THE EVENING NEWS.

Monday, - - - March 27, 1871.

PRICE OF GOLD.

Quoted daily by HOOPER, ELDREDGE & Co., Bankers.

SALT LAKE CITY, March 27, 1871.

Buying at $1.06; Selling at $1.11.

LOCAL AND OTHER MATTERS.

Sunday Meetings.—Yesterday morning, Elder Woodruff addressed the congregation at the Tabernacle. In the afternoon an interesting discourse was delivered by Elder Orson Pratt.

Grand Coalition of Talent at the Theatre.—To-night there will be a grand combination of talent at the Theatre—Miss Rose Evans, Mr. Geo. H. Waldron, "the talented young actor," Mr. W. H. Power and the Stock Company. Miss Rose Evans has achieved fame and distinction in Shakespearian roles in Australia, California and Nevada, and appears to-night as Juliet, in the play of "Romeo and Juliet." She will be supported by Mr. Waldron as Romeo and Mr. Power as Mercutio; Mr. P. Margets as Peter, and other characters by the company.

The entertainment will conclude with the very laughable farce of "Bewitched Out."

Overture at ten minutes to eight; performances commencing at eight o'clock precisely.

Free Lecture.—Another Lecture, under the auspices of the Deseret Library and Reading Rooms Association, will be delivered to-night, in Morgan's Commercial College. Prof. Karl G. Maeser will be the lecturer. The subject—"The Book of Nature," is a delightful one, and one which the professor is well qualified to treat upon in a highly instructive and entertaining manner. There is no charge for admission and the lecture commences at half past seven o'clock. All who desire food for the mind, will do well to attend.

City Hall Meeting To-night.—Remember the meeting of the Stock Importing and Improvement Society, at the City Hall, to-night; the Constitution and by-laws of the Salt Lake County Co-operative Stock Herd, will be presented and read. A full attendance is requested.

News from the Settlements.—The following items of news were received by Deseret Telegraph line this morning.

Nephi, 27.

A few citizens desirous of securing some rich ledges, as we suppose, discovered some time since by some of the party, met, and organized a mining district on the 24th, to be called the Nephi Mining District.

A Lowe, Recorder.

St. George, 27.

On Saturday evening the Dramatic Association here played the "Stranger" and the "Rough Diamond" to a full house, and gave good satisfaction. The weather continues very pleasant. The last of the settlers on the Muddy have passed here, on the way to Long Valley and the Kanab. Quite a number of settlers of Eagle and Spring Valleys, Nev., are passing through, moving to Kanab.

Springville, 27.

On the 24th, while John Anderson, a transient resident, was descending from a straw-stack, the end of a pitchfork handle entered the abdomen, passing up to the short ribs, about eleven inches; he is being attended by Dr. Willson, army surgeon, here.

Beaver, 27.

The Gentle Mary mine, in Granite District, situate in the mountains twelve miles west of Beaver, is being worked by the O'Connel Bro's. They have sunk three shafts, averaging about twenty feet, and find the ore growing richer as they sink. The ore taken out will go from thirty to fifty per cent. of the metal. This lode is a fissure vein, which extends for miles, and is eight feet in width, running between a hanging wall of granite and marble. At the foot of the wall are the same kind of indications, which surround the Emma mine in Little Cottonwood. This same belt of mineral runs south, into the Minersville old ledges, now owned by Captain Bateman, who has hands employed sinking a shaft. The ore of this mine is galena and silver. The ore of the Gentle Mary is another galena ore silver, and is kept very still by the workers, but is understood, by miners, to be bismuth.

A New Switch at Wood's Cross.—President Young and Superintendent Little and Engineer Jessie W. Fox, of the U. C. R. R. accompanied by several gentlemen, surveyed and laid out a new switch at the Wood's Cross Station of the U. C. R. R. this morning.

Arrested.—A few days ago a man known as Professor Bergman, hired a horse and vehicle from Mr. Willard, of this city, for the purpose, as he stated, of going to Camp Douglas. Not returning according to agreement Mr. Willard, suspecting his honesty, gave information to the police, who were soon on the alert for the "professor," and after three days labor on his account, succeeded in arresting him at Croydon, Morgan Co., whence they brought him to this city, and placed him in secure quarters. His case is to have an investigation this afternoon.

