OGDEN, UTAH, - AUG. 25, 1904.

SONGSTRESS WINS BRILLIANT SUCCESS

Nannie Tout Scores Grand Triumph and Wins a Place With World's Greatest Singers.

MEETS TREMENDOUS WELCOME.

Ogden News Notes.—Thieving Hoodlums Brought to Book at Kanabville—Recover Stolen Horses.

A tremendous welcome greeted Utah's greatest singer, Miss Nannie Tout, last night, when she appeared at the Grand Opera House in the home of her childhood, at her first appearance since her return from four years' study in Europe.

"She sang beautifully," "I never heard anything so grand," were the utterances from the lips of almost every person who attended the musical.

Never before was an Ogden audience more delighted and satisfied than last evening, and to say that the Grand Opera House was never before so fully packed as it was last night is to say that the house was never before so fully packed as it was last night.

The audience was brilliant, extremely friendly in its early reception and greeted in enthusiasm as the numbers succeeded each other until the concert was reached as Miss Tout returned from a pleasure trip to California.

A. T. Wright received the sad news yesterday that his brother-in-law, R. T. Potts, had been killed in Ogden, Utah. Mr. Wright and family leave tonight to attend the funeral, which takes place tomorrow.

War Against Consumption. All nations are endeavoring to check the ravages of consumption, the "white plague" that claims so many victims each year. Foley's Honey and Tar cures every form of consumption. Do not risk your health by taking some unknown remedy. Buy Foley's Honey and Tar in safety and certainty in results. Ask for Foley's Honey and Tar and insist upon having it. F. J. Hill Drug Co.

PROVO. The Daily News is delivered by carrier in Provo every evening (Sundays excepted) for 25 cents per month. All complaints, requests for changes of address and payment of accounts should be made to R. J. Dugdale, 322 West 4th North St., Provo. Advertisements and orders for church work also received.

WILL IMPROVE CANYON ROAD. Young Sports Fined for Fast Driving—Garden City News Briefs.

Special Correspondence. Council Bluffs, Iowa, Aug. 25.—The board of council will hold its 20th and probably 4th of the dugways in Provo canyon, building masonry walls on the river side to protect the road from the action of the water.

Henry W. Davis, Jr., is down from Salt Lake, moving his household effects there with a view to making his home in the capital.

Percy Jones and Albert Vincent were fined \$5 each by Justice Noon yesterday, for reckless driving on the Lake Front drive.

Postmaster General Inspectors Foster and Jones are here from Denver. He has been looking over the district southwest of the city where it is desired to establish a rural route, and is very favorably impressed with the conditions. It is hoped by his recommendation that section that his recommendation will be favorable.

Mrs. Louisa Jones, who has been an instructor in the R. Y. T. kindergarten department for several years, will go to Thatcher, Arizona, to take charge of the kindergarten department of the stake academy there.

A son has been born to Mr. and Mrs. John P. Choules and a daughter to each of the following families, temporarily residing here. Mr. and Mrs. R. W. Davidson of Tucker and Mr. and Mrs. W. H. Homing of Thibault.

Miss Lou Nelson of this city, who has been at the Holy Cross hospital for some time is reported here as convalescent.

Three transients giving the names of Hyde, Cross and Case have been sentenced to 10 days each in the city jail by Justice Noon for stealing a ride over the R. G. W. from Salt Lake to Provo.

GARLAND. The United States smelter has completed its new line of the P. L. & A. S. L. R. R. track to its large lime stone deposits which are located about five miles south of Mercur in what is known as the Seven Mile Pass, and is now busy with loading and transporting to its plants about 200 tons of lime stone per day. This spur extends right into the quarry so that the cars can be loaded at a very small cost.

Nearly a mile south of the smelter quarry the Utah Sugar company has leased a quarry from a company of Lehi men for the quarrying and delivery of the rock to the factory. Mr. Evans has contracted with Marion Walker and Rollie Taylor to quarry the rock for this season, and they are now actively at work.

PAINFUL ACCIDENT. While Max Bothe was trying to catch a wild horse in a pasture, the sugar factory yards Tuesday, the horse ran with such force against a pole which Mr. Bothe was leaning on as to break the ribs of his ribs, he also received some very bad bruises. He was attended by Dr. Stoekey, and is now doing nicely.

