EDITORIAL NOTES.

A "pauper" has recently died in a Pennsylvania almshouse with an insurance on his life for \$40,000. The right way to help the poor is to provide work for them. Alms-giving broeds just such paupers as these.

An exchange says, "The German immigration to this country, at present, is reported to be largely from the thrifty middle classes and the best of the peasantry." That's the kind the "Mormon" companies are mainly composed of.

A colony establishing itself in North Carolina advertises that "no beer saloons, churches, ministers or settlement." That's a funny association of ideas and professions. But the connection is not so disconnected, after all.

During the month of July there were 98 deaths from yellow fever, in Havana, and during the week ending August the 6th, 536 deaths fr m the same disease, with 200 cases in the city. During June there were 235 deaths from yellow fever at Vera Cruz.

The slik industry of the United States flourislies under a protective tariff. The silk mills in operation number 77; number of hands employed, 13,000; capital invested, \$10,-000,000, and value of yearly product \$12,000,000. The quality of goods shows a great improvement in the past year.

A deaf mute of Raleigh, N. C., has invented a hat fan, which turns on the inside of the hat from the force of the wind striking a neat little contrivance on the top of the hat. It is an ingenious invention, and keeps the head as cool as a cucumber. We recommend it to rabid "Mormon"-eaters during the summer season.

this we learn that Barrows finds " nothing very heretical in the Book of Mormon," and considers " it is

not the 'Mormon' theology that Christians quarrel with so much, as the social institutions, most objectionable of which is polygamy." This is quite a change in the sentiments of the "Christians " who "quarrel with Mormonism, for as

Mr. Barrows said further on in his "Polygamy was not originally a

part of the system contained in the Book of Mormon published in 1830, but was grafted on it by Joseph Smith in 1843. It is not the taproot, but a branch of Mormonism. Mor-monism flourished before polygamy was a part of it."

Just so. And these same " Christians" who now pretend that polylawyers will be permitted in the gamy is the great objection, in the times between 1830 and 1843 when polygamy was not "a part of the sident is suffering some discomfort system," pursued the Latter-day Saints with fire and sword, with rifle and cannon; and the heaviest and what improved and especially his most herrible and fatal persecutions stomach is becoming less intolerant.

KAYSVILLE, Davis Co.,

August 6th, 1881. John W. Lowell, Dear Sir .- This will certify that I witnessed for one whole day, on the 4th inst., the operation of the Agitator Thresher of the Case manafacture, sold by John W. Lowell to Bishop Barton and others at Kaysville. As I have built Separators and run them in this country, I ought to be competent to judge of their merits. The Case Agitator threshes fast and is very easy on the

horses. It cleans grain well and absolutely WASTES NO GRAIN. I saw it work for hours in wet Barley and wet and weedy Oats, and it did its work well, and threshed nearly 100 bushels an hour. The only trouble I saw with it was, that one man with a patent Tallier, could not measure the grain as fast as the Agitator threshed it, as all who were present will testify. I recommend the Case Agitator as the best thresher I have ever seen.

The official bulletin up to a late hour yesterday, would almost seem to warrant the assumption that President Garfield had successfully passed the crisis of his troubles, and was on the high road to established health; but we regret to have to announce that later in telligence is not of so favorable a character. A recent dispatch informs us that new complications have risen, and that fears are enter-tained that the injury to the stomach is irreparable.

couched in the final paragraph of the account of the lecture:

The writing inter de off one show of the lecture: the paper only, and whatever is written or drawn must bear a nom de plane, while the original name goes in a separate envelope. King Kalakawa has been soundly been done in these directions in Utah, and closed with an appeal for aid to carry on the work." King Kalakawa has been soundly berated by the intelligent newspapers of America, for traveling abroad pers of America, for traveling abroad trainer to period to person the work!" That is the out come of all these hypocritical and lying attempts to arouse popular indignation against the "Mormons." "Give us money to as the panic had somewhat subsided the band struck up, and this helped to reassure the passengers and repers of America, for traveling abroad trying to peddle off his kingdom to the highest bidder.
