EDITOR AND PUBLISHER.

Saturday, June 5, 1899.

SUMMER DISEASES—TAKE CARE OF  
THE CHILDREN.

THE warm weather seems to have fairly set in, and as is usual in the summer season, there is considerable talk around of sickness among the children. This suggests the necessity of prompt and energetic measures being taken to check the progress of what may be called the summer diseases of children, such as diarrhoea, scarlatina, measles, etc., some of which are generally felt with such fatal severity here. In San Francisco and other places west, the small pox has raged with fearful effect since this time last year; but late California papers have contained the gratifying intelligence that this dreaded epidemic had about disappeared from the infected districts. Nevada papers have also contained announcements to the same cheering effects. There is one thing in connection with this dreaded scourge, that is worthy of note,—that since its appearance on the Pacific Slope, its progress eastward has been steady and certain. We do not record this to excite alarm, but rather to show the necessity of taking steps to prevent all necessity for alarm, by adopting such sanitary measures as will help to extirpate the elements most favorable to the development of contagious diseases, such as small pox, measles, scarlet fever, scarlatina, etc., in our midst.

In portions of Cache Valley, and at several other points between there and this city, we have heard, occasionally, of late, of the prevalence of measles; and recently, this disease, we are informed, has made its appearance in this city. The virulence of such diseases may be controlled, almost wholly, by the adoption of proper sanitary precautions. This was exemplified by a report in the telegraphic dispatches a day or two ago, stating that the small pox had almost disappeared from a certain part of New York, where it had broken out with great violence, through the prompt measures of the Board of Health. Now, there are certain steps, of great hygienic importance which, if taken by the citizens generally, as they easily can be, would tend greatly to prevent the development of this class of diseases. Among such measures thorough cleanliness of person and habitation are of the first importance.

It is a somewhat common occurrence here for people to keep vegetables all winter in their cellars, or in outhouses in close proximity to their dwellings; all such places should be thoroughly cleansed of every vestige of decaying matter, so that there may be no offensive effluvia arising to help to develop and feed any kind of contagious disease. Every dwelling house would also be rendered much more healthful by being thoroughly limewashed, or otherwise sweetened by disinfectants. All refuse of decaying animal or vegetable matter anywhere in the vicinity of dwellings should be promptly removed; no pools of standing water, or heaps of manure should be allowed anywhere near human habitations; and if any offensive odors arise from a pigsty, stables or any other outhouse, or buildings no time should be lost in cleaning and disinfecting such buildings.

Prompt attention to these suggestions in every locality to which they are applicable will be sure to result in benefit. Personal cleanliness can not be too strenuously insisted upon. Thorough cleanings of the whole surface of the body should be attended to as often as necessary to keep the skin free from impurities. We do not advocate incessant soaking by bathing, but we do advocate the wise and discreet use of this and every other measure within reach of the people that will ward off the attacks of disease.

A great source of evil among our children here is the use of uncooked, unripe fruit. Now that the unripe currants hang in bunches upon the branches, unless very closely looked after, the little folks will eat them; and there is little doubt that vast numbers of cases of diarrhoea, which have terminated fatally have been brought on by this means. In reference to the kind of food that should be used in hot weather, the "Word of Wisdom" is all the guide necessary and is sufficiently explicit. Too little flesh cannot very well be eaten by either young or old during the summer season; if good wheat bread, butter, milk, ripe fruit, vegetables, rice and other farinaceous products and pure water composed the diet of the people generally in summer, but especially and above all of the children, their liability to disease and death would be far less than when allowed to eat meat and other improper articles of diet. The "Word of Wisdom", and human experience have proved this, and if the suggestions contained in this brief article be faithfully carried out, through the whole of this summer, and they easily can be by all, we are satisfied that the mortality among our children will not be so high as it has been during several seasons past.

The word of the Lord is given that the destroyer shall pass by those who observe these principles, and that should be sufficient inducement to all Latter-day Saints to carry them faithfully into effect.

## By Telegraph.

## GENERAL.

Washington, 4.—The Bricklayers' Union adopted a resolution last night for an immediate strike of the bricklayers at the Navy Yard, unless two colored workmen employed there be dismissed. Birmingham.—Mearley & Bowers' Soap Factory was burned to-day; loss, ten thousand.

Mobile.—The steamer *Mary Swan*, bound for up the Alabama river, was sunk yesterday, seventy miles above Mobile, she had 900 barrels of freight which were a total loss.

Charleston.—The *Ansdcel*, Captain Doplin, has arrived with several passengers saved from the *Mississippi*. This steamer struck upon some reefs near Martinique, and broke into pieces; the passengers and crew were saved by the steamers *Guannee* and *Acheron*.

