TO TAKE THREE MONTILS. It is believed that the trial will continue for at least three months. The indictments against the four man charged with a conspiracy, hatched in this city in 1901 to de-fraud the United States out of many thousands of acres of public lands in the west. It is alleged that these men, operating through the names of fictificus persons, acquired school lands in Oregon and California by false entries and forged signatures, by en-tries later transferred with the help of information from subsidized clerks in the general land office. Benson, who is a San Francisco millionaire, resisted extradition from California, as did his co-defendants, who are alleged to have done the actual work in the field and later car-ried the case to the United States su-preme court, where a decision unfav-crable to them was handed down. BINGER HERMAN'S WORK. It is stated that Mr. Newhouse offered to give outright to the county all the furniture of the house, worth at least \$1,800, and to turn the lease over to the commissioners. If the county would make that a nucleus for a detention home, or headquarters for a betterment league. The proposition was held open for acceptance until March 30, and when not taken advantage of, the place was sold as indicated.

LOVE AND MONEY MIX. Not only is sentiment, but money as well, involved in the break between Mme. Gould and the members of her family. The will by which Jay Gould disposed of his fortune contained a codicil which may have a prominent part if developments should follow a prolongation of the family trouble. This codicil provided that any of his chil-dren who should marry without first getting the consent of the other sons and daughters should forfeit one-half or his or her interest in the estate. In Mme. Gould's case the one-half interest is variously estimated at between \$6,-900,000 and \$5,000,000. It is said to be the contention of Mme. Gould, however, that this provision of the will was abro-gated as far as she is concerned when the consent of her brothers and sister was given to her marriage with Count Boni de Castellane. EMPEROR WILLIAM NEEDS A LITTLE MORE MONEY

Berlin, April 1.- An authentic report is in circulation that a bill will be introduced into the Prussian diet rais-ing the civil list of the emperor. This list now ariounts to \$3,20,000 a year, which sum is paid the emperor as king of Prussia and not as German emperor, a position which carries no salary. The explanation offered for raising the list is the increased cost of living, which bears particularly heavy on the royal house because a large number of chil-dren and other persons are depend-ent upon the purse of the monarch. In this connection it was learned to-day that the reports that the emperor lived beyond his income and often called upon rich friends for temporary loans are incorrect. On the other hand, his majesty, up to several years ago, saved each year a considerable sum from his income and invested it for his chil-dren is in circulation that a bill will be income and invested it for his chil-

at once into the conveyance. Quite a growd gathered along the water front, and there was cheering as the Yank-ton sailed by with the admiral's twin starred flag of blue at her truck.

The officers who accompanied Ad-miral Evans and who will remain with him during his stay at the hot springs, declare that the commander-in-chief is in much better health now than he was at the time of arrival at Magdalena bay. He sat in his emergency cabin, on the after bridge of the Connecticut on the way up from Magdalena bay and took a lively interest in every detail of the trip. The Connectleut left Mag-dalena bay early Monday morning, making the run to San Diego, a dis-tance of 620 miles in a little more than 45 benues 48 hours.

FIRST SERIOUS ACCIDENT

When Muzzle Blows Off Missouri's Gun Good Discipline Is Shown.

Magdalena Bay, March 26, via. U. S. flagship Connecticut, to San Lbago, April 1.--The first occurrence approach-ing a serious accident since the pres-Ing a serious acchient since the pres-ent target practice of the Atlantic fleet began, took place on the battleship Mis-souri at 2:30 o'clock this afternoon. The muzzle of a six-inch gun on the starboard side was blown completely off with the first discharge and pieces of it hurled with terrific force over the ship but fortunately no one was struck ship, but fortunately no one was struck and no other damage done. About 12 feet of the nuzzle of the big gun were blown away. The noise of the explo-sion was deafeng, but there was no excitement on board the ship, not even the crew of the gun which had exploded.

NAVY DISCIPLINE.

An instant after it had occurred, the gun captain, saluted his superior, the division officer:

division officer: "Sir, the muzzle of the gun is blown off," he said, quietly, as he brought his right hand to salute. There was no trace of excitement in his tones. "Silence," shouted Midshipman How-ard. It was the simple, usual word of call to the gun impires to note that an intr ruption had occurred. "Cease firing." Every man of the crew remained silently at his post as the abip proceeded steadily across the

the ship proceeded steadily across the range at the regulation speed without firing another shot. When she have to on the return trip an examination was made.

TWELVE FEET GONE.

'It was found that the trunion and breech of the gun were uninjured. An-proximately, 12 feet of the muzzle of the iong black barrel, weighing a ton, was missing, but the remaining 10 feet was unwrecked. The end had broken off in irregular, fagged pieces. Onoff in irregular, jagged pieces. One heavy section was hurled and glanced againt the mast. A second salled over the smokestacks and a third and larger plece was thrown straight across the quarter deck. If any of the heavy deces of steel had struck unything above the super-structure, the conpieces of steel had struck unything above the super-structure, the con-sequences would have been serious. The gan which exploded was of the ordin-ary six inch, be-caliber sort, mounted on the Missouri and sister ships. The pieces had been fired in several pre-vious target practices and the acci-dent today is as yet unexplained. G. E. Bradshaw, first assistant carget prac-tise infractor, was standing by the breech of the gun when the explosion lise inspector, was standing by the breach of the gun when the explosion occurred. He is unable to account for the accident. It was his first thought that the comple or protecting plus, had been left in the muzzle, but this was found not to have been the case.
