MINING, BUSINESS AND ST

DALY-WEST WAS STRONG TODAY.

Price of Bullion-Beck.

MTCH ACTIVITY IN VALEO.

May Day Was Weaker-Socramento Climbing-Hammoth Holding Up Well-Utah Sells.

TODAY'S METALS:

SILVER 60 LEAD, \$3,87% CASTING COPPER 15%

Eusiness was quiet on the exchange today. Few stocks were traded in, though the prices of several stocks were much stronger. Bullion Beck closed with \$4.40 bid. The mine is said to be shipping some very good ore from the new strike. Daly West was held at \$17.271/2 with \$17.17 bid, while Grand Central remained practically station-

Geyser Marion was traded in at 3, while Mammoth sold as low as \$2,20 with the dividend off.

Sacramento was stronger, 500 going at 23%. Sunbeam sold at 8. Utah again 25%. Suiteam sold at 8. Utan again recorded a sale, 400 shares being handed out at 60. Valeo was off today, selling between 56 and 60. About 2,300 shares changed hands during call. May Day was weaker today, 1,000

shares being dropped at \$1.03, Light was stronger, as much as 8% being offered for the stock, with 8% asked. West Mountain Placer was weaker, as was South Swansea and On-

ITS CAPACITY TO BE DOUBLED.

Another Advance Recorded in the Mr. G. K. Fisher Will Superintend Highland Boy Enlargement.

WORK WILL BEGIN AT ONCE

Meeting of Lead Producers-Unite to Raise Price of Metal-Third Term Leased.

The Highland Boy smelter, south of the city, is to be enlarged at once. Its canacity will be doubled. At present the smelter is handling about 240 tons of ore day, and this means that when the new addition is completed the plant will be able to care for 500 tons of ore per day. Mr. G. K. Fisher, who has been in the city for the past day or two, will have charge of the work and is probable that office accommoda-lons will be given him in the Highland soy office in the Dooly block. Mr. Fisher spent today in looking over the smelter at Murray and as soon as he has made his calculations the work of enlargement will begin. The present capacity consists of 3 roasting furnaces, four reverbatory furnaces and two convertors besides a sampling mill and other accessories. This is to be doubled but no addition will be made to the power plant as when the smeller was built a sufficiently powerful plant was installed to meet the requirements of the present decision of the company.

MAMMOTH SUPERINTENDENT. Stated on Very Good Authority that

Mr. McIntyre Will Direct Work. now turns out that the report It now turns out that the report that former Superintendent Donohue of the Mammoth wine had resigned is not without foundation. At any rate, it is stated on very good authority that Mr. Donohue will not take up his position with the Mammoth company when he goes out to Tintic, as he expects to do in a few days. Those who claim to in a few days. Those who claim to know say that Mr. McIntyre is going to take direct charge of the work at the mine, and that the amount of ore that will be sent to the smelter during the next few months will surprise a number of people unacquainted with the mine's condition.

THE UTAH MINE Is Looking Well-Last Shipment Runs High in Lead and Silver.

The last shipment of ore from the Utah mine at Fish Springs assayed 139 | Mining company will be held on the 18th unces silver and 43 per cent lead per ton. The mine is reported to be looking well. Superintendent D. R. Williams says in a letter received today that the shaft is down 628 feet. A station will shortly be cut and connection will be made with the ore chute which has been followed from the surface.

KOREAN MINING BOOM.

American Miners Cautioned Not to Act on Published Reports.

How far the present mining boom in Korea is of a merely political nature it is difficult it say. There has been a remarkable number of demands upon the government of that country for mining concessions and privileges leading outsiders to gather the impression that the country must be a veritable storehouse of wealth. According to the prevailing fashion in the Orient, however, the knowing ones recognize in all this activity merely the first steps in the process of establishing po-ltifical spheres of influence. At all events, the mining prospectors and ad-venturers of America should be cautioned not to wend their way hither on the reports of a new eldorado having been discovered.

