

WEATHER ITEM.—The highest point reached by the thermometer to-day was 90.

"FIRE" drew another large concourse of people to the Theatre last evening, and the place was played throughout with considerable snap. Mr. Murphy drawing immense applause, and the night longer, and the engagement of this talented gentleman will expire, and all who admire, and can laugh at and enjoy the delineation, true to life, of Irish and Dutch peculiarities, should take the rare opportunity afforded by Murphy and "Heli" to witness them.

THE "LADY OF THE LAKE."—This little summer made a trip of about five miles down the Jordan this morning in an hour; the return trip was made in an hour and ten minutes.

GRASSHOPPERS IN SUMMIT AND MORGAN.—Bishop Cliff, of Coville, called this morning. He says that myriads of grasshoppers made their appearance in Summit and Morgan counties two weeks ago. They are too late to do much damage to the crops this season, but every where in the mountains the pests are now laying their eggs, giving promise of a full supply of their descendants next Spring.

He also informed us that a vast amount of timber is being burned at the head of Weber. How the fires originate is unknown, but it is supposed that they are left smoldering at their camping places by prospectors. The head of Weber is about the best timber growing district in the Territory, and to have so much good wood wantonly and foolishly wasted is a great pity. Men out in the mountains ought to be more careful than to leave fires at their camping places. Whoever may be responsible for this destruction deserves severe punishment, whether it be the result of carelessness or wickedness.

FROM THE WEST.—H. B. Hunt, representing E. Martin & Co., Importers and Jobbers of Wines and Liquors, San Francisco, is now in our city. Mr. Hunt is a gentleman and E. Martin & Co., conduct one of the most reliable houses in the Pacific Coast.

"IRON CITY."—Hon. Wilford Woodruff, President of the Deseret Agricultural and Manufacturing Society, received a letter a few days since, dated Iron City, Iron Co., July 27th, containing considerable information about the progress of iron manufacture in that locality. Many of our readers are aware that a few men from the past year or two, have been endeavoring to make iron from the ore which, it is well known, is abundant and of the quality in some sections of Southern Utah. The letter received by Mr. Woodruff, from the secretary of the company, S. M. Blair, Esq., says that their labors have been successful, and the problem of manufacturing iron from the native ore has been most satisfactorily solved.

The company was incorporated on the 11th of March, 1870; and since that date the company have erected furnaces, imported machinery and are now successfully smelting the ore, and producing a quality of gray cast iron equal to the best. As early as 1868 the gentlemen composing the company commenced their labors; but it was not until about two years had passed that they found material to manufacture iron, or lining for their furnaces; and when this task was accomplished they were at a loss for a competent smelter. He was finally found in the person of Mr. David B. Adams, of Beaver Co., and now their most sanguine hopes are so far realized that iron of the finest quality is being produced in limited quantity, and can be sold at a profit. The means can be obtained to erect buildings, &c., to prosecute the requisite appliances. The capacity of their present furnace is twenty-five hundred pounds per day. The company have now nearly completed a brick building for a foundry; they have secured the service of a competent smelter, and, as the date of writing, the foundry was expected to be in operation in a few days. It is the intention to erect during the present year, a large smelting furnace, also one for steel, and a forge for wrought iron.

The president of the company, Ebenezer Hanks, Esq.; the directors Chapman Duncan and Seth M. Blair, Esq.

The importance of the preceding information cannot be over estimated, for the inauguration of iron manufacture in Utah is of far more importance, and more pregnant with prosperity to her citizens than a thousand mines of gold and silver were each of them of fabulous wealth. But in no branch of business is capital more needed, than in this; and as the time is not far distant when the Utah Southern railroad will extend to and probably pass through or near to the iron districts, the worth of the iron mines and their wealth creating powers will be appreciated, and men of capital will be ready to invest; and there is no doubt that a big iron trade will grow up in Utah, and a great amount of prosperity be enjoyed by the people engaged therein.

COURSE OF LECTURES TO WOMEN.—Mrs. H. M. Tracey Cutler, late professor in the Woman's Medical College, of Cleveland, O., intends to give a course of lectures in this city on physiology and kindred subjects, to ladies only. The first lecture of the course will be given on Friday afternoon, commencing at 3 o'clock, in the west room of the City Hall. The lady has lectured in England, and extensively in California and Nevada; and as the subjects she proposes to handle are of great worth, if ably treated, they will be well worth attention. Rehearsal, Friday afternoon at 3.

