# MINING, BUSINESS AND STOCKS.

## BUSINESS WAS EXCELLENT TODAY

Sales on Stock Exchange Higher Than Any Day This Year.

BIG FLURRY IN MAY DAY.

Grand Central Puts on a Spurt — Star Con. Remains Firm — Silver King Active.

TODAY'S METALS:
SILVER 60¼
LEAD, $3.67½
CASTING COPPER 15⅝

Grand Central and May Day were the star stock in the pit today, both of them doing phenomenal business at better prices. A firmer tone was shown by most of the stocks today, and the value of the shares old foots up a greater total than any day this year. Altogether 14,275 shares were sold today for which $14,210.97 was received. The highest sales previously recorded this year were made on April 5th, when $18,402.72 worth of business was transacted.

Grand Central started out with the sale of 100 shares at $5.86. From this figure it advanced to $5.97½, but weakened to $5.90½ before the call closed. The number of shares sold amounted to 2,150 shares.

Lower Mammoth was handed out at from 53 to 54½ while Petro was loosened up on a bid of 21.

Star Con. made the first sale at 35 and fell back to 34¼, while Silver King let go 25 shares at $49.00.

Valeo was active at from 85 to 85¾. May Day was a heavy participator in the day's trading at much higher prices than those recorded on Saturday, owing, int is said, to excellent assays received on Saturday. From $1.00 the price of the first sale the stock rapidly advanced to $1.09 per share, but was traded in at $1.05 before the close. Something over 8,000 shares changed hands.

Closing quotations were as follows:

| | Bid. | Asked. |
|---|---|---|
| Ajax | 49 | 60 |
| Albion | 65 | 1 00 |
| Alice | 36 | |
| Bullion-Beck | 3 30 | 3 80 |

## STRIKEE IN THE MAY DAY OF TINTIC

Extremely Rich Gold Ore Found in Upraise from 100 Level.

LOWER MAMMOTH ORE SOLD

Second Class Contracted for—Imperial Copper Co.—Park City Items—At Agnes and Dana.

A flurry in May Day stock was seen on the exchange today, the cause of which was an assay return showing very rich gold and silver values. The sample was secured in an upraise from 100-foot level and is said to have shown 69 ounces gold, 632 ounces silver and 29 per cent lead. It was also stated that a breast of ore four feet wide has already been exposed. The sample was a picked one, but it is considered very encouraging by some people, while others look with disfavor upon extremely high gold values for the reason, it is said, they scarcely ever hold out in Tintic. It must not be forgotten, however, that the Mammoth shipped some fabulously rich gold ore near the surface in early days.

### LOWER MAMMOTH.

Will Market Its Second Class Ore—Strike on 500 Level.

What is considered a very good rate has been secured by the Lower Mammoth Mining company on its second-class ores of which something like 1,000 tons are said to be already on the dump. In speaking of the matter today Simon Bamberger said that the company will net about $8 or $10 per tons by the transaction. The American Smelter company is said to have signified its willingness to take about 1,500 ton of this grade of siliceous ore. The company will start tomorrow to market the ores on the dump.

A new strike was telephoned in to Mr. Bamberger by Superintendent William Hall today. It was made on the 500-level. Four feet of ore is said to be exposed on the level the values of which run 21 per cent lead, 22 ounces silver, and 3½ per cent copper, with a trace of gold.

### AGNES AND DANA.

Work Progressing Favorably on this Bingham Property.

D. S. Scoville returned last evening from Bingham, where he has been for several days past, inspecting work on the Agnes and Dana claims. This property is located near the Highland Boy and forms the basis of a company in which New York capital is largely interested. About 18 inches of galena is now exposed in the lower tunnel. About 450 feet higher up the hill at the other end of the property the old tunnel exists, in which some good copper ore is in sight. The company is after copper and will push work, no matter how the price of lead varies.

### ITEMS FOM SEATTLE.

New Arrivals Pouring in all the Time Party Left on 24th inst.

Special Correspondence.

Seattle, May 24—Salt Lake and Utah people continue to arrive and outfit for Nome, the Alaskan Eldorado. It puts one very much in mind of the days of '48 and '49 in California. Every steamer that goes out is detained from one to three days in loading. They are filled with freight in all the space, from hold to bridge, and then more on top of this. Each ship that goes out takes a couple of lighters to unload freight on, and at the rate of loading some considerable time will be consumed in discharging cargo, with the facilities in sight.

