

FRAGMENTS.

The police now wear their new badges.

Lean quotations, New York, per 100 lbs., \$4.25.

JOHN KEENEY returned from the south last evening.

NICHOLAS BATH was fined \$5 this morning, for drunkenness.

WELLS, FARGO & Co. today received one lot of Honorable ore, value \$6,300.

The bicycle races will take place on Washington square on Monday next.

MR. SPRAGUE killed a coyote on his premises north of the Theatre this morning.

The First District School will open on Monday next, in the First Ward School house.

SILVER quotations, corrected daily by Wells, Fargo & Co., New York, \$1.05 1/2; London, 48 1/2.

THOMAS ASHTON, of Park City, will leave for Scranton, Pa., to-morrow, via the narrow gauge.

WM. NIXON was assessed \$2.50 yesterday afternoon, for being drunk and making an assault on Ike Snyder.

J. H. OWENBY, special agent of the Interior Department, leaves for Washington to-morrow, via the D. & R. G.

COL. FRITZ, a well known politician and Washington lobbyist, with his wife, will go east via the D. & R. G. to-morrow.

Mrs. AIRD, this morning, made application to withdraw the complaint against John Aird. The request was allowed on payment of costs—\$5.

The work of cleaning out City Creek was completed to-day. The stream is now clear of rubbish, and the quantity of water has been considerably increased by the opening up of new springs.

LOCAL NEWS.

Birmingham Reunion.—An adjourned meeting of the Committee of the Birmingham reunion will be held at the office of Darke & Co., 110 Main Street, on Saturday evening at 7 o'clock, prompt, to complete arrangements and other business.

Postmasters Appointed.—Today's dispatches inform us that President Cleveland has appointed John Sorenson postmaster at Ovid, and George S. Winegar postmaster at Eglin, both of which are "Mormon" settlements.

Kicked by a Horse.—A young son of Bishop Warburton, of the First Ward, Samuel by name, was accidentally kicked in the face by a colt yesterday, completely flattening his nose and disfiguring him frightfully. Dr. Benedict raised the nose to its original position and put ten stitches in it, and is in hopes that when it heals the boy will not appear much, if any, the worse for his injury.

Encouraging Progress.—From Elder Wm. M. Palmer, who has charge of the Northwestern States Mission, we learn that sixty-one baptisms occurred in that field of missionary labor between May 1st and August 1st, with a good prospect for the future. The Elders laboring there have met with but little violent treatment of late, about the only exception being in the case of Elders Jackson and King, who are operating in the northern part of Indiana, and were, upon two occasions, pelted with rotten eggs for preaching.

Selling Liquor Contrary to Law.—This morning Peter Schmidt, of Cottonwood, was brought before Justice Speirs for selling liquor on Sunday. He entered a plea of guilty, and asked the leniency of the court, claiming that the party to whom he sold the drink complained of being very thirsty, and Schmidt could not refuse the request for some beer.

Mrs. Dodder, who keeps a place at the mouth of Parley's Canon, was arrested on a charge of selling liquor without a license and, after a hearing, was fined \$10.

Sudden Death.—Shortly after 10 o'clock last evening, Alfred DeGray, of the Eleventh Ward, retired to his bed apparently in his usual health. On lying down he felt a sensation as of strangulation, and died in a few moments. Dr. Healey was summoned and pronounced it heart disease, from which the deceased had been a long sufferer, to have been the cause of death. Mr. DeGray was an iron moulder by trade, and had been employed at the Eagle Foundry for some time past. Yesterday he seemed in good health, and cheerful spirits, and ate his meals with a hearty relish. He was about 20 years of age, and leaves a wife and seven children.

Unexpected Demise.—At about five o'clock last evening, Mrs. Jones and family, of the Sixth Ward, were shocked by the realization that Alexander J. H. Wallis, cousin of Mrs. Jones, had breathed his last. The deceased was an estimable young man, about twenty-three years of age, and had always been delicate in health. He came to Utah in November, 1884, and since that time his physical condition had greatly improved. Some weeks since he went to visit a cousin at Paris, Idaho—J. H. Wallis—and while there his health began to fail. He, with others, started in a wagon for this city, and one night while sleeping out, were caught in a rain storm and thoroughly drenched. The deceased was chilled with the cold, but on his arrival in this city last Saturday, and since that time, there was nothing to indicate that the result would be fatal. His parents now reside in the Lambeth branch of the London Conference, England.