LEAD PRODUCERS MEET. Committee Appointed to Devise Some Plan of Organization.

Among those who attended the meeting of the lead producers last evening in the office of Bamberger & McMillan, in the office of Bamberger & McMillan, were J. E. Bamberger, Thomas Kearns, David Keith, S. B. Milner, C. E. Allen, J. D. Wood, H. S. Joseph, N. Treweek, H. E. Zerbe, C. F. Loofbourrow, H. G. McMillan, and a number of others. The statement of Mr. J. E. Bamberger was similar to that outlined in the "News" last week. Among other things Mr. Bamberger said that the late prices of lead had been held up mainly by the American Smelting company, who had exported the surplus at considerable loss. It was possible to secure the same prices again if the lead producers stand ogether. In order to accomplish this and, organizations are being effected in Idaho, Montana, and in Colorado. The Missouri producers are also said to favor the project. If the producers take the matter in hand it is thought that the lead surplus can be exported and past prices maintained.

Mr. Bamberger assured those present that the trust is desirous of seeing the lead producers receive good prices. It is to its advantage to do so for seve al reasons. The trust, however, is desir-ous that the producers shall manage the present difficulty themselves and to this end it was thought with State organiza-tions all over the Union a central or-ganization may be effected in New York which will create a fund to buy up the surplus and ship it to foreign countries, selling it for what it will

An informal discussion followed Mr. Bamberger's remarks and on the mo-tion of A. Hanauer a committee of five was appointed to devise some plan of organization. The committee consists of J. E. Bamberger, Thomas Kearns, Jesse Knight, A. Hanauer, and C. F. Loofbourow, who were to meet this ofternoon to further discuss the situa-

Jesse Ewing Property.

Hon. William O'Neil got home late Hon. William O'Neil got home late Saturday from the Jesse Ewing, says the Vernal Express. He says that further work on the Vernal shaft will be postponed until they get a whim yut in, which will be done in the near future. In regard to the new strike he says that it appears to be a body of iron. It is about four feet wide and joins the green copper of the Mammoth claims, the two bodies of ore lying side by side. Since the first discovery of this vein, over a week ago, he has followed its croppings for some distance and found that a short distance away from the pings for some distance and found that a short distance away from the point where it was first discovered the mineral appears to be a red oxide of copper. He believes that notwithof copper. He believes that notwith-standing the fact that the new ma-terial has the appearance of iron ore, it carries a heavy percentage of cop-per with considerable values in gold.

9:45 a. m.

This opinion is concurred in by Rock M. Pope, Samples of the ore have been sent to C. V. McCune at Salt Lake, and the values of the mineral will be known definitely by the own-ere in a few days. All of our mining men consider this latest discovery the most important one that has yet been

Grand Valley Items.

Thomas Daly came in from Lisbon Valley last Saturday. He says "they will have the most prosperous year in the history of the camp this coming

I. L. Crapo, left last Saturday morning for his uranium mines on the Dolores river, where he will soon put on a force of men and commence shipping ore to the plant on La Sal Creek which is tast nearing compilation. rast nearing completie

Warren Loose, a brother of Ed. Loose, the Sait Lake City mining man, spent Thursday and Friday in town on his way to the property of the Big Incian Copper company. We are informed that the property now being out of litigation, that it in the near future will be worked to its full capacity.

We are informed that Lorenzo Hatch has sold his interest in the Internation al Copper company operating in Beaver Basin. The price paid was \$15,000 cash, Mr. Hatch sold to the other stockholders of the company most of whom are residents of Provo, principal among whom is Co Valley Times. Congressman King.-Grand

Third Term Leased.

