## EDITORIAL NOTES.

The United States are actually importing beans from Germany. Cannot this great country, with all its agricultural resources, find beans enough to supply Boston?

Anent the water famine in Gotham a Cincinnati editor says: A lack of water for bathing purposes has not worried the citizens of New York, but now that the supply for mixing toddlers grows short they have become seriously alarmed.

The question of danger from electric light wires is still being discussed in the east. According to the N. Y. Tribune, in case of fire, if it should be necessary for the firemen to cut the wires from the roof of a burning house, they run the risk of losing their lives in the work. The wires must be cut with a wooden handled instrument to protect the men; but should the wood happen to be wet, as it is very apt to be at a fire, it would become a conductor, and the strong electric current might kill a man, just as a flash of lightning would. Great care has heretofore been exercised, but at any moment serious harm may result.

Good Company, published at Springfield, Massachusetts, began a new volume with the September number. A specimen copy of this able monthly can be had by sending twenty-five cents to the publishers. Among the contributors to the new volume are the following well known writers: John Burroughs, Maurice Thompson, Edward Bellamy, H. E. Scudder, Geo. M. Towle, Ernest Ingersoll, T. S. Collier, President D. C. Gilman, Octave Thanet, Rebecca Harding Davis, Mrs. Gen. Lew Wallace, Mrs. Lizzie W. Chapman, Katharine Carrington, Louise Stockton, Saké Wakamatsu, Elsie Goodale.

The recent earthquake in the Abruzzi has exceeded in destructiveness anything that was indicated by the first news. The Archbishop of Chieti says that more than one thousand houses are uninhabitable, and the remainder are badly damaged. The churches left standing are in a tottering condition, and religious services have to be celebrated in the open air. At another town, Orsogna, the ruin is still more complete. Of 1310 houses, 618 were destroyed and 79 others are tottering. Four-fifths of the population are without shelter, but fortunately the loss of life has been comparatively small. The army has been forwarded a number of tents, and appeals for assistance are made with good success in Italy.

The portraits of the Prophet Joseph and the Patriarch Hyrum, form a great attraction to the first number of the new volume of the Contributor. They are very fine specimens of the engraver's art. The reading matter in the new number is also of excellent character, well written, interesting and instructive. The questions and answers department is likely to prove very beneficial to the Improvement Associations, of which the Contributor is the special organ. We are pleased to note the progress and success of this commendable magazine, and hope it will be generally read by the young people of Utah. The portraits of Joseph and Hyrum are furnished in larger shape, fit for framing, for \$1.50 a pair, and will make admirable pictures for the homes of the Saints.

A great deal of fruit is being shipped East from Sacramento. The amount is much larger than at this time last year. Among the shipments has been a carload of assorted fruit, put up in the Dietz packing, a recently patented process. The Suisun Republican says the preservative agent is carbonized wheat bran, and that by its fresh fruit is preserved from decay, so that it can be shipped East by slow freight and still left as the demand is made for it without being compelled to sacrifice it for fear of loss. The carload shipped goes to New York. It contains grapes, plums, peaches, apricots, etc., and goes as fast freight, though heretofore it is the plan to ship by slow freight, as it will reduce the charges over one-half, or from \$1.00 to \$0.50 a carload to New York. If the fruit can be packed in this inexpensive manner, and preserved indefinitely and shipped anywhere, the business will develop. "Fresh peaches at Christmas and grapes in midwinter" are very alluring, and Mr. Dietz says that they may be had by simply packing them in wheat bran reduced to charcoal.

Grapes do much better when planted in the fall. They will not thrive on low wet soil, but succeed best on high, dry ground, with enough slope to carry off the surplus water. The soil should be enriched by well rotted manure, bone dust, or some fertilizer that is not rank and coarse, and should be thoroughly and deeply plowed. Set the vines in rows eight feet apart, the strong-growing kinds being planted eight feet apart in the row, and weaker sorts six feet apart. Make holes about one foot deep and two feet across, having two or three inches of good rich soil in the bottom of each hole, and spread out the roots carefully in every direction. Put fine rich soil around and in among the roots, and fill the hole to within two inches of the top. Then place around each vine a shovelful of fine, well-rotted manure. Cut back the vine to within two buds, and at the approach of winter mound up the soil over the vine to a height of eight or ten inches, to protect from freezing and thawing in winter. When planting, it is better to set a small stake in the centre of the hole before the vine is set than to drive it in the ground afterwards.

## A DUPE'S LETTER.

A CORRESPONDENT of the Sacramento Record-Union writes a letter taken to enlighten the western world on the subject of the "Mormon Church in Utah." He signs the epistle "D." After reading all that "D" has to say, we have come to the conclusion that his name is Dupe. Somebody has crammed him full with silly stories and old fusty anti-"Mormon" rubbish, and he now undertakes to bring it forth again for the regalement of the people of the coast, who have heard the same stupid yarns over and over again for years. We are not surprised at Dupe's receiving these stories or writing them down gravely as facts. But we must confess to some surprise that the Record-Union should print them.

There is only one thing in the letter that has not been told before, and that, like the rest of the stories repeated for the eleven hundred and seventy-seventh time, is untrue. A few months ago a delivery wagon was purchased for the benefit of the hands employed around the titling office and public works, and Dupe was told that this was specially used and "kept on the goall the while," carrying provisions for the leaders of the Church. Of course Dupe's ears gaped and took this all in, as well as the threadbare and dilapidated falsehood about President Young's getting "a million dollars a year" from the titling, boasting he could "buy up all Congress with his millions," and so on. Dupe says, "What becomes of it is titling food, no one knows, or how much it amounts to no one knows outside of the men who handle it." How then did Dupe find out that it amounted to a million dollars a year, and that Brigham Young appropriated it?

The rogues who stuffed Dupe with the misty tales which he has spread out in the columns of the Record-Union, have been very anxious to learn all the do's and don'ts of the Church finances and have not succeeded, and therefore they imagine because they nothing about those funds that nobody else does. Their impertinent curiosity is not satisfied and they represent the closing of the books against their Paul Pry noses. It is none of their business, but is open to any Church member having an interest in the matter. Dupe ought not to expect that strangers coming into this city will be accommodated with information about things which do not concern him, and those visitors who, like Dupe, spend a little time at Salt Lake and then undertake to tell all about the workings of the "Mormon" marriage system in homes which they never see, and in a Territory reaching over four hundred miles in length, only expose their own folly to thoughtful people. There is one statement made by Dupe that we will notice, because it is a notion that many intelligent people may entertain; that is:

"The parents adhere closely to their religion, but the children, on growing up, break away from it. The Church is thus compelled to keep up its numbers by direct importation from abroad."

The fact is that the most efficient missionaries in the field are of "Mormon" parentage. Also that a very far less percentage of "Mormon" children, when grown up, "break away" from the Church than of people who are brought here from abroad. Now, as the missionary man or young woman abjures the faith of the parents, but such cases are very rare and few compared with the number of those who are firm in their adherence. Our Sunday Schools, young men's and young ladies' Mutual Improvement Associations, and other agencies for the instruction of the youth, have the effect of indoctrinating them in the principles of "Mormonism," and when once understood and sensed in their true spirit, it is not at all likely that they will be forsaken by the young people; unless, as they grow up to maturity, they are led into temptation by the agencies supported by those "Christian diviners" who gave Dupe his points, and who would rather see a young man drunken and debauched, and a young girl led into infamy, than that they should remain in the faith and practice of the Church of the parents.

We have reason to be proud of the children of the Latter-day Saints, although, as any sensible person might reasonably expect, some go astray, and bring sorrow to their parents' hearts. And there is this fact to consider, if a young "Mormon" man or woman goes into sin and vice, that is the surest indication that he or she will forsake the "Mormon" Church. Let Dupe ponder on that, and when he goes to another place of note, and wishes to write it up, unless he desires to misrepresent let him learn the facts from those who know them, and will state them honestly, and not suffer himself to be duped by the designing, to do the work of the Devil.

## LATEST DISPATCHES.

Founded.

SAN FRANCISCO, 2.—The bark Prince Victor was dismantled and foundered one hundred and fifty miles off Cape Hawk, in a gale. The crew lost to all boats, and great suffering effected a landing, except two, who died from privation.

Explosion of Dynamite.

Fifty-six pounds of dynamite exploded in the home of a miner at Sed, blowing the building to pieces and damaging those near by.

Signal from Honolulu.

A Honolulu signal station in communication with the United States meteorological bureau will be established on Noland Klavien, and a series of observations taken.

Sea made in the Coast.

New York, 2.—Ben Butler told Herald interviewers yesterday: "I am opposed in every dictate of judgment and every sentiment of patriotism to the Panama Canal scheme, either in peace or war. I do not put it upon the altar of the building of it is an infringement of the Monroe Dec-

laration. England has seized upon the whole commerce of the eastern shore of the American continent; we will control some commerce on the western shore. Open that canal and she seizes upon that. If anything is to be done in the Pacific, it is that when British vessels carry British goods get through the canal they will take their freight up to San Francisco, and distributed up and down the State from thence, so a person simply indulges in a dream. The British ships will distribute the freight themselves in their own way, to the exclusion of American merchants. England can lay goods at the end of the Panama Canal from Liverpool as cheaply as she can in New York. As the matter stands now, England could not blockade San Francisco, because no blockade would be sufficient which was not by steam vessels, and she has no war vessels which can carry more than enough coal to make the run from the Sandwich Islands to San Francisco, and return, but once the Panama Canal is open, and you might as well anchor Gibraltar off the Golden Gate, because then she could put her heavy ironclads around our Pacific port and maintain them here certainly until we could build a navy which could cope with them. The whole western coast of our continent would be open to the ravages of her navy until we had a navy on that coast that could meet hers. But it is said that the Powers propose a guarantee of neutrality in the canal. History teaches what that means. The Powers guaranteed the neutrality of Denmark, but that guarantee did not count for much when the fleet of Nelson was at Copenhagen. Whatever paper guarantees might be, the strongest of all nations, in the event of war, would take possession of the Panama Canal. I hope the administration will be sustained by Congress with unanimity as it will be a party question, and will simply give notice to everybody that in its judgment it is neither for the reasonableness of the United States to have a canal at Panama, and that whoever builds it after such notice must do so with the full and distinct understanding that when it becomes an act of the United States to take possession of such canal, we shall do so, irrespective of any rights of private property which may be claimed for it, and put into it. After having served them with the notice, if anybody builds the canal upon those conditions, he is liable.

The Commercial Bulletin says: The completion of the Panama Canal will be effected through physical force or a miracle, and it would be prudent for statesmen to see the miracle accomplished before they get up a quarrel about the political stipules of the work.

Peruvian Revolution.

The Panama Star of the 24th had advice from Lima of the 19th, on Saturday last. A cablegram was received announcing that the troops in Arica had revolted and impelled Schöber and his chief officers and declared in favor of Calderon. It is believed by friends of the latter here that the important department of Buenos Aires will follow and thus the revolt against Florio is due to the belief that the United States intend to offer armed intervention in behalf of the Calderon government. Calderon was married on Monday last. Rumor continues to assert that he meditates visiting Europe.

The United States Consul More at Callao, and Prefect of the Port had a misunderstanding the other day during which the latter considered that he was treated discourteously. He reported the matter to Gen. Huiburt who in turn referred to Admiral Lynch.

A conference was held and resulted in a high, Calles was on Moore to explain that no discussion was intended. A Santiago paper says: The rumor increases in strength that our government intends to prolong indefinitely the occupation of Peru and to organize its administration better than at present. The military power to be supplemented by a civil one which will be sustained by military strength sufficient to crush all armed resistance.

The Canal.

The Panama Star says: What does DeLesseps mean by favoring the employment of convicts from New Caledonia, to work on the canal here. We have criminal enough as it is among our population. There are hundreds of people guilty of murder now who are running untried of justice.

WASHINGTON, 2.—President Arthur goes to New York to-morrow and will not return until the middle or last of next week. He will then go direct to the White House, and remain there. He will not go to the Soldiers' Home. When at the White House yesterday he selected his room in the north-western portion of the house.

## World's Fair.

BOSTON, 2.—The executive committee of the Fair, World's Fair, yesterday. Encouraging assurances were given by the members of the committee. The subscription books will be ready Nov. 3d.

## FOREIGN.

The Irish Revolt.

LONDON, 2.—Disturbances continue at Belmullet, County Mayo. Thus far, four persons wounded in the affray of Thursday last are dead, and six more deaths are expected. Two hundred military and 200 police are on the spot. The roads leading to Aglow are blocked with stones and a bridge has been broken for the purpose of keeping the movement of the military. Gilbooley, secretary of Baurty, County Cork, branch of the league, is arrested.

Two thousand tenant farmers of County Limerick, have resolved to apply to the land commission to fix a judicial rent or set aside unjust leases.

## A Broken-hearted Baron.

Truth says: The late Baron James de Rothschild incurred losses on the Bourse in October amounting to 80,000,000 francs, and his anxiety caused the bursting of an aneurism.

## Regal Visitors.

The Times denies that the government is resolved to enter upon more direct relations with the Vatican. The Emperor and Empress of Austria, the Crown Prince and Princess and Prince Leopold, of Bavaria, and Prince Grizella will in May next return the visit of the King and Queen of Italy.

## Section's Release.

It is stated that Sexton has been given to understand that he is to go to France as the condition of his release from prison.

## Billions of Bonds.

The Fall Mail Gazette says: There is no truth whatever in the statement that there is a large amount of money in the Bank of England deposited by the Confederate government and available for the payment of Confederate bonds. We believe it does not hold a single penny, and doubt whether there is any such money in any bank in this country.

## The Case's Interesting Letters.

ST. PETERSBURG, 2.—The police have just made an important capture. Suspicion having been directed to the inmates of a house in a respectable quarter of the city, the police surrounded the place at night, burst open the doors and seized a man and woman who were prepar-

ing dangerous explosives. Socialist pamphlets were found in the rooms. A man is a student in the School of Mines. Last week a number of nihilist proclamations were distributed about the city and several copies thrown into the barracks of the imperial guard. It is stated that the Czar has lately received many threatening missives.

## Combats.

PARIS, 2.—It is expected that Gambetta will shortly make an important statement regarding his policy, either during the debate on the government's Tunisian policy or previously at a meeting of the majority. The First Decision Under the Land Act.

DUBLIN, 1.—A military force was sent to Belmullet from Balinakee to quell disturbances. The police were drafted from all quarters, and the workhouse converted into barracks. Archbishop Tuane, in a sermon on All Saints' Day, condemned the doctrine of "no rent" in unparaphrased language.

The first decision under the land act was given at Monaghan today. The commissioners, after viewing the holding in the case, reduced the rent by 20 shillings for the next 15 years.

Sexton was released from prison on account of ill-health. The government has discovered the delinquent who conveyed Parrott's last manifesto from Kilmarnock jail.

## Revealed Secrets of Blomack.

VIENNA, 1.—Political Correspondence publishes a confidential communication from Berlin, stating that the members of the former centre party in the Reichstag will now become devoted supporters of Blomack at the election fought with deep anxiety for the Vatican.

Arrest of Socialists.

Many houses in Prague have been searched and several arrests made owing to the circulation of socialist pamphlets.

## PUT IT TO PROOF.

At a time when the community is flooded with so many unworthy devices and concoctions, it is well to find one that is beneficial and pure. So conscious are the proprietors of Dr. King's New Discovery of Consumption, of the worth of their remedy, that they offer all who desire a trial bottle free of charge. This certainly would be disastrous to them did not the remedy possess the remarkable property of curing Asthma, Bronchitis, Spleen Cough, Croup, Whooping Cough, Hoarseness, Croup, or any affection of the throat and lungs. As you value your existence give this wonderful remedy a trial.

See John W. Lowell's ad. "Ad." in this issue of the News.

## BORN.

In the 21st Ward, to the wife of HENRY C. COX, twins, both boys. All well.

## MASONS.

WANTED GOOD ROCK MASONS. Apply at THIS OFFICE.

## SALT LAKE THEATRE.
