Changes in Law of the Church Make It Impracticable to Prosecute Them

Philadelphia, Jan. 5,-The presenters of Bishop Ethelbert Talbot of the Central Pennsylvania diocese of the Protestant Episcopal church, who have not repudiated the paper filed against him, tonight formally withdrew the charges in writing made against the bishop by friends of Dr. I. N. W. Irtine, the deposed priest. They reserve the right to present new "charges in writing.'

The document was handed to Rev. Dr. W. B. Bodine, president of the board of inquiry, late tonight, by J. Frederick Jenkinson. After reading the withdrawal Dr. Bodine said:

"The charges against the bishop of central Pennsylvania having been withdrawn by the presenters, it had been hoped that arrangements may be made whereby a meeting of the board of inquiry could be avoided. As this has been found impracticable, the meeting will take place, as directed by the preading bishop, at 10 a. m. on Tuesday, state of affairs. Jan. 10, at Reading." started to inves The withdrawal is dated Jan. 2 and and he will not s

We are in possession of such proof as is sufficient, in our opinion, to put Bishop Talbot upon his trial. We be-lieved, and still believe, that the grounds are sufficient to put the ac-cused bishop on his trial. The charges cused bishop on his trial. The charges were formulated in order that the man-jest scandal in the church and the dis-grace of the office of Bishop Ethelbert Taibot should be inquired into by the board of inquiry, in the expectation and belief that the board would direct the church advocate to prepare a present-ment to be signed by such of the board as agree thereto." The paper then says that since the

LAND FRAUDS.

Special Assistant Arrives in Portland to Investigate Them.

Portland, Or., Jan. 5 .- Oliver E. Pa-Fornand, Or., Jan. 5.—Oliver E. Pa-gin, special assistant to Atty.-Gen. Moody, reached this city today and will remain as long as the investigations into the land frauds in the state con-tinue. Mr. Pagin will begin at once to acquaint himself with the position of the government in the investigations being made and by the time the grand jury reconvenes on Tuesday next, will being made and by the time the grand jury reconvenes on Tuesday next, will be ready to help Francis J. Heney in the preparation of the evidence and in the presentation of the material upon which it is expected that future indict-ments will be returned.

In the course of an interview, Mr. Pa-

gin said: "The people in general throughout the the people in general throughout the east are not paying much attention to the progress of the land fraud case, for there is no land in that part of the country to be taken and the fraud does Among the residents of Washington who are connected with the official life, however, it is recognized as a grave

state of affairs. The president has started to investigate the conditions, and he will not stop until the examination has been thorough. The govern-ment moves slowly, and the investiga-tions have been a long time on the way, but now that they are begun they will not cease until they have been suc cessful in getting at the bottom of the deceptions practised."

Mr. Pagin was asked whether or not he could confirm the story to the effect that Mr. Heney had been appointed I S. district attorney to succeed Mr. Hal "I know nothing other than what I saw in the papers," was the reply, "I think, however, the mistake has been made. Mr. Heney was appointed a regular deputy in the office of the district attorney in order that he might have access to the jury room. I judge that the mistake was made by the San Francisco dispatch saying that Mr. Heney's salary was to be \$1,500, which is that of a deputy district attorney, and not that of a district attorney himself. However, I would not be surprised if the story was or would be nearer the truth than might be supposed at this

Chicago Woman Loses One Containing \$40,000 in Securities.

New York, Jan. 6.-Mrs. W. L. Cun-ningham, a young woman claiming Chi-cago as her home, has reported to the police that baggage stolen from her Tues-day last contained \$40.00 worth of ne-gettable bonds, in addition to clothing and jewelry valued at \$1,400. She reported the loss of the baggage Wodnesday, but made no mention then of any bonds, merely stating that the trunk contained a lot of valuable clothing. She has been visiting her for some months and occupied apartments in West Forty-sixth street. In Chicago she en-gaged an expressman but after sending of her luggage suddenly changed her

In a few days the whole nerve was affected, and I could not turn over or even move in bed, for the least movement brought on terrible ageny." "Did your condition improve under

the doctor's treatment?" Quite the contrary. His medicines did not seem to help me at all. At the end of two months I wasn't a bit bet-ter, and at times I was thoroughly discouraged. I feared that I would never be able to leave my bed."

"How did you get out again?" "Because I was willing to be guided by the experience of some people who had been cured of scialica without the aid of a doctor. When I was lying in aid of a doctor. When I was lying in bed, unable to move and wasting away in flesh because I had no appetite, a friend visited me and told me about the wonderful cures brought about by a great blood and nerve remedy. Dr. Wil-iams' Pink Pills. He strongly urged ine to try them, and I luckily had sense enough to take his advice. Then I be-gan to get well."

"Did you mend quickly?" "Yes, that was the astonishing thing. I noticed a slight improvement before I had quite finished the first box of the pills. I could get out of bed while I was on the third box, and I was entirely cured by the time I had taken five box-es. I they I am permently cured for es. This work he secured observations which enabled him to determine whicher this was a new satellite or one of the atteriods. It is certain that the body is revolving around the planet Jupiter. Last night it was 45 minutes of are due west of the planet, and the distance is slowly de-creasing. The moon is on the fourteenth magnitude or slightly brighter and needs a telescope of 10 or 12 inches in di-ameter to observe R. The orbit cannot yet be determined. The satellite is five or six times further away from the plan-et than the outermost of the five others, its period may be from six to eight

months. The four very bright satellites were dis-covered by Gallieo in 1510. The faint fifth one was discovered by Barnard in 1892 with the Lick telescope. The fifth and sixth satellites are of approximately the same brightness.

Lam Chee was arrested after the saw. Then the roots are fed into a mill, where they are ground into a pulp, which is washed in water. This car-ries away the woody fibre, leaving be-hind the black gum. The gum is dried, rolled into sheets and is then ready for the subher factor.

The first mill at Buena Vista will have 132 grinders, 100 of which will be in constant use, the rest being held in Lam Chee was arrested after the body of Leong Dick wa sfound frozen in a refrigerator car at St. Louis, nearly a year ago. It was shown at the trial that Lam Chee had negotiated with in constant use, the rest being held in reserve, so that stops for repairs will hot affect the output. It is estimated that these hundred machines will pro-duce a ton of gum a day besides sev-eral tons of pulp, suitable for making paper, which will be worth \$15 a ton. Thirty men will be required to op-erate the mill.

As the dry weed is as good as the green and as the weed has only to be gathered from the prairies, where it grows wild, the mill can run the year
