After the usual exercises Bishop Burron said he could truly say it was a pleasure to meet with the Saints in his Stake, under such favorable cir-umstances. He referred to the pres ent situation of the Saints and how we naturally feit to retainte, but said that was not a right feeling and that we ought not to entertain it. He re-ferred to the history of the Saints while living in Missouri and Illinois, and contrasted the same with the present. Said the persecutions had a tendency to unite this people, and re-ferred to the state and condition of the ferred to the state and condition of the Saints, when called to start on their journey over the plains. Considered it was necessary for this people to come here to these mountains and establish themselves in this country God had a hand in this, and caused everything that transpired to result in blessings to the Saints. We ought to thank God for the persecutions we are now enduring. Advised the Saints to settle all their difficulties he Saints to settle all their difficulties coording to the Gospel plan; seek to

ave patience and charity toward one mother, and advised the Bishops when ettling difficulties, to be unbiased and give justice to all.

Apostle Taylor said he was pleased ith the remarks of Bishop Burton, and hore testimony to the same. He parrated incidents in his travels since he last met with the Saints of this lake, which were very interesting and vere listened to with great attention. Repentance was a principle we needed to act upon, and that we put off the sins of commission as well as omission. Thought it would be well to ask ourselves a few questions, such as, do we keep holy the Sabbath day? Do we visit the sick? Do we deal just-by with all men and avoid taking adly with all men and avoid taking ad antage of those who are not of us

Do we pay our tithes and offerings if the times and seasons and in the iking thereof? Do we train our children aright, and seek to exercise charity to those around us? Are our children taught at home to pay their tithing and and offerings? Do we attend our last meetings every month? And do we see that our children attend to Sunday nd week day schoo s? Apostle Taylor referred to the passage of Scripture which reads:
"Search the Scriptures for in them ye think ye have eternal life, and they are they that testify of me." He dwelt at some length on David's adultery with some length on David's adultery with sin that he had committed, for which the Lord decreed that the swore should never depart from his house. There was no complaint against David for having many wives, but for the taking of another man's wife and having her husband put to death, the Lore was di-pleased and held him to answer proved by revelation that wheneve God's people fell into transgression the indignation of the Almighty was poured out upon them. The Future for Wheat.

The following from the Mark Lance Express, London, the leading agricultural authority in England, is well worth the attention of wheat holders in this country: "Farmers hold your wheat— if you can! That is the advice which, for the first time in our life we venture to give. Since we have been acquainted with farming there has not been a year when the policy of holding wheat was so strikingly desirable as it is this season. In view of future supplies current prices are something like an insult to growers. In America there is about the worst crop on record; in South Russia a failure of the crops is reported; in the rest of Europe, including the United Kingdom, the a stream to take will be under gregate yield will probably be under average, and Australasia has very little prices. Whence then shall we get the shall probably require to impact? shall probably require to import? We receive wheat in small quantities from so many sources that there is no fear so many sources that there is no lear of scarcity, but we shall certainly has e to give a higher price than we are now offening, long before the end of the cereal year just began, in order to supply the population with bread. If farmers do not flood the markets with the new home crop, a rise will probably take place soon; but if they fol-low their usual practice it may be de-ferred until toreigners will get nearly all the benefit of it. Let English farm-ers keep in mind the fact that circumstances hearing upon the wheat sup-ply are very peculiar this year, justify-ing a peculiar policy among growers As a rule it does not pay to note wheat; but this year I am convinced that it
