

### In Women's World.

Their home in Butte, where Mr. Ben-son has for some time been a resident. They will take with them the sincere good wishes of a wide circle of friends.

An interesting meeting of the A. C. Woman's club was held at the home of Mrs. Bexell on Wednesday afternoon last.

Mrs. Ray West, who has been visiting in Ogden for some time, returned to Logan on Tuesday.

Mr. and Mrs. Aaron Farr and family left on Wednesday for their ranch near Mahad where they will spend the winter.

Mr. Fred Alder of Salt Lake was a Logan visitor during the week.

Mrs. Roy McAllister entertained informally on Wednesday afternoon.

Mr. E. R. Needham came down from Preston on business Monday.

Mr. H. E. Crockett came down from Preston to spend Sunday with his family.

Mr. and Mrs. S. W. Hendricks of Richmond visited in Logan on Monday.

Mr. Joseph Newbold is at home after spending several months in the Eastern states, doing missionary work.

Mr. and Mrs. Walter Barber and children of Star valley left for their home on Wednesday after a pleasant visit with friends and relatives in Logan.

Miss Margaret Wilkinson and Mrs. W. H. Jardine were the delegates from the A. C. Woman's club to the Federation meetings held at Park City. Mrs. Wilkinson returned home on Wednesday, but Mrs. Jardine will visit for a few days in Salt Lake.

Mrs. Congressman Howell spent several days of the week in Salt Lake City.

Mrs. Frank Hanks and little son have gone to Pocatello.

Mr. L. J. Matlock has left Logan to take a position at Tonopah, Nev.

Mr. Clark of Chicago spent part of the week transacting business in Logan.

Mr. J. J. Toronto of Salt Lake is in Logan.

### LEHI.

Lehi, Utah, Oct. 27.—Monday evening the Young Men's Republican club will give a grand free ball and social in the city pavilion. Speeches will also be made.

Hon. and Mrs. A. J. Evans and daughter Ethel are visiting in Kansas City and other eastern points.

Miss Mabel Woodhouse, one of Lehi's most popular young ladies, and Bert Peterson of American Fork, will be married the last of the month.

Mrs. S. L. Skelis is visiting relatives in Salt Lake City.

Mr. Geo. A. Smith of Salt Lake City spent Thursday with friends.

Asst. Geo. Tinsdale spent Monday here, visiting his daughter, Mrs. Joseph F. Smith.

Mr. Abe Goates has gone to Nampa to accept a position as chemist with the Western Idaho Sugar Co.

Ex. Felix Long is visiting Provo friends.

Rebecca, J. H. Gardner and M. W. Phillips are visiting the sugar factories in Idaho.

Miss Violet Becket of Provo is visiting Lehi friends.

Mrs. J. F. Miller of Farmington is visiting Mrs. Ole Larson.

Monday evening a social was given in the Third ward social hall in honor of George Shaw, who has gone on a mission to the Southern states.

Mr. John Empey of Ammon, Idaho, is visiting Lehi friends.

Rumor has it that Mr. Geo. A. Goates, one of the prominent young men of this place, and Miss Della Jensen of Oakley, will be married the last of next month.

Yes, we sell good pianos.  
N. Y. & WESTERN PIANO CO.,  
12 Market, near Post Office.

The henna hair stain is made by taking one ounce of the dried, pressed leaves, steeping in a pint of water for 20 minutes, cooling and applying leaves and liquid and all. It is best to have the hair shampooed first and dried, then the henna put on and allowed to dry, then another shampooing. A lot of trouble, but it will bring beautiful red glints to brown hair.

Henna stain is not suitable to use on drab or blond hair, but only on dark brown hair. To that it imparts a slightly auburn touch. For colorless drab hair the blond shampoo would be best, since it brings a golden glint. Rub five or six eggs all through the hair and into the scalp, allowing them to drain into a bowlful of hot water, to which have been added one teaspoonful of salts of tartar and the juice of two lemons. Use the hot water freely, rubbing it in with the eggs until you have a suds like that made with soap. An excellent tonic.

