

COUNCIL CHAMBER QUIET AGAIN.

Chief of Police Question is Not
Alluded To.

IMPROVEMENTS TO BE MADE

North State Street to be Paved With
Asphalt—City Will Contest Right to
Take Water at Higher Point.

All was peace and quiet at last night's session of the city council. Had it not been for the familiar remark of Robertson at the close of the session, there would have been nothing whatever to remind the spectators that there had ever been any trouble or excitement in the council. No reference whatever was made to the late Thompson-Hilton fight during the proceedings and the only matter that brought forth any argument at all was the location of the crematory, and that was confined to the speakers, Hewlett and Peniston.

Just before the motion to adjourn was voted upon, Robertson suggested that, inasmuch as the expected scrap had not taken place, the president be instructed to refund the admission fees of the spectators present. This was greeted with laughter and applause.

There was a great deal of business disposed of, among the most important matters being the consideration of City Attorney Nye's communication in relation to the Jordan Narrows litigation recently decided by the supreme court. Mr. Nye was unable to state what effect the first decision would have upon the city's rights to the water of the Jordan river, but that he would soon present an application to the district court for a construction of the decree. The second decree amounted practically to an abandonment by the city of that portion of its canal lying between the intake and the power company's flume. Mr. Nye recommended that proceedings be instituted at once to establish the city's right to take out water at a higher level. That delay might prove fatal as the power company might secure a vested right in the water and thereby prevent such an action on the part of the city.

By taking the water out 50 feet higher it was suggested that the city would be enabled to trade part of the canal water for the balance of the Parley's canyon water and part of the Big Cottonwood water. The recommendation was concurred in and the matter was referred to the waterworks and irrigation committees, the mayor and land commissioner, city engineer and the city attorney.

Hewlett introduced a resolution for the erection of a new crematory on the old site. In support of the resolution Mr. Hewlett stated that the old crematory had been burned down for over a year and it was time the council was getting down to business and settling on a suitable site and building a new one. He contended that that location was an ideal one and a better one could not be found.

Peniston objected to the location, as he thought it was too far out of the city and had no railroad facilities and it would cost more to operate a crematory there for that reason. The resolution was adopted, however, by a vote of 4 to 4.

Hewlett also introduced a resolution authorizing the city recorder to advise for the bids for the construction of crematory on the old grounds, which was also passed.

An ordinance was passed abolishing the office of city prosecutor and creating the office of second assistant city attorney and fixing his salary at \$900 per year, payable monthly. The ordinance, as presented, fixed the salary at \$1,200, but Robertson thought that \$900 was a much more reasonable salary than \$1,200 and moved to substitute \$900 instead of the original amount.

An ordinance was passed allowing the Oregon Short Line to increase its rate of speed from Third north to Fourth South street to twelve miles an hour instead of eight.

Robertson's resolution providing for the appointment of a special committee of five members to investigate the question of a site for a new city jail was passed.

The committee on fire department recommended the immediate purchase of a modern steam engine and the construction of six storage cisterns in the business district. The cisterns as planned by the city engineer will have a capacity of 15,000 gallons each, and will cost about \$5,000, and will be located at the intersection of Main and Brigham, Main and First South, Main and Second South and State, Second South and West Temple streets. The matter was continued for one week.

The petition of T. E. Forshee, for permission to use part of the street at 235 and 255 State street for the purpose of filling a building material thereon, was granted.

The petition of Joseph F. Smith et al. asking that State street between South Temple and North Temple be paved with asphalt, was granted, and the city recorder was instructed to advertise notice of intention to make the improvement.

A communication from City Attorney Nye, calling attention to the status of the case of Brigham E. West vs. Salt Lake City, was read. West sued the city for \$500 for services rendered as constable in poll tax cases. The communication stated that after a thorough investigation of the matter the city attorney was of the opinion that West could recover from the city the sum of \$268.55, with interest and costs. West has offered to compromise the case for \$200 if that amount is paid immediately, and the city attorney recommended that the offer be accepted. The communication was filed and the sum of \$200 was appropriated to the mayor's contingent fund to settle the matter.