Grace Hawthorne.—This young actress begins her brief engagement at the Opera House to-night, opening in "The New Camille," in the rendition of which character the press have been sounding her praise for the past year, as one of the most promising artists of the day.

At the matinee to-morrow the popular emotional drama "East Lynne" will be produced.

"Queens," a new comedy drama, will close the engagement on Saturday evening. The St. Louis Republican, in commenting on Miss Hawthorne's performances in that city says:

"In East Lynne, from Frou-Frou Grace Hawthorne confirmed the deep impression she made as Camille. Miss Milton was a darling thing to do, but it must be said the doing of it fully justified the endeavor. It proved the greatest surprise of the week and the crown of the Hawthorne work. The applause she brings is spontaneous and genuine because to brilliant ability, and during her performance here she was several times complimented by recalls at the close of the play, which is a rare distinction for an actress to achieve in this city."

From the Northwestern States.

We had a visit this morning from Elder Lewis Anderson, of Fountain Green, who returned last evening from a mission to the Northwestern States, upon which he started on the 12th of April, 1884. He labored principally in Minnesota and Wisconsin States, in which he filled a mission ten years ago, but spent about two months of his absence in Illinois. He met with fair success and greatly enjoyed his labors until his health gave way shortly after his arrival. It was, though, released to return home because of his failing health, he felt loth to do so, for he was thoroughly interested in the work of proselyting and thought he saw openings for accomplishing considerable good in that line in the near future. The prospects are better for missionary work in that portion of Wisconsin in which he has lately labored than they have been heretofore, and he expects quite a number of new converts to be added to the Church there soon.

What is known as the Minnesota Conference includes that State and also Wisconsin, Dakota and Iowa, and there are now at least twenty Elders in that field, laboring zealously and energetically for the spread of the truth.

Elder Anderson baptized fifteen persons, and was present at the baptizing of some eight others, when his fellow-workers were feeling. He generally met with fair success, and is considerably modified since the religious-judicial crusade was inaugurated in this Territory. The outrageous manner in which he has been treated has had the effect of attracting the attention of thoughtful people to the Church and religion, and of creating in their favor an interest and sympathy. Others, however, who are filled with hatred towards the Saints, appear to grow more and more bitter in their feelings and gloat over the indignities which are being heaped upon them, and what they imagine to be a prospect of their early destruction.

He found invariably that where the DESERT NEWS reached the people a better understanding prevailed in regard to the situation here, and more liberal regards the Elders was manifested. He feels that the Saints here in Utah who have relatives or friends in that part ought to take more interest in the matter of subscribing for or mailing the News for their benefit; indeed, "any others who feel interested in the spread of the truth might accomplish good also by mailing papers to the Elders who are laboring there. They will help to counteract the effect of the anti-"Mormon" stories with which the papers of that region teem.

Elder Anderson made many friends during his absence for whom he entertains warm feelings. He generally met with kind treatment, and though he was many times threatened with violence, such as tar and feathers, whiplash, etc., and upon one occasion had stones hurled at him, he fortunately escaped injury.

Many of the inhabitants of that country are Scandinavians—principally from Sweden and Norway, and as a rule they are quite hospitable. They generally locate together and form thrifty, prosperous settlements.

Times are generally hard at present in that region, owing to lack of remunerative employment, markets for their products or failure of crops. In some parts of Wisconsin the crops are almost an entire failure, because of blight and the ravages of chinch-bugs. However, quite a number of those who have embraced the Gospel in that part of the world of late expect to raise sufficient by the sale of their property or by other means to emigrate this fall, and will probably come here in October.

Refined Salt.—Farnes Brothers, of Logan, have established a new enterprise, in the shape of a salt refinery—something which has long been required in this country. It has always seemed the height of folly to be under the necessity of importing Liverpool salt into this Territory when a pure article in that line has been required for butter-making, etc., in view of the fact that we have one of the most extensive deposits of crude salt both precipitated and in solution, to be found in the world, right at our doors; but heretofore no one has stepped forward to supply the demand.

