DESERET EVENING NEWS FRIDAY DECEMBER 3 1909

MINING, BUSINESS AND STOCKS.

NEWHOUSE ENTERS DISTRICT OF EL

6

He and Windsor V. Rice of This Ci Join E. W. Griffiths and Associate In Ely Centennial.

What is believed to be the first i vestment of Samuel Newhouse in Ely has just been signalized by his en trance into the new company which i being formed to develop the groun of the Ely-Centennial, recently chased by E. W. Griffiths of this city Associated with Mr. Newhouse in th company will be Windsor V. Rice, als well known in mining circles in Utar

company will be windsor V. Rice, liss well known in ming circles in Utah. It is presumed that both men will be given a place on the directorate of the new company which will shortly file its articles of incorporation, and their intrance into it will give strength and ctability to the company. Before leaving for Ely last night Mr. Griffiths announced that the financing of the proposition is now completed, and the work on the property, which was started almost as soon as Mr. Criffiths acquired the ground, will now be pushed more energetically than ever. This work, at present, consists in div. This work, at present, consists in div. This and to consecu the five veins which are known to occur on the prop-ry. A blind lead was cut a few days ago, which was found to be four feet wide, and to contain fair values. That the management will cut other impor-tant veins with the progress of the tunnel there is not the least doubt. It is expected that the farthest vein will be cut at a depth of approximately 500 feet. The nonnecty comprises about 70 acres

be cut at a depth of approximately 300 feet. The property comprises about 70 acress of mineral land, the surface indications of which ear mark it as a winner. It is also in good company, having for its meighbors the Ely Calumet on one end and the McDonald Ely on the other. At the present time about 16 men are being employed in development. The company owns 2,100 feet along the outcrop of the five veins, all of which have good indications. Some high grade copper has been found near the surface, assays showing 35 per cent on the red metal being obtained from samples taken from the depth of 42 teet under ground.

MINING MARKET DULL.

Stocks Showed Tendency to Further

<text><text><text><text><text><text><text>

UNLISTED STOCKS.

Some activity was shown by the un-listed stocks, though prices among the Elys, which have been buoyant of late, also showed the effect of the times, From 21 a few days ago Federal Ely dropped back to 17 this morning, at which price 1,800 shares changed hands. Unitah Treasure Hill was ac-tive at 10½ and 10, 3,500 shares selling this morning at the latter figure. Closing quotations were as follows;

SCIENTIFIC MISCELLANY.

Calcium cyanamide, or nitrolime, con tains 20 per cent of fixed nitrogen, and is prepared by the action of nitrogen a mixture of lime and carbon. Experiments have shown its fertilizing value to be about four-fifths of that of Chile saltpeter. Among the newer nitrous products is nitride of aluminum, which M. Serpek, of Mulhausen, Alsace, makes by first converting

um, which M. Serpek, of Mulnausen, Alsace, makes by first converting alumina and carbon into carbide of aluminum in the electric furnace, then adding a fresh quantity of alumins, and treating the mixture with nitro-gen gas. The resulting mass, with 20 to 24 per cent of nitrogen, can be used at once as fertilizer, while crystallized nitride of aluminum has been obtained, with as much as 34 per cent of nitro-gen. This material has certain ad-vantages, but the claim is made that calcium nitrate, or air-saltpeter, is in some respects the most promising of the now numerous substances fixing the air's nitrogen in fertilizer. The nitrogen is oxidized in the electric are, and it has been found to be possible to effect the direct absorption by milk of lime of the resulting gases, thus ob-taining calcium nitrate or calcium ni-trite, equal to Chile saltpeter without further treatment. This process uses no coal, being dependent on water power, and the nitrogen is taken di-rect from the air.

rect from the air.

The new universal clock of an Eng-lish maker is designed to show the time in any part of the world. In an aper-ture in the fixed dial is a revolving disc, turning nce each day, and hav-ing the 24 hours marked on the outer edge, with subdivisions into intervals of five minutes. Greenwich is painted at the top of the dial, with the names of other places so spaced that the cor-rect differences in time will be shown. On turning the disk, one can read the time at any place at a given time in London or New York, or elsewhere.

Scientific forestry in Germany has raised the average yield of wood per acre from 20 cubic feet fn 1830 to 65 cu-ble feet in 1904, trebling the proportion of sawn timber secured from the aver-age cut. The money returns per acre were increased seven-fold in 54 years. The German Empire now has nearly 5,000,000 acres of forest, about 32 per cent belonging to the state, and the for-ests were never before in so good con-dition.

dition

dition. It is sometimes noticed with surprise that the two hands or the two feet are unequal, one being larger than the other or differently developed, and this asymmetry in the right and left halves of the body has been the curious sub-ject of research of Prof. E. Gaupp, of Freiburg. From extensive inquiry, he concludes that the inequality is normal and a sign of progress-not a defect, as Bichat regarded it a century ago. The asymmetry of the head, spine, chest and limbs is not present at birth, but appears with adaptation to sur-roundings, and each individual seems to have inborn tendencies to right-handed and left-handed effort. The asymmetry develops with the varying use and disuse of the sides. A marked degree was recorded in the face by ancient sculptors, but the greatest in-equality represents the greatest and vance in evolution, and the brain of Europeans shows more variation in the two sides than that of negroes, still more than that of the anthropoids.

