The Conflict in the Began Mining Company's Rank.

FIGHTING THE LATE ASSESSMENT.

Stockholders allege fraudulent action of the directors—Other cases instituted.

The fight in the Began Mining company, reported in the NEWS a week ago as being a probability of the near future, is now a legal proceeding having been instituted in court.

The immediate cause of the suit is the recent assessment of 10 cents per share made by the directors, though most of the stockholders, through the working of a fraudulently elected board of directors and officers.

The case is now being argued by the stockholders, and the directors, and the court is expected to render a decision in a few days.

The stockholders allege that the directors have acted fraudulently in the assessment, and that the court should set aside the assessment.

The directors, on the other hand, claim that the assessment is valid, and that the stockholders are liable to pay it.

The case is expected to be a long and costly one, and it is hoped that the stockholders will be successful in their fight against the directors.

The case is now being argued by the stockholders, and the directors, and the court is expected to render a decision in a few days.
