

MINING, BUSINESS AND STOCKS

IDAHO PROPERTY SHOWING UP WELL

Reports From Little Lost River District Indicate Strong Possibilities.

A GOOD CAMP IS LOOKED FOR.

Metta Mining and Development Company is Incorporated to Work Group of Claims.

(Special to the "News.") Camp Wilbert, Ida., Nov. 5.—That there will be a good and perhaps great mining camp on the Little Lost River is beyond a question of doubt. Upon the other hand, it is fast becoming an actual fact.

A group of claims situated near North Creek have been incorporated with a capital stock of \$300,000, and is known as the Metta Mining & Development company. The promoters and directors of the new company are W. O. Young, J. E. Rupp, Joseph T. Carruth, W. E. Jones and E. Cowles of Blackfoot. W. E. Jones is manager. A house has been built recently and the work of development will begin at once. The company expects to ship several cars of ore during the coming winter. From the body of ore in sight and the fact that it lies in the Spring Mountain mineral belt, it promises to be a mine of the future and may equal the famous Gilmore in its output, as it is a lead proposition.

W. O. Young and I. A. Brun, lessees of the Daisy Black mine, have arranged with W. H. Thomas, recently of Era, Ida., to put in a small concentrating plant, and the reduction and shipment of ore will begin at once from that mine. This property is located on Camp Creek. Much credit is due Mr. Young in his untiring efforts to get capital here and the ore moving towards the Salt Lake smelters.

O. Belpas, having acquired control of the survey or a copper property on South Creek, intends to begin in the near future to extend one for shipment. Other claims will soon follow in its wake, especially will this be the case next spring, many new discoveries have been made of late and still a large country for prospectors to work in is left.

SEARCHLIGHT BOOMING.

Many Properties Showing Fine Results—Real Estate in Demand. Special Correspondence.

Searchlight, Nevada, Nov. 5.—Strike after strike, news of new ore bodies being discovered, have been the daily tidings in Searchlight during the past week. Seven strikes on seven different properties on the "flat" west of Searchlight, all within a radius of five miles, have caused a score or more of owners in that district to get busy and start developing. Derricks and hoists can be seen in numbers for miles on the "flat," and dumps are springing up like molehills. During the week the Superior Nevada struck ore on the Colorado group, in the main working shaft, at a depth of 40 feet. The Challenge City group, owned by Santa Barbara capitalists, was in ore at 90 feet; the Golden Rod, Searchlight-Yanina Sunny Jim, Searchlight-Vernon and Bonanza group also sent in encouraging reports. Properties in this district are now in good demand, and extensions and nearby ground of the companies now operating are being sought for. The Wyoming-Searchlight is down 250 feet, and the values are gradually increasing, showing larger ore bodies, and verifying the already proven theory that depth shows up valuable deposits in this camp.

SHAFT ALL IN ORE.

The Superior-Nevada Gold Mining company is sinking a shaft 533 in the clear on the Colorado group, situated eight miles west of Searchlight. At a depth of 40 feet, the shaft is all in ore and the assays run from \$3.30 as high as \$130 in gold and silver. General Manager G. W. Huntington states that the company will start another force of men at work immediately, sinking another shaft on the St. Paul group, south of Crescent. On this group large bodies of free milling ore have been exposed carrying values from \$2.15 to \$65, besides a narrow streak which runs into the hundreds. A pocket sample ran \$405.80 as per assay by Stone & Brown, Inc. Several rich strings have been encountered carrying high grade values on the surface and a shipment has already been made from the property. The management of the Cyprus Noble company has temporarily reduced the working force in the mine pending some important changes in the developments of the company. The pumps have been raised to 400 foot level and the hoist will be changed from the east to the west side of the incline shaft.

SECURES RICH GROUND.

Speculation has been rife in Searchlight for the past few days as to the mission of Thos. E. Gahagan, the mining engineer, who has been secretly engaged in examining several properties in the "flat" west of Searchlight. It is, however, learned from good authority, that Mr. Gahagan has secured the Sunny Jim group, lying about five miles west of the Quartzite, upon which a marvelous strike of exceedingly rich ore was made recently. The property has been found to be real bonanza and the capitalists in whose employ this engineer is working have succeeded in consummating the purchase of the entire group, and will proceed at once with thorough seismic development. Notwithstanding the efforts to keep the matter, it is definitely known through reliable sources that the assays made from the sampling by Mr. Gahagan show excellent values, and the ledges are strong, well defined fissures. This property will be open up in a thorough manner, and the operation will mark a new era in the production of the Searchlight district.

