

MINING, BUSINESS AND STOCKS

MINES NEAR BOISE
ARE AGAIN ACTIVE

Big Mill Arrives for Old Black
Hornet Mine and it Will
Soon be Installed.

TAKE OVER VIOLA GROUND.

Adelmann is Taking Out Large
Amount of Ore Ready for
Installation of Mill.

(Special to the "News.")

Boise, April 22.—More activity is being shown in the Black Hornet mining district, 12 miles east of Boise, than has been seen in several years and at present quite a number of men are at work in the district. At the Black Hornet property a crew of men have been at work for several weeks constructing buildings and completing roads. In the freight sheds there is a carload of machinery to be hauled to the mine as soon as the roads will permit. The shipment is structural steel and the parts of a 30-stamp mill.

A large quantity of ore has been taken out and is ready for the mill. The bulk of it will average high in spite of the fact that there is considerable low grade stuff mixed in with it. The machinery which will be installed is to cost over \$50,000 and the managers contemplate securing power from the plant at the Barber dam.

The Black Hornet people have recently acquired the Viola property from the War Eagle Mining company and will also operate it in connection with their original holdings. The Viola mine is well developed and is said to be in a condition which will require but a slight outlay to place it on a paying basis.

WILL BUILD MILL.

Half a mile due north of these claims lies the Adelmann group, of which great things are also expected this summer. At the present time the installation of a big mill is contemplated on this property. The character of the ore, which contains traces of arsenic, zinc, lead and copper, will require the use of either chloric acid or water process, cyaniding not being practicable where the metals mentioned appear. If a smelter is put in the concentrates will be treated on the ground and the expense of shipping the ore will be entirely done away with. In addition to this saving a considerable quantity of the better metals will be recovered and the income of the plant increased materially thereby.

MARKET IS MUCH WEAKER.

Stocks Sell at Small Pace With General Tendency Toward Lower Prices.

Another slow market was developed on the local exchange this morning with prices lower and a tendency to reach lower levels. Much of the market today smacked of professionalism and the few orders were filled quickly. The number of shares of stock sold this morning was 54,700 and the selling price was \$41.85.

Addie endeavored to show a market and 5,000 shares were sold at 34 and 4 cents. Colorado was one of the low stocks again today and was selling at \$2.60 and \$2.62. Columbus Consolidated appeared to be in sympathy with the market and was down to \$2.47.

Iron Blossom, which has been the bone of contention on the market for some time was scheduled for another fall today. During the session 2,000 shares sold at \$1.75.

Ohio Copper, sold at \$1.15 to \$1.16. This stock does not appear to be getting back to the \$1 mark where it was some time ago. Among the brokers it is believed that the rise in Ohio Copper was premature.

Sioux Consolidated appears to have crossed the \$1 mark and is struggling along. It sold as low as 35 cents today.

EAST BUTTE GETS
ANOTHER PROPERTY

Takes Over Controlling Interest
In Pittsburg Montana
Copper Company.

TO INCREASE CAPITAL STOCK.

Special Meeting to be Held in May to
Ratify Deal Made With J. H.
Reed and Associates.

A deal whereby the East Butte

Copper company will acquire control of
more valuable territory is contained
in a special message received from
Boston this morning over James A.
Pollock's private wire. The message
says:

"The directors of the East Butte
Copper company have entered into
an agreement with J. H. Reed and
his associates of the Pittsburg-Montana
Copper company which they control.
A special meeting of the East Butte
Copper company is called for May 11,
at Phoenix, Arizona, to ratify the
increase in the capital stock from 300,
000 shares to 600,000 and to increase
the number of directors from four to
nine. The 300,000 additional shares of
stock will be used to acquire 83 per
cent of the capital stock of the Pittsburg-Montana and all the collateral
trust bonds and other indebtedness of
that company, approximately \$2,500,
000. The remaining 17 per cent of
stock is in the hands of scattered
holders and is not included in the
purchase.

"Pittsburg-Montana is a holding
company, owns all the bonds and 99
per cent of the stock of the Pittsburg
and Montana company, which is an
operating company.

"Under the terms of purchase, J. H.
Reed will receive approximately 100,
000 shares of East Butte stock for \$1,
000,000, par value, preferred, and \$4,
000,000 in common stock of the Pittsburg
and Montana company, but this stock
will not be delivered before Dec. 2,
1910.

WILL PAY OFF BONDS.

"The \$2,500,000 worth of Pittsburg-Montana bonds held by banks and
banking institutions of Pittsburg will
be paid off at par in cash, but not before
Dec. 1, 1910. It is thought the 200,
000 shares of East Butte treasury stock
sold aside for that purpose can be dis-
posed of at much better advantage later
than at present. The 50,000 shares of the
present authorized 300,000 shares of
East Butte stock now in the treasury,
will be offered to stockholders at \$10 a
share for the largest block, this stock
being offered on the basis of one share
now held.

President Robert H. Cross says "by
the purchase of Pittsburg-Montana
company, the East Butte company will
own one of the largest holdings of mining
properties in the Butte camp.
There are 135 acres in the present East
Butte property, and the Pittsburg-Montana
property covers 257 acres of mineral
rights, approximately 160 acres of
surface rights and a lot of mineral
rights on the Northern Pacific's right
of way crossing the property. There
are two important features, in connection
with the property, first the very
large area covered by the property, and
second the fact that the property lies
directly across the entire eastern extension
of the trend of all the copper
veins of the camp. The property is
equipped with two shafts, each supplied
with a complete and efficient surf-
face equipment and a smaller shaft.
The property at present is producing 150
tons daily of first class ore and nearly
200 tons of second class ore. This is
expected to be increased shortly both
from the Pittsburg-Montana and also
from the East Butte workings."
