LOCAL AND OTHER MATTERS.

PRATT'S NEW THEORY OF THE ORIGIN OF THE SOLAR SYSTEM.

To-morrow night Professor Orson Pratt will deliver the closing lecture of the University series on Astronomy; the subject of the lecture will be the Professor's theory of the origin of the solar system. The popularity of these lectures has been attested by the numerous attendance of our citizens, among whom the unanimous verdict in relation to them has been satisfaction and pleasure. The delivery of a course of lectures like these is rarely attempted in the oldest settled countries, and such a condensation of all the facts revealed by science in relation to the solar system has rendered them of very great value. We expect to see a crowded house to-morrow evening attending the last of the series, and to hear the learned lecturer propound his theory of the origin of the stellar worlds, of which he has made such a long and profound study, and of whose nature and laws he has given such an elaborate exposition.

LECTURE AT THE UNIVERSITY. — To-morrow afternoon, in the Deseret University building, Carl G. Messer, Esq., will deliver a lecture to the students of the Institution; subject: "Footprints of Providence in the development of Mankind, or God in History." The lecture commences at half-past three o'clock. The public are respectfully invited to attend. Admission free.

THEATRICAL.—A fair-sized audience, last evening was present at the Theatre. "The Jacobite" was never better played here, and the actors' endeavors to please were appreciated, especially those of Mr. J. C. Graham, as "John Duck," creating so much merriment that he was called before the curtain at the end of the piece. The rest of the characters were sustained by the company in an excellent manner.

"Jack Robinson and his Monkey," did not meet the success which was anticipated.

For Saturday, the heaviest and most attractive bill of the season has been prepared, consisting of "The Lost Ship," and "The Ice Witch," with an Irish dance between. The merits of these pieces are before the public and we have no doubt they will draw together one of the biggest houses of the winter.

TROUT HATCHING.—The acclimatization Society, of San Francisco, has imported trout spawn from the East; they were received on the 28th ult., and it was expected that fifty-five days from that date would elapse before the young trout made their appearance; but on the morning of the 13th inst., fifty of them had burst their shell, and they are doing well. It seems that the process of hatching had commenced before transportation commenced, but this did not retard or injure the operation. The young fish are attached to and will live on the umbilical vesicle for forty-five days, after which they will be fed, very sparingly and carefully three or four times a day on animal liver, reduced to a pulp and diffused through the water with a syringe. This will continue for a week or two, when the feeding will take place twice a day,—morning and evening, care being taken to give no more than the fish need, lest they be killed by fouling the water in which they are kept.

ODDEN ITEMS.—The following are from the *Junction* of yesterday:

"Yesterday morning Col. John Sharp and Septimus W. Sears Esq., of Salt Lake City, left Ogden per U. P. train for the East. Success to both and a safe return.

"There is a woman-beater living somewhere near the R. R. depot, an Irishman, who indulges in the "diversion" of abusing a woman. We are informed that last Monday he beat his wife so cruelly that yesterday she was scarcely able to move. The boys at the Railroad talk of treating him to a coat of tar and feathers. The hound had better quit his brutality, right away.

"On Monday evening last, two young men at the R. R. depot, Samuel Low and Frank Mosely, were having a friendly scuffle over a small pistol which Frank was trying to wrest from Sam's hands, when the pistol, which was loaded, went off and a bullet was lodged in the arm of Allen Henry, lodging near the bone. The wounded young man went to Salt Lake City yesterday morning for surgical assistance. When will people learn not to fool with fire arms?"

REPORT RECEIVED.—A friend has kindly forwarded us the Report, referred to a day or two since in the article from the *Territorial Enterprise*, made by the special committee of the Nevada Senate, on the annexation of Utah Territory to Nevada. It will be printed in the News to-morrow.

"A REVOLUTION IN MINING."—This is the title of a pamphlet, received this morning, by Mr. Almarin B. Paul, of 206 Front St., (room 5) San Francisco. It is a treatise on "Paul's Electric Dry Amalgamating process, whereby FLOUR GOLD cannot escape, and gold and silver ores containing base metals can be amalgamated, and bullion extracted 950 fine, the base metals at the same time concentrating for melting or roasting." The pamphlet treats on the following subjects "Wastage of precious metals;" "Wet and dry working of ores;" "The grand desideratum;" "Saving by concentration;" "Practical working of process;" "A 3 ton mill to Miners;" "The Electric settlers." "Pulverising barrels." These pamphlets will be forwarded to any party free of expense, on forwarding address to the author.

"THE ATLAS SILKWORM."—A San Francisco paper says that the "Atlas" is the name of a new variety of silkworm just received by a gentleman in that city, from Calcutta. This variety is said to be very hardy, lives on almost anything, and produces a large cocoon, but the silk is not so fine as that produced by some other varieties. The worms have been sent from Calcutta for the purpose of experiment. The moths are expected to emerge from the cocoon in June or July. The manner of tending them is: First, to keep them in the open air, if possible, inside a pocket-handkerchief, the handkerchief tied to the twig of a tree; after the moths have emerged, they are to be placed in a large net, or any room, and allowed to breed. From 250 to 400 eggs will be procured from each female. Though the silk cannot be readily reeled, it cards well.

SMALL POX.—The Ogden *Junction*, of yesterday says it has learned of two more cases of small pox in the Lynne district, both of which caught the infection at Cordon's, on the Main street, north of Ogden Bridge. The *Junction* says it warned the public against that place a short time ago, and the proprietor was angry at the notice, denying the existence of the disease in the house. On Tuesday Marshal Fife and Dr. Williams made an official investigation, and finding small-pox in the house they declared the place infectious, and hoisted a white flag as a warning to the public. It gives a notice to all that if they stop at this house before it is free from disease, they do so at their own peril.