Vitality is both physical and mental, and it is when the two are combined that perfect beauty appears. Physical vitality gives muscular strength while the mental creates nerve control, which springs from confidence and serenity. The condition of the body is affected by the condition of the mind. That is why worry is so detrimental to the health. Fear and anxiety chill the blood, destroy the appetite, retard the heart action and bring many genuine physical ills. The old Greek ideal of beauty and goodness was the vision of a fair soul in a fair body. Beauty is an expression of purity and happiness. There is no beauty in a gray cloud, but what glory appears when the sky clears and the sun streams out!

Massage and electricity will in time strengthen the muscles of the face so that the wrinkles are blotted out. Applying plasters will not do away with

MODISH VELVETEEN GOWN.

Striped velvets and velveteens are entering into competition with the checked velveteens so favored earlier in the season. Their possibilities as materials for handsome frocks are wonderfully good, as the illustration proves. Brown and white is the color scheme, with the skirt cut in such fashion as to form angles down the central seam. The bodice is a draped one, built over a carefully boned lining, and shows the handsome lace vestee to advantage. The short elbow sleeves are met by glove covers of brown satin made a la mousquetaire.

grower for blond hair is this: Eight ounces of cognac, one ounce of tincture of cantharides, one-half dram of oil of lavender and one-half dram of oil of rosemary. Apply to the scalp once or twice a day.

An unpleasant itching of the ears is most usually caused by eczema. Women who are subject to this ailment should eat quantities of fruit, water cress, dandelion, lettuce, etc. For a local application a weak dilution of carbolic acid is healing and agreeable or listerine diluted one-half with water will allay the fearful irritation of eczema. It is always best, of course, to consult a specialist, since the trouble may be a serious one that in time will affect the hearing.

Every man and woman should use a good breath sweetener upon arising in the morning. Cleanse the teeth with a good firm brush and a tooth powder or paste. Then pour a teaspoonful of listerine in a glass of water and add a pinch of borax and use as a mouth wash. If you will have your

lines. The thing is to fill out the tissues, which have become depleted and allowed the outer skin to fall in loose folds. To do away with hollow cheeks the large muscles of the face must be manipulated with a clamping movement, not a rolling or pinching. Electricity has the power of stimulating all functional energy, promoting cellular nutrition, quickening the circulation and energizing nerves and muscles. Steaming the face is the most harmful thing in the world. It robs the tissues of the very oils that are their foundation and nourishment. Cold water is better than hot, except once a day, when a warm facial rubbing with soap and a complexion brush is necessary to remove dust and grime.

To enlarge pores cleanse the face with a good cold cream, then bathe in hot and cold water alternately; this you must do each night. In the morning bathe in hot and cold water, and into the last cold water put a few drops of benzoin. Once a week massage the face thoroughly.

Among the little hair conveniences of the moment are delightfully deceptive front-places that are just pinned on over one's own hair. Then the little tendrils of hair that tuck around the temples are curled and drawn up over the artificial piece, so that the line of its application is altogether concealed. For the woman to whom nature has not been very generous in the matter of hair, here are innumerable soft wavy switches which may be easily adjusted in many varying styles. In evening coiffures curls run riot, and curls are sold in the shops—fascinating curls, too—singly, in pairs, and in clusters, all conveniently mounted on a shell hair-pin, so that they may be tucked in place in a hurry.—Woman's Home Companion for November.

### CLUB CHAT.

The important event in club circles this week was the meeting of the State Federation at Park City, and the event in every way was a memorable one. Mrs. Sarah Platt Decker, president of the national federation, was present, and addressed the local body on important subjects, and the entire program was a notable one in all ways.

The regular meeting of the Ladies' Literary club was held yesterday at the club house, and a program of unusual excellence given, including a talk by Fisher Harris on London, a paper on "Psychic Research" by Mrs. Tynedale, a vocal solo by Mr. Brines, accompanied by Prof. McClellan. The latter, with Prof. Willard Wehe also gave a concerto for piano and violin. And Mrs. W. P. James a vocal selection.

