

## TELEGRAPHIC NEWS.

New York, Sept. 1.—The report that a trust had been organized by the tropical fruit men of New Orleans did not create much concern among banana importers of this city. George H. Richardson, selling agent of it, who has a line of steamers which brings to this port an average of eight cargoes of bananas per month, stated he was aware of an attempt on the part of certain English firms to organize a big trust for the control of the tropical fruit trade, but he did not believe it could succeed because of the fruit being perishable. If bananas could be stored like sugar, oil or goods of that character, a trust might cause some alarm. The English trust embraced the construction of ships capable of carrying 30,000 to 50,000 bunches of bananas hung up. At present the largest vessels are able to bring only 14,000 bunches in layers.

Berlin, Sept. 1.—Emperor William has been appointed an admiral in the Swedish navy.

Reichsanzeiger published the following decree: The testamentary notes of the late Emperor William afford evidence of a lofty greatness of soul and a noble and devout mind, a knowledge of which I am unwilling to keep from the nation; therefore on this day, so important to my house, I have decided to publish abstracts as a memorial to the departed and an example to my house and people. The abstracts are dated April 10, 1857, December 31, 1868, December 31, 1873, December 31, 1878.

St. Louis, Sept. 1.—A special from Hot Springs, Ark., gives additional details of the fatal storm at that place Thursday night. The first building swept away in the north end of town was occupied by Mrs. Mattie Fletcher and four children, colored, who were drowned. The husband escaped. John Franklin rescued an injured man from the swollen torrent in the same locality. The bodies of a woman and her one-year-old babe were found in a drift. An aged couple named Harrison occupied a small cottage near the Arlington stable. The force of the water caused the building to collapse and the wife was killed. There were several lost whose names have not yet been ascertained. The victims are principally poor people, living in small cottages, which could not stand against the storm.

London, Sept. 1.—A collision occurred at Doring near Tarifa last evening, between the steamer Carlo from Cardiff and the Snaresbrook from Odessa. The Snaresbrook sank and 11 of her crew were drowned. The Carlo rescued the remaining 10.

Toledo, O., Sept. 1.—A special from Cuyahoga, Ohio, says a twenty-five thousand barrels tank of oil exploded and the oil was scattered in all directions, killing eight persons and injuring a number of others.

Baltimore, Sept. 2.—Early this morning a fire broke out in the toy warehouse of Pierce Helgenberg & Co., 107 South Sharp Street. Before the firemen could get to work, an explosion of fireworks wrecked the building and caused the flames to spread to the drug house of J. H. Winkelman & Co., on the north and the hat house of A. S. Levy & Co., on the south. Scarcely had the firemen entered the edifice occupied by the drug house when a terrific explosion occurred, and the immense building collapsed. The entire department had by this time reached the scene, and as the attention of the men was concentrated on the building under which their comrades were buried, the flames had a chance to spread with frightful rapidity. In a short time the entire block running from Lombard to Pratt Street was a mass of flame. At the drug house the firemen worked bravely. Holes were soon cut through the pavement and every effort made to reach the imprisoned men, but they were buried under a great mass of brick and iron, and fierce flames were roaring around the spot. Awful groans came from the pile, which seemed to make the working firemen put forth superhuman efforts, and after more than an hour's work it became evident that some of the men were alive and that they were being roasted to death. John Kelley, of Truck No. 2, managed to crawl out from the rubbish. Of the men who entered the building, he was the only one to escape with his life. He was cut and bruised, but his injuries are not serious. The names of the men known to have been buried in the mine are Geo. Bowers, Thomas Wagner, John A. Combs and Perry Ryan of No. 2 Hook and Ladder Co., and Harry Walker, George Kerins and Hyram McAfee of No. 7 Engine Co. It is certain that those men have lost their lives, and it may be that others were with them when the crash came. The firms that were burned out completely are: Wyllis, Bruster & Co., wholesale shoe dealers; J. H. Winkelman & Company; drugs; Tabb Brothers & Dumick, hardware; M. S. Levy & Sons, hats; H. S. King & Sons, hardware; Dobler, Mudge & Co., paper, and Hirschberg, Holland & Co., paints and glass. The row of buildings was one of the finest in the city, none of the warehouses being less than five stories high, and nearly all of them having been recently erected.

The total loss will probably reach \$1,500,000, and it is pretty well covered by insurance, most of which is in small policies in out of town companies.

