NEWS OF THE DAY.

The telegrams say that the President of the United States and a portion of his cabinet went to the Capitol yesterday and conferred with the principal republican senators, urging the passage of the new revenue bill. Last night the Senate passed the bill as it came from the House, and thereby added thirty millions annually to the amount of the people's burdens.

The flood is said to be subsiding in Here. It is a creative work considering from a Washington paper.

An architect and engineer of standing writes to a New York paper that he has had a long experience in the use of coal, and that he has found that the best method of burning coal is to use a grate of cast iron, and to use a grate of cast iron, and to use a grate of cast iron.

The U. S. House of Representatives, last night, adopted the majority report in the Arkansas case, which recognizes the Garland, and repudiates the Brooks, government.

Some of the principal hotels at Alexandria, Va., and Baltimore, Md., have been closed because of the passage of the Civil Rights bill.

General Lorenzo Thomas, formerly adjutant of the U. S. army, is dead.

The Wisconsin State Senate has passed a railroad bill less rigorous than the so-called Potter law.

The Alphonso defeated the Carlisle in a recent battle.

Bismarck gave a dinner to the members of both houses of the Prussian Parliament yesterday.

A New York dispatch, received this afternoon, says that the Pacific railroad party have acquired a controlling interest in the Pacific Mail stock.

NEWS NOTES.

The happiest couple in America—Colfax and Beecher.

"Olympian" church is a power, sir," exclaims the Brooklynite.

On the first of March free postal delivery began in most of the cities of the Dominion of Canada.

A young lady at Elmsburg, Canada, died suddenly one night of apoplexy, supposed from wearing a tight corset in bed.

A large deer park is in full operation at Maine Prairie, Minnesota, where the hunting and buying and selling of deer is made a business.

A Texas paper says: "There hasn't been a man killed in this city for three months, and it seems as though the good old times never will come back again."

A statute of Illinois, making the owner of any dog or dogs caught killing sheep liable in action for all damages, is being enforced in one of the southern counties of the State.

They are very accommodating out in Utah. Under a law of that Territory a person convicted of a capital crime, given his choice whether to die by the gallows, the guillotine, or the guillotine.

At Newgate, London, executions are now performed with a low gallop, the condemned man standing on a trap door with the guillotine, and the door falling into a pit at a given signal.

The Roman Catholics of Germany have resolved to demonstrate their unflinching allegiance to the Holy See by a pilgrimage to Rome, in which deputations from every diocese in the Empire are to take part.

An exchange advances the grave opinion that "the winter has been a long and tedious one, but there is every reason to believe that it will come to an end, and be succeeded by warm weather and spring."

Perhaps one ought not to mention such things, but it's hard to keep from thinking how different the history of this country might have been if Ulysses S. Grant, Benjamin F. Butler and Henry Ward Beecher had been born girls.—Ex.

President Eliot, of Harvard, says of the compulsory physical exercises in schools: "They should form part of the programme of every school for boys, and should be insisted upon just as regularly as Latin and mathematics."

Capt. Boynton, in his diving dress, calmly paddled himself from Wapping to Westminster, with the American flag flying at the head of the mast, which stuck in his belt. His progress created a fair amount of enthusiasm, and scientific men who have examined the dress declare that it is perfect in its way.

The production of "Henry V." at Booth's Theatre, New York City, requires forty-four actors and actresses, four hundred horses, and a large number of other things.

PROZEN WATER PIPES.

The passing severe winter is noted in many eastern cities for freezing the water pipes to a very unusual extent, and suggestions are given as to preventives, etc., of such an inconvenient occurrence. The Albany Express has the following as a simple and effective method of thawing the ice in water pipes—

"When your water pipe is frozen take the brine that is commonly used in preserving pickles, pork, etc., and pour it around the water pipe, allow it to remain a short time and if the water don't come then it will be the fault of the reservoir."

The Express does not say how the brine is to be held in the muslin to effect the cure.

Here is a preventive worth considering, from a Washington paper—

"An architect and engineer of standing writes to a New York paper that he has had a long experience in the use of coal, and that he has found that the best method of burning coal is to use a grate of cast iron, and to use a grate of cast iron, and to use a grate of cast iron."

THE UNBEARABLE HARD TIMES IN THE UNITED STATES.

A THOROUGHLY RADICAL.—This is how the Jackson, Ohio Journal would settle matters in Louisiana.

"Louisiana is the furthest from being a foreign state of any one in the Union. She was a foreign province when purchased with the money of the nation. She was a conquered province when she had been subjected to the national blood after the Democratic rebellion. She should be held as a conquered province until the Democrats are either shot, hung, or until they die a natural death. There is no safety in any other course."

ALL UNDONE.—An exchange says—

"The good wives and husbands of Indiana will be dumfounded when they learn that the marriage law of 1852 (under which all matrimonial contracts have been made) is about to be repealed, and that all marriages under that law are illegal."

That is the fault of the law, not of the married people. People must and will get married, law or no law. So just make the law to suit.
