Monday, August 23, 1890.

EMIGRATION STATISTICS.

THE statistics of emigration to New York, gleaned from the records of the Bureau of the Commissioners of Emigration of the State of New York, reveal some interesting facts. In 1851 the emigration from Ireland to New York was over 163,000, being more than one-half the entire arrivals for that year. This was the largest number that ever landed at that port during any one year. The emigration from that country has not been so large proportionately since then; in fact, it has steadily decreased. Last year the total number of emigrants was 218,586, of which 47,571 were from Ireland. But from England the emigration has been steadily increasing. In 1851 it did not number more than one-sixth of the Irish; but last year it stood 29,000 of the English against 47,000 of the Irish. Up to July 31 of this year the arrivals numbered 188,064; out of these 25,332 were English. It is expected that the emigration from England will yet be as great as that from Ireland has ever been. The English journals feel some alarm upon the subject, and they have been agitating the matter of late.

The heaviest emigration from the old world to New York was in the year 1854. The number reached 319,223. There was a great falling off the next year, the arrivals reaching only 136,223. For ten years afterwards the average was about 184,000. In 1861 only 65,539 landed at New York; lately the emigration has been larger; in 1867 it numbered 242,731. The German element in the emigration is very considerable, and it is increasing.

By this process of emigration the monarchies of the old world are being steadily depleted of their strength, and though their populations have been so numerous that the exodus from their shores of thousands has been a relief rather than otherwise to them, yet the effect upon them must eventually be disastrous.

(SPECIAL TO THE DESERET NEWS.)

By Telegraph.

GENERAL.

Mauch Chunk.—Nearly all the colliers in this region have struck.

Washington.—An order has been issued from the War Department, forbidding the residence of settlers on military reservations; the intruders must leave or be ejected by force.

Commissioner Delano decides that Co-operation Societies, which are required to pay a tax of five per cent on all dividends, interest, &c., cannot treat such amounts as business expenses and deductions.

New York.—Judge Benedict has granted an injunction, to stay proceedings with regard to the disposition of the ammunition wagons, &c., belonging to the Cuban Junta, which were about to be sold to satisfy the judgment, recovered by the owners of certain tug boats.

The amount of arrears penalty, independent of the tax, accrued by the Brooklyn brokers who failed to make the proper monthly returns, against whom suits have been commenced, exceeds four hundred thousand.

The Tribune says it is expected on good grounds that an expedition for Cuba will leave within a few days, either at this port or Boston. Several small expeditions from Florida are made more bluffs to divert attention. Marshal Barlow has been taking extraordinary precautions against violations of the neutrality laws.

Philadelphia.—The Labor Congress has adopted a platform, of which the following is a synopsis: "All political powers are inherent in the people; free government is founded on their authority and established for their benefit; the laborers in all the departments of useful industry are suffering from the system of monetary laws which were enacted during the late war, as measures then assumed to be necessary to the life of the nation, but which are now sought to be perpetuated in the interests of bondholders and bankers, to subvert the government of our fathers, and to establish on its ruins an empire in which all political power will be centralized to restrain and oppress the rights of labor, and to subordinate its votaries to the mercenary demands of an aggregated capital and its supercilious authority; that the national banking system has been inimical to the spirit of liberty and subversive of the principles of justice, without the warrant of the Constitution of the United States, and wrongfully increasing the burdens of the wealth-producing classes, millions of dollars annually. Justice, the aspirations of honest industry and the rights of impoverished liberty demand immediately their repeal and the substitution of legal tender notes as the exclusive currency of the nation. That the National Labor Union is opposed to the continuation and creation of banks by acts of incorporation, either by State or national authority, with the privilege of putting into circulation any bills and papers of the bank; also to the circulation of money, except legal tender treasury notes; that the revenue laws should be altered so that instead of the subordination of labor to capital, they may afford just protection to labor and the industrial interests of the whole country; that legal tender money should be made a legal tender in the payment of all debts, public and private, and convertible at the option of the holder into Government bonds, bearing interest at three per cent, with the privilege to redeem the bonds into money, and the money into bonds at pleasure; that the claim of bondholders, that bonds bought with greenbacks, the principal of which, by law, is payable in currency, should nevertheless be paid in gold, is unjust and extortionate, and that the exemption from tax on bonds and securities is a violation of the principles of the revenue laws. The resolutions denounce and condemn an executive department to be called the department of labor, for the protection of labor interests. They recommend the

adoption of measures to secure an eight-hour system, and call upon all the State legislatures to follow the example of Congress in recognizing eight hours as a legal day's work; they urge the full restoration of civil and political rights to every American citizen, except those convicted of felony."