REAL ESTATE BOOMING.

Real estate is booming in Searchlight these days. Stone & Brown, Inc., T. S. deputy mineral surveyors, are at work surveying and platting two extensive

additions to the present townsite. One, known as the "Searchlight-Santa Fe Townsite Addition," comprising about 70 acres on the Royal group, situated about half a mile west of the original townsite. This tract will contain some 100 lots. The other addition will be located on the property of the Boulder M. & M. Co., immediately adjoining the terminal of the Barnwell & Searchlight railway. This tract will cover more than 100 acres, and is being laid out by Stone & Brown, Inc., in an especially attractive manner. Some of the features will be the wide streets, the generous size of the residence lots, which will measure from 125 feet, a generous plaza immediately adjoining the depot, and a park to be located in the heart of the residence district. There will be from 600 to 800 lots in the tract.

BACK ONCE MORE.

Colonel E. A. Wall Returns From Visit To Washington and New York.

Colonel E. A. Wall reached the city yesterday from New York City, and is again to be found in his offices in the D. F. Walker block.

Colonel Wall has been for some weeks past at Washington, D. C., where he was present at the hearing of the case, which he is prosecuting against the United States company for title to valuable ore deposits at Bingham. The case is known locally as the Kempton case.

Col. Wall says that he is highly satisfied with the way the case has gone so far, and while it is not likely that a decision will be reached short of four or five months from now, he has every confidence in the result.

Col. Wall spent some days in New York after leaving Washington. He met Sam Newhouse there, besides one or two other Salt Lake men, and the party had a most agreeable visit.

COBALT ATTRACTS ATTENTION.

Sam Newhouse Acquires Interest In Property.

Samuel Newhouse of Salt Lake has decided to interest himself in Cobalt. As one of the incorporators of the King Edward company he is reported to have already invested \$300,000 in gold cash and should things go to please him this sum will not likely mark the limit of his investments.

A BURGLAR PROOF SAFE

What! Something a burglar couldn't get into? Well now that would be interesting. This kind of a safe is now on exhibition at numbers 113-115-117 south West Temple, where the genial Mr. Field is on hand to display this truly wonderful invention in this inventive age. The safe sells under the name of the Herring-Hall-Marvin Burglar-proof Chest. A description of the intricate and yet withal simple mechanism of this safe would be difficult indeed. Bankers and others who have valuables will be most interested in calling and examining this safe. "Copied from an Eastern Daily."

PROVE FIRE-PROOF QUALITY OF HAMILTON SAFES.

Even the Wood-work Was Not Damaged Tho the Safe Was Left in a Furnace 45 Minutes—Usefulness of Safe Not Destroyed.

In preparing a new catalog, the Herring-Hall-Marvin Safe and Lock Co. took occasion to photograph one of their smaller safes a few days ago, with a view to demonstrating the fact that the safes were absolutely fire-proof. The small safe was 2 feet by 1 1/4 feet in dimensions and was placed inside the tempering furnace of the plant. Something of an estimate of the intense heat can be gained when it is said that within a few minutes after being placed inside the furnace, the safe was red hot, the safe was allowed to remain in the furnace for 45 minutes in an effort to see whether at the end of that time the papers contained therein were damaged or not.

At the expiration of that time it was taken out, allowed to cool sufficiently and then opened. The test showed that not only were the papers intact and unharmed but the wood parts of the safe had not been injured to even the least degree. It is generally conceded that one fire will so damage the exterior of a safe as to render it useless, but this safe was a few days later placed in the same furnace and allowed to remain there for forty-five minutes and when taken out the papers inside were found to be uninjured.

So intensely hot was the furnace, that the photographer was compelled to stand 12 feet away in order to make the photograph. These splendid tests demonstrate the worth of the safes made by the Hamilton concern and are very flattering.

BUSINESS QUIET AND MARKET WEAK

Trading on Floor of the Local Exchange Smaller Than Usual.

AS INDICATED BY FIGURES.

Excitement Incident to Yesterday's Election Interferes With Volume of Business—Nevadas Very Quiet.

Business on the floor of the Salt Lake Stock & Mining Exchange this morning was light, indicating that the market has not yet recovered from the excitement incident to an election.

Nevada Hills and Lou Dillon were the only stocks other than Utah, dealt in, the former selling at \$2.25 to \$2.35 on a falling market, 1,500 Lou Dillon was sold during the regular call at 45 cents.

Columbus Consolidated was perhaps the feature of the open board session, no less than 1,000 shares, changing hands, mostly in lots of one and two hundred, the price running from \$5.00 to \$6.20.