BABY'S VOICE

Is the joy of the household, for without it no happiness can be complete. How sweet the picture of mother and babe, angels smile at and commend the thoughts and aspirations of the mother bending over the cradle. The ordeal through which the expectant mother must pass, however, is so full of danger and suffering that she looks forward to the hour when she shall feel the exquisite thrill of motherhood with indescribable dread and of child-birth can be entirely avoided by the use of Mother's Friend, a scientific liniment for external use only, which toughens and renders

pliable all the parts, and assists nature in its sublime work. By its aid thousands of women have passed this great crisis in perfect safety and without pain. Sold at \$1.00 per bottle by druggists. Our book of priceless value to all women sent free. Address: CHASEFIELD REGULATOR CO., Atlanta, Ga.

THOUSANDS OF FAIR WOMEN HERALD PRAISES FOR PERUNA.

Catarrhal Dyspepsia and Nervous Prostration Make Invalids of
More Women Than All Other Diseases Combined.

Peruna is the woman's friend everywhere. It is safe to say that no woman ever used Peruna for any catarrhal derangement but what it became indispensable in her household.

Letters From Women.
Every day we receive letters from women like the following. Women who have tried doctors and failed; women who have tried Peruna and were cured.

Miss Katie Klein, 6125 Bartmer avenue, St. Louis, Mo., writes:
"Peruna has done me more good for catarrh than the best doctors could. I had catarrh so bad, but after taking Peruna it is entirely gone, and I feel like a different person."

Miss Anna Prescott's Letter.
"I am sincerely grateful for the relief I have found from the use of Peruna. I was completely used up last fall, my appetite had failed and I felt weak and tired all the time. My druggist advised me to try Peruna and the relief I experienced after taking one bottle was truly wonderful."

"I continued its use for five weeks, and am glad to say that my complete restoration to health was a happy surprise to myself as well as to my friends."—Anna Prescott.

A constant drain of nervous vitality depleting the whole nervous system causes the mucous membrane surfaces to suffer accordingly. This is the condition called systemic catarrh. It very nearly resembles, and there is really no practical difference, between this condition and the condition known as neurasthenia, or nervous prostration.

Peruna will be found to effect an immediate and lasting cure in all cases of systemic catarrh. It acts quickly and beneficially on the diseased mucous membranes, and with healthy mucous membranes the catarrh can no longer exist.

Peruna Makes You Feel Like a New Person.
Miss Marie Coats, a popular young woman of Appleton, Wis., and president of the Appleton Young Ladies' Club, also speaks in glowing terms of Peruna. A letter recently received from her by The Peruna Medicine Company, of Columbus, Ohio, reads as follows:

"I am glad to call the attention of my friends to Peruna. When that languid, tired feeling comes over you, and your food no longer tastes good, and small annoyances irritate you, Peruna will make you feel like another person inside of a week."

"I have now used it for three seasons, and find it very valuable and efficacious."—Miss Marie Coats.

Diseased nerves are traceable directly to poor digestion, and poor digestion is directly traceable to catarrh. With the slightest catarrh of the stomach no one can have good digestion.

Very few of the many women who have catarrh of the stomach suspect what their real trouble is. They know they belch after meals, have sour stomach, a sensation of weight or heaviness, a fullness, irregular appetite, drowsiness, gnawing, empty sensations, occasional pain—they all know this; but they do not know that their trouble is catarrh of the stomach. If they did they would take Peruna.

Peruna cures catarrh wherever located. As soon as Peruna removes catarrh from the stomach the digestion becomes good, appetite regular, nerves strong, and trouble vanishes. Peruna strengthens weak nerves, not by temporarily stimulating them, but by removing the cause of weak nerves—poor digestion. This is the only cure that lasts. Remove the cause: Nature will do the rest. Peruna removes the cause. "Health and Beauty" sent free by The Peruna Medicine Co., Columbus, Ohio.

owns 150 miles of track, covering eighty miles of the streets of Denver, and includes the former holdings of the old tramway company, the Metropolitan Street Railway company, the Denver Consolidated Tramway company, the Denver City Railway company, the West End Railroad company, the Denver City Traction company and Colfax Electric company. The company is stocked for \$500,000 and has \$537,000 in bonds outstanding.