A RENAISSANCE.—A team which was being used for hauling gravel ran away this afternoon from the rear of Taylor & Cutler's store, leaving a part of the running gear in the alley before reaching Main Street, and after that, making a circuit around in front of the Salt Lake House, tearing away one of the posts supporting the eaves of the latter building, and finally bringing up a little lower down the street, with no injury worse than the bruising of the horse's legs. The wonder is that the affair was not more serious, as at one time the horses were on the sidewalk crowded with people. This runaway, we think resulted from the carelessness of the driver, but a number of cases have occurred lately on the street that would have been prevented had there been a sufficient number of hitching posts on the sides of the streets to fasten animals to.

MEMBER AT DESERET TELEGRAPH OFFICE for Henry Imberry.

SOUTHERN UTAH.—Mr. Nathaniel Ashby called upon us to-day, having recently arrived from the Southern part of the Territory. He reports the health of the people as being generally good. The heat has been excessive during this summer at St. George, but no bad results have followed; in fact, the health of the people has been better than usual at this season of the year. The death of Tutsegavil, the chief of the petty tribes around St. George, which happened a short time before Bro. Ashby left home, was looked upon to some extent as a misfortune, for he has always been a firm friend of the settlers and warmly disposed to maintain peace. There was no man of influence, for he has always taken his place and who is resolved to maintain friendly relations. The Co-operative cattle band, which is kept on Short Creek, East of St. George, has done well; the dividend made lately, after it had been in operation fourteen months, was most satisfactory to the shareholders, it amounting for that period to 35 per cent. In consequence of the drying up of the Santa Clara the settlers at St. George will be unable to raise either corn or sugar cane, but up the Rio Virgen they have water, and the prospects are better, though the grasshoppers have done them damage.

PARANOID.—We are indebted to Mr. Dwyer of the Railway News Depot, for "Frank Leslie's Illustrated," "Harper's Weekly," and "Every Saturday," all for the 20th inst.; also "Country" for September, and the San Francisco "News Letter." Parties desiring of purchasing any or all of these serials should visit the Railway News Depot, East Temple St.

DEED.  
At Coville, August 23d, of inflammation of the lungs WILLIAM HUNTER, son of William and Margaret Salmon, aged 9 months and 4 days.

**NEW REFORM.**—The introduction of Soda Water and Saraparilla, by Day & Co., has done more in the way of a Temperance Reform than all the lectures that have been delivered in the country. The natural condition of man is a thirsty one, and it has long been an established fact that water will not quench thirst. The question then arises, can we find a substitute as harmless in its effects, and more delicious in taste than anything yet discovered? We find it in Day & Co.'s Soda and Saraparilla. If every one would sign the Pledge and drink nothing but this Celebrated Beverage, much degradation, misery, shame and crime would be prevented in the world. If any one doubts the truth of our remarks let them step into the first place they come to and try it. It will vouch for itself.

THE

**EUREKA DIAPER!**

IS JUST THE ARTICLE NEEDED BY EVERY MOTHER WHO CONSULTS THE HEALTH AND COMFORT OF HER CHILD!

THE EUREKA DIAPER is designed as a shield to protect from moisture the clothing and bedding of children, and also the clothing of those who have the care of them. It is made thoroughly water-proof, there being no sewed seams, the threads of which rot when exposed to moisture.  
THE EUREKA DIAPER is so constructed as to fasten below the stomach, and to conform to the shape of the child's body; therefore it is not liable to fall off, and consequently securely retains the linen diaper in its place, at the same time giving perfect ease and comfort to the child. One of the many advantages of the EUREKA DIAPER is, that the danger and trouble of using pins is avoided; another is, that it permits a free circulation of air. They are manufactured in four different sizes, so as to suit the age and growth of the child, No. 1 being the smallest and No. 4 the largest.

We call the attention of our Lady Friends to the Newest, Rarest and Most Exquisite  
Hamburg Edgings and Insertions.