Chicago.—The *Journal's* special says that notwithstanding Gen. Sickles has accepted the Spanish mission, there are certain conditions connected with it which render it doubtful whether he will enter on the duties thereof. The Secretary of State, yesterday, addressed him a letter, asking him if he was ready to proceed to his post, as the President was anxious that we should have a representative there immediately on the retirement of the present Minister, which takes place on the 1st of July.

Information was received to-day at the War Department, indicating that the Indians are on the war path. Gen. Sherman and other leading military men express great doubt as to the practicability of adopting the Quaker policy. A gentleman direct from the Indian country says he would not be surprised to hear that some of the Quaker agents were the first scalped.

Boston.—The legislative Committee on Railroads is considering a bill to allow the Boston and Albany Railroad to increase its capital stock five millions, to extend the track from Boston to Deep Water, and to build branch roads and an additional track to Worcester.

New York.—In a bar-room last evening, Joseph Hartwell and Michael Kearney fired at the bar-keeper, Thos. Costello, wounding him, one shot mortally wounding Richard Girles, sitting in his own doorway with his family.

New York.—The Grand Lodge of the masons of New York, to-day, adopted a resolution terminating all intercourse with the Grand Orient of France till the Grand Orient shall withdraw its recognition of a body styling itself the Supreme Grand Council of Louisiana.

Poughkeepsie.—While some laborers on the Boston, Hartford and Erie Railroad were in the act of tamping a seam in a rock, a premature explosion occurred, killing one and mortally wounding several.

Washington.—The Postmaster-General has removed ten clerks from the finance bureau, and has appointed others.

The receipts of Internal Revenue, to-day, were over a million in currency. The balance in the Treasury is about \$23,000,000.

Several clerks and watchmen in the Navy Department have been dismissed, owing to the reduced appropriations.

The old national currency plates to-day, were melted down in a furnace at the Navy Yard.

Kansas City.—The stories of hanging railroad men off the Cherokee lands, Kansas, have not been confirmed and are probably false; the settlers, however, lately received large supplies of powder, and are said to be preparing to resist any force which may attempt to build a railroad or protect its workmen. Several settlers have been driven out of the country by a league on account of their lukewarmness, and others have been warned to leave within 48 hours under the penalty of hanging.

## FOREIGN.

London.—Lord Broughton died yesterday, aged 83.

Dublin.—A large meeting of the Orangemen of this city was held last evening to protest against the disestablishment of the Irish Church; it is estimated that over 40,000 were present. Appropriate speeches were made and resolutions adopted.

London.—Advices from Hong Kong, to May 11, say the French and other envoys had notified the Chinese Government that three days would be allowed for an apology for the insult to the Count De Rocheport.

Liverpool.—The steamer *United Kingdom*, which left New York last April for this port, has not yet arrived; considerable anxiety is felt concerning her; though it is said the New York agents have by no means given up hopes of her safety.

Advices from Hong Kong to the 11th of May say the civil war in Japan continued; the Mikado had sent a powerful fleet against the rebels at Hakodadi.

London.—The newspapers are still discussing the relations existing between England and the United States. The *Standard* says the conduct of America in the matter of the late treaty, in the lapse of time, may be forgotten.

The *Post* says any new attempt for the settling of the Alabama claims must come from America, and it hopes that due precautions will be taken to secure England against accepting any treaty almost, without humility, which would be repealed at the last with contumely.

Ottawa.—The Newfoundland delegates have come to terms with the Dominion Government as to the consideration to be received by Newfoundland on entering into the Union; the terms are to be submitted to the people of Newfoundland at the general election next fall.

Halifax.—In the House Assembly, last evening Mr. Murray asked the appointment of another day for the consideration of the annexation resolution. The Attorney General desired its postponement till next session. He intends to propose further constitutional measures to get out of the Confederation, and said that until they were tried, it would be wrong to take visionary steps. He did not object to the government petitioning the parliament of England to grant a repeal, but he expected the higher courts in the realm would release Nova Scotia from the confederation by declaring the Union act illegal.

London.—In the House of Commons this evening, Mr. Bruce explained the report, which had become current, of cruelty toward Fenian prisoners. He said the report arose from the necessity to repress the violent and outrageous conduct of some, but he was now re-

ported as the best conducted Fenian prisoner.

In the House of Lords this evening Sir Alfred de Balfour moved for a copy of the Alabama treaty. He said the government had shown the greatest conciliation in its desire to maintain peace, and he trusted that when negotiations were resumed between the two countries, a calmer spirit than that which succeeded Sumner's speech would show its influence, and that the Americans would feel that therein were demands that England could not entertain. He hoped that such negotiations would place their relations on a satisfactory footing, and said that all would rejoice when that could be attained.