The works now established are situated upon the shore of Salt Lake. They have a capacity for making 3,000 pounds per day, but the intention of the proprietors is to add to the works as the custom will warrant. They have a man in charge who has had an experience of thirty-six years in this line in England, and is well qualified for the position.

The process of refining is far more elaborate than a person unacquainted with the business might imagine—even more so than that required in England, owing to the anti-salt found in the waters of the lake, which have to be extracted to make a pure article of salt.

The utmost care is taken to have everything about the works as clean as possible to prevent dust or other impurities getting into the salt, and the article produced is warranted to be equal in every respect to the very finest Liverpool salt, which is noted the world over for its purity. The price at which this can be sold is but a fraction of what the imported article has heretofore cost, as this can be supplied at the works for one and a half cents per pound. We most heartily wish the proprietors success in their new and laudable undertaking.

Up-ton Notes.—We had a pleasant call this morning from Bishop Clark, of Upton, Summit County, who is in town, with a number of others, on some land business connected with a dispute between Eli Saxton and Eliza Cook in reference to an entry of land. The former made an entry under the Desert Act, and took the water out, and the latter homesteaded the same piece of land. The case is now before the General Land Office.

Bishop Clark states that the people in his district are prosperous and feel well. The crops this season are in better condition than during any previous year, and the harvest will be a good one. From present prospects the field crops will all be gathered before frost comes.

The State house in Coalville is a fine structure, built of brick, and is nearing completion. On September 16th the Relief Societies of the State will hold a fair at Coalville, the proceeds of which are to be used in assisting to finish the building.

Teachers' Examination.—The school teachers and those who aspire to become school teachers of Salt Lake County will please bear in mind the fact that one week from to-morrow—on Saturday, September 6th, they will be expected to present themselves at the Utah Normal Assembly Rooms to pass the examination before the board appointed for that purpose, and to receive their certificates as properly qualified teachers. The examination will commence at 10 A. M.

Burglary in Ogden.—The following is from the Ogden Herald of last evening:

"On Wednesday afternoon, a burglary was committed at the residence of Mr. Orson Riser, on Main Street, about half a block south of Eighth. Mrs. Riser was out visiting with Mrs. Collinson, the wife of Mr. Riser's partner in business, when the robbery was committed. The burglar was gained to the house through a window which was forced open with a hatchet, obtained from the coal store, and the burglar entered the house through the entrance was made, some flowers were standing, and these were removed and again replaced, not in the same order. This fact aroused Mrs. Riser's suspicions on her return, and on going into the house it was found that some person, who is evidently well acquainted with the premises, had been inside the house to open property to the value of nearly \$100. The furniture and everything was all straight and in its proper place, which is another evidence that the burglar knew just where to find the booty.

The officers have the matter in hand, and with the information they have to work upon it is very probable the bold burglar and his companions, if he had any, will be brought to justice.

Another Fire.—Shortly after 6 o'clock last evening an alarm was given at the City Hall that the tool house and blacksmith shop belonging to the city, at the gravel bank in the Tenth Ward, was on fire. In a short time the place was entirely destroyed, the loss on the building and its tools amounting to about \$1,000. The origin of the fire is unknown, as everything seemed safe when the workmen left, about an hour before the flames were discovered.

The necessity of more efficient means for protection against fire was very plainly evident last evening, in the utter inability of the firemen, under present circumstances, to get the fire engine any distance from the hall in time to be of service. The practice of relying on chances of obtaining a passing team to take the steamer out in case of fire is altogether too risky. The steamer weighs about 7,000 pounds, too much for an ordinary team to draw at such a speed as should be maintained in going to a fire. The impression seems to have gained that since the laying of the water pipes, their utility in case of fire is such as to render the keeping of a fire engine unnecessary. While the hydrants are of great value, this idea is certainly incorrect. A few years ago, the actual pressure of the water at the City Hall was 75 pounds, but the recent extension of the mains has reduced this to about 50 pounds. The steamer, on the other hand, is capable of throwing a stream of about 100 pounds pressure, and at all fires where used recently has had 110 to 120 pounds. Steam can be made in from eight to ten minutes, even under adverse circumstances. At first there was some failure in getting a stream started in time, but this was due to the engine, and for a number of years, ever since the present engine has been in charge, the steaming up has been a complete success. There are a great many defects in the present system, if such it may be called, that will take time to remedy, but there is no excuse for keeping matters at a perfect standstill in the matter of fire protection, and adopt a thorough and efficient system of alarms and controlling fires.

