THIS IS A VITAL ISSUE.

The educational interests of the city are of paramount importance. They should be under the management of honest, capable and public-spirited men, who will serve and represent the people and add a feature or a party. An attempt is being made to place our school affairs in the control of persons selected by the "Liberal" houses and their adherents followers, for "Liberal" interests and as the special representatives of the "Liberal" clique. In opposition to this important scheme, every friend to education and every citizen who does not favor fraud, speculation and falsehood should rally to the polls on Monday.

The people have voted the large sum of \$500,000, to be raised by levying the school district and to be used for educational purposes therein. The "Liberal" faction greatly desire to give them the handling of this money. They do not want any man on the school board who is not patriotic, representative of the people, without reference to party, nor do they want a straight Republican or any other Democrat. So now will all their purpose, which is not a valid "Liberal," to harry with "Liberal" intrigues and devices.

It should be the determination of all the respectable and permanent citizens of Salt Lake that the educational interests of the city shall not be under such domination. If the notorious Powers, with his bad and baseless record, can be installed a dictator of our school affairs and management of our school houses, what may we expect as the result?

This is a serious matter for every taxpayer and every parent. The only way to save the city from the evil now threatening it is for every honest member of the People's party, whether he be Democratic or Republican or undecided, and every "Liberal" member of both three parties, to go to the polls on Monday and vote for the candidates nominated by the Citizens as against those put up by the "Liberal" faction.

In the First Precinct the citizens' candidates are George W. Stoye and STONEY DANNER. In the Third Precinct, JOHN N. PRICE. In the Fourth Precinct, ANTHONY PRATT. The Second and Fifth Precincts will make their nominations tonight. The names will, no doubt, be in Sunday's Salt Lake Herald.

Let no voter fall on Monday. Take care not to be caught into voting the "Liberal" ticket. It is a vital question that is at stake. It is in the power of the people to strike a blow! "Liberal" victory that will be effective, and hasten the end of a faction that is the one great obstacle to the progress and welfare of Utah. All classes of decent citizens should unite for this purpose, irrespective of creed or party.

DON'T BE DECEIVED!

"LIBERALISM" has always been active in misrepresenting the people of Utah. From its inception it has dealt largely in falsehood. Even on questions in which it had an advantage because of popular opinion and prejudices, it exaggerated and magnified facts, giving numbers and illustrations untrue. It continues in this work and has scarcely anything left lying wherewith to work upon public attention.

The advocates of "Liberal" representation on the Board of Education are telling their hearers that the present free school system and all the educational improvements that have attended it are "Liberal" work.

This is a falsehood in every respect. "Liberal" members of the Legislature fought it to the last. It was framed by "Mormons," championed by "Mormons" in the Legislature. Prof. Hender was the most active "Gentile" in its favor; the pronounced and bitter "Liberal" attacked it furiously but failed to destroy it.

They are equally false in saying that there were no free schools in Utah before that bill was passed. There were free schools here before taxation before there was any local "Liberal" faction in the Territory.

Some "Liberal" who are interested, for what education they have in the schools established here under "Mormon" regulations, are trying to belittle and ridicule them. "It is a dirty bird that fouls its own nest." The schools established here in early times were inadequate for the purpose and equal to the needs of the people. "Liberal" whose does not change the facts. Comparing between the present and the past we find the negative conditions, in fact. But justice and truth are not compatible with Utah "Liberalism."

The truth is that in nearly every school, school taxes for educational improvement and progress have been voted painlessly by "Liberal" men. They are and have been more numerous in every sense of the word, as has been demonstrated beyond truthful

DON'T VOTE FOR THEM.

HONESTABLE voters of all classes, when we the name you should, not care for on Monday. They represent the "factions" that seek to rule every "Mormon" of the right to vote, no matter how good, peaceful and law-abiding a citizen he may be. They are put up as the tools of Ross Powers, the \$10,000 manipulator of the last municipal election. They were to handle the \$600,000 which the people have voted for school purposes. They are the servants, not of the whole people, but of the "Liberal" faction and are openly and avowedly nominated in the "Liberal" interest. If you want to keep the schools free from political, factional and speculative influences, don't vote for the "Liberal" candidates, who are.