Cincinnati, Sept. 2.—A most distressing tragedy was discovered last night at Delhi, a few miles from Cin-

cinnati. Mr. Steubee, of Delhi, found that his wife and two children, who had been missing since Tuesday last, had been drowned. His grief is more intense because it is believed the mother, in a fit of insanity, had dragged the children into the river with her. The children were a girl and boy nine and ten years old. The three bodies were recovered yesterday and identified.

Kansas City, Sept. 2.—A report has reached here that a battle was fought in No Man's Land last week between 18 horse thieves and a force of 50 colored settlers; and that all the outlaws were killed, together with three of the vigilantes. Several days ago the gang of desperadoes invaded southeastern Colorado and stole a number of horses, after which they fled to the neutral strip. The settlers organized a force to pursue them, and it is supposed the above fight was the result.

St. Louis, Sept. 2.—A special from Booneville, Mo., says: Six section men were killed at a small station near this city yesterday by a freight train jumping the track. A caboose attached to the freight was filled with passengers, all of whom escaped serious injury.

London, Sept. 2.—The Standard, in a savage leader on the fisheries question, says: "It will be well for the President and government of the United States to remember that Canada is a dependency of Great Britain, and that if the necessity should unfortunately arise, she has behind her the guns of English ironclads. If our American cousins fail to understand this allusion; if in deterrence to the tone of coarse brutality which seems to be the distinguishing feature of their domestic politics, they invite us to reply to their insults in a like strain, they will comprehend, perhaps, that we may be allowed to remind them of the Trent affair."

The Standard further says: "If we have to deal with a nation of thibusters, let us at least know it. We will tell our American cousins frankly that we have not advanced so far towards the ideal of Christianity that we are prepared to turn our cheek to the trans-Atlantic snifter."

Washington, Sept. 1.—Surgeon-General Hamilton has just received a dispatch from Philadelphia informing him that a case of yellow fever has been discovered there in the person of a Florida refugee who passed inspection at Waycross, Georgia. The patient was sent to the municipal hospital.

Governor Perry of Florida, telegraphed Surgeon-General Hamilton as follows: "Without the consent of the Nassau county board our promises preclude the establishment of a fever hospital there, asked by the Jacksonville committee."

Senator Call and Representative Dougherty had a conference with the President in regard to the condemnatory resolutions passed by the Jacksonville citizens concerning Dr. Hamilton's course of action. No conclusions were reached.

Julius Wise, one of the bureau's inspectors, has been on his way from Jacksonville to Fernandina three days to inspect the latter place. He telegraphs he has been impeded at all points by local quarantine regulations and expects to reach Fernandina today and Camp Perry tomorrow.

Dr. Gutierrez telegraphs from Camp Perry that there were 35 persons at muster yesterday. Fifty arrived. He will discharge 22 today.

Philadelphia, Sept. 1.—In reference to the supposed case of yellow fever now in this city. It was learned that this refugee had been taken to the German Hospital in charge of Doctors Balhache and Stays. Dr. Stays reported he found the case a doubtful one with some indications bearing out the theory of yellow fever and he made a report to the health authorities at once. Upon this report to the health authorities the patient was ordered at once to be sent to the municipal hospital.

## THE NEW CASES.

New Orleans, Sept. 1.—The Times-Democrat's special from Jacksonville says: Eleven new cases of yellow fever up to one o'clock and one death is what Dr. Mei Mitchell reports by telephone. This is a big figure for so early in the day. The greater portion of new cases are reported from 5 to 6 p. m. There will be so few people left here in a few days from now that anyone can hardly hope to escape the disease.

Tomorrow an excursion train leaves here for South Carolina in accordance with Surgeon-General Hamilton's suggestion and permission, and it will be well filled. It is especially urged now that women and children get out of the city, and great efforts are being made to send them off.

Denver, Sept. 1.—A rumor reached here, but it has not yet been confirmed, that a collision occurred a few days ago between a band of Piutes and Utes in Paradox Valley, and that several on both sides were killed.

Hon. J. B. Galloway tonight received a letter from the foreman of his ranch in the Paradox Valley, confirming the rumor of a fight between a band of Southern Utes and Pah Utes. The latter number about 200. The battle occurred near Lazy Mountains, and when the courier left for Grand Junction the battle was still raging. The ranchers have all gone into the settlements.

