And you will not forget that the latest-up-to-the-minute creations in footwear can always be found at the "Money-Back" Shoe Store at prices that are consistent with "Money-Back" dealings; over 100 styles at \$3.50 not found elsewhere under \$5.00. The bench-made grades at \$5.00 and up are only to be seen here. DAVIS SHOE CO.

The second grand union layout has been laid. A "three-way Y" will be laid next at the intersection of Main and Third South streets, like the Y laid at Fourth and Fifth South streets. The Waterloo line has been entirely rebuilt, giving an excellent double track to Main and South streets, and great relief has been given by residents in that section. It is the plan of the management, when the much vexed franchise question has been settled, to run the First South line down Thirteenth East to the State prison, the Second South street line down Eleventh East, the Third South street line down Ninth East, the Fourth South street line down Eighth East to Wadsworth, the Fifth South street line south on Fifth East and the Ninth South street line south to Waterloo by the present Fourth East street line. This will give all of that part of the city an excellent car service.

SWINGS BOTH WAYS.

Immigration Comes from Canada to The States and Back.

It is as easy to migrate from Canada to the United States as it is from the United States to Canada, and, although no effort has been made to induce Canadian immigration to this country, the census figures show that there is a much larger number of native Canadians in the United States than there are native Americans in Canada. In 1900 there were in the United States 1,183,225 persons born in Canada. Of these 187,788 were English Canadian, and 395,427 were French Canadian, the total being more than twice the number of persons of American birth in Canada. The state of Massachusetts alone contained 158,000 English Canadian and 134,999 French. Every state in the Union had its quota, Indiana, 4,988 English Canadians, and 943 French. The door between the United States and Canada swings both ways, and figures show that the country has far greater attraction for Canadians than Canada has for Americans—Diancamps News.
