FAMILY RECORDS.

WE ARE NOW PREPARED to receive orders for FAMILY RECORDS of an approved form.

Each book is divided into four forms.

The first form is that of a "FAMILY RECORD," with ruled and printed spaces for births, marriages, and deaths, in each family, also for names, dates, and places, one page accommodating one family.

The second form is a "CHURCH RECORD," with spaces for blessings, baptisms, confirmations, ordinations, endowments, and patriarchal blessings and various particulars of the same.

The third form is a "SEALING RECORD," with spaces for name of person sealed, birth, death, time, place, etc.

The fourth form is a "BAPTISM FOR THE DEAD RECORD,' with spaces for names, dates, birth death, baptism, confirmation, etc.

Each book is furnished with a title page, on which the person owning the record can enter his or her name. An explanation of the forms, or instructions how to keep the record is also printed in each book, and its pages are numbered.

These Records are well printed and ruled on good ledger paper, substantially bound in full sheep, English roan, or Bock. We can furnish them of any size, from on to five quires, or larger, but probably five quires is as large as will be desired. We can also furnish the various forms in a record, proportioned to each other to order.

EVENING NEWS

Thursday - - October 25, 1877.

Egg Raising.

The egg traffic of this country has risen to an importance which few comprehend. The aggregate transactions in New York city alone must amount to fully $8,000,000 per annum, and in the United States to fully $18,000,000. A single firm in that line of business east handled $1,000,000 worth of eggs during the year. In Cincinnati, too, the traffic must be proportionately large. In truth, the great gallinaceous tribe of our country barnyard contributes in no small degree to human subsistence, eggs being rich in nutritive properties, equal to one half their entire weight. Goose, duck, hen, pullet, and partridge eggs are the principal kinds produce in America. We have nothing, however, like what we are told used to be found in Madagascar, or have been found there, the gigantic woa egg, measuring thirteen and a half inches in extreme length, and holding eight and a half quarts. One of these birds with a single effort, might supply a modern bording house with omelettes for a day.

The perishable nature of eggs has naturally detracted from their value as a standard article of diet. The peculiar excellence of eggs depends upon their freshness. But lately the process of crystalizing has been resorted to, and by this process the natural egg is converted into a vitreous substance of a delicate amber tint, in which form it is reduced seven-eighths in bulk compared with barreled eggs, and retains its properties for years unimpaired in any climate. This is indeed an achievement of science and mechanical ingenuity, and has a most important bearing on the question of cheaper food, by preventing waste, equalizing prices throughout the year, and regulating consumption. In this form eggs may be transported without injury, either to the equator or to the poles, and at any time can be restored to their original condition simply by adding the water which has been artificially taken away. The chief egg-desiccating companies are in St. Louis and New York. No salts or other extraneous matter are introduced in the process of crystalizing, the product being simply a consolidated mixture of the yolk and albumen. Immense quantities of eggs are preserved in the spring of the year by liming. Thus treated they are good for every purpose except boiling. It is a common trick for some dealers to palm off eggs so treated as fresh, so that imposition is easily practiced. In the desiccating process, however, the difference becomes apparent, as from four to five more limed eggs are required to make a pound of eggs crystalized than when the fresh eggs are used, and eggs in the least tainted will not crystalize at all.

Some of the most experienced egg dealers declare that there is no profit in raising poultry to compare with producing eggs: A single hen will lay from twelve to fifteen dozen eggs per annum, selling at an average of thirteen cents per dozen, and the birds thus occupied can be housed and fed for less than fifty cents for the whole period. In the East the price per dozen is much higher. Here we buy them by the dozen. Step into an eastern produce or grocery establishment, and they sell so many eggs for a quarter of a dollar. There is no reason why the crystalizing process should not become quite general, and egg production stimulated as never before, and the food supply receive large accessions from this source. The already great and increasing consumption of eggs in England and France shows growing appreciation of this form of food compared with any other. It is thought the annual sales in the United States alone must aggregate nearly $20,000,000. In Lima, Peru, eggs sell at one dollar per dozen, equal to four dollars per pound crystalized. It is thought that this new process of preserving for utilization the industry of our hens and pullets may be very acceptable as well as beneficial in a business and domestic point of view.—*Cincinnati Commercial.*

HIGHEST HONORS

AT THE

UNITED STATES

CentenniaL

World Exhibition,

1876.

MASON & HAMLIN CABINET ORGANS

Unanimously assigned the

"FIRST RANK

IN THE

"SEVERAL REQUISITES"

of such Instruments!

The MASON & HAMLIN ORGAN CO. have the honor to announce that the Organs of their manufacture have been unanimously assigned "the FIRST RANK in the SEVERAL REQUISITES of instruments of the class" by the Judges at the CENTENNIAL EXHIBITION at Philadelphia, 1876, and are the ONLY INSTRUMENTS OF THIS GENERAL CLASS AWARDED THIS RANK. This is after the severest competition by the best makers, before one of the most competent juries ever assembled.

They have also received the MEDAL, but, as is well known, medals of equal merit have been awarded all articles deemed worthy of recognition; so thus it will be easy for many makers to advertise that they have received "first medals."

The differences in competing articles, and their comparative excellence, are recognised in the Reports of the Judges from which the following is an extract:—

"*THE MASON & HAMLIN ORGAN CO.'S exhibit of Reed Organs and Harmoniums shows instruments of the FIRST RANK IN THE SEVERAL REQUISITES OF INSTRUMENTS OF THE CLASS, viz: Smoothness and equal distribution of tone, scope of expression, resonance and singing quality, freedom and quickness in action of keys and bellows, with thoroughness of workmanship, combined with simplicity of action.*"

(Signed by all the Judges.)

The Mason and Hamlin Organs are thus declared to rank first, not in one or two respects only, but in the SEVERAL REQUISITES of such instruments, and they are the *Only* ones to be assigned this rank. This triumph was not unexpected, for the Mason & Hamlin Cabinet Organs have uniformly been awarded the highest honors in competitions in America, there having been scarcely six exceptions in hundreds of competitions. They were awarded highest honors and

FIRST MEDALS

PARIS, 1867; VIENNA, 1873; SANTIAGO, 1875

PHILADELPHIA, 1876;

and have thus been awarded highest honors at

Every World's Exposition!

at which they have been exhibited; being the *Only* American Organs which have ever obtained any Award at any competition with best European makers, or in any European World's Exposition!

NEW STYLES, with improvements, exhibited at the CENTENNIAL; elegant new cases in great variety. Prices very lowest consistent with best material and workmanship. Organs sold for cash on instalments, or rented until rent pays. Every Organ warranted to give entire satisfaction for any reasonable purchaser or the money refunded. ☞ ILLUSTRATED CATALOGUES sent free.
