THE VALUE OF CHARCOAL

Few People Know How Useful It is in Preserving Health and Beauty.

Nearly everybody knows that charceal s the safest and most efficient disinfec-ant and purifier in nature, but few real-ze its value when taken into the human system for the same clearsing purpose. Charceal is a remedy that the more you ake of it the better; it is not a drug at all, but simply absorbs the gases and mpurities always present in the stomach and intestines and carries them out of he system.

Boyle and family Charles Ashton, one of the men who was found guilty of grand larceny in the district court, will also be charged with being implicated in another burglary, that of entering a room and steal ing a trunk belonging to E. T. Dela hunty, several months ago. Harry Hill who was taken to the state prison confessed to Sheriff Balley that Ashton was connected with the burglary.

A Judicious Inquiry.

A well known traveling man who visits the drug trade says he has often heard druggists inquire of customers who asked for a cough medicine, whether it was wanted for a child or for an adult, and if for a child they almost invariably recommend Chama berlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always There is not the least danger curci in giving it, and for coughs, colds and youp it is unsurpassed. GROUNDING BARBED WIRE.

A letter from Atchison, Kas., says that

an unusual number of livestock have been killed this season by lightning running along barbed wire fences Twelve cattle were thus killed recently near Farmington; they stood with their heads against the wire. Electricians say there is no limit to the amount of electricity a barbed wire can carry, but that farmers can prevent this killing of livestock by ground-ing the wires frequently along the fance --that is, run a wire connected with the barbed wires into the ground from the post at a distance of about 100 feet. These grounded wires will carry the electricity into the ground, A charge of lightening striking a barbed wire will kill anything touching the vire, even though the fence be 20 miles

English agrucultral statistics for 1903, show a further sensational deline in the British farming industry The reduction in the area under ploy which has gone on steadily since 187 with three slight checks in 1885, 1894 nd 1897, steadily continues. Last year 72,000 acres were withdrawn from rable cultivation. This brings the total below 15,500,000 acres, or 3,000,000 less than it was 30 years ago. There was a decrease of 145,000 acres in the land under wheat, reducing the area 1,582,000 acres. The burley acreage fell by 51,000 acres to 1,858,000 acres. This is the lowest on record. Lands

in potato cultivation were less nearly 10,000 acres.

AMERICAN DESIGN THE BEST.

"In the production of electro-plated goods for table use, such as spoons, knives and forks and tea sts, the United Staten is ahead of all other coun-tries." said Arthur Bradshaw of Meri-Conn

"The chief factor in the American superiority is in the beauty of the designs. There is no style about the wares of the old countries, while over here the plated stuff so nearly resem bles the solld siver goods in looks and fineness of workmanship that the aver-

age buyer can scarcely tell one from the other. The best grades of the platea product will last twenty-five to thirty years which is about as long as one

Masibi's hill, on the eastern boundary of the Transvaal, in South Africa, is regarded by the British engineers at the Cape as one of the strongest natura fortresses in the world. It is a symmetrical, cone shaped hill, standing solitary in. the middle of the level veldt. As a natural curiosity it is worthy of special treatment. Its basalife formation would suggest a volcanic origin. The sides of the peak rise in natural terraces, and the Kaffirs have taken advantage of the fact is surround the elevation on all sides with well constructed defenses.
