

## BY TELEGRAPH.

## AMERICAN.

WASHINGTON, 1.—The morals of Senator Carpenter have quite disturbed some of the leading republican Senators, especially one or two from New England, and a movement is on foot to supersede him as president of the Senate, during the first week of the coming session. One Senator appears to have no doubt of the truth of the Long Branch scandal, and is conferring with other Senators as to the propriety of getting Senator Terry, of Michigan, to preside over the Senate.

The U. S. Attorney for Kentucky has forwarded to the Attorney General, a report of the recent K. K. outrages in that State, as published in the journals here, and suggests what steps should be taken for the arrest of the offenders. It is understood that it is impossible for the civil authorities to arrest them, and the aid of the military will be asked.

NEW YORK, 1.—Late developments in Brooklyn financial affairs startle the city, and the ring is greatly demoralized. The defalcations discovered are as follows: Sinking fund \$60,000; treasurer's office \$98,000; tax commissioner \$337,000; education fund \$90,000; Bridge Co. about one million. McClure, who is at the head of the treasury ring, Fowler, who is at the head of the board of city works, and McLaughlin, the head of the tax office ring men, are soundly denounced everywhere. Rodman was put in jail after a partial examination. It is well known that he will not be punished. The corporation counsel protects the ring by instituting a criminal charge instead of a civil suit against Rodman, and thus will conceal the facts which would otherwise come out. The mayor, also of the ring, makes the complaint in this form to conceal the truth. Judge Pratt, of the supreme court, and McCue, of the city court, have been detected in conspiring to appoint a receiver for the trust company. A letter in Pratt's hand-writing, addressed to the district attorney, clearly shows his complicity.

CLEVELAND, 1.—John Wilson, aged twenty-two years, a brakeman on the Lake Shore & Michigan Southern Railroad, met with a terrible accident yesterday. As he jumped on a car running toward him, he slipped, and one foot caught between the frog. He clung to the tadder, but was unable to extricate his foot, and the car wheel ran along his leg until he was pulled down on the ground, and then it ran along, until, on reaching the thigh, the body was effectually blocked. The flesh was stripped off, and the bone was horribly crushed and mangled. The man was taken to a physician's office, and he was given an extraordinary amount of chloroform, but without effect for a long time. Amputation was necessary, as a last hope of saving his life. But even that was of no avail. It is not known that he has any relatives living.

PHILADELPHIA.—L. H. Ashmead, secretary of the reform club, has issued a circular, calling on the citizens, irrespective of party, to co-operate in the movement to secure a fair ballot and an honest count of vote at the October election, and inviting them to furnish him with their names and addresses.

OMAHA, 1.—The law known as the Warren criminal code goes into effect to-morrow. It will abolish lotteries in this State.

YOSEMITE, 1.—The part of the Coulterville and Yosemite wagon road, within the limits of this valley, is completed, the first carriage passing over it to-day, from Hutchings' hotel to the foot of the Coulterville trail. That part of the road between Hazel Green and the Merced grove of Big Trees is also completed, a carriage passing over it to-day. By the Coulterville route tourists can now reach the valley, passing the grove of Big Trees on the way, in two days from Merced, and with only two miles of horseback riding. The work is progressing vigorously on the new road, and it will be completed for carriage travel early next year.

SAN DIEGO, 1.—Reports were brought in by the stage driver and passengers this morning, that a fearful storm had occurred on the Colorado desert and in the mountains east of here. At Mountain Spring the road is badly destroyed by a cave washing out, and it will cost from four to five thousand

dollars to repair it. The repairs may necessitate a change of grade. Men and materials start at once for the scene. The water in some places is three and four inches deep on the desert, which looks like an immense lake. The Arizona passengers and mails will not be delayed at all, as arrangements have been effected for their transportation by pack mules over the breaks.

NEW YORK, 2.—The Journeymen Plumbers Association met last night, to take further action to enforce the eight hour law for the plumbers now engaged on the new post office. The committee reported that they had visited Long Branch and presented a petition to President Grant, requesting him to have the eight hour law enforced; they were kindly received and he promised to send the papers to Washington and have the matter looked into, and if the eight hour law was violated in carrying out any public building he would have it remedied.