The *Junction* further says:

"From Dr. Royal we learn that he has had seventeen cases of small pox under his care at Plain City, all of whom are convalescent but one, and that one he expects will recover very shortly, when Plain City, it is hoped, will be free from infection. Dr. Royal has been very successful in his treatment of this loathsome disease, and he deserves the thanks of the people of Plain City."

OGDEN ELECTION.—The figures received by telegraph of the returns of the municipal election at Ogden, published in Tuesday's issue, were not all correct. W. W. Burton received 436 votes instead of 136; Chas. W. Penrose, 350 instead of 175, and Luther Porter had one vote for Councilor. The rest were as printed. The above corrections are from the *Junction* of yesterday.

SALT LAKE

PEOPLE'S VERDICT!

Over Half a Million sold and in use!

4,000 made and sold per week

SINGER'S

New Improved Silent

FAMILY SEWING MACHINES

ARE

The Best in the World,

Because all of them are in constant use, while a very large proportion of other makes are not used, owing to their being partially or utterly impracticable.

THE SINGER

NEW FAMILY MACHINE

Has been brought to perfection, regardless of time, labor or expense, and is now incomparably the best Sewing Machine in existence.

It is *simple, compact, durable, beautiful, quiet, light-running,* and capable of performing a range and variety of work never before attempted upon a single machine; using either Silk, Twist, Linen or Cotton Thread, and sewing with equal facility the very finest and coarsest materials, or anything between the two extremes, in the most beautiful and substantial manner.

The New Improved Attachments for Hemming, (any width) Braiding, Embroidering, Magic Ruffling, Gathering and sewing on (at the same time) Self-Sewing, Cording, Tucking, Quilting, Felling, Trimming, Binding, etc., are novel and practicable, and have been invented and adjusted especially for this Machine.

Folding Tops and Cabinet Cases.

New designs of the unique, useful and popular Folding Tops and Cabinet Cases, peculiar to the Singer Machine, are in every variety of Wood, such as black Walnut, Mahogany, Rosewood, Satinwood, and from the plainest to the most elaborate pattern and finish. The Machines themselves are plain or highly ornamented with pearl and gold to correspond with their tables or cabinets.

In the Singer the work is fed or passed through the Machine in the natural direction, namely, *from the operator*, permitting her to sit in a natural and healthy position. In many other Machines the work passes from right to left, or the reverse, *compelling the operator to sit in a bent and unhealthy position, and thus causing weakness of the back, etc.*

The Singer uses a SHORT STRAIGHT NEEDLE, which is not liable to break or miss the stitch. Many other Machines use a long crooked needle, which *is* liable to break and to miss the stitch.

In the Singer Machine the Shuttle is carried, thus avoiding nearly all wear. It requires no *oil*, and does not soil the thread or goods. Other Machines *drive* their Shuttles, in a race, thus causing great wear, and *requiring oil*, soiling the thread and goods.

On the Singer, the Tension on both the upper and lower threads is absolutely under the ready control of the operator, thus rendering the Machine always available for good sewing, which is not the case with any other. Many so-called cheap Machines are really worthless, and so are many of their new peculiarities and supposed advantages.

The SINGER is the

Oldest Practical Sewing Machine,

Being about twenty years in the market. Having been constantly improved by the employment of the most skilled ingenuity of the age and unlimited capital, it is now divested of all unnecessary parts and possesses All the Very Latest Inventions and Improvements. It is the only Machine sold on Honest Claims, as all its parts are Practical and will do all that is claimed for them. Some other Machines are Greatly Complicated, to do Useless and Silly things, and thus are rendered Liable to Constant Derangement. The Singer Seldom or Never gives trouble, but is readily and easily managed by those *who utterly fail on other Machines.*

SINGER'S

New Manufacturing Machines

Claim the same advantages over others of their class as the new Family Machines. These old and well-tried Sewing Machines are *applicable to all kinds of heavy and light manufacturing in Clothe, Leather, etc.*, and run in the most perfect and reliable manner without trouble to the operator.

HAVE ARRIVED!

A Full Assortment of those

Beautiful and Unrivaled MACHINES.

(The numbers on which show a manufacture of between Five and Six Hundred Thousand.) Consisting of the Different Varieties made by the Singer Manufacturing Company, and we shall sell at Eastern Prices, with addition of Freight only. To accommodate parties who cannot pay all down, we will sell on

EASY MONTHLY INSTALMENTS

So that all may possess one of these *Blessings.*

For the convenience of our Patrons we have engaged the services of a gentleman who has had twenty years experience and is one of the most skillful experts in the world in repairing and adjusting Sewing Machines. He will put each Machine in complete and practical running order before it leaves the Institution and will also impart to purchasers all needful instruction, so that they can at once commence work.

We resort to no trickery whatever to sell Sewing Machines, but allow their Great Merits to recommend them. We can do this, as the demand for them is so great that although the Singer Company make more than all other first-class companies combined, they cannot nearly fill their orders, and are compelled to still extend their Gigantic Works.

We having been so fortunate as to secure the

General Central Agency,

For this Territory, we extend a cordial invitation to all to come and see the Machines, whether they wish to buy or not. See all others, but do not buy without you examine the Singer.

We Guarantee every Machine we sell to give entire satisfaction.

THE SINGER

BUTTON-HOLE MACHINE

Is the only Practical one in the World.

OTHER SEWING MACHINES REPAIRED on Reasonable Terms.