The Cleofan met this week with Mrs. Lora S. Riter, whose topic was "Marie de Medici and her Regency." Next Tuesday the club meets with Mrs. Frank Roberts, 507 Second St., and Mrs. Sara Booth will give a talk on Louis XIII and the wars of the

The Woman's club will meet Tuesday, Oct. 30, at the home of Mrs. Jno. L. Bowman, at the usual hour. Mrs. P. N. Cook will give a paper on "Philip Stevens," interspersed with readings by Mrs. T. Y. Armstrong, from the works of this gifted poet.

The Daughters of Utah Pioneers held an interesting meeting on Wednesday at the B. Y. Memorial hall.

### Marriage Licenses.

Marriage licenses were issued by the county clerk during the past week to the following persons:

James E. Cambron, San Diego, Cal.; Mary E. Meyer, San Diego, Cal.

John Beck, Salt Lake; Dorothy Rindfleisch, Salt Lake.

W. W. Walters, Los Angeles, Cal.; Emma S. Rogers, Denver, Colo.

John Bennington, Salt Lake; Rowina Bellamy, Salt Lake.

Charles D. Costigan, Kansas City, Mo.; Edna M. Hanson, Salt Lake.

Charles Nebbeck, Dillon, Mont.; Fannie McCracken, Hiramsville, Mo.

Stavanti A. Erickson, Salt Lake; Beda Lindbeck, Salt Lake.

Wilford Walker, Holladay; Ella Madson, Salt Lake.

Herbert Forsnas, Bingham; Ella Ny-lund, Bingham.

Thomas M. Davis, Salt Lake; Daisy M. Meadowcroft, Salt Lake.

Arthur S. L. Indianola; Laura J. Johnson, Fairview.

J. Arthur Thomas, Salt Lake City; Clara E. Mathis, Salt Lake.

John F. Charles, Butte; Ida Francis, Butte.

William Stafford, Salt Lake City; Sara M. Borgquist, Richmond.

Charles E. Davey, Salt Lake City; Robert A. Burt, Salt Lake City.

William Green, Big Cottonwood; Ethel Terry, Millard.

A. E. Reen, Salt Lake City; Joseph P. Seese, Alamy, Idaho; Harriet H. Brown, Alamy, Idaho.

Otto W. Armesen, Salt Lake City; Zina Newbold Downey, Salt Lake City.

John A. Burt, Salt Lake City; Lar-ella H. Harrow, Salt Lake City.

Frank B. Slavin, Bingham Canyon; Jennie M. Johnson, Spokane, Wash.

Samuel Sweet, Park City; Hazel Williams, Park City.

Lee R. Marriott, Osceola, Nev.; Myrtle Gregory, Osceola, Nev.

Sam Soderling, Bingham; Lizzie Wil-don, Bingham.

William R. Copeland, Salt Lake; Al-na Peterson, Salt Lake.

William J. Stone, Salt Lake; Andie Pugh, Salt Lake.

George S. Taylor, Provo; Priscilla Smith, Salt Lake.

Alfred B. Jackson, Lake Breeze; Lil-lian M. Witzel, Salt Lake.

Frank L. Fairchild, Bingham; Flora H. Simmons, Bingham.

Nathan F. Bramlette, Salt Lake City; Annie Hardy, Salt Lake City.

Edward C. Galloway, Lewiston; Alma Hallett, Lewiston.

Carl W. Shippen, Idaho Falls; Nellie Woodhead, Lark.

Joseph Meyers, Minersville; Eliza-beth Tuckfield, Salt Lake City.

Joseph Nattes, Salt Lake City; Bir-die Jensen, Gunnison.

Benjamin E. Harman, Salt Lake City; Sarah J. Thomas, Salt Lake City.

John W. Sower, Redgeway, Colo.; Jessie Wilson Proffitt, Redgeway, Colo.

### A WILY WOMAN CANVASSER

Gets Subscribers by Visiting Miners Underground.

A Macon, Mo., Washington Post dispatch says: As Dan Greenwood, foreman of Northwest colliery No. 8, was directing the installation of a new wire cable in the tipple Wednesday, he was signalled by a good-looking, stably dressed young woman standing on the track by the box car loader.

"Mr. Greenwood," she chirped, extending a gloved hand to the sooty one the mine boss reluctantly held out.