Heavy bond forgeries in Wall St. have had the effect of creating alarm amongst business men, as the securities assailed are not of a speculative character, but the soundest in the market. Five well known houses thus far have been made victims of these swindlers, but one firm yesterday obtained an attachment against the funds in the hands of the brokers and of the forgers at the Union Trust Companies, and efforts will be made to compel restitution.

On Sunday night at 9 o'clock, Joseph Link, a cartman, 124 Willet street, left his residence for the purpose of feeding his horse, which was stabling at 129 Willet St. As he reached the corner of the street, he was struck on the left side of his head and the right side of his face by Anton Hirst, aged 19, of 127½ Willet street. The blows fractured Link's skull, and were evidently inflicted with brass knuckles. Link lies at his residence in such a critical condition, that the coroner has been summoned to take his ante-mortem statement. Hirst was arrested yesterday p.m., and on being confronted with Link, said, "I did not know it was you, I am sorry I struck you." Hirst is looked up in hellth precinct station-house to await the action of the coroner.

The excitement in Brooklyn continues very great. The ring officers are quarrelling with each other, and threaten exposures.

Theodore Tilton will shortly assume the editorship of the Brooklyn Eagle, the chief ring organ, in order to permit it to assume a quasi reform attitude.

WASHINGTON, 2.—The British Minister has informed the State department that the trial of the Manitoba prisoners will take place at Fort Gary this month, a special term of the court having been ordered for that purpose. In the mean time the prisoners will not be released on bail. The British authorities, by deciding to go ahead with the trial, assume that the offense was committed on British soil, and decide, therefore, to hasten the trial rather than to admit the prisoners to bail.

BROOKLYN, 2.—Rodman's efforts to obtain bail have so far proved futile. It is still claimed by the defaulter and his friends that the bondsmen will appear in a few days, and that Rodman will be released. Several prominent residents are making efforts to have the Department of the City Works investigated.

It is reported that City Treasurer Sprague is not only cognizant of Rodman's deficit, but was an active party in the defalcation. If this is substantiated he will be compelled to refund his share of the money. His resignation as city treasurer is probable. Another forged gold check of Rodman's for \$55,365 has been found in the Trust Company's safe. Two-thirds of the amount has been paid, and the balance is a loss to the Company.

Rumors are still rife of frauds in the Fire department, although the Fire Commissioners continue to deny them.

A breach of promise case, brought against the late mayor, Kalbfleisch, by Mary F. Wade, for \$150,000, which was supposed to have been closed by his death, is about to be re-opened by the lady, who will sue his estate for damages.

PITTSBURGH, Pa., 2.—A destructive fire occurred at Newcastle last night, resulting in the total destruction of the Knox House, Geo. Henderson's dry goods, John Ewin's

grocery, and Cubby & Son's jewelry store; loss about \$15,000.

NEW YORK, 2.—Work on the new Bergen tunnel, Jersey City, commenced yesterday.

Royal Sammis, one of the participants in the Kelsy tar and feathering case at Huntington, Long Island, yesterday, said that deacon Wood was witness of the affair as well as himself. Both saw Kelsy tarred and feathered, but they don't know what became of him afterward. He says he does not believe he was thrown into the bay; he thinks he is still alive. Sammis was engaged to marry Miss Smith about a year before the tarring and feathering of Kelsy. Kelsy knew of the engagement, but notwithstanding that, continued to write letters to Miss Smith during that time, of a most obscene and disgusting character.

COLUMBUS, O., 2.—While the wife of C. V. Deerowsky was playfully pointing a pistol at him yesterday, he requested her not to do so, and stepping so as to take it from her, it went off, the ball entering her side, and passing through her lungs, killed her almost instantly.

NEWARK, N. J.—A number of accusations have lately been made by prominent citizens against a number of leading officials of the City Hall, of alleged irregularities. The charges have now become positive, and a commission is to be soon appointed by the Common Council to investigate the matter. It is rumored round that startling frauds will be brought to light if the city books are examined.

A dispatch from Eureka, Nevada, says that W. B. Bourne, a well known mining operator and President of the Hidden Treasure mine, White Pine, arrived in Eureka yesterday morning. On examination of his baggage he ascertained that he was minus \$2,000 in gold notes, which he had placed in a small hand satchel when leaving Bay City. Where the robbery was committed or who got away with the plunder is a profound mystery. Mr. Bourne says that he kept a close watch over the satchel, and he does not think it was out of his sight. There were several Chinamen in the stage on the way from Palisades and it is barely possible that one of the "Johns" may have gone for the gold notes, though the most diligent search failed to reveal any thing which would even cast a suspicion upon the heathens.