The committee on obnoxious laws reported resolutions against the conspiracy laws in the different States, and especially those of Pennsylvania, and demanding their immediate and unconditional repeal.

Chicago.—A church, and the German theatre on the north side of the city were struck by lightning last night; the inmates were stunned, but nobody was seriously hurt.

Several citizens have clubbed together and ordered five thousand pounds of tea direct from China; they agree to pay ninety cents per pound for tea, which will be equal to that sold here for a dollar and a half. Should the samples suffer less deterioration than tea sent by the Cape of Good Hope, large orders will be promptly forwarded.

The Tribune's New York special says private telegrams say the Harvard crew have been over-trained and show signs of breaking down; the prospect of defeat is almost certain. The rates of betting have been changed accordingly.

Chief Justice Chase has been visited by several leading politicians and financiers. His friends deny that he has any political purpose in coming to New York; they say he regards himself as out of politics.

San Francisco, 21.—A deficiency of eighteen thousand dollars has been discovered in the coiners' department of the branch mint in this city.

The fires which raged in the woods in Washington Territory since July first have been nearly extinguished by the recent heavy rains.

Chicago.—The Tribune's Washington special says, the Associated Press dispatches from San Francisco, concerning the application to Secretary Boutwell to transfer the gold from the Sub-Treasury, and other matters connected therewith, do great injustice to the Treasury Department. First Vice President Colfax recently allowed his name to be used in the dispatch without a knowledge of its real meaning. The committee for the Treasury Department is sitting or is about to sit at San Francisco to investigate matters in the Sub-Treasury, and there is excellent reason to believe that the authority to transfer now asked is wanted to cover up a transfer already made without authority; as to the advantages charged to have been granted by the Secretary to certain parties, that is merely a continuation of an agreement made by the Department with a firm in San Francisco long before Secretary Boutwell came into office, which was then and is still deemed advantageous to the Government. It is also an error, that the Treasury did not even reply to the application for funds from the Sub-Treasury at New York, as a million and a half was at once started from New York to San Francisco.

Fall River.—A meeting of manufacturers was held here last night. They resolved to run all the factories only three days a week.

Washington.—Two colored men, who recently committed an outrage on a young lady on the line of the Manassas railroad, were taken from jail at Fort Royal on Thursday night by a party of disguised men and lynched.

Nashville.—Fletcher, the Secretary of State, publishes a letter to-day in answer to the Tennessee bondholders as to whether it is best to hold their new bonds. He recommends them to keep them and says repudiation is impossible because the bonds are collectable in the Federal courts, and because the people of Tennessee are too honest and proud, and no Legislature dare adopt such a measure.

New York.—Wm. M. Tweed says the Democratic Association has resolved to invite Belmont to resign the chairmanship of the Democratic committee.

The banking house of Thos. F. Morris & Co., of New York, suspended on Thursday. It is supposed the cashier is a defaulter to the amount of \$40,000.

Judge James has delivered an opinion, sustaining the Government in the case of the 130 brokers residing in Brooklyn, with regard to the payment of the tax on capital.

The weather to-day is extremely hot. Three millions in gold were shipped to prominent houses in San Francisco to-day by the Pacific Mail.

Rochester.—Commodore Vanderbilt was married to-day at London, Canada, to Miss Frank Crawford of Mobile.

Washington.—To-day is the hottest of the season, the thermometer ranged from 98° to 105°.

Cincinnati.—The weather is roasting hot. Four cases of sunstroke have occurred since yesterday.