Major Chas. Whitehead, special pension examiner, arrived in Denver and reports that when he departed from Lander, Wyoming, last Wednesday

there was considerable excitement among the settlers on account of an expected outbreak among the Shoshone, Sioux and Arapahoe Indians at Washakie, in the Shoshone reservation. The hostility of the Indians is attributed to their apprehension that the government intends to remove them to the Indian Territory forcibly if they do not consent to the terms of the present negotiations.

Agent Jones has called for military assistance and ordered the garrison at Fort Washakie to prepare for an attack. The settlers also are making active preparations for their defense.

St. Paul, Sept. 1.—The Crow Creek Indians did not hold a council last night, says the Pioneer Press special, but spent the night on a still hunt for votes against the treaty. The opposition here mostly comes from a few Indians who have acquired considerable live stock, and who fear their grazing grounds will be curtailed if treaty is made. The commissioners devoted yesterday to personal interviews with the leaders of the opposition. Chairman Pratt has been presented with a brief by the Indians, asking remuneration of seventy-five acres of land which the Northwestern took for its Pierre extension, and for a transfer of a number of this tribe from Standing Rock back to Crow Creek. He informed Chief White Ghost that he would submit these requests to the government at once, at which the chief expressed great satisfaction, as did the other Indians. A favorable decision on these two points will greatly promote the ratification of the treaty here.

## School Register.

We have been shown an advance sheet of a school register which has been prepared by J. N. Pike, designed and arranged expressly for the schools of this Territory, having for its object a correct and complete record of all the statistical information required by the laws of Congress and of this Territory. Heretofore our school statistics have not been as correct and uniform as they ought to be, and the chief and almost sole value of statistics is their correctness and consequent reliability, and their being compiled in an intelligent and uniform manner.

In addition to the statistical information it provides for the amount of each pupil's tuition fee for the time spent in school each term, and the amount paid, all of which can be seen at a glance by the teacher every time roll is called, thus affording an excellent reminder to him or the trustees as to who are delinquent in payment of tuition. On the end of the book is a visitors' register where every person visiting the school can record his name, place of residence, date of visit, and any special point of interest connected with his call. The front page contains the endorsement of the Territorial school commissioner, and the county superintendents of district schools, together with instructions for keeping the register. The forms are printed in two different lengths, twelve and eighteen inches, and can be made to register from 500 to 1000 or more names if desired before binding. A special feature of the register is that the horizontal lines are ruled in different colors to assist the eye in tracing across the face of the register. The form is the most complete and ingenious of anything of the kind we have seen in this Territory.

## NEWS NOTES.

## Items Gathered from Various Sources.

The work of double-tracking the Rio Grande has already begun. Between this city and Littleton several gangs of men with a construction train are already at work. The grade is being widened, ties are being distributed, and the stone work on culverts and bridges is in progress. The only lay in the work is caused by the large number of trains which already crowd the single track of the main line." President Palmer states that the road will be changed to standard gauge as soon as the gauge of the Denver & Rio Grande is changed to the Colorado and Utah line, or as soon as some other road of standard gauge is built to the line for it to connect with. The gauge will not be widened by laying a third rail, the president says, but it will be changed to a standard gauge road entirely.—Denver News.

Helena, M. T., Aug. 28.—A strange suit has been filed in the District Court which promises some rich and racy developments when brought to trial. The parties to the suit are Peter Wilson and Andrew Glass, both well-known and well-to-do citizens. Glass has a pretty granddaughter named Anna Eugenia Glass, with whom Wilson has been keeping company for some time. The woman is about 19 years old, and in every way a very fascinating creature. Wilson became very fond of her, and at various times gave her handsome presents. Glass, it seems from the allegations made in the complaint, took advantage of the situation and extorted large sums of money from Wilson on the charge that he was responsible for the ruin of Miss Glass, who was about to become a mother. Glass also charged Wilson with the seduction of two respectable young ladies at Silver City, M. T., who had, he said, confessed the fact to Miss Glass. Wilson was led to believe

that if the facts became known to their parents they would kill him. Owing to these representations, Wilson says, and while in fear of his life through fraud and intimidation, he was induced at one time to sign a note for \$200, at another time to mortgage a tract of 100 acres of land to Glass, and again to give him a note for \$200. At the time Wilson claims that he was weak and debilitated and his nerves shattered, and he was in a very deplorable condition caused by losses in business and harassment from other cares. Wilson prays on these grounds that the court issue an injunction restraining Glass from negotiating the notes, and have the mortgage on the land declared null and void. If the trial proves that Wilson has been playing the part of a gay Lothario, his three victims will probably give some queer and startling testimony.