"The same, ma'am," said Dan, with the air of a man to whom time is money.

"My name is Ethel Hunter," she said in a friendly way. "I am traveling representative for the Ladies' Delight, a beautiful publication, and when I sell so many copies I get a teacher's course free in the university."

"Yes," was the foreman's brief response, as he began edging off.

"I want to go down in the mine."

"The de—! mean, yes'm," said Dan, recovering himself.

"When can I go?"

"You can't go at all," said Dan, "but I have written order from Mr. Thurston, the manager."

"Then let Mr. Thurston come and show ye around."

The young woman looked with troubled eyes into the stern face of the foreman, "I heard you were such a nice man," she said.

"They be telling lies on me," returned Dan, though not unkindly. "But, look a here, Miss—"

"Hunter."

"Miss Hunter—it's as dark as a stack of black cats down there, and there be mules trains whizzing by every blessed minute, and the ore entries be as big as water in 'em and there be rats as big as cats."

The young woman burst into tears. Several men had gathered around during the colloquy and looked sympathizingly at the fair petitioner.

"And I wanted to be a teacher, so as to support my poor mother and little brothers and sisters," she sobbed.

A slight-framed, wiry man touched the foreman on the arm.

"I'll go with her, Dan," he whispered.

The good Samaritan was Jack Richards, a shot firer. The young woman with a big family responsibility wiped her eyes and thanked gratefully at the slight-framed knight. By a contemptuous shrug of his shoulders Dan indicated the washing of the hands in connection with the whole fool business, and returned to his wire cable.

As the 7 o'clock whistle was splitting the air above the engine room of No. 8 the next morning, the lady with a mission appeared at the tipple and sought her cavalier. She was attired in a coarse black garment and wore a heavy shawl over her head, but it did not hide her blue little curls which peeped over the white forehead.

The bottom Jack filed and handed

her a pit lamp, which she took gingerly and transported at arm's length. The shot firer loaded her with advice, which she took with a mixture of gratitude.

When they got out on the far entries, where the miners were at work, the lady proceeded to business. The sooty men respectfully withheld their hands, but she didn't mind a little dirt, she said, and didn't shed them anyhow.

In most of the rooms it was not necessary to go into details about the widowed mother and the little children before the dollar came for the Ladies' Delight. Where they didn't have the money she took in order on the treasurer. Not a word balked. It would look mean, she thought, to turn down a handsome lady who had defied the horrors of the underground world to visit them.

The woman solicitor had a way of talking which made each man think she had quite down on purpose to see him. They had never heard of the Ladies' Delight, and wouldn't have known it from an almanac of the vintage of '78, but they did know this young woman knew how to talk, and that she was brave and pretty.

The way she sidetracked for mule trains and crawled through crosscuts filled the shot firer with admiration. She stopped timbermen staggering under heavy loads, flagged mule drivers, waylaid pit bosses, and even tackled the trapper boys for a year's investment in the Ladies' Delight, and everybody seemed to feel the richer for the opportunity.

At the end of the second day, when a complete haul had been made in the mine, Miss Hunter turned to her escort.

"I guess you think it funny," he said, "that I go down in the mine after men to sell them a woman's paper rather than see their wives, who are up on earth."

"It did look a little odd at first," he replied the shot firer, "but I believe I know the reason now."

The lady smiled.

"I began in the mines of Wyoming," she said, "and then took them through Kansas. I've been in every mine in this district. Out there at 6, where they employ Italians and negroes who can't read, ever half of them subscribed. If I'd taken six subscriptions. Now, you've been good to me, my friend, and I—"

"Don't mention it," said Jack, backing off.

She was reaching into her handbag, where she kept her money.

"Yes, sir," she said firmly. "I will. You've been with me two whole days now, and I know the time of a gentleman of ability is worth something. Here—take this."

She handed him a small square package, neatly tied up. The shot firer, thanked her warmly and assisted her into the cab which was waiting for her. Then he opened his present. It was a picture of the young woman who was sunning underground for a college course.

