

THE \$75,000 FOR "EXTRAS" DELAYED

Council Committees Discussed
The Question for Two
Hours.

WILL INSPECT THE CONDUIT.

Mayor, Councilmen, Board of Public
Works and City Engineer Go
Tomorrow.

The committee on engineering, sewerage and waterworks of the city council, held a meeting in the council chamber Saturday afternoon and again considered at length the recommendation of City Engineer Kelsey to expend \$75,000 on "extras" for improving the Big Cottonwood conduit. After discussing the matter for about two hours it was decided to again inspect the conduit before concurring in the recommendations. Accordingly the members of the council, the board of public works, the mayor and city engineer and others interested will leave the city at 8:45 o'clock tomorrow morning and go to Murray on the street car and from there to the conduit in private conveyances.

ANOTHER TRIP PROPOSED.

When the meeting was called to order Councilman Tuddenham moved that the members of the committee and the other councilmen and officials interested make another trip of inspection to the conduit before taking any definite action in regard to the recommendations of the city engineer. Mulvey opposed this delay as he stated that nearly all the members of the committee had already been over the conduit and seen it. Ferry did not see the necessity of hasty action in regard to the proposed changes in the work and wanted to know what the changes would have on the contract. He was informed that under the specifications the engineer had the right to make any necessary changes.

Crabtree wanted to know if it would be necessary to change the forms if a change should be made in the thickness of the walls. It would be necessary answered Engineer Kelsey, and the change of form would cost about \$4,000 which is included in the estimate already submitted by the engineer. Mulvey then moved that the recommendations of the city engineer be concurred in by the committee and the necessary funds appropriated.

TUDDENHAM OPPOSED IT.

Tuddenham opposed the motion and urged that the councilmen should visit the conduit again before voting on the matter. He said that the former council had adopted a plan which was considered the most advisable for the limited funds to be used in the water improvements. He read from the contract the section which gave the city engineer the right to order the walls made thicker where necessary and argued that if the city engineer would take advantage of that right and order the thicker walls where needed there would be no necessity of increasing the thickness of the walls throughout the entire length of the conduit. He and Wells both stated that they could not understand how the engineers under the last administration could have made so serious a blunder as charged by Engineer Kelsey and the board of public works.

DENIED CHARGE OF POLITICS.

In reply to this, Mulvey stated that it was because the administration was in a political race and went into the matter without knowing what it was doing. Wells and Fernstrom both denied the statement, and in reply said that the Cottonwood project had been approved months before the work was commenced. Fernstrom stated that every attempt had been made to keep the improvement out of politics, and for that reason the administration employed Engineer Doremus, who was always a Republican. He favored continuing Mr. Doremus on the work and allowing him and Engineer Kelsey to go ahead and complete the conduit.

Wells denied most emphatically that politics played any part in the work on the water improvements done by the past administration. He said that for almost two years before the work was commenced, the matter of improving the water system and of securing additional water was considered by Mayor Morris and his associates in an intelligent and careful manner. Their motives, he said, were justly impugned from time to time, and the improvement was delayed until a few months before the close of the administration. He thought that the plan of Engineer Kelsey was a very expensive one, and urged that the matter be fully investigated before a recommendation should be made by the committee. He thought that instead of going ahead and ordering the conduit plastered throughout its entire length an experiment should be made on a section of it to see whether or not it would be necessary. As to covering the conduit he contended that that could be done gradually and not all at one time and thus save the expenditure of such a large lump sum at once.

FAVORED BY LEONARD.

Hobday said that he had during the last administration favored employing an outside engineer as consulting engineer on the improvements as he would be free from interest or prejudice in the matter, and he could pay an advance on the plan and oppose the detention of Mr. Doremus. He said that he had heard that Mr. Doremus has always had the city engineer under his control. Buck stated that he advised submitting the entire matter to a board of engineers at the time the plans were being considered, but he had been turned down by the former council.