Miners Said to be Sinking in High Miners Said to be Sinking in High Grade Rock in Two Places. Development work on the Ely Amal-samated, within sight and sound of the big smelter at McGill, is showing up larger shoots of high grade ore from which considerable production is being made, says the Ely Expositor. Miners are sinking on the ore in two places and will soon have enough out for a 50-ton shipment. A specimen of the ore weighing 530 pounds is on exhibition in front of the McGill National bank at the smelter, where it has excited the greatest wonder and which will be sent to the office of the company in Sait Lake to show what character of ore is found on the property. The de-velopment will be continued by several shafts which will follow down on the ore and a hoisting plant will be placed at the shaft showing the best ore shoot. Work in the Frederick tunnel which is penetrating the mountain east of the smelting by two shifts. The face is now in about 450 feet from daylight, and is being pushed straight ahead to pros-pect for the big ledges which show on the surface and which will be cust at a depth of 1000 feet. The Frederick is the property in which Jesse Knight re-cently purchased an interest from J. F. Brim after he made a personal in-spection of the lead-silver district join-ing the smelter company's reserve on the east. Grade Rock in Two Places. ONE MILLION A MONTH. Goldfield Con. Improvements Make Such Production Possible.

New York, 19 at 10. Uncle Sam, 100 at 51.

RECAPITULATION.

AFTERNOON SALES.

Such Production Possible. A monthly production of \$1,000,000 s predicted for the Goldneid Consoli-dated within the next month or two, or as soon as the big mill's capacity is raised to 1,000 tons per day by the completion of the Chilean mills and other improvements. According to the Goldneid Tribune the production in October was \$794,20.90, which was ob-tained from 20,137.41 tons of ore, show-ing an average value of \$39.45 per ton. The daily tonnage handled during the what less than the previous month-the 's fund the previous month-the 's fund the previous month-the 's fund the previous month-grade ore, taken from the Clearmont workings, where 2,301.49 tons of ore staken out in development work yielded \$25,904.26, or \$98 per ton. The extrac-tion at the mill may 94.49 per cent.

H. Rober's. This volume deals with the history of the Church from May 3, 1842, to Sist of August, 1843. It, therefore, covers a period of about sixteen months. The main external events may be set down as follows: First, exposure of the wickedness of John C. Bennett, and his departure from Nauvoo; (2) the charge against the Prophet Joseph of complicity in an at-tempted assassination of Ex-governor Lifburn W. Boggs, under whose cele-brated exterminating order the body of the Church was driven from Mis-souri; (3) the attempt of the state for Missouri to extradite the Prophet from the state of Illinois, to be tried as an accessory before the fact to an asseult on ex-Governor Boggs; (4) a second attempt on the part of Mis-souri, to extradite the Prophet from the state of Illinois on the old chargo of "murder, treason, burglary, arson, larceny, theft and stealing." first brought against him in the year 1838; (5) a preliminary prospecting of the west, doubtless with a view to the contemplated removal of the Saints to the Rocky Mountains. Of whether the ast organization thero-should be mentioned; (1) the intro-duction of the endowment ceremonies and enlarged instructions on the sub-lect of baptism for the dead; (2) an extension of auxiliary organization by bringing into existence to bus the state of the sing for the dead; (2) an extension of auxiliary organization by bringing into existence to bus them of great interest in the busines is the prosent develop.

(2) an extension of auxiliary organization by bringing into existence the Young Men's and Women's So-ciety. Another item of great interest in this volume is the manfest develop-ment of the character and spiritual strength of the Prophet during this period. The trying experiences through which he passed seemed to discover new qualities of soul power within him, and to emphasize those which he was known to have possess-ed. ed. The doctrinal development of the period covered by this volume deals with several items which may be re-garded as preliminary to that richer unfolding of philosophical thought to which the last year of the Prophet's teaching was so largely devoted. Vol. 5 is now ready.

6 MAIN STREET. Salt Lake City U.ah. CHICAGO. Chicago, Dec. 3.—Fear in regard to the possible spread of the switchmon's strike was greatly allayed at the opening of trading ln the wheat market today and, as a result, sentiment ln the pit was somewhat bearish. Cables were a disap-polntment to the bulls, showing, as they did, little response to the late upturn here yesterday. Favorable harvesting conditions in Argentina were the chief reasons for the comprehensive weakness of foreign markete. Prices at the opening here were 's high-re to a shade lower, with May at 1.05% to 1.05%. Later the price sold off to 1.05% of the corn helt the market manifested
