men who were in the neighborhood formed a jury and held an inquest, the

register. The greatest fortress, from a strategical point of view, is the famous stronghold of Gibraliar. It occupies a rocky peninsula jutting out into the sea, about three miles long and threequarters of a mile wide. One central rock rises to a height of 1,435 feet above the sea level. Its northern face is alrost perpendicular, while its east side is full of tremendous precipices. On the south it terminates in what is called Europa Point. The west side is less steep than the east, and between its base and the sea is the narrow, almost level span on which the town of Gibraltar is built. The fortress is considered impregnable to military as-sault. The regular garrison in time of Peace numbers about seven thousand. The biggest cavern is the Mammoth Cave in Edmonson county, Kentucky. It is near Green River, about six miles from Cave City, and twenty-eight from Bowling Green. The base consists of a succession of irregular chambers, some of which are large, situated ou different levels. Some of these are traversed by navigable branches of the subterranean Echo river. Blind fish are found in its waters.

The largest tunnel in the world is that of the St. Gothard, on the line of railroad between Lucerne and Milan. The summit of the tunnel is 900 feet be ow the surface at Andermatt, and 6, 600 feet beneath the peak of Kastelhorn of the St. Gothard group. The tunnel is 28 feet wide, and is 18 feet ten inches from the floor to the crown of the arched roof. It is 914 miles long, 114 miles longer than the Mount Cenis Something beautiful comes into every day's life if we would only sift

The biggest trees in the world are every dithe maninoth trees of California. One it out. of a grove in Tulare county, according to neasurements made by members of the state Geological survey, was shown to e 276 feet in height 208 feet in cumcir ference at base end 76 feet at a point 12 feet above ground. Some of the trees are 376 feet high and 34 feet in diameter. Some of the largest that have been be taken up quarterly. felled indicate an age of from 5,000 to 500 years. The largest library is the Bibliotheque

National in Paris, founded by Louis XIV. It contains 1,400,000 volumes, 300,000 paraplets, 175,000 manuscripts, 300,000 maps and charts and 150,000 coins and inedals. The collection of engravings exceeds 1,300,000, con taioed in some 10,000 volumes. The portraits number about 100,600.
The largest desert is that of Sahara, Shove price.

The largest desert is that of Sahara, a vast regoin of northern Africa, extending from the Atlantic Ocean on the west to the valley of the Nile on the sold the sold in thirty days.

It is announced that several Euro-pean noblemen will soon visit America; whereupon a Kansas editor shouts: "John! O-o-h, John! Count over the family silver immediately, put an extra lock on the mobogany sideboard, take the editor's jewel-spangled gold

This had a great effect until his oppo-nent asked: "What made you dry?" "He pinched me!" answered the little innocent. The whole court was con-

Among the scientific papers that will appear in the appendix of one of the forthcoming reports of the Geological Survey is one by Professor Joseph P. Iddings upon the obsidian cliff of Yellowstone Park. This cliff is an elevation half a mile long by from 150 to 200 feet high, the material of which, Professor Iddings says, "is as good a glass as any artificially manufactured." Its colors and structure not only make it highly interesting to the visitor, but fornish to the scientific investigator.

There is a story of three Yankees abroad who compared notes. One to do the cooking, "what do you mean? You went away at 10 o'clock, and now to Russia." Quoth the second; "And I am continually asked if I am not Louise Napoleon." Up spowe the third: "Ben down ter de baptis'n." "Ben down ter de baptis'n." "Didn't you know that you should have came back in time to get dinner." "Wan't thinkin' thout no dinner. Thinkin' erbout dem souls dat wuz snatched outen de iaws o' Satan.

furnish to the scientific investigator phenomena of importance. The clift presents a partial section of a surface flow of obsidian that poured down an investigation of the plateau lying the scient signs from the plateau lying the section of the four pleces of sandarac, each of the section of the four pleces of sandarac, each of the section of the four pleces of sandarac, each of the section of the four pleces of sandarac, each of the section of the four pleces of sandarac, each of the section of the four pleces of sandarac, each of the section of the sect ancient slope from the plateau lying east. It is impossible to determine what the original thickness of this flow may have been. The dense glass that forms its lower portion is from 75 to 100 feet thick, while the porous and pumiceous upper portion has suffered from ages of erosion and glaciai

that forms its lower portion is from 75 to 100 feet thick, while the porous and pumiceous upper portion has suffered from ages of erosion and giacial action. A remarkable feature of the A certain clergyman had a man of all work, whom he ordered on a festival to go to a butcher named David for a picce of meat, and then to come to the church where the clergyman was to preach. The clergyman is the course of his sermon, happening to turn toward the door as his hired man dame in, exclaimed: "And what says David?"
Upon which the other roared out: "He swears that if you do not pay your bill you need never send to his shop again."

Make frequent applications.

Durson fur doin'de Lord's work? W'y, I had ter stay der ter shout when de soused 'em under. Wan't abdody dar dat could shoullke me, an' how yer's ter dock me arter all dis?"

"Well, I don't believe I want you any langer. You needn't come back."

"Yes, that's just what I want."

"An'jes' bercase I he'ped ter sabe souls. Lady, yer oughter be ershamed o' yerse'f ter persecute 'ligion in this way. W'y, how de work o' de Lawd gwine ter prosper when de white folks lered from ages of erosion and glacial action. A remarkable feature of the cilif is the development of prismatic columns, which form its southern extremity. These are of shining black obsidian, rising from the talus slope, and are from 50 to 60 feet in height, with diameters varying from two to four feet. The color of the material of this cliff is for the most part jet black, but much of it is motified and streaked with bright brownish red sad various shades of brown, from dark to light yellowish, purplish, and olive green. The brilliant luster of the tots and the strong contrasts of color with the black are very striking. In places, the glass in the process of cooling has been broken into small angular pieces, which have been again cemented by the latter flow, producing many-colored and beautiful breccis. In some places, which have been again cemented by the sate flow, producing many-colored and beautiful breccis. In some places which have been again cemented by the streng contrasts of color with the black are very striking. In places, which have been again cemented by the latter flow, producing many-colored and beautiful breccis. In some places which have been again cemented by the sate moticeable, which under the luster, while in others a deep golden sheen is noticeable, which under the luster solves itself into thin beams of red and yellow light. Through the black and plank masses, the effect of which in skill surther to vary the appearance and beauty of the rock, and make it the study of ancient history?"
