EVENTS IN THE WEST.

A Record of Occurrences in Neighboring States and Territories.

BROWN OF CALIFORNIA IS SUSPENDED.

Cattle for Dawson—The Farragut Nearly Ready for Service—Fell Down Stairs and Died.

Two thousand steers will be driven over the Dalton trail to Dawson, starting from Pyramid Harbor in June. C. W. Thebo, representing Butte City men, has purchased 1,300 head and Jack Dalton is gathering 700 more for the same purpose.

Roderick McNeill, a coal passer on the steamer Pomona, died Sunday from burns received Saturday evening, as the vessel was going into the harbor at San Diego, Cal., a fine blow out and McNeill was scalded by the steam. He leaves a widow and several children in San Francisco.

Miss Nellie Smith, the fourteen-year-old daughter of John Smith, whose home is at 1008 William street, in West Oakland, Cal., fell down a flight of stairs Sunday morning as the result of a misstep, and died a few minutes later. The accident was an unusual one, and it will require an examination of physicians to ascertain just what injuries caused the young girl's death.

Brigadier General Merriam, commander of the department of California, has gone to Van Couver barracks, accompanied by Major Berry, his aide. It is understood that General Merriam will inspect the troops and fortifications at Van Couver. Before his departure he ordered Colonel Marcus P. Miller to take charge of all the troops remaining at San Francisco, as well as of the works of defense in and about that city.

After having been missed for about ten days, Henry Schoenberger was found dead in the attic of his house at 8049 A and E streets, Sacramento, Cal. He had hanged himself, but after death the rope broke and the body fell to the floor. Schoenberger had a wife and four children. He was very abusive to them and some time ago they left him. He had been drinking hard for more than a year and last December made an attempt to shoot his wife and eldest son.

Charles H. Walker, an Indian, committed suicide in the county jail at Redding, Cal., Saturday by hanging himself. Walker, who was arrested for brutally beating an Indian boy to death, was to have had his preliminary examination Monday morning. When his jailers went to give him his breakfast they found him hanging to the window bars of his cell. He had torn his overalls into strips and with them made the noose. To make death doubly certain he fastened his hands behind him by means of a slip noose.

Edward J. Brown, of the University of California, was suspended indefinitely from the inter-collegiate amateur athletic association Tuesday night. Several months ago Mr. Brown visited the eastern colleges as the representative of the University of California. On his return to California he criticised the standing of the eastern athletics and in general made a number of statements that were not at all to the liking of the inter-collegiate association. At the annual meeting of the association, recently held his case was taken up and Mr. Brown was invited to recall his statements. He refused to do so and has been suspended as a consequence.

In a little more than a month there will be ready for service with the United States warships in Pacific waters a small but formidable vessel—the 30 knot torpedo boat Farragut, now on the ways at the Union Iron Works, San Francisco. Contrary to the custom of shipbuilders the Farragut's engines and machinery will all be in place when she slides off the ways. The Farragut is designed for a speed of 30 knots an hour. Her dimensions are: Length, 210 feet; beam, 20 feet, 4 inches; maximum draft with the ship ready for sea and bunkers full 6 feet. Her displacement will be 272 tons and her engines will indicate a maximum of 5,500 horsepower.

The board of trustees of the San Francisco chamber of commerce at a special meeting reached the conclusion that the best means of protecting the coast against privateers would be for the citizens to procure auxiliary cruisers, by purchase or construction to protect merchant vessels against privateers, and to create an auxiliary artillery with batteries for the defense of the coast of San Francisco. It was also suggested that a submarine cable be laid from that city to the Farallon islands and that a signal station be established upon the islands, in order to announce approaching vessels one day earlier than by the present methods.

PATRIOTIC EPHRAIM.

Citizens Clamor for the Latest War News—Sunday School Work.

Ephraim, Sanpete County,
April 25, 1898.

To the Editor:

The fires are flying all over town, and enthusiastic citizens are reading the bulletins of the progress of the war as received here by wire by the enterprising druggist, Mr. H. P. Larsen.

While the war news sends the blood coursing through the veins of the patriotic citizens around the bulletin boards, the quarterly session of the Sunday school session of the Stake was in session, quietly discussing questions for the forwarding of that great institution. A large representation of the wards of the Stake was present, Stake Superintendent Newton E. Noyes presiding.