The steamer Cosonne laid over almost twenty-four hours here on account of stowaways. They put everybody ashore and then checked up tickets, hauled in their ropes and slid out to sea in the early streaks of dawn. There are some late arrivals from Salt Lake, and among them was noticed Dr. Snell, who devotes most of his time to running industries in several States and Territories. Mr. J. J. Milroy and family are also here en route to Nome. Mr. Milroy's trip to the Nome gold fields is for the purpose of making an authentic map of all claims in the district that have been legally located and occupied. On the map will also appear the name of each owner or company who holds the claim or group of claims. He will have the assistance of the government in the way of notes and reports. Mr. Milroy is well known throughout Utah and the West. Four Salt Lakers sail for Nome today, Joseph Tipman, H. B. Schenk, F. M. Ayers and G. W. Harvey.

### RICH NEVADA ORE.

Seven Tons from a Mine Near Reno Net $2,400.

A Reno, Nev., dispatch to the "News" today says: Seven tons of ore from a recent mining location, three miles east of Reno, known as the Wiedkind Find, was worked yesterday at the Reno reduction works, and yielded $2,400.

### MINES OF PARK CITY.

Ore in the California—At the Apex—Ore Shipments.

Thomas Roscamp was down from the California, in Thayne's canyon, says the Park Record, and reports a breast of ore sixty feet wide in the upper workings and a forty-foot vein in the lower level tunnel. This lower tunnel is in a distance of 750 feet, and three raises and drifts have been run from it. A drift of 200 feet has been run on the copper vein. The air pipes have all been laid. The present object is to connect the raise from lower workings with the bottom of the incline from the upper tunnel, when a good circulation and good air will be obtained. This will also solve the water question, which is at present hampering operations, for with this connection made, the water can be cared for by running it out of the lower tunnel.

The work of putting up a new mill on this property will begin about the first of next month. For the present a Huntington and two or three Willeys will suffice, but will be added to in a short time. Something over 3,000 tons of ore have been taken from this property, and a shipment of 207 tons of concentrates has been made to Colorado.

Rumors of strikes, confirmations and denials relative to strikes in the lower tunnel of the Valeo can be heard every day. In fact, specimens of ore have been brought to this office by parties who claim to have taken them personally from the new strike. However, the directors of the company say there is nothing in it yet.

O. A. Palmer, mining engineer for the Ontario and Daly, and Martin K. Harkness, mining expert, came up from Zion Wednesday. They are at present at work on the Ontario gathering facts for the approaching suit with the Crown Point company, which is set for the 5th prox. After completing this work they will commence the examination of the Daly, and it will not be long until men are at work in this property doing the prospecting or preliminary work to the active working of the mine.

At the Apex work is progressing in a raise to the old whim level, which is expected to be broken into any day. This whim level has been cleaned out and the air found to be good, and for this air is the main object of the raise. The property, however, is looking splendidly with plenty of ore, and now that the volume of water has increased two shifts at the mill have been put on, and it will be kept steadily grinding. This means a material increase in the output of this mine.

Superintendent Myers of the East Valeo was down from the mine Wednesday. He says now that the new whim is working nicely, the shaft is going down at good speed. A depth of 115 feet has been reached, and at that point a new character of rock was encountered. It is a decomposed talc quartz and looks very encouraging to the operators.

### ORE SHIPMENTS.

Following are the shipments of ore from the Mackintosh sampler for the past week:

| | |
|---|---|
| Silver King | 1,360,000 |
| Daly-West | 875,000 |
| Anchor concentrates | 500,000 |
| Ontario | 424,000 |
| Apex | 105,000 |
| Valeo | 25,000 |
| Loring Bros. | 52,000 |
| Total number of pounds | 3,141,000 |

### IMPERIAL COPPER CO.

R. N. Dickman Says its Claims are in the Greatest Copper Zone.

A large amount of interest is centered in the movements of the Imperial Copper company, which has for its landed foundation about thirty mining claims and important tunnel site in the San Francisco mountains, says the Beaver Blade. About three months ago Mr. A. B. Lewis took up the proposition of organizing a company to work the old Solomon group of claims which extended from the head of Louber canyon south to the head of the Horn Silver gulch, and including several claims located by Colonel Hawkins. To these have been added a number of properties by purchase and others by location until the group now reaches the above number.

It has been known for a number of years that the Solomon group contained an extensive vein of copper-bearing ore, but until Mr. Lewis' advent into the camp nobody seemed equal to the task of interesting capital.