Chairman Leonard of the board of

CHAINED TO A CORPSE.

Doleful Punishment of the Ancient Duplication in Our Modern Life.

The Romans used to punish a murderer by chaining to his body the corpse of his victim. Wherever he went he dragged behind him the dead body of his crime, the stony, unyielding, revolting thing that was once a man.

Every day you see people dragging around with them the corpse of their crime. They can't get away from them. And many of them have become so intimate with these corpses that they have become corpses themselves. The misery of these poor creatures is a thing to make one shudder with them. It is not an old story. They have become accustomed to it.

And there are thousands of humans who are walking the earth today with corpses chained to their backs. They are the dyspeptic stomachs that can't get rid of it. They have to go along the best they can with the stomachs they have. And the owners of said dyspeptic stomachs are suffering from some form of indigestion, first cousin to dyspepsia.

They wear that torrid appearance, their faces are ashy, nothing interests them, and they interest no one, their faces are shrunk, their nerves are wilted and their shoulder sag. Are you one of the myriads who dandle and graze their palates, at the sacrifice of their stomachs? Are you one of those who allow their senses to run riot, eating too much, drinking too much, eating at the wrong time, eating the half-digested, aged and indigestible? Are you boated after eating, and imagine that it is your food that fills you? Do you have nausea when you look upon this or that, rebel at one thing and hunger for it, too, at the same time? And have you got a whole lot of other things that you know about but nobody else does, and can't explain? If so, you have dyspepsia, or indigestion. And the chances are you have had it a long time.

Your stomach is overworked, abused, fagged out. The gastric and digestive juices are at zero, nothing interests you, and they interest no one, their faces are shrunk, their nerves are wilted and their shoulder sag. Are you one of the myriads who dandle and graze their palates, at the sacrifice of their stomachs? Are you one of those who allow their senses to run riot, eating too much, drinking too much, eating at the wrong time, eating the half-digested, aged and indigestible? Are you boated after eating, and imagine that it is your food that fills you? Do you have nausea when you look upon this or that, rebel at one thing and hunger for it, too, at the same time? And have you got a whole lot of other things that you know about but nobody else does, and can't explain? If so, you have dyspepsia, or indigestion. And the chances are you have had it a long time.

The gastric and digestive juices are at zero, nothing interests you, and they interest no one, their faces are shrunk, their nerves are wilted and their shoulder sag. Are you one of the myriads who dandle and graze their palates, at the sacrifice of their stomachs? Are you one of those who allow their senses to run riot, eating too much, drinking too much, eating at the wrong time, eating the half-digested, aged and indigestible? Are you boated after eating, and imagine that it is your food that fills you? Do you have nausea when you look upon this or that, rebel at one thing and hunger for it, too, at the same time? And have you got a whole lot of other things that you know about but nobody else does, and can't explain? If so, you have dyspepsia, or indigestion. And the chances are you have had it a long time.

Stuart's Dyspepsia Tablets do that very thing. They contain a most powerful ingredient which helps the stomach in the process of digestion, cures dyspepsia, sour stomach, indigestion, heart-burn, eructations, acidity or fermentation. They invigorate the stomach, increase the flow of gastric juice, and do two-thirds of what the stomach would have to do without them. They give the stomach some rest, and a chance to get right again.

You will feel the change first in your mind and heart and then over your whole body. You'll feel new and sweet. That's the object. You can get these effective little tablets almost anywhere on earth for 50c a package.

Stuart's Dyspepsia Tablets is the name.

public works made a short talk in which he favored the recommendations of the city engineer and told of the test which the board authorized the engineer to make. He said that a test was made of 2,700 feet of the conduit and that it leaked very badly. The motion to visit the conduit tomorrow was then carried.

