Beneficial Baths for Flowers.

On receiving flowers after a journey on receiving howers after a journey stalk should be cut afresh, and it only the instant before being seed in the water. When flowers are from the south of France, or from my far distance, the stalks should be prepared with a long stanting cut, or be in up in order to expose a large surge to the water, and they should be unused deep in the water, right up to he flower itself, and left all night. If he water is warm, so much the better, en for an ordinary journey many

UNVEILING A MYSTERY. Why the Beautiful Girl Bought Large

Pieces of Silver Alwa, s There had been a mystery in one of the most important jeweler's shops; the mystery had been a topic of conversation among the employees for nearly a year and a haif now, and although it was greatly discussed, it had not yet been explained.

The Mystery was lovely to look upon; every clerk emphasized that fact; she was tall and slender, her hair was a copper bronze and held a prisoner every stray beam of light, reflecting it in golden gleams. She had great blue eyes that looked squarely and with carnestness into the faces of the clerks, who had learned to serve her with considerate promptness and marked cour-

appeared at the shop little attention had been given to her. With the acute-ness of those who meet hundreds daily in this great establishment, she had been diagnosed as a young woman who had come to choose some simple gift for a comrade in her own walks in life. The clerk who came forward to serve her merely hoped she would not ask to buy an empty jeweler's box with the firm name therein. There was a lad of perhaps 14 years accompanying the girl —a lad with ill-fitting, but carefully mended clothes.

AN EFFECTIVE RIBBON WAIST.

The black and white effect in ribbon waists is now sought after as the tolored ribbons have been used altogether too lavishly. This effective model of black satin ribbon and white Valenuennes lace has a shaped extension in the center of the front formed of the ribbon and edged with a ruffle of the lace. A Mystical Number.

"Lucky seven" and "unlucky thirteen" are so often quoted that they have become household numbers, but, upon investigation, number nine, with the facts, fancies and phrases clustering around it is cutte as interesting. ing around it, is quite as interesting, says Leslie's Weekly. Nine, as three times three, is the "trinity of trinitles," a mystical number, and combinations in which it has figured are known since ancient times. The "nine worthles" of old are depicted in tapestry and paintings, and in early literature theli were held up as examples to mankind they were three Jewish-Joshua, Daniel Judas Maccabaeus-three Pagan-Hector, Alexander the Great, and Julius -and three Christian knights-Arthur, Charlemagne and Godfrey of

Without giving it more than a cursory glance she asked: "Have you nothing more attractive than these trifling articles to show?"

The clerk suggested she make a tour of the showcases and see if there was my piece of which she approved. Down the store she walked, slowly, so graceful a figure as to attract many approving glances. Pausing before a case she asked to have shown her a loving cup. With ill-concealed amazement he lifted out the smallest one among the six sizes displayed. "Twenty-four dollars," said the clerk,

Glancing at it indifferently she said:
"Show me the tallest one, please."
It was handed out, and without a word the girl took it up, looked it over, held it aloft at arm's length, set it on he showcase, backed away from it, paused with her head on one side; a little wrinkle of anxiety made its mark n her forehead, her lips gathered in a perturbed pucker, and said:

While she eats she says:

"You know, suntle, I told you about buying all Mr. Felsteen's wedding presents for him. Well, I've had more fun this year than ever before. You know he sells planos and organs and planolas and other mechanical instruments, besides music, to hundreds of people all over the city and state, there is so much competition in our business that we have to do everything to keep the trade. Almost every week some music teacher or their daughter or sister, or some organist or out of town dealer gets married. Well, Mr. Felsteen gets an invitation to every wedding, that means a wedding gift. He is a bachelor, you know; so he asks me to go and select the presents. All I have to do is to buy something large, that makes a big show. I've usked him to let me buy some fewelry, but no—it must be a big piece of something.

"Ever since I've been his stenographer I've had women come in our store and put on airs to me and I've got sick of it. Requirements for a PopularGirl.

What you want to learn is the art of self-forgetfulness, and begin to take an interest in the people with whom you are thrown in contact during the evening. Probably your idea of a popular girl is above all others the girl who can talk, but has it ever occurred to you that the art of being a good listener in these rushing days, when every other person you meet is overflowing with importance and talk of their own affairs, is now considered a most attractive thing in a girl?

their own affairs, is now considered a most attractive thing in a girl?

Most people, you know, love the sound of their own voice, and their vanity is sure to be pleased when they find a congenial soil who is content to simply listen and let them do all the talking. So when you meet anyone, be it man or woman, and they have a particular fad or a hobby, as you will find nearly every one has these days, let them talk on it; above all things show them you are interested and in sympathy with them. Just try this and see if the charm doesn't work. "Charm," as David Dudley Field defines it, is the ability to place yourself and others at the best.

the best.

Of course, it's but natural to want to be a good talker, by that I mean one who really knows how to entertain with her talk. You know the average man at an entertainment is very much like a small boy—he wants to be amused. So you must keep your eyes and ears open for Interesting little situations and good jokes. The girl who has learned the subtle art of telling a short story with lots of point to it is the girl who is sure to please.

The Paris Bang.

In Paris the new bang is flourishing already to accommodate the first spring hats, which tilt over it. The new bang does not relinquish the dearly-loved pompadour, it only shorten and reduces its size, making it a cushion against which the new bang reposes and giving an effect of the big fluffy bang which was popular for so many years and is still worn by the Princess of Wales and her daughter-in-law, the duchess of York. It will come down to the eyebrows, so that the hat tilting for-ward will not entirely obscure it. The two sides of the pompadour will be shortened and the bang will be worn at shortened and the bang will be worn at its edge to cover that bare high forehead which all mature women dislike so much, and if the hat is to cover the forehead, the stiff roll will only be in the way. The severely-simple method of parting the hair in the middle and carrying it back in smooth folds on each side of the head is too trying for any age, and both old and young will welcome the return of the fluffy

Take Your Soup in This Way.

I think it was Emerson who said he should prefer to sit at table with a per-fectly mannered scoundrel than take his meals with the honestest man in world who ate with his knife and made a gurgling noise in taking his soup. Most dinners begin with soup. At formal dinners oysters or claims are served as a preliminary course, but soup is considered of itself a proper beginning of the important meal of the day.

Soup is served in plates, not bowls. The soup spoon is laid on the right of the plate.

The soup plate should never be filled to the rim of the bowl part of the plate. It is not allowable to ask for a second helping of soup. Soup is eaten with a tablespoon, not

a dessert spoon, such as one is furnished with at some of the restaurants.

In taking the soup up dip the spoon from you in the plate; drink or eat it—for the proper term is in dispute—from the plate and pages from the the side next you, and never from the tip of the spoon.

There are so many wrongly-placed people in the world, and so much un-nappiness because of it, and yet in the face of all this many mothers allow their children to grow up without tak-ing the pains to find out their special gifts or of considering them when they

It is deadly wrong to a child to ignore its future in this manner, and one, unfortunitely, in which only the child is the sufferer. If even a small part of the misfortune would react upon the thoughtless parents the wrong would be less selfish; it would even be partly explated, says the Philadelphia Times.

Every human being has a talent, be fit ever so smarl, and that gift ought to have its chance in the world. Even when the question of bread and butter is not pressing, care is not taken to make the most of what has been given by nature.