On Wednesday a Blade representative, accompanied by Mr. Lewis and Mr. R. N. Dickman of Chicago, made a trip over the property by horse and by way of trails which traverse the property near its east and west side lines. For nearly two miles on the west trail, where the ledge matter has been but little disturbed, the pathway is literally paved with the glistening copper ores. Reaching the northwest end of the property, in Louber canyon, opposite the old workings of the Massachusetts property, we were greeted with the sound of hammer, pick and blast, which were being directed by Mr. Lewis through the efficient foremanship of Mr. Robert Martin, in the preliminary development of this vast zone of copper. About twenty men were at work at various points, some tunneling for the main vein, others sinking on cross veins, but all of the work directed with the object of testing the ores with depth; as to the permanency of the veins, their nature and extent is a guarantee.

Mr. Dickman, who is out here in the interests of Chicago parties, in speaking to our reporter, said: "I had thought that the descriptions given me of this property were exaggerations, but there is no room for exaggeration; this is the greatest zone of copper ore I have ever seen. It is going to take money to develop it, but it has the foundation for one of the greatest mines in Utah."

Mr. Lewis has outlined a policy which seems to be well conceived and in line with the most approved methods of mining. The work now under way is designed to open up the ore bodies at depths ranging from 200 to 400 feet, and to ascertain their nature and extent, but the principal work outlined is a tunnel starting from a point on the Frisco side of the mountain only a short distance from the railroad, which will tap the first cross vein of coppre, having its apex on the extreme summit of the mountain, at a depth of 1,460 feet. The carrying out of this work will at once put the mine in shape for economical working and in direct communication with the railroad.

### Tintic Shipment.

The shipments from the district for the past week are as follows:

| | |
|---|---|
| Centennial Eureka | 37 |
| Bullion-Beck | 10 |
| Gemini | 10 |
| Godiva | 9 |
| Uncle Sam and Humbug | 9 |
| Mammoth | 8 |
| Swansea | 7 |
| South Swansea | 6 |
| Joe Bowers | 1 |
| Boss Tweed | 1 |
| Showers | 1 |
| Total | 102 |
| Concentrates. | Cars. |
| Beck mill | 1 |
| Mammoth mill | 2 |
| Bullion. | Bars. |
| Mammoth mill | 1 |

### La Sal Mountains.

Every day brings fresh proofs of increased activity the coming season in the La Sal mountains, says the Grand Valley Times. Prospecters continue to arrive, those who absented themselves from the La Sals last year to search for richer fields are returning satisfied that when they turned their backs on the La Sals they were making a mistake. Mr. J. C. Strayton, who prospected here two years ago and put in the season in Idaho and Oregon in preference to coming back, returned today direct from Battle Lake via Victor and Cripple Creek and has this to say in regard to the spring situation: "The La Sal is the most promising district in the northwest today among the new camps and only two districts are taking up the attention of prospectors on the other side of the range for the coming season, and are being talked about by them viz: the La Sal mountains including the Paradox district and Battle Lake and in his opinion the La Sals have first choice. Battle Lake has one shipping mine but the La Sal mine is better in quantity and quality and the outside showing of prospects in the La Sals is far in the lead. He reports many parties as coming this way in June from the Colorado camps, but Castleton will be the nucleus for the mountain operations as evidenced by the fact that building is going on and people are securing town lots for building purposes, two new structures having been started this week, material for more being gotten out and today's record shows transfers of ten town lots to persons who propose building on same. L. Antles will start his assay furnace the first of the week and be ready to serve all patrons.

Jas. McBride, of La Sal Copper Mining Company, was in town a few days the first of the week. He tells us the company is now shipping about four cars a week, and doing some steady development work which will place the mine in a position to take out an immense amount of ore in the future. Mr. McBride is confident that section of the La Sal country will come to the front in the near future.

### MINING NOTES.

Ed. Loose of the Grand Central was in town today.

Editor Charles Spillman of the Tintic Miner was in town today.

The Mammoth, of Tintic, had six cars of ore on the market today.

Jesse Knight's Uncle Sam had four cars of ore on today's market.

Three cars of ore were on the market today from the Horn Silver of Frisco.

The new mill at the Fortune mine at Bingham will be started up this week.

A car of ore was on the market today from the Humbug mine at Tintic.

The Nast property, of Bingham, reported on the market today with two cars of ore.

The Taylor-Brunton sampler reported six cars of ore from Tintic and three from Frisco today.

A car of high grade copper ore was on the market today from the Savanic mine in northern Arizona.

The Showers Consolidated of Tintic reached the side tracks of the sampler today with a car of ore.

Glen R. Bothwell, of the Sacramento, reached home yesterday after his visit of several weeks in the east.

The Conklin sampler reported twelve cars of ore from Tintic, two from Bingham and one from Arizona today.

