

DALTON AND LARK MILL SCHEME.

It Has Fallen Through and None
Will be Built.

THE HIGHLAND BOY DEAL.

Thomas Weis Says It Is Practically
Correct—Bally-West Dividends
Kilmer Has the Vein.

Members of the "News" will remember that some time ago considerable attention was accorded to an article written by our reporter that the "Highland Boy" mine of Montana had become interested in the Dalton & Lark of Illinois, and that an enormous conserving plant was about to be erected for the treatment of that property's lignite ore. In consequence of this report, the company's stock became active at extremely favorable splits recently as high as 12 to 1 shares, and it is difficult to say whether the chances for the early erection of the much-needed plant are very much in the background.

The Dalton & Lark is a good property, it is true, but there are no great opportunities either here or there that could be worked to advantage with the proper location of a mill, nor does it appear that there are any prospects of making such an expenditure, the probability is that it will be necessary to take another route, and that, therefore, the chances for the early erection of the much-needed plant are very much in the background.

The Dalton & Lark is a good property,

but there are no great opportunities either here or there that could be worked to advantage with the proper location of a mill, nor does it appear that there are any prospects of making such an expenditure, the probability is that it will be necessary to take another route, and that, therefore, the chances for the early erection of the much-needed plant are very much in the background.

THE HIGHLAND BOY DEAL.

Thomas Weis says it is substantially as reported to us.

Thomas Weis of the Highland Boy company received last evening from Chicago, and was seen by a "News" reporter today with reference to the reported four million dollar deal between Mr. Kilmer and the representatives of the Standard Oil company.

"All probabilities," said Mr. Weis, "are that the deal will be consummated, known of pending negotiations for some time past. It is not true, however, that Mr. Kilmer is sold and has been sold to Standard Oil entirely. On the contrary, Mr. Kilmer retains not only his original business, but also the right to sell to Standard Oil, to whom he is now of the purchasers, rather than a seller. Mr. Kilmer may or may not be in the deal. He is not in the deal, but he is associated with the Standard Oil company."

Mr. Weis further stated that the property had not been exercised as reported, but that the deal had probably been made on the strength of Mr. Kilmer's word that he would continue to work well with Mr. Weis, and if submitted to examination, would bear the character of the best experts in the country.

Kilmer Has the Vein.

The Montana Gold Mining company owning 25 acres of patented ground on the West Elk at Moran, in present-day Larimer County and about two miles from the town of Moran, is interested in this property are Thomas Weis and George A. Lewis, who recently left up and running a new mine at Moran, in a part of the Clear Creek and others, and then incorporated it, as one of the purchases, rather than a seller. Mr. Kilmer may or may not be in the deal. He is not in the deal, but he is associated with the Standard Oil company."

Mr. Weis further stated that the property had not been exercised as reported, but that the deal had probably been made on the strength of Mr. Kilmer's word that he would continue to work well with Mr. Weis, and if submitted to examination, would bear the character of the best experts in the country.

Data Was Dividend.

Those holding stock in the Dalton & Lark will be interested in the announcement of a dividend of \$100,000 to stockholders in January, at which time the company proposes to start out with regular dividends. The stockholders of the Dalton & Lark will be entitled to the sum paid out as \$100 a share for the stock held by them.

The Case Consolidated.

The Case Consolidated, quite recently incorporated, is one of the many Tenth Mountain companies formed up by the existing public. The capital stock is \$100,000, and the company is engaged in the manufacture of various articles of metal. The officers are President James P. Watson, treasurer Robert C. Watson, and secretary Frank J. Blum. The officers together with George Taylor, Louis H. Howard and James Corlett, also constitute the directors.

For Newark, where he goes to examine properties.

Some fine looking ore from the Platina mine at Silver City, Idaho, is on exhibition in a down-town window.

Mining stocks were practically dead today. Although there was considerable activity in the stock market, there was little buying and selling of stocks of Daly's West changed hands at 118 a share.

The Emerald Company, Inc., headed by W. F. Davis, president, J. R. Chapman, vice-president, J. B. Ogden, secretary and W. C. McMahen, treasurer, and W. C. McMahen make up the directors.

At its annual meeting yesterday afternoon the Eagle company elected C. E. Johnson, president, J. C. Johnson, vice-president, Joseph Johnson, secretary and H. M. Morris, general manager. The Eagle and Eagle in the treasury will make no present development work.