The morning session was devoted to hearing reports from the superintendents of the several ward schools; in the afternoon Elder Abram Johnson, superintendent of the Mount Pleasant schools, gave an interesting account of his travels and labors as a Sunday school missionary in the Stake. He was followed by Christian Willardson, who has also been laboring in the same position. Dr. J. M. Tanner of the Stake Sunday school board, from Logan, gave an interesting lecture on "Reverence." The closing remarks were made by Elder R. Petersen.

On Sunday, home missionaries, Elders Baxter and Blake of Spring City, addressed the Saints at their large meeting house. In the evening a conjoint meeting of the Improvement Associations was held and a pleasing and instructive program was rendered.

Several dwelling houses are in course of erection. A new store is being built by T. W. Hansen immediately opposite the Union Hotel. Ephraim is prospered and a brisk business air prevails on her main streets. A. J.

A Plutocrat Canaler.

The Erie Canal, on account of its situation and length, of course, transports the greatest amount of freight. On this canal, which is owned and kept up by the New York state, the boats which are worth from $2,000 to $3,000 each are owned entirely by the canalmen. The cabins of some of the boats on this canal are comfortably, almost luxuriously furnished. One canalman, who is known to be worth over $100,000, lives with his family on one of his boats, the cabin of which is furnished with taste and has every convenience and comfort which money can purchase.—From Life on the Canal, in Godey's Magazine for May.

LITERARY NOTES.

The foremost authority in all the world on the subject of earthquakes, John Milne, and his unique earthquake observatory in the Isle of Wight will be the subject of an illustrated article in McClure's Magazine for May. The article will describe how, by the scientific appliances invented and set up by Prof. Milne, the slightest tremor of the earth, in however remote a quarter, is instantly measured and recorded and the place of its occurrence disclosed, whether on the land or under the sea.

A reconnaissance by the friends squad of one of the regular army's infantry regiments is the subject of the double-page illustration of Collier's Weekly of this week, and on the front page is portrayed the scene in the home of a naval officer who was suddenly called to duty. More than a dozen of the Weekly's illustrations are from photographs taken at or near Key West, one of them shows Captain Sampson, commander of the fleet, with a map of Cuba spread upon his knee. Consul General Lee's arrival at Port Tampa, from Havana, is the subject of an illustration by the Weekly's art editor, Mr. Walter Russell, who was at Port Tampa, and who is represented also by a pencil-sketch of General Lee. Other portraits are of Vice Consul General Springer and the chairmen of the foreign relations committees of the two houses of Congress. While soldiers and sailors are wrestling on the Gulf coast the ice is scarcely out of the rivers of the Northwest; the spring break-up on one of them is the subject of a strong picture. In keeping with the spirit of the times is a war story—a short one—by Hulbert W. Chambers, and much information about naval and military affairs and "the ever-faithful Jim."

Are You Thin?

WHO SETTER must from slow starvation, nervousness, nervousness, poor blood, impoverished general weakness? What are on the edge of nervous prostration all the time? Those who are thin, lose appetite are only simulators. To be plumped out and gain flesh, Scott's Emulsion will make you fat. You want new blood, rich blood; and a strong nerve-food.

Scott's Emulsion of Cod-liver Oil is all this. It feeds the tissues, and strengthens the nerves.

Horses Kick
In self-defence. It is their most vigorous form of protest against the abuse of Spirit Nails that are driven into their feet to hold on their shoes. Blacksmiths often use such nails in ignorance of the danger that is liable to follow.

This is what happens. One part comes out where it should, for clinching the other goes into the tender flesh. Such nails are the result of the Cold-Rolled and
Shearing Process
by which the fibres of metal are separated and can often be pried apart with the fingers. This kind of a nail can be easily distinguished by the rough edge along the sides near the point.

Putnam Nails
are exclusively Hot-Forged and Hammer-Pointed, precisely like the old-fashioned hand nails. The process works all particles of iron closely together into a compact, firm nail that cannot Split, Rot or Break and is
Absolutely Safe.
Examine the nails in your stable's shoes the next time they are reset. If for the whole month they are the Hot-Pointed Putnam, you will find more than 50 per cent already near the point, with their fibres worn and separated and disintegrated.
Nickel ring, nickel plated, mailed on receipt of 10c cents, to stamps taken.
PUTNAM NAIL COMPANY,
Neponset, Boston, Mass.