The Taylor-Brunton Sampling company will increase the wages of its employes 15 cents per day on the 1st of the month.

W. G. Filer came up from Gold Mountain yesterday and is disposed to treat the relocations of the Snyder Improvement Company very lightly.

R. D. Grant was approached today on the mooted Mammoth deal, but courteously declined to be interviewed on the matter.

J. A. Cunningham was at Mammoth yesterday. He says nothing is thought out there of the rumor that the Mammoth mine will shut down on June 1st.

The delinquent sale of Silver Park stock on which the recent assessment was unpaid took place Saturday afternoon as advertised. Only 5,500 shares went under the hammer.

R. N. Dickman of Chicago is said to have left Salt Lake for the East very favorably impressed with the Imperial Mining company's property near Frisco.

Wm. Hatfield has returned from Alta and reports lots of snow around the mines. He was not able to look over the Albion, but reports the Grizzily and two other properties shipping.

Col. Hawkins, the veteran prospector from Beaver county, who has been a prominent figure on the streets for several days past, will be married on Thursday and leave for camp again about the end of the week.

The Beaver Blade reports Mat Cullen working a force of ten men on the Moscow claims. He is said to be taking out some rich ore which was encountered immediately operations were resumed.

The Tintic Miner says that the option on the Northern Spy mine was to have been taken up last Friday by Eben Smith of Colorado and H. E. Carey of Salt Lake. It is said to be probable that the Carisa will then be developed through the Spy shaft.

Prof. W. S. Keyes, the well known mining expert, arrived yesterday from California to resume his labors in connection with the $2,000,000 suit between the Crown Point, Ontario and Daly companies of Park City. The suit comes up on June 5th.

Boston News Bureau: It is said that the chances are good for dividends being commenced on the common stock of the American Smelting & Refining company two months hence at the rate of 4 per cent. The company is now earning over $4,000,000 net or $1,000,000 more than was earned by the constituent companies before the consolidation.

### BROMUS INERMIS ON DRY LAND.

When we have been asked if bromus inermis would produce a crop of hay on the ordinary high lands of our State without irrigation we have generally answered that we did not believe that it would, says the Rocky Mountain Husbandman. There is probably one season in ten when there is sufficient rainfall to induce this grass to yield a profitable tonnage of hay, but the impression that it will do this year in and year out is false. This paper draws its conclusions from a study of the habits of the species of brome grass found growing wild in this northwest region and which is quite abundant on the high plateaus of Smith river when we chance to have a rainy season. The native brome belongs to the same family as blue joint and is what the farmers of the middle northwest knew as "quack" grass, that is these grasses are a species of plant that root the same and hard to kill out. But bluejoint while it like the native brome grass is hard to destroy and will resist a great amount of drouth must have a great deal of water in order to make it produce a ton and a half per acre unless the land is unusually rich. It occurs to us that Prof. Shaw struck it about right at the Miles City meeting of cattle growers when asked if the grass would grow without moisture he said, no, but that it had great tenacity and would cling to life through a long drouthy season and commence to grow whenever the moisture was applied. These are the exact characteristics of the bluejoint and the native or northwestern brome grass. We can point to highlands stretching along the western slopes of this valley where mowers are run of rainy seasons where the northwestern brome grass predominates and we have but little faith in the bromus inermis plant exceeding this.

Some of the bromus inermis seed sown in Montana last year has not come up yet. We have reference to the experiments on benth lands where there is no water for irrigation.

PREACHING AND PUBLIC SPEAKING."

Of the 5,000 copies of this popular book published last year only three or four hundred remain and the author has decided to sell these through the ordinary agencies for Church publications. Your local agent will order the book for you or it will be sent postpaid from the Deseret News Office. Cloth, $1.50; Half Morocco, $2.00.

DO YOU WANT AN ENGINE OR MOTOR?

The Deseret News has on hand a number of new steam engines, dynamos and electric motors, which can be bought cheap if taken AT ONCE. Write for particulars.

Goods Cheap.

$2.25 and $2.50 Ladies' Kid Shoes, $1.50 at the Bee Hive Shoe Store, 126 and 128 S. Main.

## ANOTHER COTTON MARKET FAILURE

Seymour, Johnson & Co. Go Down on the New York Exchange.

DECLINES IN WALL STREET

Announcement of Failure Had Little Effect on Stock Exchange—Live Stock and Produce Quiet.

New York, May 28.—The failure of Seymour, Johnson & Co. has been announced on the New York stock and cotton exchanges.

The firm was organized in March, 1899.

