

One broker said today that he thought Ohio ought to sell at \$5, and predicted that it would be before very long. The Winnemuck mine, purchased by the present company, has great possi-bilities, in the shape of large tonnages of silver-lead ores. Undoubtedly this portion of the Ohio's domains will re-ceive attention in the near future.

Short Line headquarters this morning it was learned that T. M. Schumacher arrived in New Orleans this morning

From 500 Level.

Advices received from the Tintle Advices received from the Tintic mining district late yesterday afternoon indicated to the officials of the Uncle Sam Consolidated Mining company that a strike, which appeared to be of con-siderable importance, had been made on the 500-foot level of the property of that corporation, or rather in the winze sunk from that level. The ore is said to be of high grade, and that there appears to be a large body of it. James Chipman, acting manager of the mine, went out to camp this morn-

the mine, went out to camp this morning to make an investigation.

OLD DOMINION FIRE.

Critical Condition Exists at Big Copper Mine at Globe, Ariz.

Globe, Ariz., Feb. 21.-Conditions at the Old Dominion mine today are still critical. Attention is now directed to the lining with canvas of one compartment of the working shaft to serve as a chimney for the escape of gas com-ing from the several levels of the mine. The guides over the same compan-ment above the collar of the shaft have also been enclosed with canvas, thereby carrying gases to the top. The men engaged in this work can remain be-

engaged in this work can remain be-low only a few minutes, and men are being lowered and raised continually. The scheme to confine gases to one compartment already is showing good results, and other comparaments are conparatively free from g. s. Pumps on the twelfth level gave out yesterday afternoon and one of the two big pumps on the tenth level did the same today.

e same today. Efforts will be made to reach the

Efforts will be made to reach the tenth level pump tonight and oil and regulate the pumps now running and start the idle pump. As a result of the failure of the pumps, water has risen from the fourteenth to within 50 feet of the twelfth level. A great deal of gas is coming from the twelfth level and the management has decid-ed fo allow the water to vise above this

even and with management has decit-ed to allow the water to rise above this level in order to shut off the gas. Two bailers of 1,000 gallons a min-the capacity are hosting water, and a third is in readiness to use when need-ed

ed. Ira Wheat, a station tender, was overcome on the stage while asceni-ing the shaft this afternoon, and had his leg broken and mangled. The interior shaft, in which the fire occurred, caved in at 9 o'clock last night, forcing the gas through the mine and driving all the miners to the sur-fuse.

Sixty men were overcome by gas, but all recovered.

The bodies of Joseph Ikenberry, Joe Artissey and John James, who met death last night while fighting the fire in the Old Dominion mine, at that place, will probably never be recov-All the compartments have been bulkheaded off and miners are mak-ing heroic efforts to subdue the flames.

Ing heroic efforts to subdue the flames. They cannot reach the pumps on some levels, however, and it is feared the mine will be flooded and will take months to extinguish the fire. All the men in the mine when the fire broke out escaped, and the three dead men were sufficiented while trying to put out the flames and fell to the bottom of the shaft.

Miners showed great heroism in fight-ing the flames. There was a pathetic scene about the mouth of the mine, wives and children begging the mine-ers hot to go down, but they went, one shift following another every few minutes. The mine is owned by Philip, Dodge & Co.

A. S. CAMPBELL. Stock Broker, 216 D. F. Walker Block.

The immediate future depends largely upon the actual status of the demand for final consumption, in other demand for final consumption, in other words, the general business condition; if this continues as good as it has been, there must be soon another up-ward movement of the metal; if it shows a falling off, or if the present duliness continues much longer, one or another of the large producers now holding aloof, will be likely to reduce his asking price. In the meanwhile the producers have it in their favor his asking price. In the meanwhile the producers have it in their favor that the business in copper is on a hand to mouth basis, and an accident to any important producer-such as a fire in a mine, smelting works or re-

a fire in a mine, smelling works or re-finery-would immediately cause a scramble for metal; while against them is the specter of a strike in the coal-fields, which would seriously check business in all directions. During the present week the market has certainly assumed a stronger tone. assumed a stronger tone.

ACTIVITY AT ELY.

Goldfield Mining Men Are Greatly Interested in Copper Camp.

William Baswick, formerly connected William Beswick, formerly connected with the Hermitage, has returned for a short visit from Ely, the new copper camp, says the Sun of Goldfield. He states that people are flocking steadily into the new district, but that supples are tardy owing to the difficult roads. He states that it is almost impossi-ble to buy 1,000 feet of iumber in the place and that it will be well on to-wards summer before teams can do much hauling, as the roads are knee deep in mud and in very poor condi-tion. He estimates the population at 1,200 people.

people, any Goldfielders, he says, are Many Many Goldfielders, he says, are now at Ely and he met many more go-ing in. He thinks the permanency of Ely as a great copper producing district is assured, a second Butte, in fact, and several samples of red crystalized and oxidized copper which he has left on exhibition at the Her-mitage seem to warrant his assertions.

WALKER ON UTAH STOCKS.

Says Over \$5 a Share Will be Divided

Among Utah Con. Shareholders. George L. Walker in the Boston

ommercial says: Utah Consolidated has declined to a point where it yields more than 8 per cent on the investment. The com-pany is earning at the rate of more than 10 per cent on its present selling price. As the company has a consider-nble cash surplus, it is not improbable that \$5.50 to \$6 per share will be dis-tributed to stockholders during the urrent year.

current year. Bingham Consolidated stock contin-ues to be absorbed by Heinze interests. It is not yet known whether he is buy-ing the stock for the Copper Securities, the Consolidated Copper or the Ameri-can Consolidated Copper or the Ameri-can Consolidated company. Insiders predict that Bingham stock will sell above 560. above \$60.

