PRESIDENT WILFORD WOODRUFF.

Eighty-six years ago today (March 1st, 1807) in the county of Hartford, state of Connecticut, he whom we now know as President Wilford Woodruff was born into the world. Woodruff was born into a family of farmers and was brought up to the plow. He was a simple, unassuming man, but his life was a life of great achievement. He was a pioneer in the settlement of the West, and his life was a life of great achievement. He was a pioneer in the settlement of the West, and his life was a life of great achievement. He was a pioneer in the settlement of the West, and his life was a life of great achievement.

But upon these incidents of history it is not necessary to dwell. This much, however, can and ought to be said. It is no common thing among mankind in the long-remembered days to walk the earth for six and eighty years, and to preserve to that time every faculty of mind and body, as our honored President has done. He is a living instance of sturdy American manhood and heaven's preserving care. His career is a constant lesson that the prolonged span of human life does not depend upon immunity from wearing care, for today no man is busier or less fearful of wearing out than he, notwithstanding his burden of years.

SENATOR STEWART OF UTAH.

It is possible but not at all likely that the scheme devised by Senator Stewart for the annexation of Utah to Nevada may get through, but the time seems much too brief to admit of any such measures being even brought up during the present session. As we look at it, failure to accomplish such work now would mean failure for years to come. It is not altogether for political reasons alone, though there might be others. After the 4th of March the Democrats will as at present have a strong majority in the House of Representatives and as it is not at present, a majority in the Senate. Undoubtedly they will look to the strengthening of their hands and there will as heretofore be more or less political legislation. They have nothing to hope for from Nevada, and it is not at all likely that they would care to jeopardize Utah with its present Democratic preponderance in that or any other manner; so we feel safe in saying that nothing will come of the project.

Senator Stewart's motives in trying to get the annexation measure through at this time may be, and doubtless are proper enough from his standpoint. He saw in his state a meager population becoming smaller every year, and with no attraction to it, leading to induce immigration from any quarter. It has a good deal of debt, not as large as some make it out to be, but it could be paid readily if it fell to the prevailing financial and industrial conditions. At the rate and in the way things are going there, the state government must sooner or later inevitably collapse for the lack of people and wealth to keep it up. As a senator he is devoted to his own state and what is left of its constituency, he naturally seeks to avert the impending crisis, and sees no other way to accomplish his feasible design than by annexing some neighboring territory which already has the requisite population and wealth. Arizona here is on the south to some extent, but Arizona for miles beyond its border. The move is being made, and Arizona for miles beyond its border. The move is being made, and Arizona for miles beyond its border.

called by dismembering that territory for the purpose of annexing it to Nevada. This is the situation now. What will it be a year hence? If all that is being alleged is well founded, it looks rather ominous for Democracy's future. It should be remembered, however, that the annexation of Nevada to the Union is a political and not a moral question. It is a question of the future of the Union, and not a question of the future of the Republic. It is a question of the future of the Union, and not a question of the future of the Republic.

There is a continental feature in the case that will not of course amount to anything, but it might as well be mentioned as that the whole case will be presented. The annexation of Utah to Nevada would be not so much a continental feature, as it would be a continental feature. The annexation of Utah to Nevada would be not so much a continental feature, as it would be a continental feature. The annexation of Utah to Nevada would be not so much a continental feature, as it would be a continental feature.

Then there came a change. The climate could no longer be said to be as healthy as it once was. The climate could no longer be said to be as healthy as it once was. The climate could no longer be said to be as healthy as it once was. The climate could no longer be said to be as healthy as it once was. The climate could no longer be said to be as healthy as it once was.

The Democrats were published long before the separation took place, before what is now Nevada contained any population at all, and it has been published continuously ever since it began. It is therefore something of a historical as to this particular subject and knows whether it speaks regarding it. It did not ignore dismemberment, but it does not ignore restoration—not because of anything that is herein contained, but for the sake and sufficient reason that Utah is too far advanced in the scale of civilization for the loss of a single part, to be made a slide show for the benefit of any of its neighbors. It is entitled to sovereignty on its own account and because of this alone we hope she will get it or not at all.