A dispatch from San Diego, this evening, to the Union says the Indian who murdered Speck, at Milquatay, has been captured across the line of Lower California. There are others implicated in the murder, who are being pursued. The Lower California authorities are showing commendable activity in following up outlaws.

On Saturday night a cloud burst, and filled Milquatay river to a depth of four feet, at which height it ran for about an hour.

Under Sheriff Tyner, of Yuma, and John Burkhardt pursued the two Mexicans who murdered Lumly, at Kenyon station, Arizona, and overhauled them at New River. A skirmish ensued in which one of the Mexicans was shot and captured, the other escaped. The pursuers are still on his track.

## LOCAL AND OTHER MATTERS.

FROM TUESDAY'S DAILY, SEPT. 2.

HEAVY thunder, lightning, rain, and hailstorm as we go to press.

THE NEW BARRACK BUILDINGS.—The three new barrack buildings shortly to be erected at Camp Douglas are to be of red sandstone, and each structure will be two stories high and one hundred feet long by thirty feet wide.

PROGRESS.—The large meeting-house at Mill Creek (Miller's Ward) is being nicely fixed up. No meetings have been held in it for several weeks, as a force of mechanics have been at work in the interior of the building for a considerable time. It will be a credit to the people of Mill Creek when finished, as it will be a monument of their industry, liberality and public spiritedness.

IRON ORE.—We were shown today a specimen of red hematite iron ore from Cedar Fort, that is, we are informed, and to our judgment presents every appearance of being a perfect substitute for the Wyoming ore that has been and is still used in very large quantities in smelting silver ores. We understand Capt. Evans and Samuel D. Sirrine, Esq., have made arrange-

ments, for one year at least, by which the Utah market will be supplied with this ore.

SUNDAY SCHOOL UNION.—A largely attended meeting of the Superintendents and teachers of the Sabbath Schools of Salt Lake City was held at the City Hall last evening. The intended jubilee of the Sabbath School children of Utah, Davis, Weber and Salt Lake counties, to be held in the large Tabernacle at some yet undecided date this fall was the principal topic of conversation. It was ultimately decided, that the previously appointed committee on music, which had finished that department of its labors should be sustained as an executive committee to arrange the details of the celebration.

THE TEMPLE.—The work of laying the rock on the walls of the Temple was resumed this morning, and enough granite is on hand to lay at least three courses. More than one hundred and fifty hands, not including the architect and his assistants, are now engaged on the stone work of this building. Of these about seventy are at the quarry, and more than eighty stone-cutters, &c., on the Temple block, whilst eight backsmiths are constantly employed solely in sharpening tools. The rock laying part of the work is in charge of Messrs. Morris & Evans.

PROVO Z. C. M. I.—The Times of yesterday says: We are informed that at a meeting of the Board of this institution held on Friday evening last, in consequence of the resignation of Superintendent James Dunn, Samuel S. Jones was appointed Superintendent and Business Manager of the East Branch and James Dunn was appointed Superintendent and Business Manager of the West Branch. Under the able management of the gentlemen, who each, prior to the departure of Mr. Jones on his mission to Europe, filled these respective positions, we anticipate a good business will be done by both branches, their labors heretofore having been highly appreciated.

FINE WHITE CELERY.—We, this morning, saw some very fine white celery, grown by Mr. Charles F. Williams, in the 4th Ward of this city. From root to crown it was about a yard long, and of corresponding girth. Mr. Williams has given considerable attention to the cultivation of this favorite plant, and has made a complete success of it. He has three thousand head growing on his lot, and probably no finer samples of the home-grown article have ever been seen in the Salt Lake market. Some of the sticks raised on his lot last year weighed seven pounds each. He has been equally successful with cauliflower and gooseberries. This season he had cauliflowers which weighed eleven pounds each, and gooseberries measuring seven inches round one way and five the other.

RETURNED FROM THE SOUTH.—Elder P. P. Pratt returned, by Sunday evening's train, from the south, where he has been traveling in the interest of his father's "History," having met with encouraging success. We learn from him that he extended his travels as far south as St. George, at which place he arrived Aug. 9th, at which time the thermometer stood at 100 degrees in the shade. Refreshing showers occurred during his four days' stay, which reduced the temperature about twenty degrees. At one time, in July, the thermometer rose to 119 in the shade and to 160 in the sun. The peaches, melons, grapes and figs in "Dixie" are most excellent.