MERGER OF LEAD CONCERNS.

New York, Feb. 21 .--- Although of-ficial announcement of the terms will not be made for several days, it is un-derstood that the merger of the United Lead company with the National Lead company has practically become au-thoritative.

BACK FROM EUREKA.

WESTERN MARKET LETTER.

WESTERN MARKET LETTER. Special Corrrespondence. Stockyards. Kansas City. Mo., Monday. Feb. 19, 1906 – Buyers acted in a peculiar manner last week, as if they were ex-pecting a big drop in cattle receipts, and did not want to be caught napping. They bought liberal receipts of cattle at sharp-ity higher prices first of the week, but showed their usual indifference when they had secured a good stock. This indicates that they want the cattle and can sell the meat. The supply today is liberal again. 12.000 head, market slow and slightly low-er on beef stears, cows and stockers and feeders steady. Not many cattle have been received from far off territory late-by. Some Idaho hay fed killing steers, weighing 1.125 to 1.150 pounds, sold last Thursday at 4.40 to 4.45, stockers of same shipment at 3.30, cows 3.70, other weight to cholce panhandle stockers 4.00, good to cholce panhandle stockers 4.00 to 4.90. A train of high grade stock-ters from Hereford, Texas, are en route for the fat store market, the uncertain more-ments of the fat store market is causing some feeders to besitate, but there is a general disposition to buy, as the fat cat the now being marketed are making meney. Buy have had a strong tendency the

general disposition to buy, as the fat catile now being marketed are making money.
 Bheep have had a strong tendency the last week, including today, but lambs are week ago. Run today 10.000 had, last week 42.000, but there are signs of a falling off in receipts, and some traders look for lambs to make some gains in the near future. Fair to good lambs are selling at 5.50 to 5.50, the pretty good ones 4.75 to 5.50 to 5.

build any portion of its proposed line from Denver north to Laramie and on

from Denver north to Laramie and on toward the northwest. It is possible that it is backed by the Gould interests but such is not believed to be the case. The capital stock is placed at \$5,000,000, and the trustees for the first year are R. H. Dyer and J. T. West of Pueblo, Colo. and Sidney J. Kent of Lincoln, Neb. West is a young man of perhaps 21 or 22 years of age, and it is claimed that Kent is connected with the Lincoln Townsite company, a Burlington insti-tution. The articles of incorporation were filed by J. D. Milliken of Mc-Cracken, Kan, who was also one of the incorporators of the Colorado, Wyoming & Idaho about a year ago, whose inten-

incorporators of the Colorado, Wyoming & Idaho about a year ago, whose inten-tions were announced to be about the same as those set forth in the articles of the new Denver, Laramie & North-western. From the Colorado, Wyoming & Idaho, however, was evolved the Den-ver, Yellowstone & Pacific several months ago, and the proposed line was materially changed, passing through the North Park country, Grand En-campment, saratoga, crossing the Un-Ion Pacific at Walcott, and continuing on toward Vellowstone park and a Pacifon pacine at Walcott, and continuing on toward Yellowstone park and a Paci-fic coast point. This line is now under way of construction. When the reor-genization was made, however, Judge Milliken was in some manner excluded.

Miliken was in some manner excluded. While the incorporation of the Den-ver, Laramie & Northwestern may be made in good faith, it is generally con-ceded here that it is only a strategic move on the part of some railroad to secure a right of way for which it may have a possible use in the future.

BORAX SMITH'S ROAD.

BORAX SMITH'S ROAD. Replying to inquiry from the Beatty Bullfrog Miner, General Superintendent John Ryan of the Tonopah & Tidewater Railroad company, says: "Regarding our road, we have 40 miles of grade built and 22 miles of track laid. We would be many miles further out, with both grade and track, had it not been for delays in securing ma-terial. From now on we anticipate no further delay, and are preparing to commence completing a mile of track per day. It is now a positive fact that we will build on through to Tonopah."

SUMMER RATES.

Harriman Lines Offer Splendid Chance To See America.

Chicago, Feb. 21,-Announcement was made here today that the Harri-man lines will make a low round trip rate of \$75 from Chicago and \$60 from Missouri river points, to Portland, San Francisco and Los Angeles. The tickets will be sold June 1 to Sept. 15. Stopover privileges en route, going and returning, will be allowed at Denver, Salt Lake and other principal cities.

ANOTHER COOS BAY ROAD.

Southern Pacific Now Figuring on a Coast Line to 'Frisco.

Portland, Feb. 22.—According to J.W. Bennett of Marshfeld, Or., a corps of engineers is running a survey for the Southern Pacific from Coos Bay to San Francisco, and that it is believed at Marshfeld that the Harriman lines in-tend to build a line along the coast for the purpose of heading off the Santa Fe which it is runnored intends. the purpose of heading off the Santa Fe, which, it is rumored, intends to build to Coos Bay. According to Ben-nett, the people of Marshfield are con-fident that the Spreckels interests in-tend to extend their road which now runs from Coos Bay to Myrtie Point on to Roseburg, Or., with possibly east-ern connections.