WHAT OF THE POLITICAL FUTURE?

The Republican party retire from the field as a controlling factor in national affairs on Saturday next after having held sway absolutely for ten years and been in power with more or less opposition for nearly thirty years. The question as to what the future is to be, or whether it shall have a future at all corresponding with its past, is therefore timely and pertinent. An accepted authority, the New York Herald, speaking on this subject, considers the political situation full of hope and encouragement for this party. "The Democracy is the winner," it says, "What would it do with the victory?" This, of course, remains to be seen, but our contemporary seems fit to answer the query at once. It declares that the Democratic party is, in fact, a new party, and it is a new party. It is a new party, and it is a new party. It is a new party, and it is a new party.

not an American President, but an American citizen. This is the situation now. What will it be a year hence? If all that is being alleged is well founded, it looks rather ominous for Democracy's future. It should be remembered, however, that the annexation of Nevada to the Union is a political and not a moral question. It is a question of the future of the Union, and not a question of the future of the Republic. It is a question of the future of the Union, and not a question of the future of the Republic.

SUCCESSORS AND FAILURE OF SERIALS.

The North American Review for March contains among many interesting things an article by Dr. Cyrus Eaton on the subject of "Fate of Medical Men." The doctor proceeds to state that some of the "fate" pointed out by the reviewer have been taken from us. It is a pity that some of the "fate" pointed out by the reviewer have been taken from us. It is a pity that some of the "fate" pointed out by the reviewer have been taken from us. It is a pity that some of the "fate" pointed out by the reviewer have been taken from us.

The first of these which the doctor mentions is the water cure, whose treatment he admits never having seen, but which he accuses some knowledge of by reading. "The patients who went to the water cure establishment," he says, "were obliged to live the most abominable regular and simple lives. They took plenty of sleep, lots of exercise; they lived on the simplest but very nutritious food; they were not allowed to give the recuperative power of nature the faintest opportunity. Naturally, those who were not by work or the demands of society, whose digestion was ruined by rich food, who had, in short, lived in defiance of every law of hygiene, derived great relief and permanent benefit. Thus, the health conditions of the life were accompanied by the patients by a series of food of washing themselves in various ways, and some were taken to stimulate the excretory glands of the skin in the form of the use of the wet pack. Chastity is certainly good, and the latter helped nature to rid the body of the waste. As for the rest of the water treatment, the doctor, the bath, the massage, that accompanied the water cure was done by them as a general rule. The real value of the hydro-pathic treatment was in the quantity of water, which was used in the treatment, and this it is in the opinion of the doctor, that was the real value of the treatment. It was a person's chance to rest and to build himself up, then, by it, it is a stimulus and tonic in the narrow sense, but it is not the cure of disease. It was a cure believed to be."

The doctor declares that the "water cure" is a very old remedy, and that it is a very old remedy. The doctor declares that the "water cure" is a very old remedy, and that it is a very old remedy. The doctor declares that the "water cure" is a very old remedy, and that it is a very old remedy.

Accustomed to all the traditions, this ought to be the first day of spring. In view of the lightning changes in weather to which we have been treated, there is some hesitation at this hour, 2 p. m., as to whether it is not too late to come in like a lamb or like a lion.

Some individuals had their yellow fever caused and subsequently followed by a long and severe illness. The plan has been to destroy it by anything. Even the most reliable has been required by the town people to be a lion's head in his hand.

Don't say to a friend "It is a remarkably fine day at last," no matter how much present conditions may justify it, because before the week is forty-four of your month it is likely to be raining and blowing so hard as usual.

At last, says one, that sign that the great war is over. It is a sign that the great war is over. It is a sign that the great war is over. It is a sign that the great war is over. It is a sign that the great war is over.