The "Liberal" campaign to put the School Board and the school trustees under "Liberal" control, was conducted with the aid of "Liberal" agents—fellowship, unionism and anti-Mormonism. It is to be noted and expected that the best elements of the city will vote on Monday, and by their votes give the most educational traits that they are expected to that sort of campaigning and that kind of school management.

THE INDIGNATION MEETING.

Two great assemblies at the Theatre last night and the meeting speeches made, were a strong rebuke of the "Liberal" effort to hinder the progress of the Territory. The abuses that have been revealed at various times by the unprincipled "Liberal" organ, have done more to damage material interests in Utah than anything else that has ever been accomplished by "Mormon" or "Gentile."

When this city was peaceful as the quietest country village and there was not the slightest sign of disorder among us, alarms were raised repeatedly, threats called for and the Government imposed arms, by the same consequences preventatives who now provide all sorts of calamities as a consequence of the organization of Democratic and Republican parties in Utah.

The decent people of the city should take further steps to disseminate correct information, and if necessary to punish the authors and publishers of the daily blies that are injuring us.

If the object of the meeting in the Theatre had been known, or some of the gentlemen who addressed the audience had signed the call, these would have been an overwhelming number and enough people for an additional meeting.

This endeavor to put the public right and show who are responsible for the wrong, ought to be repeated with emphasis.

TWO QUESTIONS ANSWERED.

Editor Deseret News:

Will you kindly answer the following questions through your paper:

1st. If a man dies, without a will, leaving a wife and son/children, can the wife and son/children claim any portion of his estate, or must the wife be compelled to sell her interest in the family and give a legal document?

2nd. If a company of men buy a piece of property, say a mill, and give their individual names thereto, payable, some of them in one sum and some in two years, would it be legal and just to tax both the mill and the individuals?

To the first question we answer, no. The children have such a legal claim on the property, as well as the wife. If she were appointed administrator of the estate she could not dispose of any portion of the property, even for the benefit of the minor heirs, without an order of the Probate court.

To the second question we answer, it would be legal, but whether it would be just is an open question to which there has been much debate both in and out of the Legislature.

AN ALLIANCE FAD.

Mr. Price, President of the Farmers' Alliance, is reported as having said: "Until something better is offered we will stand by the treasury organs." According to the Chicago Tribune this scheme is that the United States shall take a large part of its revenues, drawn chiefly from taxes on cities and towns, people, and use the money for the construction of warehouses throughout the farming districts, large enough to hold one or two years' crops of tobacco, cotton, corn, wheat, rice, oats, barley, feed, seed, wool and the other products of the farm and the plantation.

It is also known to have been suggested from Joseph's advice to Pharaoh of Egypt build storehouses for surplus crops. Joseph's plan, however, was to store up the surplus of abundant years, so as to tide over the seasons of bad harvests, and thus avoid a famine in the land. The "Fad" proposition is to store up the surplus of bad harvests, and then apply the same artificial means to keep the city and town people as hungry that they will be willing to pay for them, rather than wait until what they are worth.

All this may do very well to please the farmers and draw support from among them for the Alliance, but such a scheme will not be seriously considered by Statesmen, and there is very small danger of its ever crystallizing. It is then insisted that the legislature should instantly repeal the discrimination law. It now makes another foolish effort in the same direction. In substance it says:

The New York World is one of the papers that violated the law when Kemmerer was executed, by publishing a sensational report of the affair. On the strength of its blood-stirring extravagances it is then insisted that the legislature should instantly repeal the discrimination law. It now makes another foolish effort in the same direction. In substance it says:

"The legislature imagined a story was worse to tell, so instead of the law for the killing of condemned men for absent jury, this was set up for the protection of inmates." From this we see that protection for inmates is not the earnest desire of condemned men, and the execution of condemned men might not be a matter of much

importance, involving possibilities of care. Even if it should occasion disturbances and create a point of much doubt—it is avoided by appearance of squeaking terrors which reflect the very thoughts of it shaking in human minds. As a necessary consequence it is increasingly difficult to make convictions in capital cases. It is a dangerous and foolish, whose amount seems to be inconsideration of the best importance. Besides all this, hanging is good enough for cold-blooded murderers."

