United States Mines Yielded Over Two Billion Dollars Last Year. Wesnington, Oct. 29 .- A grand total

of \$2,069,289,196 worth of mineral products in the U.S. is announced in the statistical summary for the calendar year 1907, issued today by the geological survey. Of this amount \$1,166,165,191 were non-metallic: \$903.024,005 metallic, and \$100,000 non-spcified. The mineral products for the previous year aggregated. 1,904,007,034.

NEW PROVO COMPANY.

Special Correspondence.

Special Correspondence. Provo, Oct. 28.—The Merrill Mining company has incorporated for \$100,000 divided into shares of the par value of 10 cents each. Five hundred thousand shares are cest aside as trustee stock. The capitalization is based on the fol-lowing tolning claims: Plume, Echo, Silver Wave, situated in American Fork mining district. American Fork is the Silver Wave, situated in Ansrican Fork mining district. American Fork is the principal place of business. The offi-cers and directors are: President, H. D. Boley; vice president, John Cleg-horn; secretary and treasurer, H. C. Johnson; these, with Jacob Greenwood and E. J. Wild are the directors.

J. R. WHITNEY & SONS., Members S. L. Stock and Mining Ex-change. 332 Atlas. Ind. Phone, 261. Bell, 1717. Correspondence strictly confidential, A. S. CAMPBELL. Stock Broker, 215 D. F. Walker Block

recognize. "When the present contract with the Guggenheims was made it was the joint work of B. B. Thayer and James Phil-lips, Jr., for the Utah Consolidated, and if the matter of a five-year con-tract was left to the same parties, there could be an amicable agreement reached. Under the present contract the Garfield smelter treats the Utah ores for 33 per ton, and if there have been penalties attached in addition to this, it is the fault of the Utah Con-solidated management in the selection and shipment of ores which are sub-ject to penalty. "If it has cost the Utah 2½ cents per pound more to treat its ores at the Garfield smelter than formerly, as President Broughton claims, it is due to the fact that Utah ores are now averaging but 50 pounds of copper to the ton instead of 100 pounds as was the case several years ago. The days of five and six cent cost for the Utah Co. are over, and President Broughton knows it as well as anybody. This fact, together with the fact that there are but 1,200,000 tons of ore in sight (four years' suc-ly on basis of present operations) and the management is now exploring with diamond drills at depth typing to find more, is reason enough operations) and the management is now exploring with diamond drills at depth bying to find more, is reason enough why the company should not spend \$3,-000,000 in a plant when it can get its ores economically treated for it. Al-lowing for interest on the \$3,000,000 and depreciation, it would actually save money by so doing. "The decision to build a smelter means suspension or at least reduction of dividends for the company is not making over five cents per pound profit on its present output of 15,000,000 pounds per annum, which is \$2.50 per share, and its present surplus is under the \$2,000,000 mark."

ecognize. "When the present contract with the

Twenty-Five Million Pounds Purchased from Leading Agencies.

chased from Leading Agencies. (Pollock Special Wire.) Boston, Oct. 29.—1t is estimated that fully 25,000,000 pounds of copper has been purchased from the leading copper agencies during the past week or 10 days. Inquiriese for copper for deliv. ery for December and January at the present price of 13% cents have been turned down, This heavy buying of copper which has been principally for domestic consumption has been based on favorable election prospects. There is a considerable volume of business being held up awaiting the election and a few manufacturers have started in a few manufacturers have started in to anticipate their needs. There is now no available copper for sale under 13% cents cash, 30 days, for any delivery and no lake for sale under 14 cents, some of the leading copper interests are now predicting 15-cent copper before January.

January FACE OF SHIPPING ORE.

This Is What Is Exposed in South

Columbus Mine at Alta.

That conditions at the South Colum-bus property in Alta have been im-proving very rapidly lately has been

the method best adapted for treatment of the ore. It is belived t the desired results can best be complished by the ordinary cone rating processes