Sunday our new band gave a sacred concert in the evening, which was much enjoyed by the citizens. It will also play Thursday at the city park, where a ball game will be played between Lehi and Bingham Junction. A grand ball will be given in the evening.

TEA. It rouses new life and almost satisfies hunger.

TEA. It rouses new life and almost satisfies hunger.

of the young men also admitted having stolen the sugar ship before. Mr. Alvord will not punish the young men or divulge their names on account of their prominence.

STOLEN HORSES RECOVERED. A telephone message was received at the sheriff's office yesterday noon that five head of horses had been stolen from a barnyard near the main traveled road at Corinne, Utah, and that the thief had come this way. Deputy Sebring went out to the northwestern part of the county on horseback, and found trace of the horses, a man driving four head and riding one was seen only about two hours before. A thorough search was made of the brush in the northern part of the county, where the Boxelder county officers found the horses driven in a thicket, but the thief had left. Evidently he intended getting the horses again when darkness fell and continue onward.

A WEDDING ROMANCE. The marriage of William A. Shaw, a well known young business man of Ogden, to Miss Constance Edith May Minns, a charming young English girl from Ely, Cambridgeshire, England, which occurred today in the Salt Lake Temple, was the culmination of a little romance. The groom went to England on a mission a little over two years ago, performing a worthy work. On his return home the young lady, who is now his happy bride accompanied him, he having converted her to his faith and love. She lived with his parents, where her arrival in Ogden, Utah, has made many friends by her winsome ways. A large circle of friends will join in wishing Mr. Shaw and his young wife a long life of joy and prosperity.

BRIEFS AND PERSONALS. Friday night in the first ward amusement hall a benefit entertainment will be given in honor of several missionaries who have labored in Idaho. The cause is a worthy one and should be well patronized.

The teachers and grocers of Ogden, together with their families and friends, are invited to a social gathering at the Lagoon yesterday. Fourteen carloads of people from Ogden participated in the pleasures.

R. S. Fitzgerald and family have returned from a pleasure trip to California.

A. T. Wright received the sad news yesterday that his brother-in-law, R. T. Potts, had been killed in Ogden, Utah. Mr. Wright and family leave tonight to attend the funeral, which takes place tomorrow.

Prof. Townsend thinks he can prevent such a loss and is having one of the company's best sheds fitted up for his work next year.

Mr. K. A. Hiko, a prominent Japanese leader of San Francisco, spent several days of the week with us, looking after his work next year. Mr. Hiko is the editor of the Japanese daily newspaper published in San Francisco, also the president of a large labor contracting company.

He says that our valley is the best sugar beet country that he has ever seen, and that his company will probably plant a permanent Japanese colony here to work beets.

Today's rains have helped the looks of all crops, though there has been no shortage of water here. Both the Hammond canal and the Bear river canyon power plant will finish the season's work about the middle of the month. Harvesting is over and the second crop of lucern is up. The beet crop is in excellent condition, as shown by the fields and by laboratory analyses.

LOGAN. The agent of the Deseret News in Logan is C. R. McMillan, 100 North Main St., who has a number of agents in the county. He has a number of agents in the county. He has a number of agents in the county.

EPIDEMIC OF TYPHOID. At Providence—Democrat's Primaries And Convention—Mower Divorce Suit.

Special Correspondence. Logan, Aug. 23.—The heavy frost Sunday night did great damage to the crops throughout the valley. In some districts garden truck was killed and almost everywhere second crop alfalfa seed is badly damaged.

There is an epidemic of typhoid raging over on Providence bench. William Brown and two members of his family are down with it and other cases are reported. An analysis of the water over there shows typhoid germs in abundance.

Mrs. Ella Cardon of the Sixth ward and Mrs. Charles Priddy are also down with it. Mrs. Cardon is a member of the church. She is a member of the church. She is a member of the church.

Justice Cardon today fined Henry Lundahl \$15 for assault and battery, committed on the person of Riley Hattis.

Marshal Crockett arrested a number of boys, charged with disturbing the peace. The judge gave them a good lecture and released them, suspending sentence for good behavior.

Ruth Mower received a divorce suit against Marion H. Mower for divorce in Judge Hart's court today. Plaintiff alleges desertion as the cause and asks for a divorce without delay.

The Logan City schools will open Sept. 12.

Prof. Andrew Snow is home from a mission in the eastern states.

Hans A. Pederson is out as a candidate for representative to the Legislature on the Republican ticket.

