WANTS TO BREAK TREATIES

Retified of the Gravity of the Situation Some Possible Besults that May Come.

New York, April 20 .- A special to the Tribune from Washington says:

If All Ferrouh Bey communicated with his government today, the sultan must how be fully aware of the gravity with which the United States regards the existing state of affairs. It is inconceivable that the minister has not warned his sovereign of the American guitude after officially learning at the grate department today that the matter had not been magnified by the press, that the patience of the President and the people had been exhausted, and that the prompt redemption of the sultan's repeated promises might have to be peremptorily demanded.

A special to the World from Wash-

ington says: It is intimated tonight by diplomats familiar with the situation that the sultan of Turkey does not care particuwhether an ultimatum is issued by hited States because of the neg-pay the \$100,000 which the United States is now demanding, after years of promises, as he has means of re-

The sultan would have but to lift his finger and these Malays and Moros would join forces with the Tagalos. The war in Luzon would be extended in every direction throughout the Islands and the American forces would necessarily have to be greatly increased.

More than that, the break would give More than that, the break would give the sultan a long desired chance to remainer certain treaties between the United States and the Ottoman empire. One of these, concluded shortly after Commodore Decatur punished the Tripolitan pirates, guarantees that any American accused of a crime or misdemeanor within the Turkish empire shall be tried only by a United States consular court, and be punished only according to American laws. This is a privilege not granted to the subjects of any other power, and its advantages are of peculiar importance to the missionaries in Turkey. missionaries in Turkey.

THE AGE OF THE EARTH.

Until almost the beginning of the present century the general belief in all Christian countries was that not only as the total number of illiterate Spaniah males over 21 years is only 17,426. The comparison shows a much greater preponderance of Cuban voters than was expected. There are 187,826 white adult males who were born in Cuba, as against 96,083 born in Spain, 6,794 born in other countries, and 127,300 colored.

This is the old doctrine of the the earth anad man, but the whole cosmos, began to exist about six delphia. since. This is the old doctrine of the supernatural origin and substantial permanency of the earth and its features. Among intelligent and especially scientific men this doctrine, even in the eighteenth century, began to be ques-tioned, although not publicly; for in 1751 Buffon was compelled by the Sor-bonne to retract certain views con-cerning the age of the earth, published in his Natural History in 1749. Kem-nants of the ald ballet lineared even nants of the old belief lingered ever into the early part of the present cen-tury, and may even yet be found hid ers of civilized countries. SALTED WOODCHUCKS, GROUND SQUIRRELS, ETC.

A writer in the Rural New-Yorker tells how he rid his fields of woodchucks. He says:

I had set several hundred early cabbages, and in going through my patch early one morning I found several plants missing. I found the wood-chucks' hole under the wall, in fact, several holes near my cabbage field. I armed myself with several steel traps, and used all my cunning in setting them in the burrows of the woodchucks, but after several mornings of patient waiting, capture by trap proved unsuc-cessful, and having heard that they are very fond of sait, I mixed a liberal quantity of Parls green in about a quart of salt and placed a smaal hand-ful near each burrow, and they have

never given trouble since.

Care must be taken to keep the doctored sait from the reach of sheep and other domestic animals, as Paris green is a deadly poison.

THE CURBERS AND BROKERS. Will Play Ball on the 28th for \$500 a Side.

The Curbers have thrown down a challenge to the Broakers to play baseball, and the Brakers have picked it up and are willing to play ball at any time or place and for any amount. That's a pretty broad proposition and it met with favor. Therefore the game will be played for \$500 a side with a banquet thrown in on Saturday, the 28th, at Walker's field. If sufficient body guard can be procured Caller Jones will consent to act as umpire. The sources will be Senator Peery and LA Policek. The teams will line up.

Scrofula and Consumption are alike; they develop from the same general causes, both are hereditary and dependent upon an impure and impovished blood supply. In consumption the disease fastens itself upon the lungs; in Scrofula the glands of the neck and throat swell and suppurate, causing ugly running sores; the eyes are inflamed and weak; there is an almost continual discharge from the ears, the limbs swell, bones ache, and white swelling is frequently a result, causing the diseased bones to work out through the skin, producing indescribable pain and suffering. Cutting away a sore or diseased gland does no good; the blood is poisoned. The old scrofulous taint which has probably come down through several representations has probably come down through several generations has polluted every drop of blood.

Scrofula requires vigorous, persistent treatment. The blood must be brought back to a healthy condition before the terrible disease can be stopped in its work of destruction. Mercury, potasti and

condition before the terrible disease can be stopped in its work of destruction. Mercury, potash and other poisonous minerals usually given in such cases do more harm than good; they rain the digestion and leave the system in a worse condition than before.

S. S. S. is the only medicine that can reach deep-scated blood troubles like Scrofula. It goes down to the very roots of the disease and forces every vestige of poison out of the blood. S. S. S. is the only purely verstable blood purifier known. The roots and herbs from which it is made contain wonderful blood parifying properties, which no poison, however powerful, can long resist. S. S. S. stimulates and purifies the blood, increases the appetite, aids the digestion and restores health and strength to the enfechled body. If you have reason to think you have Scrofula, or your child has inherited any blood taint, don't wait for it to develop, but begin at once the use of S. S. S. It is a fine tonic and the best blood purifier and blood builder known, as it contains no poisonous minerals. S. S. S. is pre-eminently a remedy for children.

When my daughter was an infant she had a severe case of Scrofula, for which she was under the constant care of physicians for more than two years. She was worse at the end of that time, however, and we almost despaired of her life. A few buttles of Swifi's Specific cared her completely, as it seemed to go direct to the cause of instrouble. Identify the same equal for stubborn cases of blood diseases which are beyond the power of other so-called blood remedles.