The Third Term mining group, located about ten miles southwest of Grantsville, Tooele county, has been leased to S. J. Garn of Jummit county, has been leased to S. J. Garn of Jummit county, by Thomas W. Jennings. This property shipped some very rich lead ore about ten years ago. An incline shaft is down on the property about 260 feet. A tunnel about 700 feet long has also been driven towards the vein, which, when completed, will give about 200 feet of greater depth. Copper stained rock is being encountered in the tunnel, and it looks as if Mr. Garn might be successful in opening up a good body of copper as well as lead ore.

In Black Pine District.

Preparations are being made to do Preparations are being made to do some extensive development work in the Black Pine district, in Cassia county, Idaho. State Senator Fred Alder, Attorney W. D. Livingston of Manti and others left for that country today. While away they will look over the Black Pine Mining company a periodic. Black Pine Mining company's property, on which a great deal of work will be done during the present season.

MINING NOTES.

The Centennial-Eureka had six cars of ore on the market today,

H. A. Cohen of Captain De Lamar's force has gone to California.

Six cars of ore were on the market today from the Swansea of Tintic. L. E. Riter is around again after be-

ing indisposed for several days. The Grand Central of Tintic had four cars of ore on the market today,

The Taylor-Brunton sampler reported twelve cars of ore from Tintic to-The annual meeting of the Swansea

The Mercur has reported at the sampling rooms with about 900 pounds of cyanide product.

Col. Wall says that the shaft on the Yampa claim in Bingham is down 40

feet in the vein. Some very good lead carbonate ore has been enocuntered in a drift on the 160-foot level of the Nevada mine at

A strike of zinc-lead ore has been made in the Winnamuck at Bingham. The ore is said to carry 21 per cent zinc with 17 per cent lead.

James W. Neill returned today from Butte, Mont. While away Mr. Nell took some interesting snap shots of the Smokehouse Lode and other properties. W. F. Snyder left for the East today on mining business. Mr. Snyder has secured an option of some Gold Moun-tain property, which he will endeavor

to place while away. At the meth2 of the Silver Shield held yesterday afternoon the following directors were elected to serve for the ensuing year, namely, A. Hanauer, A. Hanauer, Jr., J. W. Langley, A. P. May-berry, A. P. Tiernan, L. A. Copeland

and J. A. Pollock. Hailey News-Miner: Burr Ramsey, manager, representing the Fisher & Boorn Mining company, made up of New York and Kansas capitalists, ar-rived on Wood river a few days ago to prosecute operations on the Fisher mine which is situated in Beaver canyon, below White's hot springs, in the Sawtooth region. A ten-stamp mill is already on the ground, and Mr. Rumsey says that it will be in operation during the next thirty or forty days. There is sufficient ore on the dump to

keep it running all summer. BOSTON WOOL MARKET.

Boston, June 5.—There is no material change in the wool market this week and the demand continues quiet. The price for Territory wools is 53055c, scoured, for line medium and fine. Fleece wools show very little life, with prices nominal. There is some demand for quarter-blood, but offerings are small. A line of Australian three-eighths blood sold on the scoured basis of 58c.

BOERS WANT

Would Have Us Notify England to Stop the War.

ONLY WAY WE CAN HELP.

Might Involve This Country in a War With Great Britain-No Night Sessions of Congress.

Washington, June 1, 1900 .- The visit of the Boer commissioners to Washington to enlist the aid of the United States in their cause brings us face to face with a question as to what we as a nation could do to assist the struggling republies. Quite a number of men have declared that our sympathy, at least, could be expressed, but the general sympathy of the people has been expressed one way or another. "But that is not sufficient," say the ardent friends of the Boers. "The sympathy should be expressed by the government through Congress." But Jus here we reach the question of what material good it would do the Boers and that is what some of the more and that is what some of the more conservative people are asking. Expressions of sympathy are but empty sounds to a people out of whom the life is being crushed. There is only one good that we could do the Boers—intervention to save their nationality. This could be by the diplomatically termed "offer of friendly offices." which have already been rejected, and would be on a par with expression of sympathy; or we could notify Great Britain that the war must stop and the Boer republics allowed their inde-pendence. This notification might be couched in the most diplomatic terms if might be full of protesting terms of friendship, and might only express the hope that the British would discon-tinue the fighting. That is what the Boers want done.

