BIG FIRE AT IDAHO FALLS COST \$40,000.

SPECIAL CORRESPONDENCE.
IDAHO FALLS, Ida., Dec. 26.—Damage done by a fire in Anderson Bros.' store in this city Saturday morning was estimated at \$40,000, all covered by \$21,000 insurance. The fire evidently had been smoldering in the basement, as the store was so full of smoke when the firemen arrived that the blaze could not be located and so not fought successfully. Despite three streams being played into the building the flames worked themselves to shelves loaded with dry goods and inflammable stock of every description. A furniture and millinery stock was on the second story, but the damage done there was mostly due to smoke and water, although the heat from below blistered some of the furniture. P. M. Sheppard, invited firemen and others whose clothes had been damaged to help themselves to clothing and furnishings from the stock, and he insisted that they take what they needed.

FACTORY HAS SUCCESSFUL RUN AT SUGAR CITY.

SPECIAL CORRESPONDENCE.
SUGAR CITY, Ida., Dec. 26.—Santa has come and gone and by the appearance of the stores for the past two weeks, he treated everyone very well. There was no special program here yesterday but the day was passed by the citizens at home with relatives and friends. In the evening there was a special Christmas ball in the opera house and one of the largest crowds that has ever been in the hall was in attendance at the dance. Everyone present had a good time.

The weather man has been dealing out all kinds of weather lately. Yesterday it commenced to thaw, which has continued since. Most of the snow has gone and the roads are quite muddy. It is snowing now, however, and a heavy fall of the beautiful is hoped for.

The sugar factory is running full blast and present indications are that the run will last until after the middle of January. An excellent quality of sugar is being manufactured and the run is without doubt the most profitable in the history of the factory. Bets that were stacked at the different dumps and those that were sliced are being

Sometimes it is slow, but to show how fatal it is and how terrible the kidney medicine you have been taking let us tell you that the deaths from kidney trouble are now 65,000 annually—over 175 per day. Astonishing figures, but they are taken from the United States census.

The way to prevent this mild kidney disease becoming chronic is to treat it from its very first hour of appearance as if it were chronic. There is but one thing known that cures both the chronic and the mild cases and we sent for it.

If you have kidney trouble start right. No cases cited except in supposed incurable forms. Let us tell you about it. F. J. Hill Drug Co., Salt Lake City, Utah.

TAKING DICTATION FROM A STENOGRAPHER AND TYPING ON TYPE WRITER.

THOUGH BLIND, ARE EXPERT STENOGRAPHERS.

A new field of endeavor has been opened to those men and women whose misfortune it is to be blind, a field which heretofore has been controlled by men and women whose chief requisite has been keen eyesight. The new work is that of shorthand and typewriting, and the first blind woman exponent to enter the profession in New York state, if not in the entire country, may be seen daily at her desk in the offices and salesrooms of the New York Association for the Blind, at 118 East Fifty-ninth street. In addition to the large volume of office work correspondence, the stenographer has many outside customers who come in during the day to give her dictation. With a speed exceeding that of the average shorthand writer, and with no other guide than a remarkable mentality and amazing subtle sense of touch, the stenographer takes down the dictation by means of a shorthand machine.

The machine resembles a small type writer, with the exception that there are only six keys. Each of these keys when struck produces on a thin ribbon of paper a raised dot. One or more, or even all, may be struck at once, and the various combinations which may be obtained give a wide range of symbols. The system used is what is known as the English Braille.

When there is a rush of work the stenographer will sometimes take down a dozen or more letters as rapidly as the average person can talk, and with a much greater degree of accuracy than the ordinary stenographer. After the dictation is over the girl takes the long roll of paper covered with Braille symbols, turns to an ordinary typewriter and types the letters with a speed that is seldom attained by the average operator having the full use of his or her eyes.

CHRISTMAS BRINGS GOOD CHEER TO RIGBY PEOPLE.

This forenoon the Latter-day Saints church was packed with children of various ages, where another Christmas tree, more singing, reciting and speech-making were furnished, followed by Santa Claus and his aids distributing candy, nuts, oranges, etc., to all present. This entertainment as well as the children's dance last followed it this afternoon were under the auspices of the Sunday school.
