GOLD MOUNTAIN DISTRICT.

Active Campaign in Progress at Trapper's Pride and Jumbo.

Delbert Webb of Monroe, who has charge of the development work it the Trapper's Pride, reports that he new six men at work on the property and that two more men will be vork in a short time, says the Richfield Reaper. The principal work at present is the

pushing of an upraise from the tunnel to the surface for air. This upraise follow one of the walls of ledge. The ledge is being crosscut to determine its width and to search fo another vein believed to be close to and paralleling the one which has been exposed for several hunded feet in the 1.500-foot tunnel. The outlook for the property is all that could b expected.

H. J. Gottfredsen of Salina and Peter Gottfredsen of Richfield went up to the Jumbo property last Friday with a load of supplies. They will push work on the tunnel all winter. Eight hundred feet of track and an ore car have been shipped in to assist in the work. The tunnel is now in 250 feet and it

is expected to strike the first vein with in the next 30 feet. It is then expected tap another and larger veln in another 50 feet. The indications are very flattering for a good mine on this ground, and it is the intention of the gentlemen to keep at it until the character of the property is positively determined

LEADVILLE DISCOVERIES.

Great Colorado Camp is Far From Being Worked Out.

The active mining area of Leadville may be taken at about eight square miles, says the Mining Reporter. Be-low this area the formations are literally honey-combed with hundreds of miles of mine workings. It would seem to the novice that after some twenty-

No one familiar with the Leadville district can believe that the ore deposits end at California gulch to the south or at Evans gulch to the north; nor that Harrison avenue marks the western boundary of the district. The new discovery on Rock hill can-not fail to stimulate prospecting in the Leadville district.

ATTRACTED ATTENTION.

Mining Exhibit from Utah Has 'Made a Hit at St. Louis Fair.

Utah's world fair commission is holding a meeting this afternoon in its rooms at the city and county building. At the meeting yesterday, Commission er Newhouse gave a very enthusiastic report upon Utah's exhibits. He said that he studied carefully its education-al, mining and agricultural exhibits and marveled at their excellence in view of the limited amount of money which the commission had to expend on them. He said that the officials of a number of schools of mines had ngratulated him upon the mining extibit and the concentrating plant in particular, which they thought was the best practical demonstration of the method of reducing ones that they had

QUINCY DISSOLUTION.

Park City Corporation About to Become A Thing of the Past,

The Quincy Mining company of Park City filed an application in the district court at Coalville today asking that the corporation be dissolved The company was capitalized at \$75. 000, representing shares of the value of 50 cents each. The application for dissolution states that the action is aken in compliance with a resolution adopted at the meeting of the stockholders held on Sept. 17. The property of the Quincy com-pany was sold to the Daly-West min-

company several years ago and the above steps are being taken by directors of the old company to wind up the affairs of the corporation.

Tintic Shipments.

The shipments of ore from the Tintle uning district during the week aggregated 101 car loads, distributed as fol-Ajax, 2: Bullion-Beck, 5: Carlsa 3; Centennial-Eureka, 16; Eagle & Blue Bell, 10; Gemini, 30; Grand Central, Bell. Will Lessen Expenses.

Vice President J. D. Wood says the shutting down of the Quincy hoisting works and the connecting up of the lower workings with those of the Daly-West Mining company, will make a saving in operating expenses aggregating close to \$5,000 monthly.

BUSINESS NOTES.

A greatly improved feeling pervades all classes of business circles this week. The causes are many; First-the prices of farm products are high and money promises to be plentiful throughout the country during the fall and winter, Second-the beet sugar factories are all running in full swing, and reports from the beet fields continue to show increased tonnage everywhere. Thirdthe leading commercial institutions are paying their dividends this month, which sets a large volume of money into circulation. Fourth-the mines and smelters continue their enormous output, and the mining dividend disbursements which can be regularly relied on, do much to create an easy money mars ket. Retail busines has been brisk all the week; due to the influx of fair and

conference visitors; collections are better, and merchants have a generally hopeful feeling as to the fall outlook. In the local stock market sugars have

such ways as alluding to its growth in a given period; by showing how many dollars of surplus there are to each depositor; by a reference to the amount of real estate loans in the community; by pointing out the safe securities held by rigid state laws.

"Specify interest dates just before they are at hand. Do it in such a way that it cannot fall to attract, and do nothing else at the time except to re-fer to the interest rate. If the rate is about to be reduced by necessity adopt a series of advertisements to point out the causes in the tersest manner possi-

'Let each advertisement take up a step in the reason and at the same time he somewhat complete in itself. Put it in such a manner that a gain rather than a loss will be had in the face of such a reduction. Advertise the necessiay of safety in savings. Show up the relation of safety to high interest rates.

