EVENING NEWS.

March 22, 1873.

PRICE OF GOLD.

At Salt Lake City, March 22, 1873.

Mining at \$1.61.

LOCAL AND OTHER MATTERS.

Fireman's Association.—We are

requested to announce that Prof. O. H. Riggs will deliver his lecture on "London and Paris," before the Fireman's Improvement Association, at Fireman's Hall, on Thursday evening, commencing at 7:30 o'clock.

Departed. It will be observed, by obituary notices, in another column, that Sister Laura Snyder, Richard, wife of Elmer Franklin D. Richard, departed this life yesterday. The relatives of the deceased may have sympathy in their bereavement.

Grand Jury. The grand jury, Messrs. W. H. Gowan, G. F. Culver, Bassett and Sommers, were pursuing a course of investigation since the adjournment of the last body. On Sunday they returned from a visit to Logan, Brigham City and Ocean, where they have been examining jails, county records, deacons of justice of the peace, etc.

Yesterday and to-day they visited the Insane Asylum, Penitentiary and City Prison.

A Well-Dressed Community.—We are informed that, some time since, a member of the Dramatic Association of Brigham City was assigned the role of a ragamuffin. Diligent search was made in the neighborhood for suitable outer habiliments to constitute the necessary "make-up" of the character, without success. It occurred to one of the members of the company that a friend from an adjacent country, than visiting at his house, had just the kind of suit that was wanted, and it was borrowed accordingly.

It is a well-known community that has a pretense coat and unmentionable in it. It is the voluntary effort of co-operation to sustain its credit.

The Tabernacle.—Brother H. Green has a number of carpenters at work, making the bethels for the roof of the New Tabernacle. They are being constructed upon the ground, ready to be raised on the building as soon as the walls are up. They are very strong, so formed, each of five thicknesses of two inch plank, as to render the roof self-supporting. The bents are boxed and bound with iron bolts and rods. The tower extending from north to south will support the tower, which will rise from near the centre of the roof.

The window frames of the lower story are all in and those of the upper are made and ready to be placed in position, when the walls are sufficiently advanced.

We understand there is nearly enough rock on hand now to complete the masonry work.

Museum.—There has been received at the Museum from H. B. Clawson, Esq., a skin of a variety of Elmone. It is remarkable for the beautiful markings of the tail and the great length of that appendage. It is a specimen of the *Putorius Longicauda Baird*. But the band markings of the tail are of more than usual brightness. As a fur bearing animal the weasel family have long been known to furriers.

A specimen of sandstone, from our settlements in Arizona, has also been received from Hon. John W. Young. This rock may have many uses. It is suitable for sharpening scythes and tools. It is composed of very fine siliceous particles closed by oxide of iron.

NOTICE TO THE PUBLIC.—There will be a general meeting of all the associations in this Stake, in the Council House, Friday evening, March 15th, at 7 o'clock. The officers and many members as desire, of all the associations, are requested to attend.

The object of the meeting is the election of a superintendent. It is expected that President A. M. Cannon and council will be present.

JUSTICE F. WILLIS, Pres't.

STEPHEN F. CUMMING, Jr.,

Secretary, Central Com.

Martial Band.—We are requested to state that there will be a meeting of all the members of Captain Beesey's martial band, at the residence of Mr. Henry Grow, 14th Ward, to-morrow night, commencing at 7 o'clock.

A FRANC STORY.—D.—A Parisian wanted to get rid of his nephew, who cost him a lot of money every year. All the others he had made him a good gift, under the pretense that the girls were either too young or too old, or had been tampered with. In despite D.— went to a matrimonial agent, who showed him his register and photographs of the daughters of the dead uncle, impossible to describe, when he discovered his own wife's likeness. Nearly out of his mind he goes home and sternly demands an explanation. "I can't deny the fact," the wife said, gently, "but it was bad year, my dear, when you had been given up by all the doctors."

At the present time the good people of Draper, Sandy, some of the men of the Cottonwood and their settlements are engaged in making a canal to convey the water of Jordan, from near the Point of the Mountain, and into the Jordan lands, ranging across the south half of the east side of the valley. Would it not be a good plan for Salt Lake City to connect into the possibility of taking an interest in that canal, by helping to construct it, obtaining in return for such the right to use the Cottonwood Creek for a large portion of this City. We do not know whether this suggestion could be operated up, as it is, but every chance for a solution of the question of water for the health and welfare of the city should receive consideration.

When the recently deceased, and we believe it will, should be such as will cover the whole world. The same people should be sufficiently extensive to cover the north western portion of the city. Anything short of that would be but a partial solution of the question. It would still be practically unsolved.

There is an abundance of water in this locality, for every purpose, and therefore the only question involved is its distribution of all necessary points. That being the consequent question of expenditure of means. If the latter were on hand the solution of the most immediately apparent things presented that has been seen in Coalville.

THEatre.—A great many Salt Lake patrons of the drama missed a treat yesterday, due to the absence of the Theatre was closed, but the enjoyment was great. Signor Majoroni proved himself an artist of the highest rank. Much of his acting was in pantomime, for "The Old Corpse" was struck dumb, in the second act, by a fine imitation of robbery, and the expressions of rage, grief, despair, affection and the sudden transitions from hope and joy to misery and despair were wonderfully delineated and fairly electrified the audience. The play contained a better plot than we had been led to anticipate and was highly interesting throughout, made so principally by the genius of Majoroni.

The support was generally good, with the exception of some sticking, requiring the aid of the manager. Messrs. Thorne, Emery, Margot, Foster, Mackintosh, Wilton and King performed their respective parts very creditably, as did Misses Colbrook, Spenser and Mrs. Clawson. Mrs. Louise Harris appeared to better advantage than we have seen her for a long time. The scenery was appropriate and the music excellent.

To-night Signor Majoroni will appear in the great play of "Jealousy," supported by Signora Giulia Majoroni, who has received many encomiums from dramatic critics, and a full company. The house should be filled, as it is rare that such artists as the Majoronis appear upon the Salt Lake stage.
