

MINING, BUSINESS AND STOCKS

ANOTHER STRIKE AT LION HILL CON.

East Side Tunnel on Northern Light Claims Breaks into Shipping Ore.

RUNS FROM OPHIR HILL SIDE

Sixteen Cars of Ore Running \$8,000 to \$8,000 a Car Was Once Shipped From Tunnel.

According to information received from Ophir the Lion Hill Consolidated property at that place has made another strike. This time shipping ore has been encountered in the East Side tunnel on the Northern Light claims opened by the Lion Hill company. It is understood that ore has been encountered that runs as high as 160 ounces in silver and from \$2 to \$3 in gold and also carries values in copper. The exact condition of affairs at the property have not been ascertained in Salt Lake yet, but a telephone message from there this morning was that the ore is broadening out in the tunnel and is trending to uncover a large body.

The tunnel is one that was worked during the time that the old Northern Light company had the property. It has been driven in between 500 and 600 feet. It is on the Ophir side of the hill and the old company believed it was apparently worked out after taking out considerable ore in many days. At one time 16 cars of ore were taken out of this tunnel that brought returns of \$6,000 to \$8,000 to the car.

In the Lion Hill property something over 1,000 tons of high grade stoping ore and low grade milling ore has been blocked out and with the addition of new shipping ore, the property will be in excellent shape for greater things.

The company has been getting some splendid results from its development work on the property and in other workings ore has been encountered that has run from 1 to 25 per cent lead, 31 to 74 ounces in silver and 41 to 51 to 15.26 in gold.

STOCKS ARE STILL WEAK.

Nearly All Stocks Show Effect of the Heavy Bear Market of Week.

Stocks stood up to their own better today than at any time during the week. After the terrible pounding that Iron Blossom has received, it has shown some considerable house cleaning. The stock showed no brighter and stronger this morning and is again moving back to its old level. There was heavy selling of this security today, but the market seemed equal to the task of absorbing it in chunks, that are other times would have sent it down. The stock opened at \$1.50, it dropped to \$1.55 and quickly climbed back again and at the close was strong at \$1.95, buyer 600. During the session 15,375 shares were sold.

Columbus Consolidated was lower today and Colorado was not as strong as usual. Most of the stocks were apparently holding their own this morning, although none of them showed any marked degree of activity. All appeared to be going at bargain counter prices. Somewhat of a run was made on South Columbus as though there was an effort to unload.

The number of shares sold during the market day was 151,842,252.

No sales were reported on the early market today and the majority of the stocks that came out were lower than usual. Ulnath Treasure Hill was offered at 22 cents. A bid of 45 cents was made for Opex and the stock was offered at 80 cents. Nairdriwer received a bid of 15 cents. Inspiration Copper received a bid of \$1 and was offered at \$5.40. Beaver Combination was offered at 18 cents and 9 cents was bid.

COLUMBUS CON. IN SEARCH OF TEAMS

Has Not Enough Wagons and
Animals to Care for Big
Output of Ore.

TWENTY TEAMS NOW WORKING

Mine Will Soon be Sending Out Enormous Tonnage to Sandy to be
Sent to Smelter.

Although the Columbus Consolidated mine is sending down 45 tons of ore and better each day to the smelter, it is inadequate to handle the large tonnage that has been developed on the property. General Manager Tony Jacobson has returned from the property feeling better pleased than ever over the prospects of the property this summer. At present he says about 20 teams are hauling ore from the bins at Tanner's flat, but they are insufficient to care for the needs of development to care for what is now going on to meet the demand for teams the company has set for a number of outfitting at Heber City, the only haulers are hauling business. It will be several days before they will be able to reach the work, but with double the number of teams there is plenty of ore to keep them busy.

The roads are still in poor shape, but are getting better each day. The mile of snow and ice taken out below Tanner's flat has left a fair wagon road all the way to Sandy, where ore is loaded for shipment to the smelter.

The property is getting better all the time," said Mr. Jacobson this morning. "The new body of ore which we struck is opening up nicely, but we can do little as yet to determine the extent of it. We can only go ahead according to the rate that our ore is being hauled away. Our bins are all full and the hauling seems to make but little difference."

In another week there will be plenty of ore coming down from the Columbus Consolidated. The roads are getting better every time and as soon as more teams arrive there will be a good tonnage coming down each day.

"Most of the farmers are now using their teams on the farms and it is hard to get people to haul ore."

DECIDES IN FAVOR OF MASON.

Jury Holds Right to Mining Claims
against Klenze.

Helena, April 16.—A special to the Record from Boulder says that a jury in the district court has awarded ownership of the Mason-Brooke group of gold and silver mines in Jefferson county to B. P. Mason of that city and B. C. Brooks of Helena. H. G. Klenze of Butte was endeavoring to secure patent to the well known properties, but having been advanced in the United States land office in Helena, action was instituted in the district court. Klenze is the step-father of Mary MacLane, the author.

FINE MORE JEWELRY ROCK.

Montgomery No. 1 Lease on Rawhide
Coalition Opens Fine Streak.

Rawhide, April 16.—An important strike of jewelry rock was made this morning on the property on the estate of the Rawhide Coalition company, and this morning more than \$4,000 worth of the extremely rich ore was extracted from the new find. In a drift on the 100 foot level, where a great body of high-grade mill ore was developed last week, the face last night disclosed an 8-inch streak of ore which carries \$2,000 in gold and \$100 in silver to the ton. The remainder of the drift samples from \$40 to \$100 to the ton.

The Truett Rawhide lease on the Happy Hooligan claim of the Coalition company in the winter has been won from the few leases near the Monty lease line, last night opened a seam of very rich rock which this morning is yielding from \$5 to \$15 from an egg pan full of fines.

The great payshot in the Gruet Ballon Hill lease on the Rawhide Queen estate has widened out to 18 inches in the winter being sunk from the 150 level, and across this streak the average values are \$2,000 a ton. This payshot is improving in size and value with every shot, and the predictions made that it will with further development rival the great Hayes-Minnette bonanza on the Goldfield Mohawk bid fair to be realized.

BOSTON COPPER CLOSE.

James A. Pollock & Co., bankers and brokers, furnish the following received on their private line this afternoon:
