

## UNIVERSITY OF UTAH.

Prof. W. G. Haynes addressed the students at chapel on Wednesday.

Last night Prof. Stewart delivered a public lecture in the science laboratory at 10 o'clock. His lecture was on practical education, and was illustrated with stereoscopic views. The lecturer was assisted by Mr. A. C. Boyle.

Today Prof. Stewart addressed the teachers of Wasatch county at Heber City.

Last night the school gave a grand ball in the assembly hall of the Museum building. The hall was beautifully decorated with class and University colors. The choruses were Prof. and Mrs. Richard H. Lyman, Prof. and Mrs. Byron Cummings and Mr. and Mrs. A. C. Ebbas.

Mrs. Emma J. McVickers, one of the regents of the University, was a visitor on Thursday.

Prof. Chamberlin of the department of biology, is now doing research work upon two remarkable species of Utah ants. One of them represents a genus new to science, as he announced some two years ago. These ants have the habit of living together in the same nest and their relationship to the ants is very unusual. Because of the interest in the preliminary note has occasioned among scientists, Prof. Chamberlin has determined to study them more fully and later he will publish the results of his investigations.

Horace W. Sheeley, A. B. '04, has returned to the University to do special work along the line of engineering. During the past year Mr. Sheeley has been in the employ of the government, making surveys of Utah lake and vicinity.

Next Saturday, Nov. 19, the big football game between the A. C. U. state champions and the U. of U. eleven will take place on Cummings field. In the evening the 66 normals will give a reception in honor of the football teams.

The Women students held an enthusiastic meeting yesterday during the lunch hour, and practiced songs to be sung at the football game next Saturday.

Mrs. E. G. Gowans visited the University today.

At its meeting on Monday the faculty approved of the president's recommendation to offer a four years' course in chemical engineering. The degree attained on completing this course will be bachelor of science in chemical engineering. This will make five engineering courses now offered by the state school of mines, which is the engineering department of the University. The outline of this new course will soon be ready for announcement, thus giving students who wish to complete it an opportunity to begin at once. The course is offered at this time in answer to the urgent request of a number of students who wish to become skilled as technical and commercial chemists. It will be a course fully up to the standard set by the best institutions of the country.

The faculty also decided to report the standing of all preparatory students to their parents four times during the year. The first report will be sent about Thanksgiving day. The standing of college students is to be reported twice a year.

## SALT LAKE CITY SCHOOLS.

The re-opening of the Lowell occurs Monday. No new registration will be necessary for those who present themselves on that date. Those desiring to return may be asked to submit to a new classification in grades.

No principal's meeting was held last Wednesday.

Next Thursday at 4:35 p. m. Supt. Christensen and Supervisors Miss Pratt and Miss Smith will meet with principals and fifth and sixth grade teachers, to discuss matters bearing on sewing in those grades.

The second monthly pay day was a feature of last Friday.

The High school paper, the "Red and Black," has accorded the Eastdallers a space in each issue. Charles Williams is associate editor, and Jean Williams, Merle Lynch, Scott Kimball and Ella Dyer are on the editorial staff of the Bryant.

At the optional meeting held by Mr. Farrell, chair modeling was the topic under consideration.

Throughout the city, principals are holding their local meetings on Monday afternoon. The common law seems to prevail, that no meeting shall exceed in length one hour.

## L. D. S. UNIVERSITY.

The fourth year English class is about to take up the study of "Midsummer Night's Dream."

The "Gold and Blue" was published last week. It is new and fresh, and shows much improvement over the first issue of last year.—O. M. Rogers.

The regular monthly examinations were given during the past week. The report cards containing marks for the past two months will be issued by the 15th.—Charlotte Wetzel.

The players in the band have been working hard for some time. Last Wednesday they made their first appearance before the student body. Their selection will be enjoyed and applauded.—B. J. Ashton.

John Sharp, one of our last year's graduates, visited the school on Wednesday. The next evening he departed for Colorado, where he has been called to labor as a missionary.—Leone Asper.

The class in German A has been divided into two sections of 25 students each. Prof. J. Miller conducts one section and Student Kohlberg, the other. This arrangement is much more satisfactory to both students and teachers.—Owen Horsfall.

The section of the normal training class that is teaching reading is now studying Eto Van Winkle, while the Arithmetic section is working on cubic measure. The young pedagogues are beginning to learn that teaching is not such a "snap" after all, although great interest is manifested.—Helen Kimball.

For the past week, the class in Church history have been studying the Book of Mormon and the Spaulding manuscripts. They compare the two manuscripts as to their origin, con-

## CASTORIA

For Infants and Children.

The Kind You Have Always Bought

Bears the Signature of J. C. Fitch

The annual reception which the faculty tenders to the student body of the college will be held at a time, in the near future, when President Joseph R. Smith can be present. Committees of the faculty are now at work arranging for the event.

Prof. A. B. Wright is being congratulated this week on the receipt of a letter from Paris informing him that a life-sized portrait of Miss Mary Young, daughter of Hon. John W. Young, which he painted while in Paris, has been accepted for exhibition in the Paris salon this autumn. Prof. Wright is naturally much pleased with this recognition of the highly artistic qualities of his work.

Dr. and Mrs. John A. Widtsoe were visitors at the college Monday, and while viewing the art exhibition in the faculty room, were so impressed with a beautiful Russian landscape, copied by Prof. Wright from a painting by Corot, that they purchased it.

The theological department received this week a new and complete set of scripture books. These have also been received a number of theological reference works for the library.

Dr. J. M. Tanner has lent to the college at a specially low figure some valuable classical and miscellaneous works, including 27 volumes of "Ancient Classics for English Readers," 14 volumes of Heath's "Pedagogical Library," six volumes of Lydecker's "Natural History" and other books. These, together with a number of books already received for the English and theological departments, and a large order just placed for miscellaneous works, will add greatly to the value of the library.

A new boiler is being installed at the engine-room in order to increase the efficiency of the heating plant. Electrician Thomas Porter has just completed putting in a heating plant at the Art and Music building.

The Deacon Light society last week listened to a paper by Mrs. Mattie H. Hansen on the "Life and Scripture of Michael Angelo," and to a discussion of art, science and one of "Othello," led by Mrs. Jeanie E. Clemenson. The program for today's meeting includes a paper by Mrs. Amelia Chamberlin, and act one, scene three, of "Othello" by Miss McBride.

Congressman Rowell was a visitor at the college last Friday.

Prof. Vernon lectured on "Bacon" before the Mutual Improvement associations of the First ward last Sunday night, and the same night Prof. Robinson spoke on "Music" before the young people at Richmond.

Mr. Gardner, recently returned from a mission to Australia, registered at the college this week for third-year work.

Bishop Owen of Wellsville, president of the Alumni association last year, and now a member of the board of trustees of the Agricultural college, visited the mechanic arts department this week, and expressed himself as pleased with the excellent work that is being done.

## WEBER STAKE ACADEMY.

Ogden.—Harry Nelson, who has just returned from a mission to Germany, occupied the time at devotional Wednesday. He bore a strong and earnest testimony to the divinity of the Latter-day work.

Election day interfered very little with the regular routine of the work in the academy. Had it not been for three or four students who left their work in school at the request of their parents to become the "pulling out" of convalescences for both parties we would not have been aware, so far as attendance goes, of the battle going on without.

President L. W. Shurtliff and Bishop Peterson visited the school during the forenoon.

Nearly all the missionary students are yet to come, which, together with the mid-year eighth grade graduates will send the enrollment considerably over 300. Query—Where will the room come from?

Good news has reached us. Miss Jennette McKay, who has been laboring as a missionary for the past year, has been honorably released, and will return home next month. Miss McKay did missionary work in Kansas City for a short time, but the major portion of her time has been spent at the exposition. She has been with Prof. Cummings in the Educational department.

In his report at the Priesthood meeting last Saturday, the principal invited the Bishops of the several wards to pay the academy a visit, at their convenience. Bishops McQuarrie of the Second ward and Hollands of Roy awarded themselves of the invitation, and both made addresses at devotional Monday morning. Their remarks were testimonial to the great amount of good the school is doing, and were liberal in encouragement to the students. Bishop Hollands visited the Book of Mormon, philosophy and grammar and classics classes.

We are continually hearing flattering reports from missionary boys of last year. Roy Clark and Andy Boyle are laboring together in Switzerland, Leon Riley and Ernest Forde are enthusiastic in their labors in England. A letter from the latter to Prof. Thos. McKay was read at devotional Friday morning. If every young man in Zion could hear the testimony of Ernest Forde, there would be fewer heart aches in the missionary field.

The Night School continues to increase its numbers. Great interest is manifested by the students in their recitation and attendance. A large number of students anticipate commencing later on. To these we would suggest that they "hurry up" for they are losing valuable instruction.

## AGRICULTURAL COLLEGE.

Logan.—The past week a large consignment of electrical machinery for the shops has been received, also material for a completely new electrical light and power plant. Mr. Griffin, an expert electrician, sent by Engineer Heyward of Salt Lake City, began Wednesday the installation of the new equipment for light and power distribution. This was ordered especially for the college from Schenectady, N. Y., and will be the most perfect in the west and serve as an ideal model for electrical students.

Arrangements are making for the reception of the Salt Lake teachers who are expected to visit the college on Saturday. As many of them have never inspected the work of an agricultural college the trip cannot fail to be most instructive and pleasurable.

Miss Anna Swenson, sister of a former professor of engineering, George R. Swenson, now in Salt Lake, returned to her college in domestic science.

Many of the junior and senior girls in domestic science have begun to make their Christmas gowns. Each is first required to make a manila paper model of the entire gown. This is now work in progress, and is being done in many of the schools in the west, and is taught

## Drake's Palmetto Wine.

For Indigestion, Flatulency, Constipation and Catarrh of the Mucous Membranes. Every case is cured absolutely with one dose a day; gives immediate relief, and cures to last cure. Seventy-five cents at drug stores for a large bottle, but a trial bottle will be sent free and prepaid to every reader of this paper who needs it and writes for it. Address your letter or postal card to Drake's Palmetto Wine Co., Drake Bldg., Chicago, Ill.

only in the dressmaking parlors of large cities.

One of the students recently registered in a Miss Fox of San Francisco. Unable to get at Berkeley the special course she wanted, she has come to Logan for a year's work in hydraulics, chemistry, and anatomy. Next year Miss Fox hopes to accompany an expert relative who are to invest in mining property in Mexico.

Mr. M. C. Hansen, instructor in carpentry, is the conductor of the choir of the Fifth ward.

The position of professor of horticulture, left vacant by the resignation of Prof. Hult, was filled the past week by the appointment of Mr. Robert Northrop. Mr. Northrop received his B. S. degree at the Michigan college of Agriculture, where he was instructor during his senior year. He was then for two years assistant professor of horticulture in the Agricultural college of North Dakota, and now is an instructor while doing post graduate work.

Mr. D. S. Stephens, secretary to the president, spent Sunday recently with his sister in Preston, Ida.

Prof. Widtsoe has just returned from Des Moines, Ia., where he has been attending a meeting of delegates from the various agricultural colleges and experiment stations. Over 200 delegates were present from nearly all the states and territories, and the chief subject of discussion was western methods of agriculture. Among the delegates were Prof. Linfield, once of Utah, now in Montana, and Prof. Foster, now the president of the Agricultural college of New Mexico. Prof. Widtsoe also met John T. Cairns, 3d, an alumnus of the Utah Agricultural college, who is now taking graduate courses at Ames, Iowa, and who is reported to be doing exceptionally good work there.

One of the most interesting of the facts that Prof. Widtsoe brought back from his trip was that Prof. Meade, chief of the United States irrigation investigations, admiring the work done by the Logan college, had proposed to contribute \$5,000 of federal money to the irrigation work of the Logan experiment station, provided that the state would appropriate an equal amount.

Prof. Peterson accompanied the rector eleven yesterday on his trip to Po-

castello, where it plays a return game with the state academy. While there he will visit some mines just opened to the south of the city.

Last Saturday afternoon the B. E. A. defeated the Phi Delta Nu in a hard-fought game of football, scoring five against three.

Target practice takes place regularly twice a week. At the last the highest score made by one of the new cadets was that of Private Chatterly, and the highest of the old cadets was that of Private Bohrer.

Student Life, under the supervision of Miss Mauch and of Prof. Upham, intends to give performances this winter of Sheridan's "Ivaine" and Goldsmith's "She Stoops to Conquer."

## NEW LIBRARY BOOKS.

The following 35 books will be added to the public library Monday morning, Nov. 14, 1904:

## MISCELLANEOUS.

Burr—Kinematics of Machinery. Berg—Buildings and Structures of American Railroads. Church—Notes and Examples in Mechanics.

Church—Mechanics of Engineering. Holmes—Steam Engine. Johnson—Engineering Contracts. Kent—Mechanical Engineer's Pocket-book.

McShane—One Thousand Pointers for Mechanics and Engineers. Mayes—Modern Locomotive Construction.

Meyer—Steam Power Plants. Snow—Steam Boiler Practice. Spangler—Valve Gears. Thurston—Manual of Steam Boilers. Thurston—Manual of Steam Engine.

Thurston—Steam Boiler Explosions. Thurston—Materials of Engineering, 3 vols.

Unwin—Elements of Machine Design, 2 vols.

Wait—Law of Contracts. Wellington—Economic Theory of Railway Location.

Whitnam—Steam Engine Design. Wood—Thermodynamics, Heat Motors and Refrigerating Machines.

## FICTION.

Fowler—Kate of Kate Hall.

Ginsing—New Grub Street. Harrison—Theophano. Lough—Law of the Land. Jordan—Mrs. Iverson, Her Book. King—Comrades in Arms. Lighton—Uncle Mac's Nebraska. Read—"Turk". Roche—Sorrow of Sorrow. Roseboro—Players and Vagabonds.

## Constipation.

Health is absolutely impossible, if constipation is present. Many serious cases of liver and kidney complaint have arisen from neglected constipation. Such a deplorable condition is unnecessary. There is a cure for it. Dr. H. B. Jones, 111, Broadway, N. Y., writes, Feb. 12, 1902: "Having tried H. B. Jones' I find it a fine medicine for constipation." See bottle. Sold by Dr. C. M. I. Drug Dept.

## Combinations

The age of combinations. In most cases combinations are against the people. In this case we are talking about a combination that is with the people.

A combination of a cook and

SMITH'S FLOUR

It can't be beat.

## AT NEWMANS

ALL THIS WEEK.

## "LADIES' SHOE SPECIALS."

We offer a stylish good wearing shoe, value \$3.00

for—

\$2.00.

## A REMEDY FOR COLD FEET.

Newman's fleece lined shoes from \$1.50 to \$2.50

Stylish lasts and patterns. The same appearance as a dressy street shoe.

## Sale of Rogers Silver

MONDAY, NOV. 14th.

\$12.50  
WORTH OF  
ROGERS  
SILVER  
FOR  
\$7.50

Six Triple Plated Dinner Knives,	\$2.25
Six Extra Plated Dinner Forks,	\$3.00
Six Extra Plated Table Spoons,	\$3.00
Six Extra Plated Tea Spoons,	\$1.50
One Extra Plated Butter Knife,	.75
One Extra Plated Sugar Spoon,	.50
Handsome Display Case,	\$1.50

26 Pieces, regular price . . . \$12.50

Every piece guaranteed by us, and sold in sets as above, complete, for—per set . . . \$7.50

These Sets are on display in our show windows and will be sold Monday Morning at 9 o'clock.

There are two designs, both new and handsome, and a choice will be given as long as they last.

26 Pieces of Silver For \$7.50, Means Less Than 30c for each piece and a Handsome Case For Nothing.

To those who know the value of Rogers Silver it will be needless to say more, and to those who do not know the value, we would suggest immediate investigation. The value we give may never be again offered, and the opportunity is a rare one.

Cash Orders Received from the Country Will be filled if we Have the Goods When Order Is Received and Money Refunded if Customer is not Satisfied.

Leysons JEWELERS. 236 MAIN ST. SALT LAKE CITY.

AS USUAL, EVERY PIECE BEARS LEYSON'S GUARANTEE. PHONE 65 FOR THE CORRECT TIME.