Its members were Frederick W. Johnson, Henry A. Seymour and David Webster, the latter said to be a special partner, for $50,000. Alfred Hayer Jr. is the assignee and Coudert Bros. are named as the counsel. It is said that the troubles of the firm are due to commitments in the cotton market. They had been long of cotton, but turned to the short side two weeks ago. In the stock market they have been bears. No information can be obtained as to the extent of their contracts, but in the stock exchange they are not believed to be large.

Rumors of financial trouble regarding the firm which were circulated at the time of the Price, McCormick & Co. failure have precipitated the suspension.

Transactions for the account of the failed firm amounted to 8,000 shares in the course of half an hour after the failure was announced.

It was stated that the firm's outstanding contracts on the cotton exchange are small and that these are well margined.

Burlington pushed up to 127⅜ and sugar rallied to 116. The market hardened, but to a scarcely perceptible extent. The close was dull and irregular.

### NEW YORK MARKET.

New York, May 28.—Offerings were small and declines quite uniform, averaging ½ except in sugar and Baltimore & Ohio, which yielded 1 to 1½ respectively. American ice advanced 3¼. The announcement of the Seymour, Johnson & Co. suspension failed to awaken any animation. Business was principally for the account of the failed firm under the rule. Prices were slightly higher.

MONEY AND BONDS.

Noon: Money on call steady at 1½@1¾ per cent. Prime mercantile paper, 3½@4½.

Sterling exchange easy with actual business in bankers' bills at 4.87¼@½ for demand and 4.84¼@¾ for 50 days; posted rates, 4.85@½ and 4.88½.

Commercial bills, 4.84¾@4.84.

Silver certificates, 60@61.

Bar silver, 60⅛.

Mexican dollars, 47½.

Government bonds steady; U. S. refunding 2s, when issued, 104; 2s reg., 93½; 3s reg. and coupon, 109¾; new 4s reg. and coupon, 134¾; old 4s reg. and coupon, 115¾; 5s reg. and coupon, 113¾.

SUGAR.

New York, May 28.—Sugar, raw steady; fair refining, 4; centrifugal, 96 test, 4½; molasses sugar, 3 13-16; refined, firm; crushed, 5.70; powdered, 5.40; granulated, 5.30.

### CHICAGO MARKETS.

LIVE STOCK.

Chicago, May 28.—Cattle—Receipts, 22,000; steers slow to lower; butchers' stock steady to shade lower. Good to prime steers, 5.00@5.70; poor to medium, 4.35@4.80; stockers and feeders, 3.75@5.10; cows, 3.00@4.50; heifers, 3.25@5.00; canners, 2.25@2.90; bulls, 3.25@4.40; calves, 5.00@6.75; Texas fed steers, 4.00@5.10; Texas bulls, 3.25@3.75.

Hogs—Receipts, 40,000; tomorrow, 23,000; left over, 1,493; 5 to 10c lower. Top, 5.25; mixed and butchers, 5.00@5.25; good to choice heavy, 5.15@5.25; rough heavy, 5.00@5.10; light, 4.95@5.22½; bulk of sales, 5.15@5.20.

Sheep—Receipts, 11,000; strong lambs, 10 to 20c higher. Good to choice wethers, 4.90@5.25; fair to choice mixed, 4.35@4.75; western sheep, 4.75@5.25; yearlings, 5.25@5.60; native lambs, 4.50@5.15; western lambs, 6.00@7.15; spring lambs, 6.00@7.00.

PRODUCE.

July wheat opened at 66⅞, rose to 67@⅞, then fell to 66½.
Close—Wheat—May, 65¾; July, 66⅛.

THE DIFFERENCE IN PERFUMES.

There's a vast difference in perfumes;
One perfumer makes some odors good—others just passable.
Another perfumer will have his specialty,
And so you go through the entire list of perfume makers.
We pick out the best from each maker and gather them here for you.
That's one reason why all our perfumes are good.
And it's just a matter of preference with you, which one it shall be.
And one thing about our perfumes you've probably noticed. Their lasting qualities.
50c the ounce up.

F. C. SCHRAMM,
Prescription Druggist.
Where the Cars Stop. McCornick Bldg

Lewis' 98 % Lye,

Powdered and Perfumed.
(PATENTED.)
The strongest and purest made. Unlike other Lyes, it is finely powdered, packed in a can having top lid, one easily cut and the other removable for constant use. It will make the best Perfumed Hard Soap in 20 minutes without boiling. It is the best for cleansing waste pipes, disinfecting sinks, closets, cleaning paints, bottles, barrels; washing trees and killing insects; for engineers and machinists' uses; for painters, to remove old paints, etc.