Philadelphia.—The Labor Congress has elected Richard Trevillick, of Detroit, Mich., President; A. T. Davis, of Washington, first, and Conrad Kuhn, of New York, second Vice President; J. H. Watts, of Philadelphia, Recording Secretary; A. C. Phelps, of New Haven, Conn., Treasurer. The new officers were installed and appropriately addressed the Congress. A. C. Cameron, of Illinois, and C. H. Tucker, of New York, were elected delegates to the European National Labor Congress to be held in Switzerland. Cincinnati was selected as the place for holding the next Convention. The committee on the new political party reported that they were unable to agree and by request were continued until next year. A resolution of sympathy with the Cuban revolutionists, the Irish patriots and the oppressed millions of Europe was adopted, and one for the reduction of the naturalization term from five to three years was also adopted. The Congress then adjourned.

New York.—T. G. Churchill, the Treasurer of the Lincoln Monument fund, publishes a letter to-day in which he states that a contract had been made with H. K. Brown, the celebrated sculptor, and that he had already finished the plaster cast of the late President, which had been accepted by the committee. It had been sent to the foundry to be cast in bronze. Mr. Brown has been paid ten thousand dollars on account; the balance of the funds, eleven thousand, have been invested in five-twenty bonds.

The American flint glass works at Brooklyn were damaged by fire yesterday to the amount of twenty-five thousand dollars.

It is announced that the new increased freight tariff west, goes into effect to-day and the ruinous competition between the roads leading west has been terminated by a compromise.

Washington.—The heat to-day is intense. The sky is cloudy, but there is no rain.

Gottsburg.—Only a few officers have arrived. General Meade and Staff and other generals who participated on the battle will arrive to-morrow. The attendance of Confederate generals promises to be small. General Lee states his business engagements prevent his attendance.

Rochester, N.Y.—The Old Rochester House Block on Exchange Street, occupied as a planing mill and sash factory, was totally destroyed by fire this afternoon, together with nearly a million feet of lumber in an adjoining yard; the aggregate loss including the building and stock amounts to a hundred thousand dollars.

Louville.—Three companies of the State militia left this morning for Lebanon, N.Y., to be distributed in the lower counties, where the regulators have been depredating.

The heat to-day is intense. The thermometer stands at 120°.

Chicago.—Albion N. Towne, assistant Superintendent of the Chicago, Burlington and Quincy Railroad, has been appointed General Superintendent of the Central Pacific Railroad, with a salary of \$13,000 in gold.

Governor Palmer has appointed the delegates to the National Capital Convention at St. Louis.

FOREIGN.

Madrid.—Notwithstanding the invasion and insurrection it is now believed the Carlist movement is ended.

Lisbon.—The mail steamer from Rio has arrived with dates to the 20th of July. President Lopez was then at Ascurra; he had plenty of provisions but was short of arms, ammunition and other war material. The allied armies had captured Villa Rica and were preparing to storm Ascurra.

Paris.—La France, to-day, says that Cuba is lost to Spain. The wisest thing Cuba can do is to take advantage of the present situation.

Havana.—The banquet to the Governor-General last night was a grand affair. Sir John Young disclaimed having avowed himself in favor of a severance of allegiance from England. When at Quebec he had said in a speech that a change of allegiance might be possible, not a severance of allegiance.

Havana.—News from St. Domingo to 2d state that Cabral, with 3,000 troops, was besieging Arica. Baez commanded the forces in the city.

The news from Hayti dates to the 9th. Salnave had retreated from Jacmel, but was continuing the siege of Aux Cayes. A Dutch schooner loaded with contraband articles of war had been captured.

London, 21.—The Morning Post has an editorial on the coming yacht race. It says that in a light wind smooth water there are several English yachts that may be relied on to beat Bennett's American yacht *Dawnless* at every point. The result of the recent race to Cherbourg and the return, as a test of speed, was marred by an accident to the sails of the *Dawnless*. The impression among yachtsmen is that she will not stand to her canvas, and cannot compete successfully in heavy any more than in light weather; but in going free she would probably sail as fast or faster than our deep vessels. A yacht race around the Azores offers a fairer chance to test the quality of all the vessels.

As the time of the international boat race approaches the excitement in sporting circles increases. Much space in the newspapers is given up to this subject.