Good Iron of Utah Manufacture.—S. M. Blair, Esq., and others have for the last year or two been devoting their time and means to experiments in the manufacture of iron at Iron City, Iron County, U. T. It is gratifying to record the fact that success is about crowning their labors. They have now, co-operating with them, a man who has had a long experience in the business,—Mr. David Adams, of Adamsville, Beaver Co., U. T., and he has succeeded in making from the ore a specimen of pig iron, pronounced by judges to be of very excellent quality. We trust that the enterprise of the company at Iron City will reap a rich reward; it is deserving of it, and if good marketable iron can be manufactured there, in large quantities it will be a source of incalculable benefit to the Territory.

The Greeley Tribune is the name of a weekly paper published in the new town of Greeley, Colorado. It is said to contain a prosperous community. Speaking of the use of water for irrigation, it says, it was seen last year that if every person was allowed to use water, a vast amount would be wasted, and it was evident that some are naturally so careless that if the Mississippi river were at their command, it would be insufficient, while fields would be swept away. They now propose, the *Tribune* says, to adopt so much of the regulations of the Salt Lake people, as shall be found applicable, the general plan of which is, to divide the tillable land into districts under the control of a Water Board, and the whole under the control of a Water Commissioner, who gives personal supervision to the furnishing of water, and whatever pertains thereto.

The *Tribune* has an electrotyped head in the writing of Horace Greeley—the artist having made and exact *fac-simile* of it. The into rest of this head certainly does not lie in the beauty of the chirography, for the philosopher of the New York *Tribune* will never gain a prize for fine penmanship. It is almost as bad as Rufus Choate's was, and it was said of his writing that the Chinese who had seen it were so delighted with it that they offered him a large salary to go to China to mark tea-chests for them; and quite as illegible as that of a President of a Railroad in Michigan, who wrote a letter to a farmer on the line, threatening him with a suit for encroaching on the company's privileges, and which the farmer, unable to read it himself, used as a pass on the Road for about a year, the conductors recognizing it as the President's hand writing, but, unable to decipher it, had to accept the farmer's version of its contents. It is said of Mr. Greeley's writing that he became displeased at one of his printers and wrote him a letter discharging him. The man moved West, and on the strength of this letter, which no one could read, and which the bearer said was a letter of recommendation from the honored editor of the *Tribune*, succeeded in obtaining an excellent position as foreman of an office.

PEOPLE'S VERDICT

Over Half a Million sold and in use!
4,000 made and sold per week

SINGER'S
New Improved Silent
FAMILY SEWING MACHINES
ARE
The Best in the World,
Because all of them are in constant use, while a very large proportion of other makes are not used, owing to their being partially or utterly impracticable.

