The Irish executive appears to be carrying out the provisions of the arms act with a vengeance. Among the recent seizures is a rusty old cannon kept at the gap of Dunloe for awakening echoes for the edification of American and other tourists.

The coup d'état of the Prince of B. Igaria created a sensation in Ber-lin and Vienna. Liberal papers consider he has made a great mistake and has taken an attitude unworthy of his German origin. Gen. Erneroth, now virtual dictator, is a Russian officer.

The English chaplain at Tunis takes advantage of the present excitement to ask subscriptions for a memorial window in the church at St. Augustine, Tunis, to John Howard Payne, the author of "Home, sweet home," and once American consul to Tunis.

How to Shear Sheep.

I use a platform raised from the floor about 10 inches, and large enough to hold sheep and fleece, say 34 by 5 feet. Set the sheep on this bench on his rump, supporting the sheep by your bent leg, and the head of the sheep under your left arm. The position is easy for yourself and the sheep Shear off and detach from all fleece all the wool on the belly and legs that would easily drop off. Then shear the left side of the sheep entire, commencing at the ruffle under neck, around the neck, head, shoulders, etc., letting the fleece roll back just past the back-bone. When the entire left side is sheared, turn the sheep so that the shearing from the head down, let-ting the fleece fall down and back of its own weight. When nearly sheared, lay the sheep flat on his side, putting the right knee over, but not upon the neck, and finish the shearng around the rump and tail.

The above is the easiest way a sheep can be sheared, but long prac-tice is necessary to make easy work For easy and rapid shearing I pre-fer short-blade shears, and a great

deal depends upon keeping shears in perfect order. If your shears are dull, or run bad, you will soon tire out. If tag locks have to be cut, an extra pair of shears should be ket t laying near for that purpose. If you have plenty of cobs, throw them on the floor of the pen where your sheep are confined. They will keep the sheep much cleaner than straw. Catch your sheep by the hind leg, and when carrying or lift ing them, grasp them around the body. Never let anyone grab your sheep in the wool. In handling sheep on the shearing bench, do it in such a way that they cannot get their footheld anywhere. They are helpless until they get a foothold,

then look out. Lastly, though not leastly, never Immigrants landed to day in New York, 3,193.

The International Sugar Refining Old ewe, whose lamb was bleating old ewe, whose lamb was bleating of Davesport, The Dalles, Oregon. Company of Amsterdam have failed. like all creation, used to make me mad all over. Such sheep won't hold still. But an old shearer cured me by saying that when a shearer got angry, it was a sure sign that he didn't know more than the sheep

ings in Tunis.

The Indian saftsmen of Montreal have struck for \$2.50 per day and against white labor.

The Emperor William returns to Berlin to day and inspects Potsdam garrison to-morrow.

To sum up, all you have to do is to hold your sheep in an easy position, keep your fleece together, avoid cutting the sheep, shear smooth, but not too close, keep cool, and by long practice you will make a shearer.—Correspondent Rural World.