MINE WORKERS OFFICIAL SAYS THERE'LL BE NO STRIKE

Indianapolis, Ind., Feb. 25.—In a statement issued tonight Vice-President T. L. Lewis of the United Mine-Workers of America declares that there will be no strike of the mine workers on April 1, saying the operators will restore the reduction accepted by the miners two years ago, and perhaps more. The statement is as follows: "You may have heard on the proposition as a fixed fact—that there will be no strike in the mining industry April 1. The operators will restore the reduction accepted by the miners two years ago, and perhaps more."

"The statement is as follows: 'You may have heard on the proposition as a fixed fact—that there will be no strike in the mining industry April 1. The operators will restore the reduction accepted by the miners two years ago, and perhaps more.'"

ing public will not materially suffer by reason of the advance which will be granted to the miners. T. L. LEWIS. (Signed) "Vice-President United Mine-Workers of America."

NO CHANGE IN SITUATION.

Pittsburgh, Pa., Feb. 25.—Francis L. Robbins, chairman of the executive board of the Pittsburgh Coal company and one of the operators who was a party to the interstate agreement, was not in the city tonight, but earlier in the day he said:

"There has been no change in the situation between the bituminous coal operators and the United Mine-Workers agreement for the year starting April 1. There can be no compromise offered to the miners without a meeting of the operators who are members of the interstate agreement, and no such meeting has been held nor has one been called. The dispute between the miners and the operators remains identically as it has been since the adjournment of the joint conference in Indianapolis."

THE FORBIDDEN CITY UNDER DOUBLE GUARD.

Pekin, Feb. 25.—The guards around the Forbidden City have been doubled since yesterday afternoon, and all the palaces and residences of high officials are expected to be guarded. The police who have hitherto carried batons are now armed with rifles. All the officials that are accessible either refuse any information or profess ignorance of the reasons for the increased guard, and as a result many rumors are afloat.

The chief of police and other officials were telephoned yesterday to report to the palace, and the display of forces immediately followed their conference. Possibly the only cause is the alarm of the empress dowager over the prevalence of revolutionary rumors recently. The Chinese minister at Tokio telegraphed the government, warning it against several revolutionary students who were departing from Japan for China.

Two packages of dynamite have been found in the street outside of the gate leading to the palace. Apparently they were dropped by some one afraid to carry them.

One report finding credence is that there is a quarrel about within the palace between the partisans of the empress dowager and the emperor over the selection of an heir to the throne, but it is not confirmed.

All the reports obtainable indicate that the military measures at the palace were only precautionary and were taken because of the widely circulated rumors that there would be trouble here today.

The finding of the packages of dynamite outside the palace gate, which is somewhat mysterious, probably caused uneasiness, as the court had been here since the outbreak in the Pekin railway station on Sept. 24 of last year, when a missile was exploded inside a private car carrying one of the four missions ordered abroad to study foreign political methods, and killing four persons and wounding 20 others.

The reports of trouble within the palace cannot be corroborated, but they probably are founded on gossip, for which Pekin is always a hotbed, or based on the strengthening of the palace guards.

The police tonight appeared without their rifles. The city was never so quiet. There has not been the slightest sign of feeling shown against foreigners, nor have the foreigners been any apprehensions. Several parties from the foreign legations are taking advantage of the mild weather to make long excursions into the country.

The canal that Saturday had been designated as the day for disturbances is said to have manifested in the United States. The telegrams describing the military preparations of the American government for trouble in China have been widely published in the Chinese newspapers and are considered as decidedly unfriendly.

RIOTERS ATTACK RURAL GUARDS IN CUBAN TOWN.

Havana, Feb. 25.—The quarters in the town of Quibabana, occupied by 20 rural guards, were attacked early this morning by about 30 rioters, armed with rifles and revolvers, who suddenly entered from the rear and began shooting indiscriminately into the dormitories of the sleeping soldiers, shouting, "Long live the constitution," "Long live the liberal party," and "Down with the rural guards."

As soon as the dazed soldiers realized the situation they seized their arms and began to return the fire, whereupon the rioters fled. None of them has been arrested.

It was found that a sergeant had been killed in his bed and that a corporal on guard also was killed, while four rural guards were wounded.

