10 .-Cloudy weather greated the landing today of Admiral Sperry, commander-inchief of the United States Atlantic flect and his officers to receive official welcome at the hands of Prime Minister Sir Joseph George Ward on behalf of the government. The landing was made at the newly erected quay at the feat of Queen street, the city's principal theroughfare, at the shore endof which an elaborately decorated stand had been crected for the recep-

Grouped about the prime minister were the members of the cabinet and representatives of various town, borcugh and county districts of the dominton

Immense crowds thronged the streets and the verandas and roofs of houses adjacent were moving masses of humanity.

It was a great reception and unbounded enthusiasm prevailed. In his address Sir Joseph eulogized President Reoscoeit as representing the best tra-ditions of the common blood of civiliza-tion. He then presented to Admiral Sterry for President Roosevelt a de-cerated gold and silver album, suitably Insertbed, as a souvenir of the visit of the American fleet to New Zealand. To Admiral Sperry was given a beautifully filuminated address of welcome, en-clessed in a handsome casket of wood, with an inlaid cover having a design emblematic of New Zealand. The American commander-in-chief, in reflying to the prime minister, said no greeting would appeal more strongly address Sir Joseph eulogized President

retiving to the prime infiniter, said no greeting would appeal more strongly to President Roosevelt than that com-ing from a people small in number but great in achievements. He described Auckland harbor as magnificent and safe, as exceeding any harbor in, the Pacific, except that of Sydney and Ma-rila. Every facility the naval commande: might desire was to be had Fere.

Pure. In bis address of welcome on behalf of the citizens of New Zealand, Lord Physical and President Roosevelt were hone ed not because of their positions, but for the noble work they had done and were doing for their countries, and for humanity.

The anoged Russian spy, is to the difference that on July 22. Ishiyama had an inter-view with Mr. Suzuki Interpreter of the Russian ambassy in Tokio and told the latter that he would like to sell to the orbass: a number of sketches represent-ing the inside of the Japanese naval stations at a cost of 5,00,000 yen, asking lis service as an interpreter for the purpose. Furthermore, he promised the Interpreter to give one-fourth of that sum as commission. Instead of com-municating the matter to the Russian endosses, interpreter Suzuki at once re-ported the extraordinary case to the To-kio gendarmerie headquarters with the result that the alleged traitor was sub-sequently arrested at the Yumei-Kan hotel, Tsukili, as already mentioned. The sy is now detained in Tokio pris-on, pending trial. It is stated that they measure three by three feet ench. The authorities are now conducting a search for accomplices. for humanity. Admiral Sperry in reply dwell upon the great work in the furtherance of the peace of the word that is being done by Great Britain and America, and on the common interests of the two countries in the Pacific, which as declared were growing in magnitude daily. He said the meeting of the British and American fleets at Auck-land made for the maintena, s of the principles of the Hagto beace confer-ence and Anglo-Saxor interest. After the ceremories of welcoming by the government, a procession was

by the government, a procession was formed, the route being through Queea street to Drill'iall, where Arthur My-ters, the mayor, accorded Rear Admiral

ters, the mayor, accorded thear Admiral Sperry a civic welcome. In an interview today Rear Admiral Sperry said the cruise of the fleet from an Francisco had effected a great im-

# HIGH INFANT MORTALITY.

#### Chicago Health Authorities Attribute It to Improper Feeding.

Chicago, Aug. 10 .- To the overfeeding of hables and the feeding them on improper foods, such as beer, pickles and sausages, the health dethem partment attributes the excessively high infant mortality in Chicago in the past six weeks. In its weekly bulletin, issued yes-

baseball game be played before the fleet reaches China and that the semi-final and final games be played here. Two tropbles valued at \$2,000 each will be presented to the winning football and baseball teams. In its weekly buildin, issued yes-terday, the department calls attention to the fact that 438 deaths from diar-rheal diseases among children under two years of age were reported in July, and that nearly 209 deaths from the same causes had occurred in the past eight days, indicating that the August infant mortality rate will be much blefter

FOR HOME RECEPTION. Washington, Aug. 9.—Tentative plans have already been made by the mayy department for the reception of the Atlantic battleship fleet at the conclu-sion of its world-encircling tup. It is expected if all goes well that the fleet will arrive in United States waters on the 22nd of next February. The litinerary of the fleet has been prepared very carefully, and thus far it has been followed with clocklike precision. The Atlantic fleet now at Auckland, well on its way to Manila, has not lost a day. It steamed in regular, forma-Mugust minim mortainty rate win be much higher. "More than 80 per cent of these deaths," says the bulletin, "occurred in the congested residence areas of the city—the poor quarters—and by far

families. "Most of these deaths were abso lutely avoidable. The great majority are attributed to lack of proper care."

### SKIN GRAFTING.

Remarkable Series of Operations

Comes to End in New York.