### CURIOUS FACTS AND FIGURES OF MANY KINDS.

There are said to be 10,000,000 migratory sheep in Spain, which travel on occasions as much as 200 miles from the plains to the mountains. They are known as transhumantes, and their march, resting places, and behavior are regulated by special regulations dating from the fourteenth century. At certain times no one may travel the same route as the sheep, which have the right to graze on all open and common land on the way.

In Madagascar silk is the only fabric used by the natives for clothing. It is cheaper than linen in Ireland.

In Alaska is found a kind of fish that makes a noise when it is taken. The tail of the fish is stuck into the crack of a wooden table to hold it upright, and its noise is lighted. It gives a good, steady light of three-candlepower, and considerable heat, and will burn for about three hours.

The changing rose is a plant to the cultivation of which the Japanese devote much attention. It produces a day, but suddenly out of a dark place into a sunny room, it slowly assumes a pale pink hue, which gradually grows in intensity until it becomes of the deepest red shade. The color changes again at night, and when the rose is replaced in a dark room, no loud animal is known to have naturally poisonous flesh. There are, however, several fish whose flesh is deadly.

Gibraltar is the smallest British possession. It measures only half two square miles. Canada is the biggest, with 3,766,000 square miles.

Over 100 miles of tunnel have been cut out of the rock of Gibraltar.

No other nation in the world owns so much valuable jewelry as the British. Banks Land, Prince Albert Land, Victoria and Baffin Land, with hundreds of other islands, and lands, are at present quite useless.

Numbers of experiments have been made to test the strength of iron and of corked bottles thrown into the sea at various portions of the world. The most

AFTERNOON COAT BY BECHOFF-DAVID.

Among the many beautiful evening coats seen, none are more exquisite than the illustrated model made of Gobelins blue velvet. The long sleeves are heavily embroidered with a manderin's robe, with gold tulle embroidery. Beautiful embroidered clusters of Persian blue-tinted orchids run all over the gold tracery—producing a wonderfully artistic effect. The model could be easily copied, and with much less expense, by fashioning it of heavy broadcloth, and with Persian ribbons, or passementerie—both of which are fashionable—used instead of the hand-work.

remarkable example ever heard of was that in which a bottle traveled 6,000 miles in about two years and a half, roughly, at the rate of six and a half miles a day.

One hundred and fifty-five people are killed by accidents in the streets of London in the course of a year.

Never in the history of the English parliament have the full number of members been present at one sitting.

The Japanese house of representatives consists of 300 members, elected by ballot, each member receiving a salary. The house of peers consists of members of the royal family, princes and marquises, counts, viscounts, and barons, elected as representatives of the several orders, and persons elected for seven years by and from the fifteen highest taxpayers in each city and prefecture.

In Russia an extensive domestic industry consists of the manufacture of wooden spoons, of which as many as 30,000 are made annually. They are nearly all of birch wood.

In Italy only incomes of \$30 a year or less are exempt from taxation. In Prussia the limit is \$25.

An experiment has shown that 1,000 tons of soil settle yearly on the 110 square miles of London.

Of all European cities Rome has most frequently been in the hands of enemies. It has been entered and sacked more than 40 times since 20 B. C.

There are no fewer than 77 distinct dialects spoken in England.

The rate of suicide in the British army is equal to 20 per million annually; in the German to 55, and in the Austrian to 138 per million.

The longest fence in the world, it is thought, is one of wire netting in Australia, 1,225 miles long. Its object is to keep rabbits from the cultivated fields.

Germany is now making 1,500,000 tons of beet sugar yearly, and exporting more than a million tons.

Scotland has 3,128 elementary schools, attended by 1,200,000 pupils, has 3,710 schools.

Sixteen thousand motor cars of all grades were made in England during 1905, and were worth about \$20,000,000.

Japan gets 185,000 recruits yearly for her

### A LUCKY POSTMASTRESS

Is Mrs. Alexander, of Cary, Mo., who has found Dr. King's New Life Pills to be the best remedy she ever tried for keeping the stomach, liver and bowels in perfect order. You'll agree with her if you try these pills. They are guaranteed to give new life. Guaranteed by Z. C. M. I. Drug Dept., 112 and 114 So. Main St., druggists. Price 25c.