We quote this jumble of nonsense for the purpose of showing what foolish proclamations are involved in the case that most otherwise great papers have of pursuing a treasonable policy. If you want to keep the schools free from political, factional and speculative influences, don't vote for the "Liberal" candidates.

First president, Harry T. Duke (short time); First president, H. G. Hayworth; Second president, G. G. Hayworth; Third president, A. Scott Chapman; Fourth president, John A. Marshall; Fifth president, Charles Bettison.

Please do not vote for one of these. Look out for the Chinese ticket and vote for men whom you trust. Every vote counts and every vote is needed.

SECOND AND FIFTH PRECINCTS.

The citizens of the Second and Fifth precincts believe the time is not making their contributions to the school trustees. They must fight for the purpose. Next the Republican calls, All good citizens should attend. Choose good men for the position. It does not matter whether they be Democrats or Republicans, so long as they are not tools of the "Liberal" faction; their politics will not matter. Pick out able honest men, regardless of faith or party. Then support them at the polls on Monday. Better late than never. Do your duty!

LABOR LAW MUDGLE IN KANSAS.

The Kansas Legislature during its session passed an eight-hour law. It was made a malfeasance for any State, city, county or municipal office to permit its hired laborer to do more than eight hours' work a day unless in case of emergency arising from war or the saving of life. The punishment prescribed for violation of this law is a fine of \$50 to \$100, and imprisonment not less than six months for each offense.

The time for the enforcement of this law has just arrived. Difficulties never thought of now present themselves. The various public institutions of the state have been operated as a rule by two shifts, a night and a day force.

At the penal, charitable, reformatory, and even county, institutions have been so carried on. Under the new law, to operate them will require three shifts of employees, but there was no provision made for engaging this extra force. The Attorney-General of the state holds that the officers of all these institutions will make themselves liable to the penalties of the law for each instance in which an employee works more than eight hours a day.

The Board of Trustees of the State Charitable Institutions have notified the Governor of the rather anomalous situation, and have asked him to call a special session of the Legislature to rectify matters. They hold that unless something is done immediately all the inmates of the State reformaries run the risk of becoming liable to criminal prosecution.

Victor Newman, a Wall street broker, is hopelessly insane. His brother, a physician, is in a conspiracy to run him. He is worth \$200,000.

The act of Congress declaring war against England passed the House June 4th, 1852; the Senate June 13th, 1852, and was signed by the President next day.

Legislation of this kind presents a curious case of our American system of public and political demagogery. In all its legislation relating to the eight-hour law no one word has been said by law leaders about public institutions of any kind. Farm labor by mere legislation has not been touched on, because it was assumed that the eight-hour day would be impossible in that industry. In fact, the employees of public institutions did not demand any labor reforms, nor did they agitate on the question, yet the Legislature passed the law above mentioned.

The question arises, were these legislators ignorant of the fact that where two shifts of men were then employed, the new law would regulate all? Is it possible that the law was not poison, but a "dose" which gives immediate relief and soon cures the disease? I consider it the next step in legislation to make it all who need a dose of civic medicine. For sale by D. Appleton & Co.

Mr. Lewis of Kansas charges the Republicans with putting poison in her political medicine, alkalized in two doses. A Republican leader says it was not poison, but a "dose" which gives immediate relief and soon cures the disease.

In relation to secret societies Charles Sommer once said: "I find two persons here in Washington in harmony, and

We used various medicines, alkalized in two doses, but with no effect. I then tried Dr. E. C. Chidester and Charles Remond, which gave immediate relief and soon cured him. I consider it the next step in legislation to make it all who need a dose of civic medicine." For sale by D. Appleton & Co.
