THE RECENT PANIC

Compelled some people to sell good stocks. Prices have been steadily rising ever since and good stocks are a little scarcer all the time. For this reason, if you have the money NOW IS A GOOD TIME TO BUY. Send us an order for any good commercial stock you wish to buy. We specially commend the preferred stock Utah-Idaho Sugar Company, It pays a DIVIDEND OF 175 CENTS ON A \$10 share EVERY QUARTER; and market price is certain to advance and future dividends SURE.

GETTING UNDER WAY.

General Manager Melatosh of Ohlo Copper in Bingham Today.

General Manager Colin McIntosh of the Ohio Copper company went out to Bingham this morning to get things in motion at the mine and mill. His first attention will be directed towards driving the Mascott tunnel ahead and to the sinking of the main shaft which to the sinking of the main shaft which is to be connected with the tunnel. It is figured that it will take about 90 days to equip the mill for operation, but it will require a little more time than that to shape the mile for opera-tion through the Mascott avenue, But by Jan, 1, if nothing unforseen hap-pens to prevent it, Mr. McIntosh will be ready to output 2,000 tons of orc per day from the mine.

MILL FOR THE IMLAY.

Directors Now Giving Consideration

To the Subject. The Imlay Mining company is giv-ing consideration to the matter of building a mill to provide facilities for the treatment of the vast bodies of low grade ores developed in its mine, which is located in Humboldt county, Nev. The proposition was brought up at a meeting of the board of directors a few days ago, when it was decided to employ some competent metallurgie, al engineer to conduct a series of tests before determining definitely what kind GOLDFHELD. Bonanze, 143; Kanney, 7 bid; al engineer to conduct a series of tests before determining definitely what kind of a plant is needed to obtain the best results. The mine contains a large quantity of ore valued at anywhers from \$\$ to \$16 per ton which will re-quire mill treatment before it can be considered commercially valuable.

ENGINEERS' LEASE.

ENGINEERS' LEASE. In comparison with recent achieve-ments, says the Goldfield, News, the performance of the Engineers' lease on the Florence this week was some-what off, but still the record is an en-viable one. The daily production was 40 tons, or 280 tons for the week. The average values were \$180, making a total output for the week of \$50,400. The figures given in the production table are for the ore extracted during the previous week and settled for dur-ing the past seven days. angle, 607; Coming Nation, 304.

Stoping is in progress from the sub-foot level. There is no diminu-tion in the extent of the ore shoot and the indications are favarable for a better production next week.

A car load of concentrate from the Albion mine at Alta is in the local market and will be sold during the field shippers will reap a generous har

day on controls showing 33.25 ounces in silver, 26 per cent lead and \$2.60 in gold. The product comes from the vest in consequence. Mr. Alberger is personally acquaint-ed with Dr. L. D. Godshall, vice pres-ident and general manager of the smelting company named, and was with him until a few days ago, during jigs recently installed near the tunnel intrance to the mine.

A meeting of mining men has been called for this evening at 8 o'clock at the Commercial club, the object of which is to consider the matter of organizing a Utah branch of the Amer-ican Mining congress. The call issued is signed by a number of prominent mining operators. It is understood that Samuel Nawhouse has constant with him until a few days ago, during the doctor's negotiations for the en-largement of the plant. The capacity at this time is about 100 tons a day, but the proposition is to increase this to from 500 to 600 tons daily, affording admirable facilities for handling the milling ores of this entire section of country. On Aug 15 Dr, Godshall will return to the Atlantic coast where, in all probability, the deal for reconstruc-tion and enlargement will be author-ized. The cost will be \$2,000,000, but the money is claimed to be in sight, as the partices back of the project are not unaware of the tremendous pos-sibilities of the enterprise. Needles, Cal., located south and a lit-tle east of Goldfield, has a lower rate basis for the hauling of milling ores from Goldfield than to the Selby smelt-er, Salt Lake or Denver. that Samuel Newhouse has cosented to preside
