It took the Republican county convention just 35 minutes to transact its preliminary business this morning, and take a recess to allow its committees to prepare their reports. The opening session was featureless, and the real interest lay in the lobbying done among the delegates by candidates and friends of candidates. While in session Col. Squires called their stight to the fact that the fight this year is a fight to a finish, that the Gentiles are fast leaving the party, or have already done so, and that the culy Republican hopes lie in putup a ticket that no one can find with, that the business men will sum for, and that will prevent the Americans from "whipping us out of our boots" or deflecting enough votes

This has always existed in all nations and with all peoples, and perhations and with all peoples, and per-haps, growing less in degree, it always will exist. But as people increase in intelligence and true patriotism, this power loses its strength and is more and more confined to its legitimate sphere. This influence is not confined to any particular church nor to any to any particular church nor to any partaicular state or locality. It is as much to be condemned in one church n and to be condemned in one church or locality as in another, but I see no reason why a rule should be applied in this matter in Utah different from that in any other state or locality. Why should not all be measured by the same standard?

PRESENT DAY CONDITIONS.

For many years after the pioneers came into the valley the people were all of one religious faith. Strong, all of one religious faith. Strong, aggressive men, with powers of lead-ership, naturally rose to power in the Church, and the same gualities made them prominent in affairs of state. There was a commingling of Church and state. The condition would have been the same had these people been all Catholics, Presbyterians or Meth-odists instead of Latter-day Saints. For the last 30 years the conditions have been improving. During the last 10 years the change for the better has been little short of marvelous. It is difficult to find its counterpart in his-