naval suthorities that the hard part of the journey around the worid hus been completed. The battleships have proved their efficiency, and the personnel of the fleet, from Admiral Evans and Admiral Sperry down to the junior apprentice boy, has demonstrated its capacity. It has not been determined yet whether the fleet, on its arrival in American waters, will go to New York bay or to Hampton Roads, but it is likely that it will rendezyous at Hampton Roads, whence it started on its historic jour-ney. New York, Aug. 10 .- Believed by the physicians to have been the subject of physiciens to have been the subject of one of the most remarkable series of skin grafting operations that have been performed in Brooklyn in several years. Miss catherine German, 23 years old, has probably undergone the last of the operations which have saved her life. She was injured while at work in a Williamsburg store last May, when her hair became entangled in the machinery of a money carrying device and almost all the hair on the top of her head was torn off, carrying the scalp with it. She was rushed to the hespital, where the physicians quickly saw that skin graft-ing would be necessary. Six weeks as? the first operation was performed. Two of her relatives offered themselves as subjects. They were Miss Margaret formar, and a cousin whose name is withheld. They were chosen in prefer-ence to several young women who vol-unteered as friends of Miss Gorman. The wound upon which the skin was grafted was 12 inches in circumference. Patches of skin three inches square were removed from the legs of the per-sons giving the skin, after an anas-thetic had been administered. When the skin was placed upon the wound forming what the physicians termed "skin islands." From the edges of the "islands " new skin quickly formed and, spread until all were joined. For two of the operations the skin was remov-ed from the leg of Miss Gorman. me of the most remarkable series of ney. There it will be joined by the ships in commission on the Atlantic scaboard and a magnificent review will take place. It is expected that President Roosevelt, members of his cabinet and prominent naval officers will be present to welcome the ships on their ro-London, Aug. 9 .- Few of the morn ling newspapers comment on the ar-rival of the Americas fleet in New Zealand waters and these chiefly to ex-press regret that no British fleet is present to join in welcoming the vis-The Times however, goes further saying: There is a legitimate feeling of plea-sure in this most remarkable display of navaj force and naval skill from a netion which above all others is con-sidered the natural ally of Great Brit-ain in the Pacific and indeed, all over the world

Report That White Star Will Build

#### Them is Discredited.

Them is Discredited. New York, Aug. 10.—Pier superinten-dents and other shipping experts, who have the job of getting the big liners alongside the piers on arrival, ridiculed the report from London to the effect that the Waile' Star company intended to build two liners, the Olympic and the Lauerita, over 1,000 feet long. The general opinion was that the limit had been reached by the Mauretania which is 780 feet, an account of the limit of the pier accommodation and the difficulty of docking big ships in bad weather against wind and tide. The longest pier in the harbor at the present time is the North German-Lloyd at Hoboken, which is 900 feet long. Capt. D. H. Roberts, the pier superin-tendent of the Cunard line, said that the war department would not allow

any pier in New York to be built longer than 325 feet, and that was the reason the new Cunard piers were not built longer than they are. With a strong tide against her, it took 12 tugs to bring the big stip along the pier. Capt. Roberts did not believe that the White Star fine intended to build any such liners as described, as they would be too unwieldy and costly to handle with any profit. He thought that the limit was reached before the Lusitania and Manetania were built and the future Mauretania were built and the future linets would be constructed on the lines of the Carmania and Caronia, which had both proved such all-round

#### BOZONS REARRESTED.

Foreigners Who Jumped Bail Captured by Deputy Sheriffs.

tured by Deputy Sheriffs. Yesterday Deputy Sheriffs Steel and Johnson arrested George and Louis Bo-zon, two foreigners, who lumped their ball several weeks ago. The men were arrested on the charge of brutally as-saulting Christ Johnson at Murray. They were arraigned before the justice there and placed under ball to appear for pre-liminary hearing. When the time for the hearing arrived the two Bozon's could not be found and their ball was forfeited. Several weeks ago the two men and a coust hald in wait for Johnson as he came off shift at the smelters. They had had some grudge against him and when they caught Johnson they beat him se-verely. One of the Bozon's fired three shots at Johnson, one of them taking ef-fect and breaking his saw. Jim Bozon, the one who did the shooting, has es-caped, but the other two are back in the

GREAT DEMAND FOR WORKS ON AERO-DYNAMICS Washington, Aug. 10 .- With interest roused by Count Zeppelin's airship light several days ago and the tests

low, being held at Fort Myer, the Smithschian institute is being deluged with requests for the works on aero-

with requests for the works on aero-dynamics by Prof. S. P. Langley. To meet these demands the institution has prepared a booklet containing four of the principal papers written by Prof. Langley, on his flying machine. The papers are entitled "Story of Experi-ments in Mechanical Flight," "The Langley Aerodrome," "The Great Fly-ing Creature" and "Experiments With the Langley Aerodrome" in which Prof. Langley gives his version of the last attempt to fly his airship which ended disnafronsly.

disnstronsly. Prof. Langley was probably the pl-oncer if vestigator and experimentor with michines heavier than air, that were supported in flight only by their own mechanical energy. He designed and hull several small models and a quarter size model of a larger man-carrying machine which made success-rul dights of over hair a mile eaca, keeping in the air as long as fuel lasted. The first of these flights was made in May, 186, over 12 years ago. The three small aerdromes, two driven by steam and the third by gasoline engines are on exhibition in the United States mu-seum. msly.

and the third by grasoline engines are seen. The latest large machine built not iong before Prof. Langley's death has never been fully tested, a break oc-carring in the launching apparatus at each of the two trials in 1903. The underlying principles of Prof. Langley's experiments worked out brough years of scientific study is ex-pressed in one of the papers published originally in 1897. What is popularly known as flying moduling a balloon and which its in-ventor has called the aerodrome. The aerodrome (from words signifying air immer) is then the name given to this appread us of the section which its in-ventor has called the aerodrome. The aerodrome (from words signifying air immer) is then the name given to this appread to builton the start. Though some of Mr. Langley's mod-els had flown short distances before, he principle of its action which in no vay resembles that of a balloon that flows because it is lighter than the principle of the start on the start. Though some of Mr. Langley's mod-els had flown short distances before, he preferred to consider the flight of May 6, 1806, over 12 very ag referred to above as the first really successful. Dr. Alexander Graham Beil, Mr. Frank G. Carpenter and others were wit-mated by 1m. Beil at about 3,600 feet or more than half a mile