Primaries to elect delegates to the Democratic convention will be held tomorrow night. The convention meets Saturday next. The primaries and convention will be tame affairs compared with the Republican day last week.

P. P. Christensen is here today working up Republican day at Salt Lake next Friday and incidentally getting in some good work for Cutler.

WAS WASTING AWAY. "I had been troubled with kidney disease for the last five years," writes Robert R. Watts of Salt Lake, "I lost sleep and never felt well and doctored with leading physicians and tried all remedies available, without relief. Finally I tried Foley's Kidney Cure and less than two bottles completely cured me and I am now as well as ever. During the summer kidney irregularities are often caused by excessive drinking or eating overheated foods. Buy Foley's Kidney Cure, F. J. Hill Drug Co., tested."

LEHI. Beets Now Show No Effects of the Frosts, but Other Crops Suffer.

Special Correspondence. Sugar City, Aug. 24.—Messrs. Cutler and Whitney of the two Idaho Sugar companies, who passed through Sugar City this week, both expressed themselves as surprised and gratified at the way the beet crop has recovered from the severe frosts which swept the Snake River valley in June. A trip through the vast expanse of beet fields contiguous to both factories, showed that the plants are in beautiful condition, and it would be impossible now to tell that they had ever been subjected to the frosts. Very different is the report made of the grain and potato crops. The June frosts set them back badly, and the continued frosts of August 20 and 21 again had an effect on them. Farmers everywhere, while feeling somewhat depressed over the partial failure of the grain and potato crops, express themselves as being pleased to know that they have at last found in the sugar beets, a crop which will stand the severest frosts of which this region is capable. While frosts are not so severe as they were in the Snake River valley, to a much greater extent than in the Utah valleys, nothing like the severity of this year's frosts, nor the frequency of their visits has been known in the past.

Managers Mark Austin is already contracting for next year's acreage, and he thinks it will exceed by \$5 to \$6 per acre that planted for this year. The brick work on the Fremont county sugar company's plant is rapidly nearing completion, and the machinery is well in place. The finishing strokes are being put on the new section at Parker, and it is indicated that the plant will be ready for operation as soon as the beets are ripe. On the Elgin bench, the banner beet district of the west, the beets are already being harvested in about three weeks. Government experts who have visited the bench in the last two weeks, say that it contains the healthiest tracts of beets ever found anywhere in the United States.

Sugar City building operations continue to go forward at a lively rate. A recent interview with Mr. J. H. Wallis, however, printed in the "News" contains several errors. One was that the new schoolhouse decided on for Sugar City was nearing completion. The fact is that it is not yet started. The band has only had two months' practice and is doing very creditably. Rev. Geo. J. Adams, principal of the New School school here, has returned from a two months' trip at his old home at Westboro, Mass., and Boston, where he has been visiting friends. The academy will commence Sept. 6, and Mr. Adams will be assisted by Mrs. A. P. Forbes of Boston, who will have charge of the intermediate departments of the academy.

The Lehi basketball club will play Spanish Fork at that place tomorrow. Tomorrow will be the last of the weekly half-day holidays for the merchants and clerks of this end of the valley, as they are only given during June, July and August.

A daughter was born to Mrs. Orinda Thomas Tuesday morning. All well. The threshing is now in full swing and the farmers are highly gratified with the crop harvest, the average yield being over 50 bushels of barley and oats to the acre, and 35 bushels of wheat.

Mr. Parley Austin died last Saturday night with convulsions.

CEDAR CITY. Fruit-Except in sections where drought is most prevalent, where the damage was caused by high wind, conditions were favorable for the rapid advance of fruit crops. Apples, peaches, plums and plums are being shipped in considerable quantities; prospects for late peaches and apples are generally good.

Grain-harvest and threshing of small grain continues over most of the state, having been completed in a few favorable localities, except in extreme northern counties the yield is fair to good; in elevated sections the hot weather and the half of the present month was of great benefit to crops, and in these districts the prospects are greatly improved. Hot weather has also been of benefit to corn, which now promises good returns. Some crops have been damaged by hail, high wind and heavy rain.

Grasses-Some hay in the field was damaged by rain in southeastern localities; aside from slight interruption from the showers, the hay crop is doing well. Windy weather has progressed rapidly, with results satisfactory in most sections; the second crop clover and timothy are yielding well in southwestern valleys; grain, grass and other crops are doing well, though some of the stock is still finding ample summer feed.