'Many bank men imagine that if an institution departs from the old way of advertising it loses its dignity. This is not so where advertising is done properly.

"Of course 'smart' advertising is to be strictly avoided. An advertisement can be original and still be clean and terse. A savings bank advertiser terse. A savings bank advertiser should be a thorough gentleman in the advertising world, but it should be re-membered that a thorough gentleman makes friends as well with the man of lowly rank as the one of higher staelon.

"The tone of publicity should always appeal to him for whom the savings bank was founded."

FOR PERMANENT DISPLAY

Exhibits Being Secured for Real Estate Bureau of Information.

Manager Miller of the Real Estate ssociation's bureau of information was busy all day today at the state fair grounds, selecting samples of the exhibits for permanent display in the bu-Prize winners at the fair reau. so far been liberal in contributing their products. The Utah Fire Clay company has promised to place its exhibit The

the disposal of the bureau. seedless apple display from a Provo orchard has been secured, and will be preserved in jars of alcohol. Other exibitors of fruit have been approached and so far no refusals to contribute have been made. Excellent samples of the large and arid farm exhibit have been promised, and will be given prominent place in the bureau's exhibit of Utah's fruits and cereals.

Mr. Miller expects to complete his sections by tonight, and move the exhibits to the bureau immediately upon the completion of the fair. The west vall is being prepared for the farm exhibit, facing the mineral exhibit which now lines the east wall of the room. Through the kindness of the Utah ugar company enough transparent ars have been donated to hold the ex-Sugar hibit of perishable fruits.

INDIAN DEPREDATIONS.

Reports as to Conduct of Utes Seem to Have Been Exaggerated.

Governor Wells today received a reply from Secretary of the Interior Hitchcock to his letter of Sept. 24, submitting complaints from the authoritles of San Juan county in regard to the depredations alleged to have been committed there in the past few years wandering bands of Indians from the Southern Ute, Uintah and Navajo reservations. It is claimed that the Indians have been intruding upon the grazing lands of that county and have committed petty depredations much to the annoyance of the residents of that locality, and Governor Wells requested the officials at Washington to investigate the matter.

Brigham City Man Badly Wounded While Out Hunting.

(Special to the "News.")

Brigham City, Oct. 8 .- Yesterday John Young and son of this city went out to Duckville shooting. While there the boat in which they were seated tipped slightly, and the son's gun, a 22-caliber target fifle, was discharged, the bullet entering the father's back and penetrating the stomach. A doctor was immediately summoned, but as he had to come a distance of 15 miles, the wounded man suffered considerably before his arrival. He is now in a crit-ical condition, with the chances for his recovery very slight. Mr. Young is a highly respected citizen and the dis-iressing accident is much regretted by the community.

chance of recovery, and that everything possible was being done for him. Mr. Newey has gone to Butte for the pur pose of rendering all necessary assist-ance. The unfortunate man is about 6 years of age and unmarried. He has been in the employ of the express company for some years, and has many friends in the Junction city.

HARMSWORTH PAPER MILL. Will Help United States Publishers if

Tariff Should be Removed,

Sir Alfred Harmsworth may make a success of his Newfoundland paper mill enterprise, because he was born a lucky man, but the experience of news. paper publishers in this country has been that it is wiser to buy white paper in open market even under the dic-

tation of the so called paper trust than to make it in mills of their own. William H. Singerly of the Philadel-

phia Record went broke making his own white paper instead of buying it. Mr. Bennett of the Herald, who is one of the best judges of paper stock, con-tracts for his printing paper himself. The expenditure of \$5,000,000 in Newfoundland will prove a great boon to that island.

It is a tribute to the clever intuition of the young publisher that he should first to comprehend the future pos.

sibilities of the great island that lies almost halfway to Europe. This tract of 1,280,000 acres will sup-ply pulp for the civilized world. If the day ever comes in which the pro-tective duty now levied is removed, the publishers of the United States will welcome Sir Alfred's white paper.

This enterprise will do wonders for St. John's, although the Harmsworth shipping point will be Lewisport, m Notre Dame bay, distant from Livernool only 1.720 miles. Harmsworth will have his own railroads through the vast property. Sir Alfred certainly is a hustler.-Julius Chambers in Brooklyn Eagle.

HEARST'S PAPER MILL,

Rumored He Will Follow the Example of Harmsworth.

William, R. Hearst is to follow the example of Sir Alfred Harmsworth in manufacturing his own paper, according to a report which has been in circulation among paper manufacturers. Mr. Hearst is said to have secured a large tract of land for this purpose at Bombazee Rips, on the Kennebec riv-er, in Maine. This location is three miles south of the Madison mill of the Great Northern Paper company,

The superior natural water power at In his reply Secretary Hitchcock says Bombazee Rips is said to make that
