A Forger, Bigamist and Embezzler Caught after Two Years' Search.

A NEWSPAPER PUBLISHER GOES MAD.

Proposed Bill to Tax Bachelors.—A Huge Wolf Cat Trapped—A trapped Suicide.

At Casper, Natrona county, Wyoming, a rich deposit of asbestos has recently been discovered.

A new artesian well at Rawlins, Carbon county, Wyoming, furnishes 100,000 gallons of water daily.

Some of the threshing outfit in various counties in Colorado are still out to work on the crop.

Nampa (Idaho) citizens are turning their attention to the general fields of the Payette River, many secure claims are being made. They think this one of the most striking strikes ever made in southern Idaho.

The Ontario mineral Park City, is to be ground again, and while it is not so plentiful as it was before, it is still very slow and heavy as being made under many strong difficulties, says the record.

Jesse Hart, citizen of Durango, Colo., has become a noted experimenter. He has been placed in the country just out here having until recently, been called to examine more into his hobby.

Specimens from Colorado show that the Denver Public Sampling Works Co. did most of the sampling in Denver during the past year. This company handled 1,000,000 pounds of coal, saving a sum of \$100,000.

The Utah Contractors have arrangements whereby all perishable freight will be brought through from Salt Lake before a passenger train. That is, a car containing perishable goods will be attached to the regular passenger train and carried to the destination of the car.

Mr. William Lippman, in one of their saloons, a mixture of castor and glycerine, supposing he was taking castor oil, and thus the effect of the poison in less than fifteen minutes. The mixture which caused his death was kept in an unlabelled bottle in the undershirt pocket.

A great ice flooding is in progress at Laramie, Wyoming, at the present time. An immense amount of ice is gathered there annually for the Union Pacific company, and is shipped to points east and west. The ice is fifteen inches thick, and is made of the pure waters of the parameter river. The "icebreaker" is read through a piece four feet long.

The Park City social club, says the Record, is now thoroughly organized with a membership of about 40 and has to prove one of the most successful social organizations ever effected in this city. Its officers W. G. Lambeth, President; O. W. Morris, secretary and treasurer; A. Sullivan, W. F. Adairley, Wm. M. H. Horford and F. J. Weston, invitation committee.

Alma Josephson has captured in a fog in the mountains east of town, one of the largest wild cats we have seen, says the Brigham City Register. The animal was in the hills for more than five feet from tip to tip and was uncommonly heavy. The fur was purchased by Photographers Collins and will make an excellent coat. These animals are said to be quite numerous in the hills east of Brigham City.

Sheriff Wm. J. Rogers, Atlin, announced that he had obtained a \$100,000.00 Land company about \$100,000 worth of the stock was bought by F. B. West, a ten thousand millionaire of Chicago, by the Cunay Packing company and Moses, Nichols and Davis, all well known men of Omaha. The Cunay Land company has deposited over \$60,000 in grading its streets, clearing off brush and changing the channels of the Big and Little Blue creeks.

Martin McGrath and others have obtained a lease on the Kentucky No. 1, 2 and 3 and the George claims in the Blue Mounds, near Tremont, hills, says the Park City Record. The hills rise on one side and the ground will be developed by means of a tunnel and one shaft is now being worked. The ground is very promising and gives every indication of developing into a great mine. West will prosecute vigorously, but the ground is proven good and bad.

For some time past Mr. J. D. Carson, publisher of the Atlin Colorado County Republican, Atlin, has given unmercifully to the politicians in Tremont, who are the leaders in the community for the safety of the community to have him taken into custody. On Tuesday evening at about 11 p.m., Sheriff Higgins, accompanied by several officers, came to him in his home in Tremont to take him into custody. The officers were provided pending an investigation that will take place in regard to his mental condition.

H. J. Kerr of El Paso, New Mexico, has the contract of supplying sugar extract company with 1200 tons of cane sugar to be rapidly come into his agreement. Over 100 men at work in the mills and their operations extend over a mile in the vicinity of Deming. About fifteen tons are consumed and sold daily. The industry is proving a great inducement of developing the country. It is to be used for the cultivation of cotton on the plains of New Mexico and the products to be devoted to that purpose. Interested parties have gone so far as to secure concessions from the Mexican government for the digging of the root Mexican soil.

An old Señor a blind broom maker, while the other morning at Joaquin, New Mexico, took a quantity of sugar extract to the physician holding in a quantity of sugar. The physician attended to the man's life. No divorce was granted for the cash set, but it is presumed that eventually he will be divorced. The unfortunate man probably blind, having lost his sight two years ago by an explosion to

the Lamontine mine. Shortly after the accident he went east, where he learned the broom making trade. He has worked steadily at this trade for the past year and a half and has made a considerable living.

A few mornings since the bridge builders started work upon the bridge across the Arkansas at Casper, Casper, Wyo., midway across the river, the water drawing the bridge washed away, and the large bridge started to move upon the river current, and most of the men who were engaged in the work to get the bridge to stand again were unable to leave the bridge and floated away with it. Want the high water has been to what might happen next. Christiansen, who is a native of Norway, a very active river boat owner, aerry boat operator, has the bridge built, and the men who managed to reach safety before the dangerous waves were encountered. The river has risen greatly in the past twenty-four hours.

Professor C. L. Ingalls of the National Experiment Station has been busy in the last few days in getting corn in. He planted a section of corn with a direct-rower May 27th last. The work of harvesting was performed on July 2nd by removing all the tassels from every plant that had not yet reached maturity. The total number of pounds of grain from ten harvested rows, was 825, or from two acres 12,250, and from twenty, all the wheat was left in the ground, and the yield was 1,000 bushels per acre, which is about twice as much as was harvested in the previous year, notwithstanding considerably less area of ground.