Lord Clarendon regretted the unavoidable delay in furnishing the papers called for; he traced the history of the negotiations and said the House of Commons was not entitled to assume that a majority of the Senate and people of the United States supported Sumner's demands, and he believed that the sympathetic feeling and good sense of all America would ultimately prevail. He would shrink from no sacrifice to maintain peace, but the national honor must be maintained. He was not aware of the nature of Motley's instructions, but he hoped that what had occurred would promote and not hinder the negotiations, as the terms that England was willing to concede, or must refuse, were well known.

London, 4.—The French trans-Atlantic cable is completed.

The personal property of the late Sir Edward Cunard, in this country, has been sworn at £300,000.

Paris.—It is semi-officially stated that the French Government is opposed to the neutralization of the Suez Canal.

Madrid, 4.—General Derode is to sail instantly for Cuba, in reply to the demand of General Dulce for immediate relief from the Captain Generalcy of that island.

Athens, 4.—The Greek elections have ended and show a large majority in the Chambers in favor of the Bulgarian Ministry.

## PROCLAMATION.

TERRITORY OF UTAH,  
SALT LAKE CITY,  
EXECUTIVE OFFICE.

To whom it may Concern, Know Ye, That whereas, it appears by the files and records in the office of the Secretary of State for the said Territory, that Cyrus M. Hawley, was on the 19th day of April, A.D. 1899, duly appointed and commissioned by the President of the United States, Associate-Justice of the Supreme Court of the United States for the Territory of Utah, and that on the 29th day of May, A.D. 1899, the said Cyrus M. Hawley duly qualified himself for said office by filing his said commission and his oath of office, duly certified according to law, in the office of the said Secretary of State of said Territory at Salt Lake City; and whereas, by virtue of an Act of Congress, approved on the 27th day of July, A.D. 1898, regulating the District Courts of the United States—in and for the said Territory of Utah—whereby it was made the duty of the Governor to assign the District Judges of said Territory to their respective Districts, and to appoint the time and place of holding Court in each of said Districts;

Now, therefore, I, Charles Durkee, Governor of the said Territory, do hereby assign the Hon. Cyrus M. Hawley, Associate-Justice of the Supreme Court of the United States for the said Territory, to the Second Judicial District of said Territory, in the place of the Hon. Enos D. Hoge, removed.

And whereas, it has been represented to me that the time now designated and appointed for the holding of the said Court in the said Second Judicial District is inopportune; and that the interests of the people of the said District require a change of the time of holding the same; Now, therefore, I, Charles Durkee, Governor of the said Territory, do hereby change the time of holding the said Second District Court, and in its place appoint the Second Monday in November, A.D. 1899, for the holding of the same, at the city of St. George, in said Territory, to commence at the hour of eleven o'clock, A.M. of that day.

In testimony whereof, I have hereunto set my hand and caused the Great Seal of the Territory of Utah to be affixed.

Done at Salt Lake City, on this 4th day of June, A.D. 1899.

CHARLES DURKEE,  
By the Governor,  
E. A. MANN,  
Secretary of State for the Territory of Utah.

## TOTAL ECLIPSE OF THE SUN.

A total eclipse of the sun will occur on the 7th of August next. It will be visible as a partial eclipse throughout the whole of North America. An astronomical writer says in relation to it:

No total eclipse of the sun has been visible in any considerable portion of this country since 1874, and none will be visible after this year during the present century. An event of this character, coming so rarely and of such moment, can scarcely fail to attract general attention. Where the eclipse is total the optical and spectral phenomena, as well as those more properly astronomical, claim special notice.

The moon's shadow will strike the earth in Siberia at 3.37 p.m. (Washington time), in latitude 55 degrees north, and longitude 165 degrees west of Washington, pass over the town of Okhotsk, in Siberia, at 3.43 p.m., cross Behring's Strait at 4.15 p.m., and pass through Alaska and the British Possessions, striking the northern boundary of the United States in longitude 81 degrees west of Washington. After reaching the settled parts of the country, it will pass over or near the following cities and towns in all of which the eclipse will be total:

In Iowa, at Cherokee, New Munich, Lake City, Booneboro, Des Moines, Newton, Knoxville, Okaloosa, Ottumwa, Fairfield, Mount Pleasant, Burlington.

In Illinois, at Macomb, Springfield, Decatur, Shelbyville, Mattoon, Robinson.

In Indiana, at Vincennes, Washington, Leavenworth, New Albany.

In Kentucky, at Louisville, Shepherdsville, Frankfort, Danville, Mount Vernon, Mount Pleasant.

In West Virginia, at Eastville.

In Tennessee, at Blountsville, Taylorsville.

In North Carolina, at Wilkesboro, Salisbury, Greensboro, Raleigh, Fayetteville, Goldsboro, Leesburg and Wilmington, passing into the Atlantic

Ocean at New River Inlet, between Beaufort and Wilmington.

The cities and towns mentioned are all on railroad lines, and are easily accessible.—Exchange.