The journals state the course is a hard one, but the race is likely to be close. If the weather is bad the result probably will be in favor of Oxford, if good, Harvard will win; a nice, slow English drizzle is the thing to take the heart out of the Americans. Regulations have been issued to keep the course clear two hours before and until the race is ended.

Paris.—It is now tolerably certain that General Laboulaye will be appointed Minister of war.

London, 21.—The Standard in an editorial on Canadian matters says there is great probability of a change in the relations between Canada and Great Britain which would likely be distasteful to the majority of the inhabitants of the dominion, if they were consulted.

London—even.—The Oxford crew have been out for practice to-day. They made good pace with 38 to 39 strokes a minute. The Harvard crew have been also out with a Jewett boat; they go away briskly at nearly forty strokes a minute; their rowing is regarded as very satisfactory. Good judges think they are likely to win the race. At the special desire of the Harvards, Thomas Hughes, ex-member of Parliament for Oxford, has been appointed referee. To-day being 7 to 4 on the Oxford.

Madrid.—Admiral Humes is dead. The volunteers have petitioned the Government to spare the life of Polo, recently captured at the head of a band of Carlists. The prefect of Perpignan has been arrested at Histrum with ten other Carlists who were about to cross the frontier.

Paris.—The Presse says a new senatorial constitution is in preparation granting autonomy, and greater liberties to the colonies.

Havana.—Advices from Matanzas say that the Cap. General had reviewed the troops in that city. They expressed a willingness to go into active service. The rebels, four hundred strong, in the jurisdiction of Colon, had been committing depredations. They burnt several estates.

Colonel Berganali, who left Puerto Padre with a regiment numbering 800 men while escorting a convoy to Los Tunis encountered the rebels twice. A severe fight ensued, the result is unknown. Report says he reached Los Tunis.

The Herald's Havana special to the 10th, via Key West, states that intelligence from Colon has been received to the effect that ten thousand insurgents have appeared in the vicinity of Macarigua. But few troops are in the district and the governor is unable to check the patriots, who are destroying all the property owned by the Spaniards.

Madrid.—The troops are still pursuing the fugitive Carlists on the frontier provinces and have taken many prisoners. The wife of Polo, the Carlist leader who was captured at Almagro, has been released with Gen. Prim for the life of her husband.

Dimensions have arisen in the Cabinet with regard to the manner in which Government should proceed against those bishops who have refused to obey the late decree of the Regent.

In Barcelona fifteen thousand working men have struck for higher wages, others are expected to join them in this movement. Grave fears are entertained for the preservation of order.

Regent Serrano positively denies that he sustains the pretensions of the Duke of Montpensier to the throne of Spain. He declares he is entirely neutral on the question of the disposal of the Spanish crown.

It is asserted on good authority that the preliminaries for a treaty for the cession of Cuba have been signed.

Paris.—The Journal Officiel publishes an imperial decree appointing General Le Bonf minister of war, to succeed Marshal Niel, deceased.

The French officials have arrested five more Carlist chiefs on the Spanish frontier.

Washington, 22.—Cuban advices to the 9th have been received here. They give the following statement of the political condition there: The volunteers are exhibiting the purposes of their organization, that of seizing the Governor of the island of Cuba. Everywhere throughout the island the volunteer junta are acting in concert with the Ayuntamiento at Havana, and exercise the same control over Derodas that expelled Dulce from his position. It is reported that a formidable organization of Spaniards in the interest of Céspedes' government, in every part of this land, has been exposed by means of a spy. The object of this organization was to counteract that of the volunteers, and strengthen the Cubans in the field with means necessary to carry on the contest. This they did, but the exposure had driven hundreds into the Cuban army and given them a moral and physical power which will be a terror to the Spanish troops and volunteers. It is reported Derodas contemplates resigning with a view to return to Spain believing that his longer continuance in his present position would detract from his well-earned reputation.

Private advices state the Emperor of Japan is making extensive preparations for the reception of the Duke of Edinburgh now en route for Yokohama. The Tycoon's old palace is being prepared for his residence, while at Jeddo. Horses and carriages have been ordered from China for his transportation and convenience.
