What the Best Judges In Utah say about them: SALT LAKE CITY, Aug. 16th, 1880. The undersigned hereby certify that they have carefully and thorough-ly examined the D. O. CALDER CABINET ORGAN, Class B, (and compared it with a number of Organs of other makers, some of which enjoy a world-wide reputation) and have no hesitation in pronouncing it to be an excellent instrument both in its mechanical construction, thoroughness of workmanship, and superiority of tone and touch, and that, all things being considered, it is second to none as a desirable instrument for the Parlor or Meeting House, and is calculated to give entire JOSEPH H. RIDGES, Builder of the Tabernacle Pipe Organ. C. J. THOMAS, Conductor of Zion's Musical Society. T. RADCLIFFE, Organist and Conductor of Philharmonic Society. ORSON PRATT, JR., Pianist and Teacher. C. Y. TAGGART, Prano Tuner and Repairer. W. E. WEIHE, Violing st, Tuner and Repairer of Organs and other Musical Instrument CHARLES SMITH. In presenting the CALDER ORGANS to the Musical Public, with the above valuable Certificate of their superior merits, I desire to call attention to some of the especial features which distinguish them: The actions are made for me by the celebrated E. O. Carpenter, who has for over fifteen years made Organ actions, and their every possible improvement a specialty. They are made with a perfectness of work-adjustment, tone and quality, that stand unrivalled. None but the very best materials, in every part, are used. The **Hammond patent** stop work, used exclusively in these Organs, is acknowledged by com-petent judges to combine more excellent features than any hitherto invented. It is simply impossible to disarrange or break any part of it by ordinary use. It will never wear out, nor will the relative position of its parts ever change. The patent divided relative position of its parts ever change. The patent divided Octave Coupler, as applied in these Organs is constructed of metal in the most improved manner, rendering it impossible to get out of order and arranged to couple right and left from center of Key-board, thus enabling the performer to increase the power of tone in the upper or lower half of the instrument at will. The Improved Equalizing Arrangement by which the upper or higher notes are rendered more prominent and brilliant, so that the melody part is not overbalanced and drowned by the lower notes of the instrument, as is the case in most other Organs. The New and - Improved Carpenter Vox-immana, by which the front set of reeds, as also the sub-bass set, are as discernibly affected as the back set, giving it the sympathetic sweetness of the human voice. Other, and a more extended description of improveare to be found in my catalogue, which can be had on application. PLUMBER, TINNER, These Organs are made for me, and bear my name on the key-board as a standing guarantee that they are in all respects precisely as claimed in this advertisement and in my circular. I also warrant them for six in this advertisement and in my circular. I also warrant them for six years. The prices vary with the style of cases, and combinations in the actions from \$65 and upwards; but to give some idea of the extraordi-nary low prices of these magnificent instruments, I will quote wiyle 2, action 23; 5 octaves, 4 sets reeds of 21-2 octaves each, 9 stons, knee swell and Patent Grand Expression, \$90, Sold for Cash or on instalments.