The market was weak and uncertain, throughout the morning, and a number of stocks declined a point or two.

The total business during the regular call amounted to 3,355 shares, representing a worth of \$2,635.50, the open board sales amounting to \$5,650, representing a worth of \$12,631.75.

VALUES EXTRAORDINARY.

Assays of Nevada-Rockland Ore Show Fine Results.

Charles Baxter of the Nevada-Rockland brought to Yerington Wednesday last a ton of ore from the new strike in the mine, which was reported in our last issue, says the Yerington (Lyon County) Times. Assays from grab samples of this ore run \$13.08 per ton, this assay being shown to us just before we went to press last night. The ton of ore will be shipped today on Monday to Selby & Co. The ledge from which this assay comes has widened to five feet and is looking better with every shot put into it. This strike is at a depth of about 200 feet from the surface. Keep your eye on the Nevada-Rockland. It is liable to be a second Mohawk.

GETTING GOOD RESULTS.

Work on Native Copper Company's Ground is Highly Satisfactory.

The Native Copper Mining company which is an organization composed mainly of Reno people, with Benj. Currier, president, H. Pennington, vice president, Sophia Knox, secretary and treasurer, and John Pothoff, F. D. King, Theresa Pennington and H. Pennington, directors, has been doing considerable development work in the past two months on its claims just west of Yerington.

The company is capitalized for \$500,000.

CONCENTRATES.

C. O. Ellingwood will leave tonight for New York on mining business.

Walter C. Orem has gone to Yerington to look over his interests there.

R. J. Jarvis of the Rainbow property at Alta returned to Salt Lake yesterday after a visit to the camp.

C. D. Rookledge returned from Nevada Monday night. Politics took up the major portion of his attention yesterday.

Louis D. Gordon of Round Mountain left Salt Lake for camp yesterday. He expects to spend nearly all winter at the mines.

Willard F. Snyder returned from New York yesterday in time to cast

his vote and attend to some other matters requiring his attention.

Grant Snyder manager of the Nevada end of the National Development is in the city for a few days. He brought back some handsome specimens of rock from the company's properties there.

M. M. Johnson, chief of the Newhouse engineering staff, has returned from a trip into British Columbia, where he went to inspect the property of the Dominion Copper Co., of which he is general manager.

BULLFROG RUSH MINING COMPANY.

TO STOCKHOLDERS:

Recent developments on the Bullfrog Rush property are such that we do not feel justified in further disposing of treasury stock at the original promotion price.

The values reported in the wine, on which the early great hopes of this splendidly located property were based, have not held out at depth, and at the present workings the assays obtained were so unsatisfactory that we cannot at this time further recommend the purchase of the stock.

To all who have purchased Bullfrog Rush Mining Company shares from the L. M. Sullivan Trust Company we make the following proposition:

Return the stock to us and select any new promotions any other stock you like before it is listed. We will credit you with the amount you paid for Bullfrog Rush shares against any subscription you make to our new companies.

THIS OFFER IS GOOD UNTIL JANUARY 1.

L. M. SULLIVAN TRUST COMPANY, Goldfield, Nevada.

Bullfrog Rush Mining Co. GOLDFIELD NEVADA, NOV. 6, 1906

TO THE PUBLIC

We desire to state that the use of our names in the advertisement of the so-called Union Securities Company of Nevada as directors of the Bullfrog Rush Mining Company, in which it is stated that six million dollars' worth of ore is already blocked out in this property, is unauthorized, and that according to our best information the statement is absolutely and UNQUALIFIEDLY FALSE.

The property is unquestionably a splendid prospect and during the course of its early development held out great hopes of becoming a great mine, but at this time the best average assays obtained in the lower workings are from sixty cents to one dollar per ton. There is a large quantity of ore that has been opened up in the mine and upper tunnels which gives assays of from fifteen to thirty-five dollars per ton, but this, in itself, after deducting the cost of mining and milling does not establish for this property a valuation of \$325,000, which on a capitalization of 1,500,000 shares at the par value of one dollar, offered at fifty-five cents per share, would be the case.

We retain our positions on the directorate of the Bullfrog Rush Mining Company for the present in order to protect important interests, but we warn anybody who intends investing in the stock of the Bullfrog Rush Mining Company that if he does so it is at his own risk, nor do we in any way endorse any other venture of the United Securities Company of Nevada, of whose responsibility we know nothing. (Signed)

JOHN SPARKS, Governor of Nev.

Director of the Bullfrog Rush Mining Company.

L. M. SULLIVAN