THE SINGER
NEW FAMILY MACHINE
Has been brought to perfection, regardless of time, labor or expense and is now incomparably the best Sewing Machine in existence.
It is *simple, compact, durable, beautiful, quiet, light-running*, and capable of performing a range and variety of work never before attempted upon a single machine; using either Silk, Twist, Linen or Cotton Thread, and sewing with equal facility the very finest and coarsest materials, or anything between the two extremes, in the most beautiful and substantial manner.
The New Improved Attachments for Hemming, (any width) Braiding, Embroidering Magic Ruffling, Gathering and sewing on (at the same time) Self-Sewing. Cording, Tucking Quilting, Felling, Trimming, Binding, etc., are novel and practicable, and have been invented and adjusted especially for this Machine,
Folding Tops and Cabinet Cases.
New designs of the unique, useful and popular Folding Tops and Cabinet Cases, peculiar to the Singer Machine, are in every variety of Wood, such as black Walnut, Mahogany, Rosewood, Satinwood, and from the plainest to the most elaborate pattern and finish. The Machines themselves are plain or highly ornamented with pearl and gold to correspond with their tables or cabinets.
In the Singer the work is fed or passed through the Machine in the natural direction, namely, *from the operator*, permitting her to sit in a natural and healthy position. In many other Machines the work passes from right to left, or the reverse, *compelling the operator to sit in a bent and unhealthy position, and thus causing weakness of the back, etc.*
The Singer uses a SHORT STRAIGHT NEEDLE, which is *not* liable to break or miss the stitch. Many other Machines use a long crooked needle, which *is* liable to break and to miss the stitch.
In the Singer Machine the Shuttle is carried, thus avoiding nearly all wear. It requires no tension and does not cut the thread or goods. Other Machines *drive* their Shuttles, in a race, thus causing great wear, and *requiring oil*, soiling the thread and goods.
On the Singer, the Tension on both the upper and lower threads is absolutely under the ready control of the operator, thus rendering the Machine always available for good sewing, which is not the case with any other. Many so-called cheap Machines are really worthless, and so are many of their new peculiarities and supposed advantages.
The SINGER is the
Oldest Practical Sewing Machine,
Being about twenty years in the market. Having been constantly improved by the employment of the most skilled ingenuity of the age and unlimited capital, it is now divested of all unnecessary parts and possesses All the Very Latest Inventions and Improvements. It is the only Machine sold on Honest Claims, as all its parts are Practical and will do all that is claimed for them. Some other Machines are Greatly Complicated, to do Useless and Silly things, and thus are rendered Liable to Constant Derangement. The Singer Seldom or Never gives trouble, but is readily and easily managed by those who *utterly fail on other Machines.*
SINGER'S
New Manufacturing Machines
Claim the same advantages over others of their class as the new Family Machines. These old and well-tried Sewing Machines are applicable to all kinds of Heavy and Light manufacturing in Corks, Leather, etc., and run in the most perfect and reliable manner without trouble to the operator.
HAVE ARRIVED!
A Full Assortment of those
Beautiful and Unrivaled
MACHINES.
(The numbers on which show a manufacture of between Five and Six Hundred Thousand.) Consisting of the Different Varieties made by the Singer Manufacturing Company, and we shall sell at Eastern Prices, with addition of Freight only. To accommodate parties who cannot pay all down, we will sell on
EASY MONTHLY INSTALMENTS
So that all may possess one of these *Blessings.*
For the convenience of our Patrons we have engaged the services of a gentleman who has had twenty years experience and is one of the most skillful experts in the world in repairing and adjusting Sewing Machines. He will put each Machine in complete and practical running order before it leaves the institution and will also impart to purchasers all needful instruction, so that they can at once commence work.
We resort to no trickery whatever to sell Sewing Machines, but allow their Great Merits to recommend them. We can do this, as the demand for them is so great that although the Singer Company make more than all other first-class companies combined, they cannot nearly fill their orders, and are compelled to still extend their Gigantic Works.
We having been so fortunate as to secure the
General Central Agency,
For this Territory, we extend a cordial invitation to all to come and see the Machine, whether they wish to buy or not. See all others, but do not buy without you examine the Singer.
We Guarantee every Machine we sell to give entire satisfaction.
THE SINGER
BUTTON-HOLE MACHINE
Is the only Practical one in the World.
OTHER SEWING MACHINES REPAIRED on Reasonable Terms.

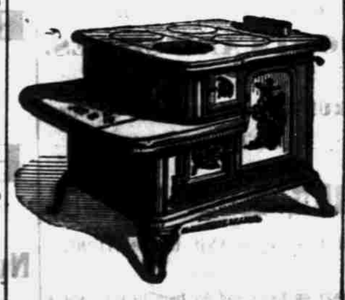
THE CELEBRATED
COOKING STOVES!


SUPERIOR
For Wood.
They are really what their name indicates, SUPERIOR to any other Stove in the market, and for
Economy, Durability, Convenience & Dispatch
Are Unequalled!
KANSAS, ALASKA
AND
IMPROVED AMERICAN
For Coal.
Which for Neatness of Design, Thoroughness of Combustion, Capacity of Oven, Economy of Fuel, Use of Feed and Uniformity of Operation, place them as the best Stoves in the market.
They have been constructed specially for the use of our Western Bituminous Coal (for which all stoves of Eastern manufacture are so ill adapted). Enlarged Fires insure a perfect draft; the plates that line the fire chamber are unusually heavy, and combine certain peculiarities in their construction which give these Stoves superiority over all others in the consumption of the coals, thus saving a large percentage of fuel.