COL. WETMORE, general agent of the Colorado Coal and Iron Company, returned on yesterday's D. & R. G. train, from an extended pleasure trip east.

MCCORMICK & Co. to-day received two cars Hanauer ore, value \$2,480; Crescent ore, value \$2,900; Queen of the Hills ore, value \$1,300; total, \$6,680.

COL. BLISS, government prosecutor in the "Star" route case, accompanied by his wife and G. W. DeWitt and wife, left on this morning's D. & R. G. train for Chicago.

TEACH CHILDREN TO SWIM.—The necessity of having children taught to swim cannot be too strongly impressed upon the minds of mothers. There is no more time to be lost. Knowledge will be of important service. A child may begin at six years of age. The motions are very easily taught. A swimming-school is, of course, the most convenient place in which to learn it, however, the child is taught in still water with a rope fastened about the waist and secured to a post or some object on terra firma, there is no danger even in deep water. A life-preserver gives a feeling of security to the timid beginner. There are few German children who cannot swim. Prussian soldiers have to learn swimming as a part of their military training.—New York Commercial Advertiser.

A PRETTY WEDDING CUSTOM.—In the Bermuda islands there is a pretty custom of taking up a very young cedar tree, wrapping the roots in paper and setting it in the wedding cake. The tree is afterward planted near the dwelling of the newlyweds, and is kept as a memorial of their happy day ever green. The cake is made in three tiers, the lowest of which is simply frosted; the second tier is smaller, is covered with silver leaf, while the topmost one, which is only large enough to hold the carefully protected roots of the little cedar, is coated with gold leaf. Only the lower cakes are cut and eaten.—Louisville Courier Journal.

CLEANING GLASS FRAMES.—Glass frames may be cleaned by simply washing with a small sponge, wet with hot water, or with a solution of turpentine, not too wet, but sufficiently to take off the dirt and fly-marks. They should not be afterward wiped, but left to dry themselves.—Democrat.

TO HAVE POTATOES MEALY.—If you wish to have potatoes mealy do not let them stop boiling for an instant; and when they are done, pour the water off and let them steam ten or fifteen minutes over the fire. In the spring of the year it is better to boil the potatoes in two waters, pouring off the first as soon as it comes to the boil, and then cover the potatoes a second time with cold water, adding a little salt.—Boston Budget.

BUSINESS NOTICES.

The 29th Ward District School will open Monday the 31st inst. with T. B. Lewis as principal and with competent assistants.

A STARTLING LETTER FROM TEXAS.

IRENE, Hill County, Texas, June 29th, 1885.

Gentlemen.—It affords me great pleasure to send you the report of the wonderful popularity of your BROWN'S SARSAPARILLA and its effects on the system.

I sent an order for a dozen and soon sold it all. Its medicinal effects made it all the rage. About five weeks ago I received a gross and have now only 15 bottles left. Ladies taking six bottles at a time. Dr. J. F. Myrick, one of our leading physicians, testifies to having cured himself and one of his children of Rheumatism by its use. I will soon send for another gross.

Yours very truly, F. BYNUM, To Brown Medicine & Man's Co., Leavenworth, Kansas.

How to Consult Dr. Foote, Sr., by Mail.

Dr. Foote, Senior, author of "Plain Home Talk," Medical Common Sense," etc., etc., to those who would like to consult him by mail, has prepared a list of questions and a circular of gratuitous advice by addressing box 414, Salt Lake City. The doctor has arranged to have information supplied in the way of a letter. Receiving such printed matter the correspondent can describe his or her case fully and direct to the doctor in New York. Dr. Foote is successfully treating all forms of chronic diseases, especially Rheumatism, devoted thirty years of study and practice. Evidence of his success can also be seen in the testimonials above, but all letters of consultation and orders for remedies should be addressed to Dr. E. B. Foote, Sr., 120 Lexington Avenue, New York City.

1. Consultation free.

2. In another place, description of diseases.