Canadians Want Shoe Duty Increased.
New York, Feb. 19.—A deputation of boot and shoe manufacturers from all over Canada will wait upon the Dominion government to request an increase of the duty upon imported shoes, says a Montreal special to the Times. Another complaint is that the Canadian manufacturers have to pay high duties upon the fine leathers they import for this class of shoes, while the shoes are admitted at a figure which makes it impossible for them to compete with the American manufacturers. They will, therefore, require an increase of the present duty from 25 per cent to 35 per cent.

Catholic University Extension.
New York, Feb. 19.—It is proposed to establish in this city a branch of the Catholic university of America, to be known as the department of pedagogy. Next Saturday a meeting will be held at the Catholic church, when Right Rev. Spalding, bishop of Peoria, will make an address on the question.

Longest Electricity Transmission Line.
Helena, Mont., Feb. 18.—The largest, longest transmission of electricity in the world has just been completed by the Missouri River Power company, transmitting power from its dam and plant at the Missouri river to Butte. The length of this line is 65 miles, crossing the main range of the Rocky mountains at an altitude of 7,250 feet, and a spur of the main range at almost an equal height. This power line conveys 12,000 horsepower, which is all the power available at the dam at present although the installation of the transmission plant is intended to convey that quantity when the additional dam contemplated by the company, for which a site has been selected, is completed.

The transmission line consists of two complete lines on parallel poles of three large cables each.

To Raise Colombia Armored Steamer.
New York, Feb. 19.—Arrangements have been made by the Colombian government, says a Colon dispatch to the Journal and American, to secure the services of a New York wrecking company to recover from the bottom of the shallow of Panama bay the government armored steamer, Laucha, which was sunk on Feb. 15 by the Padilla of the rebel fleet.

The sunken steamer not only ob-

structs navigation, but it is thought that the damage done was not great, and that the Laucha could be raised to the Colombian squadron within a short time in a serviceable condition as she was before the battle.

It is stated by a general of her officers that she was not sunk by any of the shots from the Padilla, but through the action of a young officer, who opened the sea-cocks as soon as it was known that the Laucha was sinking. The Laucha was the flagship of the government squadron sunk in Panama bay in the naval engagement on Jan. 13. The fight was marked not only by the sinking of the Laucha, but by the death of Gov. Alban (governor of Panama), who was killed by the first shot fired from the rebel fleet. The vessel was hoisted from the Chilean government.

Soldiers Arrive at Panama.

New York, Feb. 19.—The French steamship Canada has arrived at Colon from Savannah with 500 soldiers and 124 officers, among whom are three generals, says a Herald special from Colon.

Dr. Miguel Abadía Mendez, former minister of foreign relations, was also a passenger. He is en route to Chile, where he will act as special envoy from Colombia.

It is reported that Dr. Jose V. Concha, former minister of war, left Bogota last week on the steamship Athos for New York. His mission is unknown.

Highest Price for Real Estate.

New York, Feb. 19.—Record high prices for real estate on Fifth Ave. have just been broken by a sale of 2,300 square feet at the rate of \$74 per square foot. The property is located near Thirty-fourth street.

Telephone Co. President Resigns.

New York, Feb. 19.—At a meeting of the directors of the Telephone, Telegraph and Cable company of America, the resignation of J. M. Thompson, president, was received and accepted, and Henry S. Kearny was elected his successor. Mr. Kearny was commissioner of public buildings, light and supplies during the last administration in this city. Control of the Telephone, Telegraph and Cable company of America, which is the principal independent telephone corporation of the country, was acquired a few months ago by Chas. W. Morse.

Seeking Sites for French Schools.

Chicago, Feb. 19.—M. Lazare Welles, Baron d'Essex, Controller of the French Legation and Viscount de Faramond, members of the commission to look up sites for French industrial schools in the United States, again have visited President Harper of the Chicago university. They discussed with him the conditions upon which a favorable report might be made to the French government on the plan of locating two of the proposed schools, one of economics and one of engineering in this city.

It was stated after the conference that the French would not be closed until the French commissioners had seen John D. Rockefeller. They left last night for New York for that purpose.

Chilian Financial Situation Alarming.

New York, Feb. 19.—There is alarm in certain circles regarding the financial situation in Chile, according to a Herald dispatch from Valparaiso.

