Production During the Month of October Broke All Records.

According to advices received from Calumet, Michigan, all records of pro-

duction were broken in the Lake Superior copper regions last month, when the output was close to 19,000,000 pounds, which sold for about \$2,500,000. Nothing like this record, it is claimed, has ever been reached since the opening of the district.

With three-fourths of the current year gone, the Lake Superior mines have a product of approximately 153, 500,000 pounds to their credit, and, barring unforseen accidents, will finish 1904 with a production of 210,000,000 pounds fine, compared to \$193,436,904

peunds in 1903. among today's arrivals. As an index to the condition of the Lake Superior copper mining industry the annual report of the mine inspector Bingham Con. properties, was in Bingof Houghton county, presented at the ham today. meeting of the supervisors this week, is worthy of notice, says a correspondcur will return to camp again tomorrow ent of the N. Y. Commercial. During morning. the year ended Sept. 30, the average number of men employed in the mines, mills and amelters of Houghton coun-ty, was 14,321, a larger force than was the Utah Copper company, is in Binggiven employment in any previous year. As compared to last year, there was a gain of 700 men, or virtually ner cent While a few of the older mines are employing less men than in the heyday of their prosperity, the fact is there are working in the copper proprties of Lake Superior today than ever The gains at the new mines more than offset the decreased working forces at the older properties. In ad-dition to the 14.321 men employed in Houghton county, the scene of the principal operations, there are 2,000 men in the mines of Keweenaw and

Ontonagon counties. Notwithstanding that the force of this disfrict has dou-

bled in 10 years, the mines have by no

ceans reached their productive capac

ty and it is probable that upwards of

Price of Whisky Goes Down.

Peoria. Ill., Oct. 22.—The drop in the price of whisky posted yesterday was made because the price on rectified goods was too high and affects every distillery in the country. The conflict in prices was caused by the war between the trust and independent houses. No further market disturbances are looked for.

UTAH MAN'S SUCCESS.

G. P. Kellar's Assayers' Balance Gets Gold Medal at St. Louis.

One of the notable successes achieved by Utah men at the world's fair was the securing of the gold medal for the best assayer's balance by Mr. G. P. Keller of this city, whose shop is in the Board of Trade building. In competition with American and European mechanics Mr. Keller has succeeded in producing an article which is unequalled in the world.

The Keller balance is so finely adjusted that a single ounce can be divided into 16,000,000 parts and each part can be accurately weighed. So sensitive are they that heat or moisture will effect them. It is stated that if a person should touch with his finger one f the little plates suspended in the palance that the moisture left by the contact can be weighed. Their extreme sensitiveness compels

that they be kept in a glass case carefully preserved from dust and heat, and the article to be weighed must be placed upon them with tweezers and the doors carefully closed. sary is it that they be carefully en-closed that Mr. Keller has been able to find but one mechanic in Utah who can manufacture cases to sult these scales

They are indeed a work of art and were admired by people from all sec-tions of the world. They are valued at from \$100 to \$300 a piece, and since the world's fair award was made, the Salt Lake Hardware Co., who are the sole agents for these scales, have been re-ceiving daily, dozens of inquiries from all parts of the world in relation to them. So thoroughly accurate and re-liable are these scales that they are used to test other appliances of a similar kind not so accurate. The good news of this award was re-

ceived in the following telegram to the Salt Lake Hardware Co.:

Salt Lake Hardware Co.; "Salt Lake Hardware Co., Gentlemen:—Gold medal awarded you for balance. Congratulations. WHITAKER."

attention to the natural foundations of the proposed dam at North Platte, Wyo., not far from the Nebraska berand found the formation solid der. marble able to support any sized dam desired. The reservoir when built will supply an immense tract of land in At Cody Wyoming and Nebraska. Wyon, it is proposed also by the gov-ernment to build a dum impounding a lake 15 miles long, the dam being about 80 feet high in a box canyon 60 feet wide at the bottom and 100 feet wide 200 feet up. By this, 160,000 acres, of land will be irrigated. It is one of the most ideal dam sites Capt. Hammond ever saw, and the geological for-mation of the country would delight any student of geology. He will return later to Wyoming to continue his drill work