Nothing took place during Saturday's celebration of independence day to cause the attack except that the rural guards prevented a group of striking bakers from interfering with work in a local bakery. The rural guards say that the leader of the rioters wore a policeman's uniform, and they claim to have recognized some of the others.

DR. CHARLIE CAN MURDERED.

Butte, Mont., Feb. 25.—Doctor Charlie Can, a Chinese physician, who has been a resident of Butte for 30 years, was murdered at his quarters on Colorado street at sometime during last night. Robbery was probably the motive for the crime, as the Chinaman was reported to be wealthy. His head was crushed as if with a hammer and his throat cut. A money belt that the Chinaman wore was missing. A Chinese was arrested on suspicion today but it is believed no definite clue to the murderer has been secured.

CADETS' BODIES RECOVERED.

Gambier, O., Feb. 25.—The charred bodies of Cadets Winfield Scott Kunkle of Ashabula, O.; J. E. Henderson of Ridge Farm, Ill.; and James J. Fuller, of Warren, O., were found in the ruins of Delaware Hall this afternoon.

There is no satisfactory explanation as to what caused the fire. Some are of the opinion that oily rags may have caused spontaneous combustion. The floors of the building were oiled and in this part at least accounts for the rapidity of the fire.

ADVISORY BOARD OF YALE.

St. Louis, Mo., Feb. 25.—President Arthur T. Hadley of Yale university, announced at the banquet last night of the associated Western Yale clubs, that the university corporation had decided to grant the petition for an advisory board, and stated that the board would consist of one member from every alumni association having 100 or more members, and that associations having less than 100 members would be allowed to band together until the required number was secured.

SOUTHERN PACIFIC'S LOSS.

Wells, Nev., Feb. 24.—The loss to the Southern Pacific company through yesterday's wreck of the fast mail and freight train at Alton, near here, is estimated at \$100,000. Two monster locomotives, a mail and fifteen freight cars are smashed to kindling wood and only 11 ft for the scrap pile.

The contents of the freight cars were most valuable, consisting of typewriters, Stetson and Panama hats and high grade silk goods. The work of picking out what can be saved of the goods was going on all day. The railroad company has five detectives watching the goods, but many thefts are reported. Many tracks from the scene of the wreck through the desert have been followed and many stolen goods recovered. One cache con-

tained fully 100 valuable silk waistcoats, many Stetson and Panama hats and a couple of typewriters. Other caches have contained everything from a box of cigarettes and gold rimmed spectacles to 500 typewriters. The track was cleared this forenoon to allow the resumption of traffic, but several days will be required to clear away the wreck.

MEXICO GETTING GOLD.

Mexico City, Feb. 25.—The exchange and currency commission has received bids from both New York and London bankers for another \$1,000,000 silver money, in pursuance of the policy of exchanging silver for gold to expedite all the measures taken by the country on a gold basis. Gold money is already entering into circulation, though in some cases people who don't comprehend that the change is permanent are hoarding the yellow money.

The general financial situation is remarkably good and customs collections have now passed the figures of \$4,000,000 monthly.

Instructions have been sent to the Philadelphia mint to ship here another \$1,000,000 in new Mexican gold coin.

SERMONS ON CHICAGO CRIMES.

Chicago, Feb. 25.—Crime's prevalence in Chicago, its causes and possible remedies were the theme of sermons in many pulpits yesterday. Practically all the clergymen who spoke on the subject urged the necessity for higher saloon license, an increased police force, although one minister asserted that these measures would be of little effect if not backed up by moral sincerity in the community.

Citizens were urged to give strong personal support to the movement to suppress lawlessness and redeem the good name of Chicago.

HELD FOR HOMICIDE.

New York, Feb. 25.—Peter Cooper, an iron worker, was held without bail in the Lee Avenue court, Williamsburg, on a charge of homicide. He was accused of having caused the death of John Jahrsdorfer, a non-union iron
