Home-made and imported boots and shoes. The finest quality boots and shoes at the lowest prices.

BOOTS AND SHOES

Big boot. The finest quality boots and shoes at the lowest prices.

SALT LAKE CITY

Has on hand a fine stock of his own manufacturing. Also a well-selected stock of imported goods.

EVENING NEWS

Friday, August 8, 1879.

Correspondence

BRIGHAM CITY, August 8th, 1879.

Editors Deseret News:

In company with Pres. O. G. Snow, Patriarch Wm. Box, and Bishop H. Tingy, your correspondent had the pleasure recently of visiting the Wards west of this city, situated on the north and 55 miles north of west from Brigham is located Curlew Valley, which a few years ago, was known only as a hard ground, but by the energy of a few Saints, inspired by the perseverance of Bishop A. Goodrich, the leading mind of that Ward, a canal, nine miles in length, has been constructed, and an abundance of water, for which this valley is noted, has been turned on to the natural channel, and by the use of it to convert the otherwise dry plain into fruitful fields and pleasant homes. A suitable place has been selected for the city, and the Bishop, not allowing himself to be behind his flock to drive, but always ahead, piloting the way, has erected a commodious and substantial dwelling on the city ground, covered with a good shingle roof. I make no mistake in saying that the city, and the Bishop, not allowing himself to be behind his flock to drive, but always ahead, piloting the way, has erected a commodious and substantial dwelling on the city ground, covered with a good shingle roof.

About 25 miles south-west from Salt Lake, (the name of the new city), lies Kelton, the depot which receives the dairy products and produce of the valley. Five meetings were held at Salt Lake, and a complete organization of the Ward was effected. A. Goodrich, Bishop, and Joseph Robbins and H. J. Hanson, counselors; a number of Priests and deacons were ordained and set apart.

About 42 miles southwest from Salt Lake, lies Park Valley, a lovely little valley, which only drawback appeared to be a meagre supply of water. This valley, unlike Curlew, runs east and west, bounded on the north by a range of mountains from which the water for irrigating purposes flows, and containing sufficient saw timber, it is said, to bid up the place. At the base of these mountains are located a number of excellent farms, where, in time, beautiful and elegant homes will be made. From this elevated locality we have a beautiful view of the entire valley and also of the northwest end of Salt Lake, at the foot of which lies Kelton.

The residents of this valley, on the strength of a temporary self-organization, have had a school, conducted a Sabbath school, and thirty-six students were enrolled in the common school. A number of pious and zealous men were organized to labor in the ward in their respective places. This valley was first settled in 1899, by Thor. Dunn, W. C. Thomas, and a few others, and a few families are present population is 21 families and a few ranchers.

Fifty-two miles over a road, in nearly horizontal course, from Kelton to Grange Creek, which I think lies nearly west of Park Valley and in view of the unvarying appearance of Grange Creek Valley, I, a resident I should favor the construction of a road direct between the two places, over a low pass in the mountains, which would make the distance between the two valleys and thus enable each to visit the other, and lend a helping hand, if only by way of encouragement. Grange Creek Valley is entitled to the latter; there is some good land on this creek, but the water, which is plentiful, is an entire failure in season and some families, I noticed, have to haul their water for several miles for house use, and the crops of course have to be raised in dry seasons, and the people are chiefly poor, having just moved in from Europe and other places, and consequently their present condition is not very encouraging, but if our old line of plenty of water return to us, the Saints will yet make comfortable homes here. The first settlers came here in '76, among them were E. F. Hubbard, Marshall Grover, B. F. Cooke, Henry Merrill and W. C. Thomas; 44 families make up the present population; it is estimated that in ordinary seasons there is sufficient water to irrigate 800 acres of land. This ward was completed in its organization with Samuel H. Kitchin, Bishop, and B. F. Cooke and Phil. Paquet counselors, priests and deacons were ordained, and as many of the Saints as could make it convenient, were rebaptized, and upon the whole a general good feeling prevailed. The first of the brethren and sisters who had the least encouragement, seemed full of hope that a brighter day was at hand. Having nearly reached the corner stone of Utah, Idaho and Nevada, we were quite willing to return again to the city of Brigham where dear ones anxiously watched for our return, and where the greetings of welcome are melody in the heart which echo's "Home Sweet Home."

P. F. MASON

How the Oil Crossed the Hills.

John Ward, one of the watchmen on duty during the filling of the new oil-pipe line in Pennsylvania, gives the following account of what he saw:

The line crosses Hiner's Run, or the head water, at a place called McClure's Spring. Here there is quite a hollow or depression in the ground. From this place to the six miles beyond there is a gradual rise; this the oil had to climb after passing the hollow at the spring. I was told to watch well this hollow as the oil descended the Kettle Creek Mountain and was coming. I repaired to the hollow and lay some hours there, when I heard a sound like a heavy wind, and presently heard the oil gurgling past. I waited some time. There was no leakage and all seemed perfect. I thought that the pipe line was a success for the time, and left my position and passed along to see it was all right ahead. I had gone some two miles when I received a dispatch to watch well the hollow and see if the oil was coming. I hastened back. Imagine my astonishment when I saw the place I had left such a short time before so lame, now hissing at ten thousand points. Jets of oil were flying twenty feet high, and hundreds of barrels flowing down Hiner's Run, never to see a market.

headway. It was a dark night, and I dared have no light. I had taken of my coat, and was leaning over the side of the pipe, and I was not aware of an oil man, I would like to know what constituted one. I at length grew sick, and supposed I would have to give up and all would be lost, when as I was not then an oil man, I would like to know what constituted one. I at length grew sick, and supposed I would have to give up and all would be lost, when as I was not then an oil man, I would like to know what constituted one.

Here was a force against which human power was of no avail. We only stood and looked on, when suddenly, as quick as thought, all commotion ceased, except a sucking in of air, and I heard the oil passing rapidly along the pipe, and I knew it had crossed the mountain, and was speeding its way to Williamsport, with no more mountains to climb, and that the oil line was an established fact.

Catarhhal

Wet Do Meyer's Treatment on Catarhhal, explains the following important facts: 1. That Catarhhal is a disease of the eye, and is caused by a virus. 2. That the virus is transmitted by contact with the eye of an infected person. 3. That the virus is also transmitted by contact with the eye of an infected animal. 4. That the virus is also transmitted by contact with the eye of an infected object. 5. That the virus is also transmitted by contact with the eye of an infected person.