Vegetables and melons-The potato crop, on the whole, appears to be somewhat poorer than the average; garden vegetables and sugar beets are doing well, except in drought-affected districts in northern counties; melon shipping continues active.

PRESTON, IDAHO. RUSHING GRAIN TO MARKET. Excellent Dry Farm Crops-Heavy Frost-Welcome Rain.

Special Correspondence. Preston, Oneida Co., Idaho, Aug. 24.—The farmers of this section have been rushing their harvesting and threshing and crowding their grain to the market, wheat having reached the 70-cent market price, which is a pleasant thing for the farmer. The dry farm crops are excellent throughout these parts.

It is feared that the heavy frosts which have occurred the last few nights will do a great deal of damage to alfalfa feed.

The work on the Central school building is progressing quite well now, but people regret very much that it will not be ready for this year's school work.

A pleasant rain fell occurred here this morning and continued most all day.

BAKER CITY, ORE. FIFTH ANNUAL REUNION. Of the Old Folks of Baker and Union Counties, Oregon.

Baker City, Or., Aug. 19.—One of Utah's good institutions—the annual reunion of the old folks of Baker and Union counties—has taken deep root in Oregon, and is becoming more popular every year.

Mr. Joseph Barton our popular freight and passenger agent of the Sumpter Valley railway, was the guest of honor at the movement. He labored hard to bring it about and succeeded, resulting in a mutual and friendly feeling between the good people of eastern Oregon and our own.

The O. R. & N. company has now come into line and has carried the old people free to this place of meeting.

The Baker City Democrat this speaks of the last affair just held here as "The fifth annual reunion of the old folks of Baker and Union counties held here yesterday marked an epoch in eastern Oregon and was a gala day for all those who participated in the event. The old folks, all of whom were 65 years of age and upward, in attendance upon the convention numbered nearly 400, and they were all of them light hearted as a parcel of school boys and girls. There were also present a number of distinguished guests among them being Gov. George E. Chamberlain, who made himself one of them and mingled with the old folks from early morning until late in the evening, and took part in the fine program which was rendered. He made no long speeches, but listened to everyone who had a favor to ask, a grievance to present or a story to tell. The governor was everywhere and all the time the enthusiasm and interest of all. No one would have known him if he had not been there. He was seen here mixing in and out of the crowd, eating his luncheon, joining in the games and taking part in the jollification like all the rest.

Baker City and the Baker City entertainment committee can well be proud of yesterday's reunion convention and the good time which was had by all. The old folks of Baker and Union counties have a grand good time.

The Union delegation was in charge of E. S. McComas and a large committee, over the Sumpter Valley R. R. S. Newbury, president of the Baker and Union counties delegation were in charge of Mrs. J. D. Slater, Mrs. J. D. McKinnon, Mrs. Schaeke, J. M. May, W. C. Clavins, J. W. Scribner, Preston, U. G. Couch, Saylor and J. D. Slater.

Frost Causes Anxiety Among Grain Growers—Crops Otherwise Promising.

Special Correspondence. Lyman, Wyo., Aug. 23.—Last night the Lyman people had a time of rejoicing in honoring the 47th anniversary of the birthday of Samuel R. Brough. The people assembled in the meeting house and gave the Bishop a genuine surprise. The opening speech was made by J. H. Eardley, sister Ada Rollins, in behalf of the Lyman people, and the Bishop with a bouquet of flowers as tokens of the love and esteem of his people, to which the Bishop feelingly responded. A poem composed for the occasion by Eardley Rollins, was read by Sister Jane Phillips. Then followed a program of songs, speeches, instrumental music and recitations.

The last two nights brought with them frost, causing much anxiety among the farmers. It is believed that the grain is injured some, but cannot tell positively.

LYMAN, WYO. BISHOP BROUGH HONORED.

Weekly Crop Bulletin and Weather Report.

United States department of agriculture, Idaho section, climate and crop service, weather bureau. Weekly crop bulletin, for the week ending Monday, Aug. 22.

At the beginning of the week the weather was extremely warm over the entire state; toward the close it became much cooler, the change having been accompanied by a considerable amount of high wind in exposed districts; the cool wave reached its climax on the morning of the 21st, when a heavy shower of rain was common occurrence in southern counties. Some local showers occurred in eastern sections, these having been unusual, or very in some extreme southeastern localities, in other portions of the state the season's rain was not so general.