Peace and good health prevailed among the people. Crops of grain and fruits were about average. During an absence of eight weeks Bro. Pratt visited fifty-one towns, cities and villages, traveling a distance of 886 miles, and has added to his subscription list 1079 names. Bro. Pratt has been well received everywhere, and desires, through the News, to thank the people for the courtesies extended to him by them.

ANOTHER OF THEM.—At a late hour on Sunday night a lady and her daughters, who occupy a house in the 13th Ward, nearly opposite C. V. Spencer's place, were startled after having retired to rest, by hearing some person inside the dwelling. The lady hastily turned up the lamp and as she did so a man ran out of the front door.

On examining the premises it was discovered that the uncere-

after getting inside he had opened the back door, which was previously fastened, and then proceeded to enter and opened the front door.

There can be no doubt that his object was plunder, and he was evidently about to commence a search for booty when he was alarmed and took to flight.

In the face of so many occurrences of this kind which have happened lately, it would almost seem superfluous to advise sensible people to be on the watch for and have matters arranged so as to be in a position to give such fellows a deserved and warm reception.

THAT ILLUMINATED CLOCK.—That illuminated clock, to be erected at the Eagle Emporium corner, by Z. C. M. I. is probably a bigger thing than some people imagine. The clock was manufactured by the Seth Thomas Clock Company, of Connecticut, the works of which will be in the front ground floor compartment of the Emporium building, and a shaft will pass downwards from them till it reaches the vault, along which it will pass horizontally, and then upwards through the column which will support the dials. The vault, which is being lined with brick, and which has an arched roof, is thirty-two feet long and four feet wide. The column which will support the globe, in which will be the dials, is of cast iron, of tasteful design, the under portion square and part of the upper section round fluted. The whole column, including the globe, will stand about eighteen feet high, and if the intention of putting a couple of feet of rock base to support it be carried out, the whole structure will be about twenty feet in height. The dial globe is about five feet in diameter and the dials themselves, four in number, are three feet in diameter, or the same size as those of the City Hall.

We understand the work of arranging and fitting up the works will be done by Messrs. Silver and Eliason.

PROBATE COURT.—Yesterday afternoon, in the Probate Court for Salt Lake County, the indictment charging S. M. Butcher, R. W. Taylor and Sol. Gee with the killing of Gabriel Cotton and two sons, at Bingham, was read to those parties. Gee pleaded not guilty, and Butcher and Taylor asked for time to plead, which was granted.

A motion for a separate trial for Gee was sustained, and the time for its commencement was set for Friday morning, at nine o'clock. The people vs. John Selby. Trial set for Wednesday. Geo. W. Groo was by the court assigned counsel for the defendant.

People vs. Chas. Buckley—set for Tuesday, Sept. 2. Geo. W. Groo assigned as counsel for defense.

People vs. M. S. Scott—set for September 2, 2 p.m. Geo. W. Groo assigned as counsel for defense.

People vs. John Welsh and Harry Roberts. Hosea Stout assigned as counsel for defense.

People vs. H. Gillem. Hosea Stout assigned as counsel for defense.

The case of Tanner vs. Dickson was set for next week.

TUESDAY MORNING, SEPT. 2. The case of the People vs. W. R. Keithly was called up. Defendant asked that the case be put at the foot of the calendar, which was not granted, and time of trial was set for Wednesday morning, Sept. 3rd.

The cattle stealing case of the People vs. McCabe, Jones and Crawford, was called up. The prisoners each pleaded not guilty, and the trial was set for Friday, Sept. 12, at 9 a.m.

The court then took a recess till 2 o'clock.

STOVEPIPES.—This morning, Mr. John Needham, who supervises the Clothing Department of Z. C. M. I., walked into our sanctum, looking taller than usual, and well satisfied with himself, and with things generally. There was a reason for it. He had on a brand-new silk stovepipe hat, one of the first of a new consignment of the latest styles, specially forwarded by express. It is not to be expected that a new stock of such headgear will hold out long, for if the ladies are passionately fond of a "love of a bonnet," the gentlemen also, when it comes to stovepipes, are just as well satisfied to obtain the "correct thing." No more than the gentle sex do the rougher sex delight in having "nothing to wear."