The trouble has been brought about chiefly by the unusual drop in customs duties last month of about 750,000 pesos and also by the reduction in nitrate exports due to the longshoremen's strike, which is now ended.

The government is devising means to meet the crisis. It has been decided that the payment of sums of more than 1,000 pesos be postponed, and that the appropriation for extraordinary expenses be not touched.

Economies in various directions will be carried out. It is reported that the new Chilean loan has been placed in Europe at 6 per cent interest.

SAN FRANCISCO TO HONOLULU.

New Ocean Freight Service Established via Seattle.

San Francisco, Feb. 19.—The departure of the steamship Meteor for Honolulu and other Hawaiian ports, via Seattle and Puget Sound ports, marks the beginning of a new ocean freight service between San Francisco and the islands.

The Meteor is owned by the Globe Navigation company, and is one of a trio of fast freighters which will hereafter leave this port every 20 days and compete with the Spreckels line and the American-Hawaiian Steamship company for the sugar carrying and general merchandise trade. The other vessels are the Tampico and the Eureka, each of 2,000 tons. None of them will carry passengers.

Army Officers Assigned.

San Francisco, Feb. 19.—Gen. Oscar F. Long, superintendent of the transport service at this port, will soon leave San Francisco to take charge at Washington, D. C., of the land and water transportation of the United States army, comprehending the Atlantic as well as the Pacific seaboard. He will succeed Gen. Bird, who is soon to go on the retired list. Capt. Carroll A. Devol will succeed Gen. Long at this post.

Maj. Carver, Howland, Twenty-ninth Infantry, has been relieved on duty at Fort McDowell and will sail for Manila, to there join his regiment, which is soon to return to this country. Lieut. Col. Morris C. Foote, Ninth Infantry, is assigned to the command of the post at Angel Island.

The police commission has closed 15 saloons near the Presidio gates on the grounds that they were a nuisance. The closing was a letter from Col. J. B. Rawles, commander of the post.

Santa Catalina Island is Sinking.
Berkeley, Cal., Feb. 19.—Prof. William B. Hart, of the University of California, has made the discovery that Santa Catalina island, the famous pleasure resort, is slowly sinking into the Pacific.

While dredging for marine animals on the coast of the island he found positive evidence in rocks and shellfish that the island had once extended three quarters of a mile from the present low tide limit. He estimates that the island is now 270 feet lower than it was formerly. This movement is apparently going on now, while the mainland coast opposite Catalina is slowly rising.

OUTLAW LEADER CAPTURED.

Ramon Galindo, Who Killed Capt. Jones of Texas Rangers, Taken.

El Paso, Tex., Feb. 19.—Ramon Galindo, leader of the island band of outlaws, who in 1892 ambushed and killed Capt. Jones of the Texas Rangers, has been captured by Sgt. Bryant, an ex-ranger. Galindo has been hiding but recently became involved in a shooting affray in Dona Ana county, New Mexico, and returned from Old Mexico was reported to the officers here who have since been on the lookout for him.

White Man Turned Yellow.

Great consternation was felt by the friends of M. A. Hogarty of Lexington, Ky., when they saw he was turning yellow. His skin slowly changed color, and his eyes, as he suffered terribly. His malady was Yellow Jaundice. He was treated by the best doctors, but without benefit. Then he was advised to try Electric Bitters, the wonderful Stomach and Liver remedy, and he writes: "After taking two bottles I was wholly cured." A trial proves it. Get your return from Old Mexico was reported to the officers here who have since been on the lookout for him.

GARDNER DAILY STORE NEWS.

Been waiting the arrival of the new hats for some time. And such hats—none just like them anywhere else. Maybe you can find some that look like them. But after they've been worn a while. There's when you see the difference. Price for price there are no other hats like the Gardner hats. Reason—We buy more hats—cause we sell more hats—and buying and selling more hats, isn't it reasonable to expect that we can buy and sell hats cheaper. All the popular styles are here. First the stiff ones, then the soft ones. Of course the Fedoras in latter styles will always be the favorites. But many new ones patterned after the Fedoras—infringements as it were. Queens, Pantominas, Florodora. Hats are \$1.00, \$1.50, \$2.00, \$2.50, \$3.00. Boys' hats, too, one to \$1.50.