AND WHAT THEN? It is more than likely that any notification of the kind, no matter how skillfully worded by Secretary Hay would be met with an equally matically prepared reply which, trans-lated into plain Anglo-Saxon, would tell us to please mind our own busi-ness. Some of the statesmen of Washington are trying to figure out what our people would do in that event. Should we persist in demanding the cessation of the war in South Africa and decisre war on Great Britain to enforce the demand, or should wa quietly pocket the snub and accept the humiliation of it? These are some o difficulties those statesmen who are giving the question so much atten-tion are going through. It is said that official expressions of sympathy would do no material good and would offend Great Britain. The most earnest pro-Boer sympathizer says that a demand by the United States upon Great Brit ain would not mean war or a snu from the British government, but the from the British government, but that England, fearing our power, would do as we asked before accepting the dread-ful hazard of a war. We heard the same thing about Spain, a poor. nation, and yet even Spain, who could not expect to win a single victory, wen to war before she would obey our de mands to relinquish Cuba. It seem perfectly plain that we can only stop England in Africa by fighting her our-selves. That is the opinion of the best informed statesmen in Washington.

ABANDON NIGHT SESSIONS. The proposition was made during th consideration of the Alaska bill t have night sessions. But to this Chair have night sessions. But to this Chairman Warner, of the committee on revision of the laws, objected during the time so many visitors were in the city attending the meeting of the Mystis Shrine. These Shriners were prominent men from all parts of the country, and, as Mr. Warner explained it the Huges of Perpengual 11 to the transport of the country. the House of Representatives would have appeared absurd to these visitor at an average night session. He knew what night sessions are, especially when so much was going on in the city. There would probaly have been a dozen or two members present, and the visitors would have gazed down upon an area of empty seats. They upon an area of empty seats. would have got a very poor impression of the business qualities of the House. The Alaska bill at best is a very dry subject, and the droning of the reading clerk drives nearly all of the members out of the House in the daytime, and ir the evening they could not have been forced to attend. Mr. Warner wisely decided that he would avoid such scenes, and the night session program was abandoned.

CUSHMAN AFTER A COAT OF

Representative Cushman of Wash-ington State was observed the other day twisting his long and angular person so as to get an accurate view of the ceiling of the House of Representa-tives. He looked intently into each of the skylights as if he were trying to loite a coon or a possum in a tall syca-

"What are you doing?" I asked, and he replied: "Do you see that? There are 45 large glass squares up there, and in many of them are coats of arms representing various States. And I am trying to find out whether my State of Washington is on earth or not. You Washington is on earth or not. You can see Kentucky, Rhode Island, Arkansas and nearly every other backwoods precinct from Woonsocket to Ubedam, but where is the State of Washington? I am going to find out." Mr. Cushman disappeared through the long winding passage which leads to the office of the architect of the capital which seems to be in tol, which seems to be in the very bowels of Capitol hill. Soon he re-turned with an order that the pictured face of the immortal George shall ap-pear upon one of the windows of the celling of the House in the near future to represent the State which has been named for him.

Our cars are no better-in themselves -than the cars of other lines. It is what is INSIDE them that makes then

nore comfertable. For instance: The seats in our recining-chair cars are provided with the ng-cars have electric form, and are govery car is a thermometer, which it scep the temperature of his car as mar. By themselves, these things are this, but the sum total of them goes a long

way toward making a Burlington a mighty enjoyable eiperand 10.00 p. m. for Omaha, Kansas City,

St. Louis, and Chicago. Tickets at all R. G. W. Ticket Off-Through sleepers daily, Ogden and Salt Lake City to Omaha and Chi-
