SHOWN AS A REDUCER.

A Test Dress Which May be of Great Importance.

A test [illegible] which promises a great improvement in coal consumption has been successfully used by the Board of Chemical Industry of the U. S. [illegible]. This consists in the addition of the great heat which is developed in the [illegible] by the [illegible] of metallic sodium. The heat of burning of hydrogen is theoretically [illegible] calories and in certain experiments [illegible] was found. From this the result is to [illegible] the [illegible] of [illegible] which [illegible] to [illegible] and [illegible] which [illegible] to [illegible] and [illegible] [illegible] [illegible]
